Briefings on how to use the Federal Register
For information on briefings in Washington, DC, see announcement on the inside cover of this issue

Now Available Online

Code of Federal Regulations

via

GPO Access

(Selected Volumes)

Free, easy, online access to selected *Code of Federal Regulations (CFR)* volumes is now available via *GPO Access*, a service of the United States Government Printing Office (GPO). *CFR* titles will be added to *GPO Access* incrementally throughout calendar years 1996 and 1997 until a complete set is available. GPO is taking steps so that the online and printed versions of the *CFR* will be released concurrently.

The *CFR* and *Federal Register* on *GPO Access*, are the official online editions authorized by the Administrative Committee of the Federal Register.

New titles and/or volumes will be added to this online service as they become available.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online edition of the **Federal Register** on *GPO Access* is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to gpoaccess@gpo.gov; by faxing to (202) 512–1262; or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 61 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 28, 1997 at 9:00 am
WHERE: Office of the Federal Register

Rules and Regulations

Federal Register
Vol. 61, No. 249
Thursday, December 26, 1996

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1075

[DA–96–12]

Milk in the Black Hills, South Dakota, Marketing Area; termination of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule; Termination order.

SUMMARY: This rule terminates the remaining administrative provisions of the Black Hills, South Dakota, Federal milk marketing order (Order 75), effective December 31, 1996. All of the monthly operating provisions were terminated as of October 1, 1996. Termination of this order was requested by Black Hills Milk Producers, a cooperative association that represents all of the producers whose milk is pooled under the order.

EFFECTIVE DATE: December 31,1996.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2971, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–2357; e-mail address, connie__m__brenner@usda.gov.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Termination Order: Issued August 30, 1996; published September 6, 1996 (61 FR 47038).

The Department is issuing this rule in conformance with Executive Order 12866.

This termination order has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have a retroactive effect. This rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may request modification or exemption from such order by filing with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with the law. A handler is afforded the opportunity for a hearing on the petition. After a hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

This order of termination is issued pursuant to the provisions of the Agricultural Marketing Agreement Act and of the order regulating the handling of milk in the Black Hills, South Dakota, marketing area.

Small Business Consideration

In accordance with the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Agricultural Marketing Service has considered the economic impact of this action on small entities and prepared an analysis which was included in the Black Hills, South Dakota, termination order published September 6, 1996 (61 FR 47038). This action merely terminates the administrative provisions that were embodied, by reference, in § 1075.1 of the order. The market administrator, in his capacity as the orders liquidating agent, has completed the disbursement of all of the money remaining in the administrative, producer-settlement, and marketing service funds established under the order. Accordingly, the remaining provisions of the order are terminated.

Statement of Consideration

This rule terminates the remaining administrative provisions of the Black Hills, South Dakota, Federal milk order. Termination is favored by a majority of the producers engaged in the production of milk for sale in the marketing area in the representative period, determined to be June 1996, and such producers produced more than 50 percent of the milk produced for sale in the Black Hills, South Dakota, milk marketing area in such representative period. Section 608(c)(16)(B) of the Agricultural Marketing Agreement Act of 1937, as amended, requires that if a majority of the producers engaged in the production of milk for sale in the marketing area in a representative period determined by the Secretary favor termination of the order, and such producers produced more than 50 percent of the milk produced for sale in the marketing area in the representative period, that such order shall be terminated. Therefore, the provisions of the order, as amended, were terminated effective October 1, 1996 subject to specific exceptions. The termination order left intact certain administrative provisions that were embodied, by reference, in § 1075.1 of the order.

The market administrator, in his capacity as the order's liquidating agent, has completed the disbursement of all of the money remaining in the administrative, producer-settlement, and marketing service funds established under the order. Hence, the remaining provisions of the order should be terminated.

Therefore, the aforesaid provisions of § 1075.1 of the order are hereby terminated.

For good cause shown, this rule shall be effective December 31, 1996. Neither a comment period nor a 30-day effective date is provided in that all other provisions of the order were terminated effective October 1, 1996, and no parties are affected by this action.

Animal and Plant Health Inspection Service

9 CFR Part 77

[Docket No. 96–092–1]

Tuberculosis in Cattle and Bison; State Designation

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the tuberculosis regulations concerning the interstate movement of cattle and bison by raising the designation of Oklahoma from a modified accredited State to an accredited-free State. We have determined that Oklahoma meets the criteria for designation as an accredited-free State.

DATES: Interim rule effective December 26, 1996. Consideration will be given only to comments received on or before February 24, 1997.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 96–092–1, Regulatory Analysis and Development, PPD, APHIS, suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 96–092–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Mitchell A. Essey, Senior Staff Veterinarian, National Animal Health Programs, VS, APHIS, 4700 River Road Unit 36, Riverdale, MD 20737–1231, (301) 734–7727; or e-mail: messey@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Background

The "Tuberculosis" regulations, contained in 9 CFR part 77 (referred to below as "the regulations"), regulate the interstate movement of cattle and bison because of tuberculosis. Bovine tuberculosis is the contagious, infectious, and communicable disease caused by *Mycobacterium bovis*. The requirements of the regulations concerning the interstate movement of cattle and bison not known to be affected with, or exposed to, tuberculosis are based on whether the cattle and bison are moved from jurisdictions designated as accredited-free States, modified accredited States, or nonmodified accredited States.

The criteria for determining the status of States (the term "State" is defined to mean any State, territory, the District of Columbia, or Puerto Rico) are contained in a document captioned Uniform Methods and Rules—Bovine Tuberculosis Eradication," which has been made part of the regulations via incorporation by reference. The status of States is based on the rate of tuberculosis infection present and the effectiveness of a tuberculosis eradication program. A State must have no findings of tuberculosis in any cattle or bison in the State for at least 5 years to be designated as an accredited-free State.

Before publication of this interim rule, Oklahoma was designated in § 77.1 of the regulations as a modified accredited State. However, Oklahoma now meets the requirements for designation as an accredited-free State. Therefore, we are amending the regulations by removing Oklahoma from the list of modified accredited States in § 77.1 and adding it to the list of accredited-free States in that section.

Immediate Action

The Administrator of the Animal and Plant Health Inspection Service has determined that there is good cause for publishing this interim rule without prior opportunity for public comment. Immediate action is warranted to change the regulations so that they accurately reflect the current tuberculosis status of Oklahoma as an accredited-free State. This will provide prospective cattle and bison buyers with accurate and up-to-date information, which may affect the marketability of cattle and bison since some prospective buyers prefer to buy cattle and bison from accredited-free States.

Because prior notice and other public procedures with respect to this action are impracticable and contrary to the public interest under these conditions, we find good cause under 5 U.S.C. 553 to make it effective upon publication in the **Federal Register**. We will consider comments that are received within 60 days of publication of this rule in the **Federal Register**. After the comment period closes, we will publish another document in the **Federal Register**. It will include a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

Cattle and bison are moved interstate for slaughter, for use as breeding stock, or for feeding. Oklahoma has approximately 62,000 cattle herds with a combined total of 5,800,000 cattle. Approximately 95 percent of herd owners would be considered small businesses. Changing the status of Oklahoma may affect the marketability of cattle and bison from the State, since some prospective cattle and bison buyers prefer to buy cattle and bison from accredited-free States. This may result in some beneficial economic impact on some small entities. However, based on our experience in similar designations of other States, the impact should not be significant.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are in conflict with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 77

Animal diseases, Bison, Cattle, Reporting and recordkeeping requirements, Transportation, Tuberculosis.

Accordingly, 9 CFR part 77 is amended as follows:

PART 77—TUBERCULOSIS

1. The authority citation for part 77 continues to read as follows:

Authority: 21 U.S.C. 111, 114, 114a, 115–117, 120, 121, 134b, and 134f; 7 CFR 2.22, 2.80, and 371.2(d).

§ 77.1 [Amended]

2. In § 77.1, in the definition for "Modified accredited state", paragraph (2) is amended by removing "Oklahoma,".

3. In § 77.1, in the definition for "Accredited-free state", paragraph (2) is amended by adding "Oklahoma," immediately before "Oregon,".

Done in Washington, DC, this 16th day of December 1996.

A. Strating,

Acting Administrator, Animal and Plant Health Inspection Service.

9 CFR Part 113

[Docket No. 93–128–2]

Viruses, Serums, Toxins, and Analogous Products; Encephalomyelitis Vaccine, Eastern, Western, and Venezuelan, Killed Virus

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the standard requirement for Encephalomyelitis Vaccine, Eastern and Western, Killed Virus, by specifying requirements for killed Venezuelan equine encephalomyelitis vaccines and revising the standard potency test for Eastern and Western equine encephalomyelitis vaccines. The amendments require the use of Vero 76 cells in the test to evaluate the potency of Encephalomyelitis Vaccine, Eastern, Western, and Venezuelan, Killed Virus, and establish minimum antibody titers which must be elicited by each of the indicated fractions, as determined by a plaque reduction, serum neutralization assay in which Vero 76 cells are used.

EFFECTIVE DATE: January 27, 1997.

FOR FURTHER INFORMATION CONTACT: Dr. David A. Espeseth, Director, Licensing and Policy Development, Center for Veterinary Biologics, VS, APHIS, 4700 River Road Unit 148, Riverdale, MD 20737–1237, (301) 734–8245.

SUPPLEMENTARY INFORMATION:

Background

In accordance with the regulations in 9 CFR part 113, standard requirements are prescribed for the preparation of veterinary biological products. A standard requirement consists of specifications, procedures, and test methods that define the standards of purity, safety, potency, and efficacy for a veterinary biological product. Where a standard requirement for a product has not been established, production procedures and specifications for purity, safety, and potency of a biological product are provided in an Outline of Production filed with the Animal and Plant Health Inspection Service (APHIS).

On November 27, 1995, we published in the **Federal Register** (60 FR 58255–58256, Docket No. 93–128–1) a proposed rule to amend the regulations in § 113.207 by providing requirements for killed Venezuelan equine encephalomyelitis vaccines and amending the potency test provisions for killed Eastern and Western equine encephalomyelitis vaccines. The proposed amendments required the use of Vero 76 cells in the test to evaluate the potency of Encephalomyelitis Vaccine, Eastern, Western, and Venezuelan, Killed Virus and establish minimum antibody titers which must be elicited by each of the indicated fractions, as determined by a plaque reduction, serum neutralization assay in which Vero 76 cells are used.

We solicited comments concerning our proposal for 60 days ending January 26, 1996. We received two comments by that date from a manufacturer of veterinary biological products and a veterinary biologics industry consultant. They are discussed below.

One commenter expressed support for the rule provided adequate data are available to justify the proposed revisions. Adequate data are available to support the revisions. Antibody titers in guinea pigs, as measured by duck embryo fibroblasts, were correlated with protection in horses. Antibody titers in guinea pigs measured by Vero 76 cells were, in turn, correlated with those measured by duck embryo fibroblasts. Therefore, the Agency believes that there is justification for the proposed revisions. No changes to the regulations are made in response to this comment.

The other commenter, who claimed to have considerable experience with the plaque reduction, serum neutralization assay in which Vero cells are used, stated that "less than 1:10" rather than "less than 1:4" should be set as the acceptable titer for control guinea pigs in the tests for the Eastern and Western type fractions because nonspecific titers up to 1:10 are commonly encountered. In response to the commenter, the Agency notes that the correlative studies to support the rule were conducted with guinea pigs with prevaccination titers of less than 1:4. APHIS believes that extrapolation of the results of the studies to a situation where the sera of test animals prior to vaccination are negative at a 1:10 dilution but positive at a 1:4 dilution is inappropriate. No change to the regulations is made in response to this comment.

The second commenter also requested that, in proposed § 113.207(b)(4), "three or four vaccinate serum samples" instead of "two or three vaccinate serum samples" be specified to "be consistent with the initial tests being satisfactory if 80 percent of the vaccinates show protective titers." In response to the commenter, APHIS notes that the proposed "two or three vaccinate serum samples" does not differ from the requirement specified under the current regulations. Moreover, paragraph (b)(6) of § 113.207 of the current regulations not proposed for amendment specifies that four or more failures is a basis for an unsatisfactory test, and that for a given fraction, at least 9 of the 10 vaccinated guinea pigs, or 90 percent, must have an acceptable titer for a satisfactory first-stage test. Therefore, "three or four vaccinate serum samples" and "80 percent of the vaccinates show[ing] protective titers" would be inconsistent with current regulations. No change to the regulations is made in response to this comment.

Therefore, based on the rationale set forth in the proposed rule and in this document, we are adopting the provisions of the proposed rule as a final rule without change.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

This rule revises the standard requirement in § 113.207 for Encephalomyelitis Vaccine, Eastern and Western, Killed Virus, by specifying a different cell type for use in the potency test assay and specifying different minimum specific antibody titers that must be achieved for a satisfactory test. In addition, the rule revises the standard requirement so that it would also apply to Encephalomyelitis Vaccine, Venezuelan, Killed Virus. The Agency believes the titers given in the standard requirement are adequately correlated with claimed efficacy and that they would be readily obtained by all relevant vaccines currently licensed. We do not expect any increase in cost to the biologics manufacturers affected by this rule. The changes should actually decrease costs for most impacted manufacturers, since fewer repeat tests will be needed and obtaining Vero 76 cells should prove less expensive than procuring primary DEF.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. This rule would not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures that must be exhausted prior to a judicial challenge to the provisions of this rule.

Paperwork Reduction Act

This rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 113

Animal biologics, Exports, Imports, Reporting and recordkeeping requirements.

Accordingly, 9 CFR part 113 is amended as follows:

PART 113—STANDARD REQUIREMENTS

1. The authority citation for part 113 continues to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.22, 2.80, and 371.2(d).

2. In § 113.207, the section heading, the introductory text, the introductory text of paragraph (b), and paragraphs (b)(2), (b)(3), (b)(4), and (b)(5) are revised to read as follows:

§ 113.207 Encephalomyelitis Vaccine, Eastern, Western, and Venezuelan, Killed Virus.

Encephalomyelitis Vaccine, Eastern, Western, and Venezuelan, Killed Virus, shall be prepared from virus-bearing cell culture fluids. Each serial or subserial shall meet the requirements prescribed in this section and the general requirements prescribed in § 113.200, except those in § 113.200(d). Any serial or subserial found unsatisfactory by a prescribed test shall not be released.

* * * * *

(b) *Potency test.* Bulk or final container samples of completed product from each serial shall be tested for potency in accordance with the two-stage test provided in this paragraph. For each fraction contained in the product—Eastern type, Western type, or Venezuelan type—the serological interpretations required in this test shall be made independently. A serial or subserial found unsatisfactory for any of the fractions shall not be released.

(1) * * *

(2) Fourteen to 21 days after the second injection, serum samples from each vaccinate and each control shall be tested by a plaque reduction, serum neutralization test using Vero 76 cells.

(3) If the control serum samples show a titer of 1:4 or greater for any fraction, the test is inconclusive for that fraction and may be repeated: *Provided,* That, if four or more of the vaccinate serum samples show a titer of less than 1:40 for the Eastern type fraction, less than 1:40 for the Western type fraction, or less than 1:4 for the Venezuelan type fraction, the serial or subserial is unsatisfactory without further testing.

(4) If two or three of the vaccinate serum samples show a titer of less than 1:40 for the Eastern type fraction, less than 1:40 for the Western type fraction, or less than 1:4 for the Venezuelan type fraction, the second stage of the test may be used for the relevant fraction(s): *Provided,* That, if a fraction is found acceptable by the first stage of the test, the second stage need not be conducted for that fraction.

(5) If the second stage is used and four or more of the vaccinate serum samples show a titer of less than 1:40 for the Eastern type fraction or the Western type fraction, or less than 1:4 for the Venezuelan type fraction, the serial or subserial is unsatisfactory.

* * * * *

Done in Washington, DC, this 16th day of December 1996.

A. Strating.

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 4310–12–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Part 206

[Docket No. FR–2958–C–06]

RIN 2502–AF32

Home Equity Conversion Mortgage Insurance Demonstration: Additional Streamlining; Correction and Delay of Effective Date for the Definition of "Principal Limit" in § 206.3

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Final rule correction and delay of effective date.

SUMMARY: On September 17, 1996 (61 FR 49030), the Department issued a final rule to changes proposed on May 10, 1996, to the Home Equity Conversion Mortgage (HECM) Insurance Demonstration. The final rule had an effective date of October 17, 1996, except that the amendment to the definition of "principal limit" in § 206.3, had a delayed effective date of January 5, 1997. This document further delays the effective date of the definition of "principal limit" in § 206.3 until May 1, 1997. In addition, § 206.121(c) is corrected to remove language that should have been omitted which allowed HUD to change a monthly adjustable ARM to annual interest rate adjustments if assigned to HUD.

DATES: Effective date of this document: October 17, 1996.

Effective date for amended definition of "principal limit" in § 206.3 is delayed until May 1, 1997.

FOR FURTHER INFORMATION CONTACT: Richard K. Manuel, Director, Home Mortgage Insurance Division, Office of Insured Single Family Housing, Room number 9272, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708–2700; TTY (202) 708–4594. (These are not toll-free telephone numbers.)

SUPPLEMENTARY INFORMATION: The September 17, 1996 final rule delayed the effective date for the amendment to the definition of "principal limit" in § 206.3, until January 5, 1997. The Department recognized at that time that the Lockheed/Martin (CDSI) system would have to be changed to accommodate the new calculation. The Department now realizes that the change will not be completed by the January 5, 1997 effective date and by this notice delays further the effective date.

Accordingly, the effective date for the amendment to the definition of "principal limit" in § 206.3, as stated in the final rule published on September 17, 1996, at 61 FR 49030, is delayed until May 1, 1997.

The September 17, 1996 final rule inadvertantly failed to delete from § 206.121(c) the language allowing HUD to change a monthly adjustable ARM to annual interest rate adjustments if assigned to HUD. This language had been proposed in the May 10, 1996 proposed rule, at 61 FR 21918, and opposed by public comment. Therefore, in the preamble to the September 17, 1996 final rule, at 61 FR 49030, the Department agreed not to make the disputed language final.

Accordingly, in FR Doc. 96–23717, in the final rule published on September 17, 1996 (61 FR 49030), the first and second sentences in 24 CFR 206.121, are corrected as follows:

§ 206.121 Secretary authorized to make payments.

* * * * *

(c) *Second mortgage.* If the contract of insurance is terminated as provided in § 206.133(c), all payments to the mortgagor by the Secretary will be secured by the second mortgage, if any. Payments will be due and payable in the same manner as under the insured first mortgage. * * *

* * * * *

Dated: December 19, 1996.

Nicolas P. Retsinas,

Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc. 96–32769 Filed 12–24–96; 8:45 am]

BILLING CODE 4210–27–P

DEPARTMENT OF THE INTERIOR

Office of the Special Trustee for American Indians

25 CFR Chapter VII and Part 1200

RIN 1035–AA00

The American Indian Trust Fund Management Reform Act of 1994

AGENCY: Office of the Special Trustee for American Indians, Interior.

ACTION: Final rule.

SUMMARY: The Office of Special Trustee for American Indians (OST) in the Office of the Secretary of the Interior is promulgating this regulation to implement Title II of Public Law 103–412, the American Indian Trust Fund Management Reform Act of 1994 (the Act). The Act, for the first time, permits American Indian tribes to take tribal funds out of trust status with the Department of the Interior (DOI). The purpose of the Act is to enable tribes to manage the funds by themselves, or with the help of capable commercial fund managers. The regulation affects tribal funds only, not Individual Indian Monies (IIM) funds.

EFFECTIVE DATE: These regulations take effect on January 27, 1997.

SUPPLEMENTARY INFORMATION: 25 CFR Part 1200 in chapter VII contains provisions which affect 240 tribes with trust funds. These tribes currently have approximately $1.5 billion in judgments, settlements, awards, and associated earnings held in trust status by the Department of the Interior. Key concepts of the regulation are as follows: (a) Tribes wishing to withdraw some or all of their tribal funds under the Act (not IIM funds) must present a tribal resolution acknowledging that when funds leave the U.S. Treasury, the federal government has no further liability relating to those funds; (b) tribes must also present a management plan for Secretarial approval, detailing how the funds will be managed once they are out of trust, including a protection against a significant loss of principal; (c) if the funds are not managed by the tribes, they are to be managed by capable investment managers or investment firms with proof of liability insurance; (d) tribes must provide notification to tribal members regarding their intent to withdraw funds from trust; (e) tribes may return any or all of their funds withdrawn under this act, including any earnings, to trust status; (f) tribes may request technical assistance and/or grants from the Department in order to develop the management plan. The ability to take funds from trust creates new tribal opportunities for investment of funds and for economic development; therefore, establishment of the regulation has a high priority in Indian Country.

Summary of Regulation and Comment Received

In accordance with the Act, this regulation was developed with the active participation of tribal representatives. The policy of the Department is, whenever practical, to afford the public an opportunity to participate in the rulemaking process. A Regulatory Workgroup was established by the Office of Trust Funds Management (OTFM), which had tribal representation, as well as representation from the InterTribal Monitoring Association (ITMA), Departmental Office of the Solicitor (SOL), and Bureau of Indian Affairs (BIA). Also in furtherance of tribal participation, draft regulations were sent to all tribes with trust funds in August, 1995; a formal presentation was made by OTFM at a National Tribal Consultation in September, 1995. The consultation session was announced in the Federal **Register** and was open to the public. Comments which were incorporated from this consultation are as follows: (a) A specific provision for notifying the tribal membership of an intent to remove funds was included based on comments by the Delaware Tribe of Oklahoma; (b) the "certification" by tribe's legal counsel of authority of tribal government to withdraw funds was changed to a requirement for a "legal opinion" to be included in the application package based on comments from both the Hopi and Cheyenne River Tribes; (c) a requirement to provide a copy of audit or investment report when requesting to withdraw additional funds was included based on comments from the First Nations Development Institute; (d) a requirement for liability insurance of tribal officials was added based on a suggestion from the Skokomish Tribe of Washington State. Other changes were made, such as changing the approving official to the Secretary, Department of the Interior, from the Commissioner of Indian Affairs, Bureau of Indian Affairs; removing duplicative language from the policy statement; adding clarifying language regarding applicability of these regulations to "proceeds of labor" funds; and requiring tribes to submit copies of applicable distribution plans or settlement acts when making application to withdraw funds. The regulation was also rewritten in a "user-friendly" format after the consultation.

On February 9, 1996, the OTFM was moved from the BIA to the OST by Secretarial Order Number 3197. This action was taken to implement Title III of the Act which established the Office of the Special Trustee for American Indians. The Director, OTFM, reports directly to the Special Trustee.

The Department published a Notice of Proposed Rulemaking in the **Federal Register** as part 144 in Chapter I of 25 CFR on May 16, 1996, on page 24731, with a 60-day open comment period. This final rule is being published as new part 1200 in the newly established chapter VII of 25 CFR, which is reserved for rules published by the Office of the Special Trustee.

Only one formal comment was received on the proposed rule. An Oklahoma City law firm commented that in discussions with representatives of three tribes, concerns had been expressed relating to the ability of tribes

VOL 61 ISS 249 DEC 26 1996 UMI

to use withdrawn funds for economic development purposes as part of an overall business plan. The firm was not authorized to comment directly for the tribes, but recommended modifying § 144.14 to clarify the use of funds withdrawn from trust to obtain financing for economic development purposes. The Act does not address economic development activities as a part of a tribe's plan for management of their withdrawn trust funds. After review, it is felt that an attempt to include a discussion of "economic development purposes" in the regulations is not necessary. The Secretary is tasked with determining if a tribes' plan is "reasonable," has adequate protection against a "significant loss of principal," and will allow the tribe to follow the dictates of any approved distribution plan for judgment or settlement awards. Each tribal plan will be evaluated by the Secretary on its own merits based on the criteria listed in the regulation.

Administrative Matters

The Department has determined that this rulemaking will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

The Department certifies that the rule does not represent a governmental action capable of interference with constitutionally protected property rights. Thus, a Takings Implication Assessment need not be prepared under Executive Order 12630, "Government Action and Interference with Constitutionally Protected Property Rights."

The Department has certified to the Office of Management and Budget that this rule meets the applicable standards provided in Sections 3(a) and 3(b)(2) of Executive Order 12998.

This document has been reviewed under Executive Order 12866 and is not a significant regulatory action.

The Department has determined that this rule does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement is required under the National Environmental Policy Act of 1969.

Paperwork Reduction Act of 1995

The Office of Management and Budget (OMB) has approved, under 44 U.S.C. chapter 35, the information collection requirements in Subpart B (Application to Withdraw Tribal Funds from Trust Status) under control number 1035–0001. The information for this Subpart is being collected and used by the OST to determine applicant eligibility, evaluate applicant capabilities, protect the service population, safeguard tribal trust funds, and permit the OST to evaluate capability of tribes or their contractors to manage and invest large blocks of funds.

The OMB has approved under 44 U.S.C. chapter 35, information collection requirements in Subpart D (Applications for Technical Assistance to Withdraw Tribal Funds from Trust Status—General and Specific Budget) under control number(s) 1035–0002 and 1035–0003. The information for this Subpart is being collected and used by the OST to determine applicant eligibility, as well as the level of need for technical assistance in order for tribes to develop the Management Plans and to complete the application for withdrawal process. This is in accordance with statutory authority which requires the Secretary to provide technical assistance for tribes to complete the required Management Plan. This information will be collected once only from each applicant.

The OST estimates that the average burden of complying with the collection, broken down by Subpart, will be as follows: Subpart B (Application to Withdraw Tribal Funds from Trust Status), 342 hours; Subpart D (Applications for Technical Assistance to Withdraw Tribal Funds from Trust Status) General form, 13 hours; Specific Budget form, 39 hours.

Responses to the collection of information under this regulation are required in order for Indian tribes to obtain or retain benefits under the Act. However, not every tribe will need to respond to each request for information contained in the regulation, as some of the requests pertain to specific situations (requests for technical assistance). Any disagreements over application approvals are subject to the criteria and procedures in § 1200.21 of the regulation.

With regards to confidentiality, an Indian tribe is not protected under the Privacy Act. However, in accordance with DOI, OST, BIA and OTFM policy, tribes are accorded confidentiality with regard to trust fund account matters. Tribal information provided will not be shared with anyone outside the Department without permission from the tribe.

The Department may not collect information, nor are Indian tribes or other persons required to respond to such collections unless the collection displays a currently valid OMB control number.

List of Subjects in 25 CFR Part 1200

Indians, Indian tribal trust funds, Indian trust responsibility, Tribal funds withdrawal.

For the reasons given in the preamble, the Department of the Interior establishes a new chapter VII consisting of part 1200 in Title 25 of the Code of Federal Regulations as set forth below.

CHAPTER VII—OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS, DEPARTMENT OF THE INTERIOR

PART 1200—AMERICAN INDIAN TRUST FUND MANAGEMENT REFORM ACT

Subpart A—General Provisions

Sec.

1200.1 Purpose of this regulation.
1200.2 Definitions.
1200.3 What is the Department's policy on tribal management of trust funds?
1200.4 May tribes exercise increased direction over their trust funds and retain the protections of Federal trust status?
1200.5 What are the advantages and disadvantages of managing trust funds under the options in § 1200.4?
1200.6 Do these regulations tell tribes how to receive future income directly rather than have the government continue to collect it?
1200.7 Information collection.

Subpart B—Withdrawing Tribal Funds From Trust

1200.10 Who is eligible to withdraw their tribal funds from trust?
1200.11 What funds may be withdrawn?
1200.12 What limitations and restrictions apply to withdrawn funds?
1200.13 How does a tribe apply to withdraw funds?
1200.14 What must the Tribal Management Plan contain?
1200.15 What is the approval process for management plans?
1200.16 What criteria will be used in evaluating the management plan?
1200.17 What special criteria will be used to evaluate management plans for judgment or settlement funds?
1200.18 When does the Department's trust responsibility end?
1200.19 How can the plan be revised?
1200.20 How can a tribe withdraw additional funds?
1200.21 How may a tribe appeal denials under this part?

Subpart C—Returning Tribal Funds to Trust

1200.30 How does a tribe notify the Department if it wishes to return withdrawn funds to Federal trust status?
1200.31 What part of withdrawn funds can be returned to trust?
1200.32 How often can funds be returned?
1200.33 How can funds be returned?
1200.34 Can a tribe withdraw redeposited funds?

Subpart D—Technical Assistance

1200.40 How will the Department provide technical assistance for tribes?
1200.41 What types of technical assistance are available?
1200.42 Who can provide technical assistance?
1200.43. How can a tribe apply for technical assistance?
1200.44 What action will the Department take on requests for technical assistance?

Authority: 25 U.S.C. 4001.

Subpart A—General Provisions

§ 1200.1 Purpose of this regulation.

This part describes the processes by which Indian tribes can manage tribal funds currently held in trust by the United States. It defines how tribes may withdraw their funds from trust status; how they may return funds to trust; and how they may request technical assistance or grants to help prepare plans to manage funds or to ensure the capability to manage those funds.

§ 1200.2 Definitions.

As used in this part:

Act means the American Indian Trust Fund Management Reform Act of 1994 (Pub. L. 103–412, 108 Stat. 4239, 25 U.S.C. 4001).

Agency Superintendent means the official in charge of a Bureau of Indian Affairs Agency.

Area Director means the official in charge of a Bureau of Indian Affairs area office.

Bureau or *BIA* means the Bureau of Indian Affairs, Department of the Interior.

Department or *DOI* means the Department of the Interior.

General Counsel means the attorney for the tribe.

OST means the Office of the Special Trustee for American Indians, Department of the Interior.

OTFM means the Office of Trust Funds Management, Department of the Interior.

Resolution means the formal manner in which a tribal government expresses its legislative will.

Secretary means the Secretary of the Interior or his/her designee.

Solicitor means the Office of the Solicitor, Department of the Interior.

Special Trustee means the Special Trustee for American Indians appointed under Title III of the Act.

Tribal council means the elected or appointed governing officials of any tribe which is recognized by the Secretary.

Tribe means any Indian tribe, band, nation, rancheria, pueblo, colony or community, including any Alaska Native village or regional or village corporation as defined or established pursuant to the Alaska Native Claims Settlement Act which is federally recognized by the U.S. Government for special programs and services provided by the Secretary to Indians because of their status as Indians. For this purpose, it also means two or more tribes joined for any purpose, the joint assets of which include funds held in trust by the Secretary. An example of this would be the KCA (consisting of the Kiowa, Comanche and Apache Tribes).

Us means the Department of the Interior, i.e., the Secretary of the Interior or his/her designee.

We means the Department of the Interior, i.e., the Secretary of the Interior or his/her designee.

§ 1200.3 What is the Department's policy on tribal management of trust funds?

(a) We will give tribes as much responsibility as they desire for the management of their tribal funds that we currently hold in trust.

(b) Title II of the American Indian Trust Fund Management Reform Act, implemented by these regulations, offers tribes one approach for assuming increased management of their funds that we now hold in trust and administer. Under Title II, a tribe may completely remove its funds from Federal trust status and manage them as it wishes, subject to the requirements and conditions in this part. When a tribe withdraws its funds under this part, it may invest those funds in equities or other investment vehicles that are statutorily unavailable to us.

§ 1200.4 May tribes exercise increased direction over their trust funds and retain the protections of Federal trust status?

Yes. The Tribal Self-Governance Act (25 U.S.C. 458) and the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et. seq.) provide other options for trust funds management. A tribe may choose to manage its trust funds under the provisions of these Acts if it wishes. These options are covered by 25 CFR part 900 (the "Indian Self-Determination and Education Assistance Act Program") and 25 CFR part 1000 (the "Self-Governance Program").

§ 1200.5 What are the advantages and disadvantages of managing trust funds under the options in § 1200.4?

Under these other options, the funds remain in Federal trust status and the tribe can exercise a range of control over their management. However, the tribe has fewer investment options than it has when it withdraws its funds completely from trust status. If a tribe chooses to keep its funds in trust status, the tribe is subject to the same statutory investment restrictions that bind us. That means that the tribe's investments are limited to bank deposits and securities guaranteed by the United States. (See 25 U.S.C. 162a for specific statutory investment restrictions.)

§ 1200.6 Do these regulations tell tribes how to receive future income directly rather than have the government continue to collect it?

No. These regulations apply only to the withdrawal of funds which are in trust. Some of these funds come from the sale or lease of trust resources. Even if a tribe withdraws its funds, we will collect and manage future income. If a tribe wishes to receive future income directly, it should contact the OST/OTFM staff at its agency or area office to find out how to do this.

§ 1200.7 Information collection.

The information collection requirements contained in subpart B of this part, Application to Withdraw Tribal Funds from Trust Status and subpart D of this part, Application to Withdraw Tribal Funds from Trust Status-General and Specific Budget Technical Assistance, have been approved by the Office of Management and Budget under 44 U.S.C. 3507 *et seq.* and assigned clearance numbers 1035–001 (subpart B), and 1035–002 and 1035–003 (subpart D). Information collected in § 1200.13, (How does a tribe apply to withdraw funds?) will be used to determine the eligibility of applicants, and the capability of tribes or their contractors to manage and invest large blocks of funds. Information collected in § 1200.43, (How can a tribe apply for technical assistance?) will be used to determine the eligibility of applicants, as well as the level of need for technical assistance, in order for tribes to develop Management Plans and to complete the application for withdrawal process.

Subpart B—Withdrawing Tribal Funds From Trust

§ 1200.10 Who is eligible to withdraw their tribal funds from trust?

Any tribe for whom we manage funds in trust.

§ 1200.11 What funds may be withdrawn?

A tribe may withdraw some or all funds that we hold in trust if we approve a plan that it submits under this part.

§ 1200.12 What limitations and restrictions apply to withdrawn funds?

(a) A tribe may withdraw funds appropriated to satisfy judgments of the

VOL 61 ISS 249 DEC 26 1996 UMI

Indian Claims Commission (ICC) and the Court of Federal Claims and that we hold under the Indian Judgment Funds Use and Distributions Act (25 U.S.C. 1401) or another act of Congress if:

(1) The tribe uses the funds as specified in the previously approved judgment fund plan, and;

(2) The tribe withdraws only funds held for Indian tribes and does not include any funds held for individual tribal members.

(b) A tribe may withdraw funds appropriated to satisfy settlement agreements relating to certain tribal claims and that we hold and manage for the tribe pursuant to an act of Congress if:

(1) The tribe uses the funds as specified in the previously approved settlement act plan;

(2) The tribe withdraws only funds held for Indian tribes and does not include any funds held for individual tribal members; and

(3) It is determined that there is no provision in the act or settlement agreement requiring that the funds remain in trust to implement the act or agreement that cannot be waived.

(c) Tribal funds commonly known as "Proceeds of Labor" funds, usually income to trust resources, are generally withdrawn under normal tribal budgeting procedures, but may also be withdrawn from trust under this part. These funds may be returned to trust under the provisions of subpart C of this part.

§ 1200.13 How does a tribe apply to withdraw funds?

The tribe must submit four copies of its application and the attachments listed below to: Director, Office of Trust Funds Management, Department of the Interior, 505 Marquette NW, Suite 1000, Albuquerque, NM 87102. We will notify the tribe if the application is incomplete and will help the tribe complete the application if requested. When we determine that the application is complete, we will send copies to the appropriate agency superintendent and area director, the Special Trustee and the Solicitor. Each application package must contain the items listed below.

(a) Proof that the tribe has notified its members of its intent to remove funds from trust and that, when the request is approved, the tribe and not the United States Government will be liable for funds management. Notification must be by the method(s) that the tribe customarily uses to notify its members of significant tribal actions. The notification must identify the specific funds to be withdrawn.

(b) A tribal resolution that:

(1) Expressly authorizes the withdrawal of the funds and indicates the (approximate) dollar amount of the funds to be withdrawn;

(2) Expressly acknowledges that the funds, once withdrawn in accordance with the Act, will no longer be held in trust status by the United States, and that we have no further liability or responsibility for the funds; and

(3) Acknowledges that:

(i) Neither we nor the tribe necessarily accept the account balances at the time of withdrawal as accurate; and

(ii) Neither we nor the tribe have waived any rights regarding the balances, including the right to seek compensation for incorrect balances.

(c) A copy of a formal agreement between the tribe and the manager of the funds to be withdrawn, in which the manager agrees to:

(1) Comply with the terms of the plan we approve under § 1200.15 and make only those changes that conform to revision procedures in the approved plan and the requirements of § 1200.19; and

(2) Transfer funds to the tribe or another manager only after receiving a valid tribal resolution calling for this transfer and proof that the tribe has notified its members of intent to transfer the funds. The resolution must clearly state that:

(i) The funds are being withdrawn to be reinvested by the tribe in a manner consistent with the goals and strategies of the approved plan; and

(ii) The fund managers will continue to follow any previously approved distribution plan conditions.

(d) A legal opinion by the tribe's attorney or its general counsel that:

(1) The resolution referred to in paragraph (b) of this section was enacted under procedures established by the tribe's organic documents or oral tradition;

(2) The tribal governing body has the legal authority to withdraw funds from trust status and that the withdrawal does not require a referendum vote or other procedure beyond a tribal council resolution; and

(3) If the funds to be withdrawn are judgment or settlement funds, that the tribe's plan for managing the funds meets the requirements of any applicable judgment fund use and distribution plan or settlement act.

(e) The results of a tribal referendum, if one was held.

(f) If the funds to be withdrawn are judgment or settlement funds, a copy of the act and/or plan that sets out the conditions for the uses of the funds or income from them.

(g) A management plan as provided for in § 1200.14.

§ 1200.14 What must the Tribal Management Plan contain?

The Tribal Management Plan required by § 1200.13 must include each of the following:

(a) Tribal investment goals and the strategy for achieving them.

(b) A description of the protection against the substantial loss of principal, as set forth in § 1200.16.

(c) A copy of the tribe's ordinances and procedures for managing or overseeing the management of the funds to be withdrawn. These must include adequate protections against fraud, abuse, and violations of the management plan.

(d) A description of the tribe's previous experience managing or overseeing the management of invested funds. This should include factual data of past performance of tribally-managed funds (i.e., audited reports) and the identity and qualifications of the tribe's investment officer.

(e) A description of the capability of all of the individuals or investment institutions that will be involved in managing and investing the funds for the tribe. Provide copies of State or Federal security applications for account executive(s).

(1) Investment entities named must submit:

(i) Ownership information (including Central Registry Depository (CRD) numbers);

(ii) Asset size and capitalization;

(iii) Assets under management;

(iv) Performance statistics on managed accounts for the past 5 years; and

(v) Any adverse actions by licensing and/or regulatory bodies within the past 5 years.

(2) In addition, we may ask about:

(i) Soft dollar arrangements;

(ii) Affiliation with broker dealers, banks, insurance and/or investment companies;

(iii) Research done in house;

(iv) Recent changes in active portfolio managers; and

(v) Any other information necessary to make an adequate evaluation of the proposed plan.

(f) A description of how the plan will ensure that the fund manager will comply with any conditions established in judgment fund plans or settlement acts.

(g) Proof of liability insurance of the investment firm.

(h) Proof of liability insurance that protects against fraud for those Tribal Council members with authority to disburse funds. In many tribes the chairperson, and the comptroller and/or the tribal treasurer, for example, would be the positions having this authority.

(i) A plan for custodianship of investment securities that includes:

(1) Name of persons in the tribe who can direct the custodian;

(2) Name of the custodian;

(3) Copy of intended custodian agreement;

(4) Size of custodian operation;

(5) Disclosure of any security lending provisions; and

(6) Insurance coverage.

(j) A tribal council agreement to provide an annual audit and report on performance of withdrawn funds to the tribal membership, with a copy to: Office of the Special Trustee for American Indians, Department of the Interior, MS–5140, 1849 C Street NW, Washington, DC, 20240. This agreement must include:

(1) A statement that the copy to the Special Trustee is for information only, and infers no liability on our part regarding the audit results, nor does it infer a requirement for us to take any action whatsoever; and

(2) A description of the steps (including audit performance and reporting) the tribe will take to ensure its membership that the tribe is continuing to comply with the terms of the plan submitted and approved pursuant to judgment fund limitations (if any) and/or the terms of the Act.

(k) The proposed date for transfer of funds.

(l) A statement as to whether the tribe chooses to receive the withdrawal as a cash balance transfer, as a transfer of marketable investments that we own for the tribe, or as a combination of the two.

(1) A cash balance transfer may require us to sell bonds, notes, or other investments that we purchased when investing the tribe's monies.

(2) We cannot transfer non-marketable securities to a tribe. We can only purchase and hold them and must sell them back to the U.S. Treasury.

(3) If we sell a tribe's security at a loss (i.e., when market value is less than book value or carrying value) we will first notify the tribe. The tribe must instruct us to proceed with the sale and must agree not to hold us responsible for the loss before we will make the sale.

(4) If the tribe asks us to transfer marketable securities, upon proper instructions from the new tribal custodian, we will order our custodian to physically transfer the proper security to the new custodian on the agreed upon date.

(m) Agreement that judgment award funds will have segregated accounts.

(n) A description of the procedures for amending or revising the plan.

§ 1200.15 What is the approval process for management plans?

The Secretary will approve or disapprove each management plan, based in part upon our recommendation.

(a) We will determine the completeness of the application, provide for adequate professional review of the application and the management plan, and provide technical assistance as necessary to make an application complete.

(b) We will coordinate with area directors in confirming authority of tribal governments to make requests.

(c) We will approve or disapprove a request within 90 calendar days of receiving a completed application. This 90-day period does not include time that we spend awaiting a response from the tribe for additional information that we have requested. All determinations will be in writing, and all responses will be by certified mail.

(d) If we find that a plan does not meet the criteria in § 1200.16, we will notify the tribe of shortcomings of the request, and allow the tribe to respond before recommending formal disapproval.

(e) Before final approval, we will reach agreement with the tribe on how many days after final approval we will transfer the funds. We will transfer the funds as soon after final approval as the tribe or manager is ready to receive them, unless we need additional time to sell existing instruments.

§ 1200.16 What criteria will be used in evaluating the management plan?

Each plan must be approved by the appropriate tribal governing body, and must be accompanied by a resolution approving the plan. The plan must be reasonable in light of the trust responsibility and the principles of Indian self-determination, and other appropriate factors, including, but not limited to, the factors listed below:

(a) We will evaluate the individuals or entities that will manage the funds to be withdrawn, or that will advise the tribe on investing the funds to be withdrawn in order to determine if they have the capability and experience to manage the funds. Among the elements we will evaluate are: the number of years in business, the performance record for funds management, and the ability to compensate the tribe if the entity is found liable for failing to comply with the tribe's management plan (i.e., its assets, bonding, and insurance).

(b) We will review the tribe's experience in managing investments. We will compare this experience to the complexity of the proposed management plan to determine whether the tribe has the experience to manage its proposed plan or whether it should begin with a less complex approach.

(c) We will evaluate the tribe's internal audit and control systems for overseeing or monitoring its investment activity.

(d) We will evaluate the adequacy of protection against substantial loss of principal. Our determination will include a thorough evaluation of the tribe's investment plan including:

(1) The goals and objectives;

(2) The proposed uses of the fund in order to meet business objectives;

(3) The size and diversity of the investment portfolio (for example, the class of stocks and the mixture of types of investments);

(4) The financial condition of the tribe;

(5) The inherent riskiness of the proposed investments; and

(6) The tribe's projected need and proposed timeframes to draw down the funds being invested or the income from them.

(e) We will determine the likelihood that the plan will be followed. We will base this determination on the contents of the agreement between the tribe and the fund manager and other appropriate factors.

§ 1200.17 What special criteria will be used to evaluate management plans for judgment or settlement funds?

For judgment or settlement funds, in addition to the criteria in § 1200.16, we will determine if the plan adequately provides for compliance with any conditions, uses of funds, or other requirements established by the appropriate judgment fund plan or settlement act.

§ 1200.18 When does the Department's trust responsibility end?

Our trust responsibility for funds withdrawn under this part ends on the date that the funds are withdrawn. However at the time of withdrawal neither we nor the tribe may be deemed to have accepted the account balance at the time of withdrawal as accurate; or waived any rights regarding the balance and our ability to seek compensation.

§ 1200.19 How can the plan be revised?

Once a tribe has withdrawn its funds, the tribe may revise its plan without our approval. All revisions should conform to the procedures outlined in the approved management plan. The tribe should inform its members of all revisions to a plan through normal tribal procedures before the revisions are implemented.

VOL 61 ISS 249 DE 26 1996 UMI

§ 1200.20 How can a tribe withdraw additional funds?

(a) If a tribe has withdrawn funds under an approved tribal management plan and wishes to withdraw additional funds that will be managed under the same plan, it need not submit a complete new application. The tribe must:

(1) Notify us of the additional amount it intends to withdraw and whether the funds to be withdrawn are in kind or cash. (Written notification should be provided to our address in § 1200.13);

(2) Send us a tribal resolution approving the new withdrawal and certifying that the funds are being withdrawn subject to the same conditions and that they will be managed under the plan in the original approved application;

(3) Send us a copy of the most recent compliance audit or investment report.

(b) After we finish our review we will release the additional funds, unless the compliance audit or investment report indicates that the tribe is not complying with its management plan. In this case, we will not release the additional funds until the tribe demonstrates that it is complying with the management plan.

§ 1200.21 How may a tribe appeal denials under this part?

If we deny a request or do not approve an application within 90 days of a request, the tribe may address any problems that we identify and resubmit a revised request, seek technical assistance, or appeal the denial under 43 CFR Part 4.

Subpart C—Returning Tribal Funds to Trust

§ 1200.30 How does a tribe notify the Department if it wishes to return withdrawn funds to Federal trust status?

If a tribe elects to return some or all of the funds it has withdrawn from Federal trust status pursuant to this Act, it must first notify us in writing at our address in § 1200.13. This notification must provide a proposed date for the return of the funds, as well as the amount of funds to be returned, or actual securities to be delivered to the appropriate custodian.

§ 1200.31 What part of withdrawn funds can be returned to trust?

A tribe may return all or a portion of the principal which was removed from trust under this Act along with earnings and profits. We will verify the amount declared for earnings before we accept a return. We will accept any amount less than the original principal amount as a principal amount.

§ 1200.32 How often can funds be returned?

Tribes may return all or part of withdrawn funds no more than twice a year, beginning no sooner than six months after date of withdrawal, except with approval of the Secretary.

§ 1200.33 How can funds be returned?

Funds may be returned either as cash or securities, which meet the requirements for investments in 25 U.S.C. 162a. Cash can be transferred to the US Treasury by Electronic Funds Transfers (EFT), or the Automated Clearing House (ACH) process. Tribes must coordinate the transfer of ownership in securities with us to ensure proper credit to the tribe. The securities must meet investment restrictions contained in 25 U.S.C. 162a.

§ 1200.34 Can a tribe withdraw redeposited funds?

Yes. If a tribe wishes to withdraw redeposited funds from Federal trust status, it must submit a written request to do so, accompanied by a new resolution and any revisions it wishes to make in its original management plan.

Subpart D—Technical Assistance

§ 1200.40 How will the Department provide technical assistance for tribes?

(a) We will provide direct or contract technical assistance, in accordance with appropriations availability to tribes for developing, implementing, and managing Indian trust fund investment plans. We will ensure that our legal, financial and other expertise is made fully available to advise tribes in developing, implementing, and managing investment plans.

(b) We may award grants to tribes for developing and implementing plans for investing Indian tribal trust funds.

(c) Tribes may also obtain technical assistance on their own.

§ 1200.41 What types of technical assistance are available?

The types of technical assistance include: investment planning; accounting; selection of investment managers; monitoring of investments; asset management; or other assistance appropriate to support funds withdrawal.

§ 1200.42 Who can provide technical assistance?

A sample of competent providers includes any of the following entities with the appropriate skills and capabilities: available DOI or OST staff; intertribal organizations; public agencies; and contracted private investment firms.

§ 1200.43 How can a tribe apply for technical assistance?

(a) Tribes wishing technical assistance may request it by sending us a letter along with a tribal resolution outlining the technical assistance required, tribal resources which may be applied to the need, and suggested provider, if known. The resolution must state clearly that the assistance is needed for developing, implementing, or managing an investment plan under the provisions of this authority.

(b) Tribes requesting funds for technical assistance must send a completed SF–424, APPLICATION FOR FEDERAL ASSISTANCE, and SF–424A, BUDGET INFORMATION, along with a tribal resolution, detailing the assistance specifically requested, and the suggested provider to our address in § 1200.13.

(c) We will make grants subject to funds availability. We will publish a notice in the **Federal Register** concerning the availability of funding, deadlines for grants, the application process, and approval criteria. If funding is limited, grants will be awarded based on criteria that we feel will best meet the intent of the Act. We will consult with tribes in determining annual criteria. Unsolicited grant requests will not be accepted.

§ 1200.44 What action will the Department take on requests for technical assistance?

We will respond in writing to all requests for technical assistance and grants, advising of decision, availability of appropriate expertise and funding, and anticipated delivery of the service.

Dated: December 19, 1996.

Ada E. Deer,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310–12–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 8707]

RIN 1545–AT19

Distribution of Marketable Securities by a Partnership

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations providing rules for partnership distributions of marketable securities under section 731(c) of the

Internal Revenue Code of 1986, as amended, and for determining when those distributions are taxable to the distributee partner. The regulations reflect changes to the law made by the Uruguay Round Agreements Act enacted on December 8, 1994.

DATES: These regulations are effective on December 26, 1996.

FOR FURTHER INFORMATION CONTACT: Terri A. Belanger or William M. Kostak at (202) 622–3080 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document amends 26 CFR part 1 to provide rules relating to the treatment of partnership distributions of marketable securities under section 731(c). Under section 731(a), in the case of a distribution by a partnership to a partner, gain is recognized to the partner only to the extent that any money distributed exceeds the adjusted basis of the partner's interest in the partnership. Prior to the enactment of section 731(c), marketable securities were not considered money and, therefore, the distribution of marketable securities by a partnership to a partner was not a taxable event. Section 731(c) now treats a partnership distribution of marketable securities as a distribution of money and as a taxable event if the value of the distributed securities exceeds the adjusted basis of the partner's interest in the partnership. Section 731(c) also provides several exceptions to the general rule that a distribution of marketable securities will be treated as a distribution of money.

On January 2, 1996, the IRS published in the **Federal Register** (61 FR 28) a notice of proposed rulemaking (PS–2–95) to provide guidance regarding section 731(c). A number of public comments were received concerning the proposed regulations. However, the public hearing scheduled for April 3, 1996, was cancelled because no one requested to speak. After consideration of the written comments received, the proposed regulations are adopted as revised by this Treasury decision.

Explanation of Provisions

I. General Background

The proposed regulations provide rules for determining when and the extent to which a distribution of marketable securities by a partnership to a partner will be treated as a distribution of money for purposes of section 731(a). Although modified in response to comments, the final regulations generally adopt the rules contained in the proposed regulations.

II. Public Comments

Several comments requested that the IRS reconsider the requirement in § 1.731–2(d) (2)(ii) of the proposed regulations that a marketable security must be actively traded on the date of distribution to qualify for the "nonrecognition transaction" exception to section 731(c). Because of this rule, financial instruments (securities) that are treated as marketable securities under section 731(c)(2)(B) on the date of distribution, but that are not actively traded, would not qualify for this exception. Commentators suggested that the final regulations should not include this requirement or should include a more narrowly drafted provision. In response to these comments, the final regulations provide that a security that falls within the definition of marketable security may qualify for the exceptions under § 1.731–2(d) of the final regulations even if the security is not actively traded on the date of distribution. An anti-stuffing rule has been added to address the concern to which the actively-traded requirement of the proposed regulations was directed.

Several comments also suggested that § 1.731–2(d)(2) of the proposed regulations should allow a de minimis amount of cash and marketable securities to be transferred in a nonrecognition transaction. The final regulations provide that if the value of money and marketable securities transferred in a nonrecognition transaction is less than 20 percent of the total amount of all property transferred in exchange for the distributed security, the entire value of the distributed security will qualify for the nonrecognition transaction exception under § 1.731–2(d)(1)(ii) of the final regulations.

Several commentators also suggested that the five-year rules of § 1.731–2(d)(2) and (3) of the proposed regulations be eliminated. Section 1.731–2(d)(2) of the proposed regulations provided that a marketable security that was acquired in a nonrecognition transaction in exchange for other property and distributed within five years by the partnership would not be subject to section 731(c). Section 1.731–2(d)(3) of the proposed regulations provided that a marketable security that was acquired by the partnership before it became actively traded would also not be subject to section 731(c) if it was distributed by the partnership within five years of becoming actively traded. One commentator, for example, argued that a security is no less a substitute for the underlying assets in a nonrecognition transaction after five years than before five years. These five-year rules were included in the proposed regulations because of administrative concerns. For example, it may be difficult, after the passage of many years, for taxpayers or the IRS to determine the circumstances in which a partnership acquired a particular security. Moreover, it is not clear whether certain exceptions should apply to a distribution of securities if those securities were acquired by a partnership many years ago and are now distributed to a partner who was not a partner at the time the securities were acquired. These administrative concerns remain valid, and a five year time limitation provides a reasonable and simple solution to such problems. Therefore, the final regulations retain both five-year rules.

One comment requested clarification regarding whether a section 708(b)(1)(B) termination affects a partnership's qualification for the exceptions under § 1.731–2 (d) and (e) of the regulations. Another commentator suggested that the regulations be modified to provide that marketable securities will not be treated as money when there is a deemed distribution of marketable securities by the terminating partnership as the result of a section 708(b)(1)(B) termination. In response to these comments, the final regulations provide that a section 708(b)(1)(B) termination does not have any effect on a partnership's qualification for the exceptions under section 731(c). In addition, a deemed distribution occurring as a result of a section 708(b)(1)(B) termination will not be subject to section 731(c).

Several comments suggested that the 10-percent test in the investment partnership look-through rule under § 1.731–2(e)(4) of the proposed regulations should be modified or eliminated. A partnership can qualify for the investment partnership exception only if it has never been engaged in a trade or business and substantially all of its assets are investment assets. Under the proposed regulations, a partnership is treated as engaged in a trade or business engaged in by, or as holding a proportionate share of the assets of, a lower-tier partnership in which the partnership holds a partnership interest unless the upper-tier partnership does not participate in the management of the lower-tier partnership and the interest held by the upper-tier partnership is less than 10 percent of the total profits and capital interests in the lower-tier partnership. According to the comments, the requirement that the upper-tier partnership not participate in

VOL 61 ISS 249 DEC 26 1996 UMI

the management of the lower-tier partnership should be sufficient to ensure passive ownership of the interest in the lower-tier partnership. The commentators further argued that ownership of more than 10 percent of the capital and profits interest in a lower-tier partnership may still be consistent with passive ownership. After consideration of these comments, the final regulations modify the rule in the proposed regulations to increase the threshold ownership percentage amount from 10 to 20 percent.

In response to a comment, the final regulations clarify that an interest in a lower-tier partnership that qualifies for the exception to the investment partnership "look-through" rule is treated as eligible property for purposes of determining whether the partner who contributed the lower-tier partnership interest is an eligible partner of the upper-tier investment partnership.

One commentator recommended that the regulations include an example that illustrates the section 732(a)(2) ordering rules for distributions that include money, marketable securities and other property, and to clarify whether marketable securities are treated as money for purposes of section 732(a)(2). Because the statute and the regulations provide that marketable securities are treated as money only for purposes of sections 731(a)(1) and 737, no additional examples are necessary.

One comment suggested that the effective date of the regulations should be the same as the effective date of section 731(c) because the regulations contain guidance for the various exceptions provided for by the Internal Revenue Code. In response to this comment, the final regulations provide that, for the period between the effective date of the statutory provision and the effective date of these regulations, taxpayers may apply the rules contained in these regulations. Another comment suggested that the final regulations should make clear that the rules in the investment partnership exception apply with respect to all property contributed to, or held by, a partnership at any time (including any period prior to the enactment of section 731(c)). The IRS and Treasury believe that this is sufficiently clear from the statutory language, and an explicit statement to this effect in these regulations is not necessary and may be confusing.

One comment requested that the regulations provide several examples illustrating abusive transactions intended to be covered by the anti-abuse rules of § 1.731–2(h), and that these rules be coordinated with the general anti-abuse rules of § 1.701–2. After consideration of this comment, it has been determined that the text of the regulations adequately describes several situations that would be considered abusive under these rules, and that additional examples are unnecessary.

In response to several comments, the final regulations clarify that the 90 percent test of § 1.731–2(c)(2)(i) and the 20 percent test of § 1.731–2(c)(2)(ii) are determined using the gross value of the entity's assets, disregarding any debt that may encumber or otherwise be allocable to those assets, other than debt that is incurred to acquire property with a principal purpose of avoiding or reducing the effect of section 731(c).

Finally, the regulations clarify the interaction of the limitation on gain rule in section 731(c)(3)(B) and the various exceptions listed in paragraph (d). The regulations provide that any gain or loss on a distributed security that qualifies for an exception is not taken into account in determining the distributee partner's limitation on gain.

III. Effective Dates

In general, section 731(c) applies to distributions made after December 8, 1994. These regulations are effective for distributions made on or after December 26, 1996. However, taxpayers may apply the rules of this section to distributions made after December 8, 1994, and before December 26, 1996.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the notice of proposed rulemaking preceding the regulations was issued prior to March 29, 1996, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding these regulations was submitted to the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal authors of these regulations are Terri A. Belanger and William M. Kostak, Office of Assistant Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding an entry in numerical order to read as follows:

Authority: 26 U.S.C. 7805. * * *

Section 1.731–2 also issued under 26 U.S.C. 731(c). * * *

Par. 2. Section 1.731–2 is added to read as follows:

§ 1.731–2 Partnership distributions of marketable securities.

(a) *Marketable securities treated as money.* Except as otherwise provided in section 731(c) and this section, for purposes of sections 731(a)(1) and 737, the term money includes marketable securities and such securities are taken into account at their fair market value as of the date of the distribution.

(b) *Reduction of amount treated as money*—(1) *Aggregation of securities.* For purposes of section 731(c)(3)(B) and this paragraph (b), all marketable securities held by a partnership are treated as marketable securities of the same class and issuer as the distributed security.

(2) *Amount of reduction.* The amount of the distribution of marketable securities that is treated as a distribution of money under section 731(c) and paragraph (a) of this section is reduced (but not below zero) by the excess, if any, of—

(i) The distributee partner's distributive share of the net gain, if any, which would be recognized if all the marketable securities held by the partnership were sold (immediately before the transaction to which the distribution relates) by the partnership for fair market value; over

(ii) The distributee partner's distributive share of the net gain, if any, which is attributable to the marketable securities held by the partnership immediately after the transaction, determined by using the same fair market value as used under paragraph (b)(2)(i) of this section.

(3) *Distributee partner's share of net gain.* For purposes of section 731(c)(3)(B) and paragraph (b)(2) of this section, a partner's distributive share of net gain is determined—

(i) By taking into account any basis adjustments under section 743(b) with respect to that partner;

(ii) Without taking into account any special allocations adopted with a principal purpose of avoiding the effect of section 731(c) and this section; and

(iii) Without taking into account any gain or loss attributable to a distributed security to which paragraph (d)(1) of this section applies.

(c) *Marketable securities*—(1) *In general.* For purposes of section 731(c) and this section, the term *marketable securities* is defined in section 731(c)(2).

(2) *Actively traded.* For purposes of section 731(c) and this section, a financial instrument is actively traded (and thus is a marketable security) if it is of a type that is, as of the date of distribution, actively traded within the meaning of section 1092(d)(1). Thus, for example, if *XYZ* common stock is listed on a national securities exchange, particular shares of *XYZ* common stock that are distributed by a partnership are marketable securities even if those particular shares cannot be resold by the distributee partner for a designated period of time.

(3) *Interests in an entity*—(i) *Substantially all.* For purposes of section 731(c)(2)(B)(v) and this section, substantially all of the assets of an entity consist (directly or indirectly) of marketable securities, money, or both only if 90 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

(ii) *Less than substantially all.* For purposes of section 731(c)(2)(B)(vi) and this section, an interest in an entity is a marketable security to the extent that the value of the interest is attributable (directly or indirectly) to marketable securities, money, or both, if less than 90 percent but 20 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

(4) *Value of assets.* For purposes of section 731(c) and this section, the value of the assets of an entity is determined without regard to any debt that may encumber or otherwise be allocable to those assets, other than debt that is incurred to acquire an asset with a principal purpose of avoiding or reducing the effect of section 731(c) and this section.

(d) *Exceptions*—(1) *In general.* Except as otherwise provided in paragraph (d)(2) of this section, section 731(c) and this section do not apply to the distribution of a marketable security if—

(i) The security was contributed to the partnership by the distributee partner;

(ii) The security was acquired by the partnership in a nonrecognition transaction, and the following conditions are satisfied—

(A) The value of any marketable securities and money exchanged by the partnership in the nonrecognition transaction is less than 20 percent of the value of all the assets exchanged by the partnership in the nonrecognition transaction; and

(B) The partnership distributed the security within five years of either the date the security was acquired by the partnership or, if later, the date the security became marketable; or

(iii) The security was not a marketable security on the date acquired by the partnership, and the following conditions are satisfied—

(A) The entity that issued the security had no outstanding marketable securities at the time the security was acquired by the partnership;

(B) The security was held by the partnership for at least six months before the date the security became marketable; and

(C) The partnership distributed the security within five years of the date the security became marketable.

(2) *Anti-stuffing rule.* Paragraph (d)(1) of this section does not apply to the extent that 20 percent or more of the value of the distributed security is attributable to marketable securities or money contributed (directly or indirectly) by the partnership to the entity to which the distributed security relates after the security was acquired by the partnership (other than marketable securities contributed by the partnership that were originally contributed to the partnership by the distributee partner). For purposes of this paragraph (d)(2), money contributed by the distributing partnership does not include any money deemed contributed by the partnership as a result of section 752.

(3) *Successor security.* Section 731(c) and this section apply to the distribution of a marketable security acquired by the partnership in a nonrecognition transaction in exchange for a security the distribution of which immediately prior to the exchange would have been excepted under this paragraph (d) only to the extent that section 731(c) and this section otherwise would have applied to the exchanged security.

(e) *Investment partnerships*—(1) *In general.* Section 731(c) and this section do not apply to the distribution of marketable securities by an investment partnership (as defined in section 731(c)(3)(C)(i)) to an eligible partner (as defined in section 731(c)(3)(C)(iii)).

(2) *Eligible partner*—(i) *Contributed services.* For purposes of section 731(c)(3)(C)(iii) and this section, a partner is not treated as a partner other than an eligible partner solely because the partner contributed services to the partnership.

(ii) *Contributed partnership interests.* For purposes of determining whether a partner is an eligible partner under section 731(c)(3)(C), if the partner has contributed to the investment partnership an interest in another partnership that meets the requirements of paragraph (e)(4)(i) of this section after the contribution, the contributed interest is treated as property specified in section 731(c)(3)(C)(i).

(3) *Trade or business activities.* For purposes of section 731(c)(3)(C) and this section, a partnership is not treated as engaged in a trade or business by reason of—

(i) Any activity undertaken as an investor, trader, or dealer in any asset described in section 731(c)(3)(C)(i), including the receipt of commitment fees, break-up fees, guarantee fees, director's fees, or similar fees that are customary in and incidental to any activities of the partnership as an investor, trader, or dealer in such assets;

(ii) Reasonable and customary management services (including the receipt of reasonable and customary fees in exchange for such management services) provided to an investment partnership (within the meaning of section 731(c)(3)(C)(i)) in which the partnership holds a partnership interest; or

(iii) Reasonable and customary services provided by the partnership in assisting the formation, capitalization, expansion, or offering of interests in a corporation (or other entity) in which the partnership holds or acquires a significant equity interest (including the provision of advice or consulting services, bridge loans, guarantees of obligations, or service on a company's board of directors), provided that the anticipated receipt of compensation for the services, if any, does not represent a significant purpose for the partnership's investment in the entity and is incidental to the investment in the entity.

(4) *Partnership tiers.* For purposes of section 731(c)(3)(C)(iv) and this section, a partnership (upper-tier partnership) is not treated as engaged in a trade or business engaged in by, or as holding (instead of a partnership interest) a proportionate share of the assets of, a partnership (lower-tier partnership) in which the partnership holds a partnership interest if—

(i) The upper-tier partnership does not actively and substantially

participate in the management of the lower-tier partnership; and

(ii) The interest held by the upper-tier partnership is less than 20 percent of the total profits and capital interests in the lower-tier partnership.

(f) *Basis rules*—(1) *Partner's basis*—(i) *Partner's basis in distributed securities.* The distributee partner's basis in distributed marketable securities with respect to which gain is recognized by reason of section 731(c) and this section is the basis of the security determined under section 732, increased by the amount of such gain. Any increase in the basis of the marketable securities attributable to gain recognized by reason of section 731(c) and this section is allocated to marketable securities in proportion to their respective amounts of unrealized appreciation in the hands of the partner before such increase.

(ii) *Partner's basis in partnership interest.* The basis of the distributee partner's interest in the partnership is determined under section 733 as if no gain were recognized by the partner on the distribution by reason of section 731(c) and this section.

(2) *Basis of partnership property.* No adjustment is made to the basis of partnership property under section 734 as a result of any gain recognized by a partner, or any step-up in the basis in the distributed marketable securities in the hands of the distributee partner, by reason of section 731(c) and this section.

(g) *Coordination with other sections*—(1) *Sections 704(c)(1)(B) and 737*—(i) *In general.* If a distribution results in the application of sections 731(c) and one or both of sections 704(c)(1)(B) and 737, the effect of the distribution is determined by applying section 704(c)(1)(B) first, section 731(c) second, and finally section 737.

(ii) *Section 704(c)(1)(B).* The basis of the distributee partner's interest in the partnership for purposes of determining the amount of gain, if any, recognized by reason of section 731(c) (and for determining the basis of the marketable securities in the hands of the distributee partner) includes the increase or decrease, if any, in the partner's basis that occurs under section 704(c)(1)(B)(iii) as a result of a distribution to another partner of property contributed by the distributee partner in a distribution that is part of the same distribution as the marketable securities.

(iii) *Section 737*—(A) *Marketable securities as other property.* A distribution of marketable securities is treated as a distribution of property other than money for purposes of section 737 to the extent that the marketable securities are not treated as money under section 731(c). In addition, marketable securities contributed to the partnership are treated as property other than money in determining the contributing partner's net precontribution gain under section 737(b).

(B) *Basis increase under section 737.* The basis of the distributee partner's interest in the partnership for purposes of determining the amount of gain, if any, recognized by reason of section 731(c) (and for determining the basis of the marketable securities in the hands of the distributee partner) does not include the increase, if any, in the partner's basis that occurs under section 737(c)(1) as a result of a distribution of property to the distributee partner in a distribution that is part of the same distribution as the marketable securities.

(2) *Section 708(b)(1)(B).* If a partnership termination occurs under section 708(b)(1)(B), the successor partnership will be treated as if there had been no termination for purposes of section 731(c) and this section. Accordingly, a section 708(b)(1)(B) termination will not affect whether a partnership qualifies for any of the exceptions in paragraphs (d) and (e) of this section. In addition, a deemed distribution that may occur as a result of a section 708(b)(1)(B) termination will not be subject to section 731(c) and this section.

(h) *Anti-abuse rule.* The provisions of section 731(c) and this section must be applied in a manner consistent with the purpose of section 731(c) and the substance of the transaction. Accordingly, if a principal purpose of a transaction is to achieve a tax result that is inconsistent with the purpose of section 731(c) and this section, the Commissioner can recast the transaction for Federal tax purposes as appropriate to achieve tax results that are consistent with the purpose of section 731(c) and this section. Whether a tax result is inconsistent with the purpose of section 731(c) and this section must be determined based on all the facts and circumstances. For example, under the provisions of this paragraph (h)—

(1) A change in partnership allocations or distribution rights with respect to marketable securities may be treated as a distribution of the marketable securities subject to section 731(c) if the change in allocations or distribution rights is, in substance, a distribution of the securities;

(2) A distribution of substantially all of the assets of the partnership other than marketable securities and money to some partners may also be treated as a distribution of marketable securities to the remaining partners if the distribution of the other property and the withdrawal of the other partners is, in substance, equivalent to a distribution of the securities to the remaining partners; and

(3) The distribution of multiple properties to one or more partners at different times may also be treated as part of a single distribution if the distributions are part of a single plan of distribution.

(i) [Reserved]

(j) *Examples.* The following examples illustrate the rules of this section. Unless otherwise specified, all securities held by a partnership are marketable securities within the meaning of section 731(c); the partnership holds no marketable securities other than the securities described in the example; all distributions by the partnership are subject to section 731(a) and are not subject to sections 704(c)(1)(B), 707(a)(2)(B), 751(b), or 737; and no securities are eligible for an exception to section 731(c). The examples are as follows:

Example 1. Recognition of gain. (i) *A* and *B* form partnership *AB* as equal partners. *A* contributes property with a fair market value of $1,000 and an adjusted tax basis of $250. *B* contributes $1,000 cash. *AB* subsequently purchases Security *X* for $500 and immediately distributes the security to *A* in a current distribution. The basis in *A*'s interest in the partnership at the time of distribution is $250.

(ii) The distribution of Security *X* is treated as a distribution of money in an amount equal to the fair market value of Security *X* on the date of distribution ($500). (The amount of the distribution that is treated as money is not reduced under section 731(c)(3)(B) and paragraph (b) of this section because, if Security *X* had been sold immediately before the distribution, there would have been no gain recognized by *AB* and *A*'s distributive share of the gain would therefore have been zero.) As a result, *A* recognizes $250 of gain under section 731(a)(1) on the distribution ($500 distribution of money less $250 adjusted tax basis in *A*'s partnership interest).

Example 2. Reduction in amount treated as money—in general. (i) *A* and *B* form partnership *AB* as equal partners. *AB* subsequently distributes Security *X* to *A* in a current distribution. Immediately before the distribution, *AB* held securities with the following fair market values, adjusted tax bases, and unrecognized gain or loss:

	Value	Basis	Gain (Loss)
Security X	100	70	30
Security Y	100	80	20
Security Z	100	110	(10)

(ii) If *AB* had sold the securities for fair market value immediately before the distribution to *A*, the partnership would have

recognized $40 of net gain ($30 gain on Security *X* plus $20 gain on Security *Y* minus $10 loss on Security *Z*). *A*'s distributive share of this gain would have been $20 (one-half of $40 net gain). If *AB* had sold the remaining securities immediately after the distribution of Security *X* to *A*, the partnership would have $10 of net gain ($20 of gain on Security *Y* minus $10 loss on Security *Z*). *A*'s distributive share of this gain would have been $5 (one-half of $10 net gain). As a result, the distribution resulted in a decrease of $15 in *A*'s distributive share of the net gain in *AB*'s securities ($20 net gain before distribution minus $5 net gain after distribution).

(iii) Under paragraph (b) of this section, the amount of the distribution of Security *X* that is treated as a distribution of money is reduced by $15. The distribution of Security *X* is therefore treated as a distribution of $85 of money to *A* ($100 fair market value of Security *X* minus $15 reduction).

Example 3. Reduction in amount treated as money—carried interest. (i) *A* and *B* form partnership *AB*. *A* contributes $1,000 and provides substantial services to the partnership in exchange for a 60 percent interest in partnership profits. *B* contributes $1,000 in exchange for a 40 percent interest in partnership profits. *AB* subsequently distributes Security *X* to *A* in a current distribution. Immediately before the distribution, *AB* held securities with the following fair market values, adjusted tax bases, and unrecognized gain:

	Value	Basis	Gain
Security *X*	100	80	20
Security *Y*	100	90	10

(ii) If *AB* had sold the securities for fair market value immediately before the distribution to *A*, the partnership would have recognized $30 of net gain ($20 gain on Security *X* plus $10 gain on Security *Y*). *A*'s distributive share of this gain would have been $18 (60 percent of $30 net gain). If *AB* had sold the remaining securities immediately after the distribution of Security *X* to *A*, the partnership would have $10 of net gain ($10 gain on Security *Y*). *A*'s distributive share of this gain would have been $6 (60 percent of $10 net gain). As a result, the distribution resulted in a decrease of $12 in *A*'s distributive share of the net gain in *AB*'s securities ($18 net gain before distribution minus $6 net gain after distribution).

(iii) Under paragraph (b) of this section, the amount of the distribution of Security *X* that is treated as a distribution of money is reduced by $12. The distribution of Security *X* is therefore treated as a distribution of $88 of money to *A* ($100 fair market value of Security *X* minus $12 reduction).

Example 4. Reduction in amount treated as money—change in partnership allocations. (i) *A* is admitted to partnership *ABC* as a partner with a 1 percent interest in partnership profits. At the time of *A*'s admission, *ABC* held no securities. *ABC* subsequently acquires Security *X*. *A*'s interest in partnership profits is subsequently increased to 2 percent for securities acquired after the increase. *A* retains a 1 percent interest in all securities acquired before the increase. *ABC* then acquires Securities *Y* and *Z* and later distributes Security *X* to *A* in a current distribution. Immediately before the distribution, the securities held by *ABC* had the following fair market values, adjusted tax bases, and unrecognized gain or loss:

	Value	Basis	Gain (Loss)
Security *X*	1,000	500	500
Security *Y*	1,000	800	200
Security *Z*	11,000	1,100	(100)

(ii) If *ABC* had sold the securities for fair market value immediately before the distribution to *A*, the partnership would have recognized $600 of net gain ($500 gain on Security *X* plus $200 gain on Security *Y* minus $100 loss on Security *Z*). *A*'s distributive share of this gain would have been $7 (1 percent of $500 gain on Security *X* plus 2 percent of $200 gain on Security *Y* minus 2 percent of $100 loss on Security *Z*).

(iii) If *ABC* had sold the remaining securities immediately after the distribution of Security *X* to *A*, the partnership would have $100 of net gain ($200 gain on Security *Y* minus $100 loss on Security *Z*). *A*'s distributive share of this gain would have been $2 (2 percent of $200 gain on Security *Y* minus 2 percent of $100 loss on Security *Z*). As a result, the distribution resulted in a decrease of $5 in *A*'s distributive share of the net gain in *ABC*'s securities ($7 net gain before distribution minus $2 net gain after distribution).

(iv) Under paragraph (b) of this section, the amount of the distribution of Security *X* that is treated as a distribution of money is reduced by $5. The distribution of Security *X* is therefore treated as a distribution of $995 of money to *A* ($1000 fair market value of Security *X* minus $5 reduction).

Example 5. Basis consequences—distribution of marketable security. (i) *A* and *B* form partnership *AB* as equal partners. *A* contributes nondepreciable real property with a fair market value and adjusted tax basis of $100.

(ii) *AB* subsequently distributes Security *X* with a fair market value of $120 and an adjusted tax basis of $90 to *A* in a current distribution. At the time of distribution, the basis in *A*'s interest in the partnership is $100. The amount of the distribution that is treated as money is reduced under section 731(c)(3)(B) and paragraph (b)(2) of this section by $15 (one-half of $30 net gain in Security *X*). As a result, *A* recognizes $5 of gain under section 731(a) on the distribution (excess of $105 distribution of money over $100 adjusted tax basis in *A*'s partnership interest).

(iii) *A*'s adjusted tax basis in Security *X* is $95 ($90 adjusted basis of Security *X* determined under section 732(a)(1) plus $5 of gain recognized by *A* by reason of section 731(c)). The basis in *A*'s interest in the partnership is $10 as determined under section 733 ($100 pre-distribution basis minus $90 basis allocated to Security *X* under section 732).

Example 6. Basis consequences—distribution of marketable security and other property. (i) *A* and *B* form partnership *AB* as equal partners. *A* contributes nondepreciable real property, with a fair market value of $100 and an adjusted tax basis of $10.

(ii) *AB* subsequently distributes Security *X* with a fair market value and adjusted tax basis of $40 to *A* in a current distribution and, as part of the same distribution, *AB* distributes Property *Z* to *A* with an adjusted tax basis and fair market value of $40. At the time of distribution, the basis in *A*'s interest in the partnership is $10. *A* recognizes $30 of gain under section 731(a) on the distribution (excess of $40 distribution of money over $10 adjusted tax basis in *A*'s partnership interest).

(iii) *A*'s adjusted tax basis in Security *X* is $35 ($5 adjusted basis determined under section 732(a)(2) plus $30 of gain recognized by *A* by reason of section 731(c)). *A*'s basis in Property *Z* is $5, as determined under section 732(a)(2). The basis in *A*'s interest in the partnership is $0 as determined under section 733 ($10 pre-distribution basis minus $10 basis allocated between Security *X* and Property *Z* under section 732).

(iv) *AB*'s adjusted tax basis in the remaining partnership assets is unchanged unless the partnership has a section 754 election in effect. If *AB* made such an election, the aggregate basis of *AB*'s assets would be increased by $70 (the difference between the $80 combined basis of Security *X* and Property *Z* in the hands of the partnership before the distribution and the $10 combined basis of the distributed property in the hands of *A* under section 732 after the distribution). Under section 731(c)(5), no adjustment is made to partnership property under section 734 as a result of any gain recognized by *A* by reason of section 731(c) or as a result of any step-up in basis in the distributed marketable securities in the hands of *A* by reason of section 731(c).

Example 7. Coordination with section 737. (i) *A* and *B* form partnership *AB*. *A* contributes Property *A*, nondepreciable real property with a fair market value of $200 and an adjusted basis of $100 in exchange for a 25 percent interest in partnership capital and profits. *AB* owns marketable Security *X*.

(ii) Within five years of the contribution of Property *A*, *AB* subsequently distributes Security *X*, with a fair market value of $120 and an adjusted tax basis of $100, to *A* in a current distribution that is subject to section 737. As part of the same distribution, *AB* distributes Property *Y* to *A* with a fair market value of $20 and an adjusted tax basis of $0. At the time of distribution, there has been no change in the fair market value of Property *A* or the adjusted tax basis in *A*'s interest in the partnership.

(iii) If *AB* had sold Security *X* for fair market value immediately before the distribution to *A*, the partnership would have recognized $20 of gain. *A*'s distributive share of this gain would have been $5 (25 percent of $20 gain). Because *AB* has no other marketable securities, *A*'s distributive share of gain in partnership securities after the distribution would have been $0. As a result, the distribution resulted in a decrease of $5 in *A*'s share of the net gain in *AB*'s securities ($5 net gain before distribution minus $0 net

VOL 61 ISS 249 DE 26 1996 UMI

gain after distribution). Under paragraph (b)(2) of this section, the amount of the distribution of Security *X* that is treated as a distribution of money is reduced by $5. The distribution of Security *X* is therefore treated as a distribution of $115 of money to *A* ($120 fair market value of Security *X* minus $5 reduction). The portion of the distribution of the marketable security that is not treated as a distribution of money ($5) is treated as other property for purposes of section 737.

(iv) *A* recognizes total gain of $40 on the distribution. *A* recognizes $15 of gain under section 731(a)(1) on the distribution of the portion of Security *X* treated as money ($115 distribution of money less $100 adjusted tax basis in *A*'s partnership interest). *A* recognizes $25 of gain under section 737 on the distribution of Property *Y* and the portion of Security *X* that is not treated as money. *A*'s section 737 gain is equal to the lesser of (i) *A*'s precontribution gain ($100) or (ii) the excess of the fair market value of property received ($20 fair market value of Property *Y* plus $5 portion of Security *X* not treated as money) over the adjusted basis in *A*'s interest in the partnership immediately before the distribution ($100) reduced (but not below zero) by the amount of money received in the distribution ($115).

(v) *A*'s adjusted tax basis in Security *X* is $115 ($100 basis of Security *X* determined under section 732(a) plus $15 of gain recognized by reason of section 731(c)). *A*'s adjusted tax basis in Property *Y* is $0 under section 732(a). The basis in *A*'s interest in the partnership is $25 ($100 basis before distribution minus $100 basis allocated to Security *X* under section 732(a) plus $25 gain recognized under section 737).

(k) *Effective date.* This section applies to distributions made on or after December 26, 1996. However, taxpayers may apply the rules of this section to distributions made after December 8, 1994, and before December 26, 1996.

Margaret Milner Richardson,

Commissioner of Internal Revenue.

Approved: November 27, 1996.

Donald C. Lubick,

Acting Assistant Secretary of the Treasury (Tax Policy).

BILLING CODE 4830–01–U

DEPARTMENT OF LABOR

Office of Labor-Management Standards

29 CFR Parts 402, 403, 404, 405, 406, 408, and 409

Submission of Computer-Generated Labor Organization and Auxiliary Reports

AGENCY: Office of Labor-Management Standards, Labor.

ACTION: Notice of policy.

SUMMARY: The Labor-Management Reporting and Disclosure Act of 1959, as amended (LMRDA), provides for the reporting and disclosure of information on the financial transactions and administrative practices of labor organizations. The statute also provides, under certain circumstances, for reporting and disclosure of information by labor organization officers and employees, employers, labor relations consultants, and surety companies. The Department of Labor's Office of Labor-Management Standards (OLMS) has begun to receive required reports in a variety of computer-generated formats. OLMS has developed standards to ensure the uniformity of computer-generated reporting forms to assist persons who make approximately 10,000 requests to examine these reports each year. This notice of policy is to inform those who file reports of the standards for computer-generated reports.

EFFECTIVE DATE: December 26, 1996.

FOR FURTHER INFORMATION CONTACT: David Geiss, Chief, Section of Reports and Disclosure, Office of Labor-Management Standards, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N–5119, Washington, DC 20210, (202) 219–7353 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background: While enacting the reporting provisions of the Labor-Management Reporting and Disclosure Act of 1959, as amended (LMRDA), Congress expressed the belief that the labor-management process and union members, officers, and the public in general would benefit by having access to information about labor organizations, their officers and employees, employers, labor relations consultants, and surety companies. In particular, the disclosure of financial information about labor organizations was intended to help ensure their fiscal integrity. Consequently, labor organizations are required to file information reports, annual financial reports, and trusteeship reports. Labor organization officers and employees, employers, and labor relations consultants who engage in certain activities are required to file financial disclosure reports. Surety companies which issue bonds required by the LMRDA must file annual reports concerning their experience with such bonds. Section 205 of the LMRDA provides that these reports are public information.

Pursuant to section 208 of the LMRDA and 29 CFR Parts 402, 403, 404, 405, 406, 408, and 409, OLMS has prescribed and printed reporting forms to be used to submit the required reports. In an effort to reduce the paperwork and reporting burdens on those who file required reports, OLMS has begun to accept computer-generated reports in lieu of the printed OLMS forms. However, to insure the integrity of public disclosure for union members and others who examine and study the reports, computer-generated reports must meet certain standards to ensure uniformity and compliance with the Congressionally mandated reporting requirements.

Current Actions: Computer-generated reports which are submitted to OLMS will be accepted only if in overall appearance and content they are virtually indistinguishable from the printed OLMS forms and their readability is equivalent to the readability of OLMS forms (Forms LM–1, LM–2, LM–3, LM–4, LM–10, LM–15, LM–15A, LM–16, LM–20, LM–21, LM–30, and S–1). For example, a form should meet the following criteria to be accepted as substantially identical to the corresponding printed OLMS form:

* The form should be the same size (8½ by 11 inches) as the OLMS form.

* The layout of each page should be the same as the layout on the OLMS form.

* There should be no abbreviations or misspellings, and no additions or deletions of words.

* The font-size, spacing, and boxes on the form should be substantially the same as those used on the OLMS form.

Computer-generated forms which are not substantially identical to OLMS forms will not be accepted as complying with the reporting requirements of the LMRDA and will be returned to the filer.

Dated: December 19, 1996.

John Kotch,

Acting Deputy Assistant Secretary.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 4000, 4022, and 4041

RIN 1212–AA75

Finding Aids; Benefits Payable in Terminated Single-Employer Plans; Termination of Single-Employer Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Correction.

SUMMARY: On July 1, 1996, the Pension Benefit Guaranty Corporation published

in the **Federal Register** (at 61 FR 34001, FR Doc. 96–16398) a final rule reorganizing, renumbering, and reinventing its regulations. This document contains corrections to 29 CFR Parts 4000, 4022, and 4041 as so published.

EFFECTIVE DATE: July 1, 1996.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, or Marc L. Jordan, Attorney, Office of the General Counsel, Suite 340, Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005–4026; 202–326–4024 (202–326–4179 for TTY and TDD).

SUPPLEMENTARY INFORMATION: As published, 29 CFR Parts 4000, 4022, and 4041 contain errors that call for correction. This document corrects those errors.

List of Subjects in 29 CFR Chapter XL

Part 4000

Administrative practice and procedure, Authority delegations (Government agencies), Blind, Business and industry, Civil rights, Claims, Conflict of interests, Deaf, Disabled, Discrimination against handicapped, Equal employment opportunity, Federal buildings and facilities, Freedom of information, Government employees, Handicapped, Nondiscrimination, Organization and functions (Government agencies), Penalties, Pension insurance, Pensions, Physically handicapped, Political activities (Government employees), Privacy, Production and disclosure of information, Reporting and recordkeeping requirements, Small businesses, Testimony.

Parts 4022 and 4041

Pension insurance, Pensions, Reporting and recordkeeping requirements.

Accordingly, 29 CFR Parts 4000, 4022, and 4041 are corrected as follows:

PART 4000—FINDING AIDS

1. The authority citation for Part 4000 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3).

§ 4000.1 [Corrected]

2. In § 4001.1, in the table "Subchapter B—Rules Applicable to Single-Employer and Multiemployer Plans," the next-to-last entry (beginning with "2612" in the left column) is corrected to read as follows:

§ 4000.1 Distribution table.

* * * * *

Ch. XXVI part Subpart(s)/section(s)	Ch. XL part(s)/subpart(s) Subpart(s)/section(s)
Subchapter B—Rules Applicable to Single-Employer and Multiemployer Plans	
. . . . .	
2612	4001
. . . . .	

§ 4000.2 [Corrected]

3. In § 4000.2, the table, "Subchapter A—General," is corrected to read as follows:

§ 4000.2 Derivation table.

* * * * *

Ch. XL part Subpart/section(s)	Ch. XXVI part(s) Subpart/section(s)
Subchapter A—General	
4000	[Tables].
4001	2612 (and various statutory and regulatory definitions).
4002	2601.
4003	2606.

PART 4022—BENEFITS PAYABLE IN TERMINATED SINGLE-EMPLOYER PLANS

4. The authority citation for Part 4022 continues to read as follows:

* * * * *

Authority: 29 U.S.C. 1302, 1322, 1322b, 1341(c)(3)(D), and 1344.

§ 4022.3 [Corrected]

5. In § 4022.3(a), the word "is" is corrected to read "is, on the termination date,".

PART 4041—TERMINATION OF SINGLE-EMPLOYER PLANS

6. The authority citation for Part 4041 continues to read as follows:

Authority: 29 U.S.C. 1302(B)(3), 1341, 1344, 1350.

§ 4041.2 [Corrected]

7. In § 4041.2, the second and third sentences in the definition of Proposed termination date are corrected to read: "A proposed termination date becomes the 'termination date' if a plan terminates in a standard termination. A proposed termination date specified in the notice of intent to terminate or standard termination notice may not be earlier than the 60th day, nor later than the 90th day, after the issuance of the notice of intent to terminate."

Issued in Washington, D.C., this 19th day of December, 1996.

Martin Slate,

Executive Director, Pension Benefit Guaranty Corporation.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 596

Terrorism List Governments Sanctions Regulations; Authorization for Government Stipends and Scholarships for Students

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Final rule; amendment.

SUMMARY: This final rule amends the Terrorism List Governments Sanctions Regulations to generally authorize payment by the Governments of Syria and Sudan of stipends and scholarships for Syrian and Sudanese nationals studying at accredited educational institutions in the United States.

EFFECTIVE DATE: December 20, 1996.

FOR FURTHER INFORMATION CONTACT: Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220; tel.: 202/622–2520.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document is available as an electronic file on *The Federal Bulletin Board* the day of publication in the **Federal Register**. By modem, dial 202/512–1387 and type "/GO FAC," or call 202/512–1530 for disk or paper copies. This file is available for downloading without charge in WordPerfect 5.1, ASCII, and Adobe Acrobat™ readable (*.PDF) formats. For Internet access, the address for use with the World Wide Web (Home Page), Telnet, or FTP protocol is: fedbbs.access.gpo.gov. The document is also accessible for downloading in ASCII format without charge from Treasury's Electronic Library ("TEL") in the "Business, Trade and Labor Mall" of the FedWorld bulletin board. By modem, dial 703/321–3339, and select the appropriate self–expanding file in TEL. For Internet access, use one of the following protocols: Telnet = fedworld.gov (192.239.93.3); World Wide Web (Home Page) = http://www.fedworld.gov; FTP = ftp.fedworld.gov (192.239.92.205).

Additional information concerning the programs of the Office of Foreign Assets Control is available for downloading from the Office's Internet Home Page: http://www.ustreas.gov/treasury/services/fac/fac.html, or in fax form through the Office's 24–hour fax–on–demand service: call 202/622–0077 using a fax machine, fax modem, or (within the United States) a touch–tone telephone.

Background

On August 22, 1996, the Office of Foreign Assets Control issued the Terrorism List Governments Sanctions Regulations, 31 CFR part 596 (the "Regulations"), implementing section 321 of the Antiterrorism and Effective Death Penalty Act of 1996 (Pub. L. 104-132, 110 Stat. 1214, 1254 (18 U.S.C. · 2332d)). Section 596.504 authorizes U.S. persons to engage in all financial transactions with a terrorism list government that is not otherwise subject to sanctions contained in 31 CFR chapter V, currently the Governments of Syria and Sudan, except for a transfer from a terrorism list government constituting a donation to a U.S. person, or a payment that a U.S. person knows or has reason to know poses the risk of furthering terrorist acts in the United States. This final rule adds § 596.505 to the Regulations, generally authorizing donations from the Governments of Syria and Sudan in the form of stipends and scholarships for their respective nationals enrolled as students in accredited educational institutions in the United States. Representations made by an accredited educational institution concerning the status of a student may be relied upon in determining the applicability of this general license.

The general license contained in § 596.505 was originally issued by the Office of Foreign Assets Control on October 24, 1996, as General License No. 1. General License No. 1 may continue to be relied upon for transactions within its scope occurring between October 24, 1996, and the effective date of this final rule.

Since the Regulations involve a foreign affairs function, Executive Order 12886 and the provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory FlexibilityAct (5 U.S.C. 601-612) does not apply.

No collection of information is contained in this final rule.

List of Subjects in 31 CFR Part 596

Administrative practice and procedure, Banking and finance, Cuba, Fines and penalties, Iran, Iraq, Libya, North Korea, Reporting and recordkeeping requirements, Syria, Sudan, Terrorism, Transfer of assets.

For the reasons set forth in the preamble, 31 CFR part 596 is amended as follows:

PART 596—TERRORISM LIST GOVERNMENTS SANCTIONS REGULATIONS

1. The authority citation for part 596 continues to read as follows:

Authority: Pub. L. 104–132, 110 Stat. 1214, 1254 (18 U.S.C. 2332d).

Subpart E——Licenses, Authorizations and Statements of Licensing Policy

2. Section 596.505 is added to subpart E to read as follows:

§ 596.505 Certain transactions related to stipends and scholarships authorized.

(a) United States persons are authorized to engage in all financial transactions with respect to stipends and scholarships covering tuition and related educational, living and travel expenses provided by the Government of Syria to Syrian nationals or the Government of Sudan to Sudanese nationals who are enrolled as students in an accredited educational institution in the United States. Representations made by an accredited educational institution concerning the status of a student maybe relied upon in determining the applicability of this section.

(b) Nothing in this section authorizes a transaction prohibited by § 596.504(a)(2).

Dated: November 27, 1996.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: December 3, 1996.

James E. Johnson,

Assistant Secretary (Enforcement).

[FR Doc. 96–32858 Filed 12–20–96; 2:47 pm]

BILLING CODE 4810–25–F

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 269

Inflation Adjustment of Civil Monetary Penalties

AGENCY: Office of the Secretary, Department of Defense.

ACTION: Final rule.

SUMMARY: This final rule adjusts the amount of each statutory civil penalty subject to Department of Defense jurisdiction in accordance with the requirements of the Federal Civil Penalties Inflation Adjustment Act of 1990 as amended by the Debt Collection Improvement Act of 1996.

EFFECTIVE DATE: January 27, 1997.

FOR FURTHER INFORMATION CONTACT: Mr. Tom Summers, Directorate for Accounting Policy, Office of the Deputy Chief Financial Officer, Office of the Under Secretary of Defense (Comptroller), 1100 Defense Pentagon, Room 3A882, Washington, DC 20301–1100, (703) 697–0586 (e-mail address: summerst@ousdc.osd.mil).

SUPPLEMENTARY INFORMATION: The Federal Civil Penalties Inflation Adjustment Act of 1990 (FCPIAA), Public Law 101–410, 104 Stat. 890, 28 U.S.C. 2461, as amended by the Debt Collection Improvement Act of 1996 (DCIA), Public Law 104–134, April 26, 1996, requires the inflation adjustment of Civil Monetary Penalties (CMP) to ensure that they continue to maintain their deterrent value. The DCIA requires that not later than 180 days after its enactment, and at least once every 4 years thereafter, the head of each agency shall, by regulation published in the **Federal Register**, adjust each CMP within its jurisdiction by the inflation adjustment described in the FCPIAA. The inflation adjustment under the DCIA is to be determined by increasing the maximum CMP by the cost-of-living adjustment, rounding to amounts set forth in section 5(a) of the FCPIAA. The cost-of-living adjustment is the percentage (if any) for each CMP by which the Consumer Price Index (CPI) for the month of June of the calendar year preceding the adjustment, exceeds the CPI for the month of June of the calendar year in which the amount of such CMP was last set or adjusted pursuant to law. The first adjustment to a CMP may not exceed 10 percent of such penalty.

Any increased penalties shall apply only to violations which occur after the date on which the increase takes effect.

A typical example of an inflation adjustment of a CMP is as follows:

Title 10 U.S.C., section 1094(c)(1) imposes a maximum penalty of $5,000 to a person who provides health care independently as a health-care professional where that person does not have a current license to provide such care. The term "health care professional" means physician, dentist, clinical psychologist or nurse and any other person providing direct patient care as may be designated by the

Secretary of Defense in regulations. The penalty was set in 1985. The CPI for June 1985 and 322.3. The CPI for June 1995 is 456.7. The inflation factor, therefore, is 456.7/322.3 or 1.42. The maximum penalty amount after increase and statutory rounding would be $7,000 (1.42×5,000). The new maximum penalty amount after applying the 10 percent limit on an initial increase is $5,500.

A similar calculation was done with respect to each CMP subject to the jurisdiction of the Department of Defense. In compliance with the DCIA, the Department of Defense hereby is amending its religions by creating this new part.

This final rule has been issued without prior public notice or opportunity for public comment. The Administrative Procedure Act (5 U.S.C. 553(b)(B)) does not require that process "when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest." In this instance, the Department of Defense finds for good cause, that solicitation of public comment on this final rule is unnecessary and impractical. The Congress has required that the agency issue the amendments contained the rule, and provided no discretion to the agency regarding the substance of the amendments. All that is required of the Department of Defense for determination of the amount of the inflation adjustment are ministerial computations.

It has been determined that 32 CFR part 269 is not a significant rule as defined under section 3(f)(1) through 3(f)(4) of Executive order 12866. The rule does not:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy; a sector of the economy; productivity; competition; jobs; the environment; public health or safety; or State, local or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlement, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandate, the President's priorities, or the principles set forth in Executive Order 12866.

The Department of Defense certifies that this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities. This rule implements statutory authority intended to protect the Department's programs from abusive practices, but will have no adverse or disproportionate economic impact on small businesses.

The Department of Defense certifies that this rule does not impose any reporting or recordkeeping requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 32 CFR Part 269

Administrative practice and procedure, penalties.

Accordingly, Title 32, Chapter I, subchapter M of the Code of Federal Regulations, is amended to add part 269 to read as follows:

PART 269—CIVIL MONETARY PENALTY INFLATION ADJUSTMENT

Sec.

269.1 Scope and purpose.
269.2 Definitions.
269.3 Civil monetary penalty inflation adjustment.
269.4 Cost of living adjustments of civil monetary penalties.
269.5 Application of increase to violations.

Authority: 28 U.S.C. 2461.

§ 269.1 Scope and purpose.

The purpose of this part is to establish a mechanism for the regular adjustment for inflation of civil monetary penalties and to adjust such penalties in conformity with the Federal Civil Penalties Inflation Adjustment Act of 1990, 46 U.S.C. 2461, as amended by the Debt Collection Improvement Act of 1996, Public Law 104–134, April 26, 1996, in order to maintain the deterrent effect of civil monetary penalties and to promote compliance with the law.

§ 269.2 Definitions.

(a) *Department.* The Department of Defense.

(b) *Civil monetary penalty.* Any penalty, fine, or other sanction that:

(1)(i) Is for a specific monetary amount as provided by Federal law; or

(ii) Has a maximum amount provided by Federal law;

(2) Is assessed or enforced by the Department pursuant to Federal law; and

(3) Is assessed or enforced pursuant to an administrative proceeding or a civil action in the Federal Courts.

(c) *Consumer Price Index.* The index for all urban consumers published by the Department of Labor.

§ 269.3 Civil monetary penalty inflation adjustment.

The Department shall, not later than 180 days after the enactment of the Debt Collection Improvement Act on April 23, 1996, and at least once every 4 years thereafter—

(a) By regulation adjustment each civil monetary penalty provided by law within the jurisdiction of the Department of Defense by the inflation adjustment described in § 269.4; and

(b) Publish each such update in the **Federal Register.**

§ 269.4 Cost of living adjustments of civil monetary penalties.

(a) The inflation adjustment under § 269.3 shall be determined by increasing the maximum civil monetary penalty for each civil monetary penalty by the cost-of-living adjustment. Any increase determined under this paragraph shall be rounded to the nearest:

(1) Multiple of $10 in the case of penalties less than or equal to $100;

(2) Multiple of $100 in the case of penalties greater than $100 but less than or equal to $1,000;

(3) Multiple of $1,000 in the case of penalties greater than $1,000 but less than or equal to $10,000;

(4) Multiple of $5,000 in the case of penalties greater than $10,000 but less than or equal to $100,000;

(5) Multiple of $10,000 in the case of penalties greater than $100,000 but less than or equal to $200,000; and

(6) Multiple of $25,000 in the case of penalties greater than $200,000.

(b) For purposes of paragraph (a) of this section, the term "cost-of-living adjustment" means the percentage (if any) for each civil monetary penalty by which the Consumer Price Index for the month of June of the calendar year preceding the adjustment, exceeds the Consumer Price Index for the month of June of the calendar year in which the amount of such civil monetary penalty was last set or adjusted pursuant to law.

(c) *Limitaiton on initial adjustment.* The first adjustment of civil monetary penalty pursuant to § 269.3 may not exceed 10 percent of such penalty.

(d) *Inflation adjustment.* Maximum civil monetary penalties within the jurisdiction of the Department of Defense are adjusted for inflation as follows:

United States Code citation	Civil monetary penalty description	Maximum penalty amount as of 10/23/96	New adjusted maximum penalty amount
10 U.S.C. 1094(c)(1)	Unlawful Provision of Health Care	$5,000	$5,500
10 U.S.C. 1102(k)	Wrongful Disclosure—Medical Records:		
	First Offense	3,000	3,300
	Subsequent Offense	20,000	22,000
31 U.S.C. 1352	Use of Appropriated Funds to Influence Contract:		
	Minimum	10,000	11,000
	Maximum	100,000	110,000
31 U.S.C. 3721(i)	Personal Property Loss Claims from Government Personnel	1,000	1,100
31 U.S.C. 3802(a)(1)	Program Fraud Civil Remedies Act/Violation Involving False Claim	5,000	5,500
31 U.S.C. 3802(a)(2)	Program Fraud Civil Remedies Act/Violation Involving False Statement	5,000	5,500
33 U.S.C. 1319(g)(2)(A)	§404 Permit Condition Violation, Class I (per violation amount)	10,000	11,000
33 U.S.C. 1319(g)(2)(A)	§404 Permit Condition Violation, Class I (maximum amount)	25,000	27,500
33 U.S.C. 1319(g)(2)(B)	§404 Permit Condition Violation, Class II (per day amount)	10,000	11,000
33 U.S.C. 1319(g)(2)(B)	§404 Permit Condition Violation, Class II (maximum amount)	125,000	137,500

§ 269.5 Application of increase to violations.

Any increase in a civil monetary penalty under this part shall apply only to violations which occur after the date the increase takes effect.

Dated: December 18, 1996.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Coast Guard

33 CFR Part 100

[CGD 05–96–113]

RIN 2115 7E46

Special Local Regulations for Marine Events; New Year's Eve Fireworks, Delaware River, Philadelphia, PA

AGENCY: Coast Guard, DOT.

ACTION: Notice of implementation.

SUMMARY: This notice implements 33 CFR 100.509 for the New Year's Eve Fireworks Display, to be held at Penns Landing, in the Delaware River, Philadelphia, Pennsylvania on December 31, 1996. These special local regulations are needed to control vessel traffic in the vicinity of Penns Landing due to the confined nature of the waterway and expected vessel congestion during the event. The effect will be to restrict general navigation in the regulated area for the safety of spectators and other vessels transiting the event area.

EFFECTIVE DATES: 33 CFR 100.509 is effective from 11 p.m., December 31, 1996 until 1:30 a.m., January 1, 1997.

FOR FURTHER INFORMATION CONTACT: Chief Warrant Officer T.J. Donovan, marine events coordinator, Commander, Coast Guard Group Philadelphia, 1 Washington Ave., Philadelphia, PA 19147–4395, (215) 271–4940.

SUPPLEMENTARY INFORMATION: The Philadelphia Convention and Visitors Bureau will sponsor the Neighbors in the New Year fireworks display, to be launched from a barge anchored off Penns Landing, on the Delaware River, Philadelphia, Pennsylvania. A large number of spectator vessels are expected to be in the area to watch the fireworks. Therefore, to ensure the safety of spectators and transiting vessels, 33 CFR 100.509 will be in effect for the duration of the event. Under provisions of 33 CFR 100.509, a vessel may not enter the area between Pier 30 and the Benjamin Franklin Bridge unless it is registered as a participant with the event sponsor or it receives permission from the Coast Guard patrol commander. These restrictions will be in effect for a limited period and should not result in significant disruption of maritime traffic.

Dated: December 5, 1996.

T.M. Cross,

Captain U.S.C.G., Commander, Fifth Coast Guard District, Acting.

Special Local Regulation: Fireworks Displays Within the First Coast Guard District

AGENCY: Coast Guard, DOT.

ACTION: Notice of implementation.

SUMMARY: This document provides notice of the dates and times of the special local regulations contained in 33 CFR 100.114, "Fireworks Displays within the First Coast Guard District." All vessels will be restricted from entering the area of navigable water within a 500 yard radius of the fireworks launch platform for each event listed in the table below. Implementation of these regulations is necessary to control vessel traffic within the regulated area to ensure the safety of spectators.

EFFECTIVE DATE: The regulations in 33 CFR 100.114 are effective from one hour before the January 1, 1997 scheduled start of the event until thirty minutes after the last firework is exploded for each event listed in the table below. The events are listed alphabetically with their corresponding number listed in the special local regulation, 33 CFR 100.114.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander James B. Donovan, Office of Search and Rescue, First Coast Guard District, (617) 223–8278.

DISCUSSION OF NOTICE: This notice implements the special local regulations in 33 CFR 100.114 (61 FR 32329; June 24, 1996). All vessels are prohibited from entering a 500 yard radius of navigable water surrounding the launch platform used in each fireworks display listed below.

Table 1—Fireworks Displays

22. First Night Fireworks
Date: January 1, 1997
Time: 12:00 a.m. to 12:13 a.m.
Location: Vicinity of New England Aquarium, Boston Harbor, MA

RIN 2115–AE 47

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Florida

AGENCY: Coast Guard, DOT.

ACTION: Interim rule with request for comments.

SUMMARY: The Coast Guard is changing the regulations governing the operation of the J.D. Butler (Hillsboro Boulevard/SR 810) drawbridge, mile 1050.0 at Deerfield Beach, by limiting the number of openings during certain periods. This change is being made because of complaints of delays to vehicular traffic during the heavy tourist season period. This action is necessary to accommodate the needs of vehicular traffic flow and provide for the reasonable needs of navigation.

DATES: This rule is effective December 26, 1996. Comments must be received on or before February 24, 1997.

ADDRESSES: Comments may be mailed to the Commander(oan), Seventh Coast Guard District, Bridge Section, Brickell Plaza Federal Building, 909 S.e. First Avenue, Miami, Florida 33131–3050, or may be delivered to room 406 at the same address between 7:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays. The telephone number is (305) 536–5117.

FOR FURTHER INFORMATION CONTACT: Mr. Brodie Rich, Project Manager, Seventh Coast Guard District, Bridge Section at (305) 536–5117.

SUPPLEMENTARY INFORMATION: This rule is being published as an interim rule and is being made effective on the date of publication. This rule is being promulgated without an NPRM because this proposed regulation change is needed immediately due to the large increase in seasonal highway traffic on Hillsboro Boulevard and the greater number of bridge openings being caused by increased vessel traffic along this reach of the Atlantic Intracoastal Waterway. This interim rule was tested with request for comments (61 FR 1524, January 22, 1996) from December 1, 1995 through February 28, 1996. The change in opening schedules helped to relieve seasonal traffic congestion without unreasonably impacting navigation. The Coast Guard did not receive any objections to the temporary deviation during the test period. The interim rule has not changed from the previously tested temporary deviation.

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD07–96–064) and the specific section of this rule to which each comment applies, and give the reason for each comment. Please submit two copies of all comments and attachments in an unbound format, no larger than 8½ by 11 inches, suitable for coping and electronic filing. Persons wanting acknowledgement of receipt of comments should enclose stamped, self-addressed postcards or envelopes.

The Coast Guard will consider all comments received during the comment period. It may change this rule or the assessment in view of the comments received.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the District Commander at the address under **ADDRESSES.** The request should include the reasons why a hearing would be beneficial. If it determines that the opportunity for oral presentation will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The Coast Guard is changing the regulations governing the operation of the J.D. Butler (Hillsboro Boulevard/SR 810) drawbridge, mile 1050.0 at Deerfield Beach, by limiting the number of openings during certain periods. This change is being made because of complaints of delays to vehicular traffic during the heavy tourist season period. This change is being made because of complaints of delays to vehicular traffic during the heavy tourist season period. This four lane roadway which intersects with highway A–1–A, a two-lane roadway immediately east of the drawbridge, becomes extremely congested as vehicles enter and leave the popular beach area. The weekend bridge openings exacerbate this congestion especially during peak periods. This action is necessary to accommodate the needs of vehicular traffic flow and provide for the reasonable needs of the vessel navigation.

On January 30, 1996, the Coast Guard issued Public Notice 8–96 soliciting comments on the test of this regulation from December 1, 1995 through February 28, 1996. No objections were received. This interim rule is unchanged from the temporary deviation with comments published on January 22, 1996.

The interim rule reduces the number of draw openings by changing the existing 20 minute schedule to hour and half-hour openings from 7 a.m. to 6 p.m. on Friday through Sunday and federal holidays. From Monday through Thursday, from 7 a.m. to 6 p.m., the draw will continue to open on the hour, 20 minutes after the hour, and 40 minutes after the hour.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of executive order 12866 and does not require an assessment of potential costs and benefits under section 6(a) (3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. We conclude this because of the infrequent operation of the draw, and public vessels of the United States, tugs with tows, and vessels in a situation where a delay would endanger life or property will continue to be passed through the draw at any time.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this rule will have a significant economic impact on a substantial number of small entities. "Small entities" may include small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their field and governmental jurisdictions with populations of less than 50,000. This rule does not require a general notice of proposed rulemaking and, therefore, is exempt from the requirements of the Act. Although this rule is exempt, the Coast Guard has reviewed it for potential impacts on small entities.

VOL 61 ISS 249 DE 26 1996 UMI

The economic impact will not affect a substantial number of small entities since tugs with tows are exempt and local excursion vessels will be able to plan their passage during the scheduled opening periods.

Therefore, the Coast Guard's position is that this rule will not have a significant economic impact on a substantial number of small entities. If, however, you think that your business or organization qualifies as a small entity and that this rule will have a significant economic impact on your business or organization, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and in what way and to what degree this rule will economically affect it.

Collection of Information

This rule contains no collection-of-information requirements under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*)

Federalism

The Coast Guard has analyzed the rule that under the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that under section 2.B.2.e.(32) of Commandant Instruction M16475.1B, promulgation of operating requirements or procedures for drawbridges is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES**.

Bridges.

Final Regulations

For the reasons set out in the preamble, the Coast Guard amends 33 CFR Part 117 as follows:

PART 117—[AMENDED]

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g); section 117.255 also issued under the authority of Pub. L. 102–587, 106 Stat. 5039.

2. Section 117.261 is amended by revising paragraph (bb) to read as follows:

§ 117.261 Atlantic Intracoastal Waterway from St. Mary's River to Key Largo, FL.

* * * * *

(bb) Hillsboro Boulevard (SR 810) bridge, mile 1050.0 at Deerfield Beach. The draw shall open on signal; except that, from October 1 through May 31, from 7 a.m. to 6 p.m., on Monday through Thursday, the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour; and from 7 a.m. to 6 p.m., on Friday through Sunday and federal holidays, the draw need open only on the hour and half-hour.

33 CFR Part 165

[COTP CHARLESTON 96–072]

RIN 2115–AA97

Safety Zone Regulations; Back River and Foster Creek, Charleston, SC

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for the U.S. Border Patrol Training Academy Small Arms Range at the Charleston Naval Weapons Station. The safety zone will become effective at 12:01 a.m. Eastern Standard Time (EST) on December 1, 1996 and will terminate at 12 a.m. EST on February 1, 1997. This safety zone is needed to protect vessels and personnel from safety hazards associated with small arms fire and is an extension of a previously published rule [COTP Charleston 96–052].

EFFECTIVE DATE: The regulation becomes effective at 12:01 a.m. EST on December 1, 1996 and will terminate at 12 a.m. EST on February 1, 1997 unless terminated earlier by the Captain of the Port.

FOR FURTHER INFORMATION CONTACT: Lieutenant Jeffrey T. Carter, Coast Guard Marine Safety Office Charleston, at (803) 720–7701, between the hours of 7:30 a.m. and 4:00 p.m. EDT, Monday through Friday, except federal holidays.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 533, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days from the date of publication. Following normal rulemaking procedures would have been impractical. The information concerning the need for an extension to the previously published rule was not received with sufficient time to publish proposed rules prior to the event or to provide for a delayed effective date.

Discussion of Regulation

The temporary safety zone, previously published as [COTP] Charleston 96–052], being extended for an additional two months for the U.S. Border Patrol Training Academy Small Arms Range at Charleston Naval Weapons Station. The safety zone will become effective at 12:01 a.m. Eastern Standard Time (EST) on December 1, 1996 and will terminate at 12 a.m. EST on February 1, 1997. This safety zone is needed to protect vessels and personnel from safety hazards associated with small arms fire.

The safety zone will consist of those portions of unnamed tributaries of the Back River and Foster Creek that are generally described as lying south of the main shoreline and extending southward to the northern shoreline of Big Island (U.S. Naval Reservation). Specifically, the area beginning at a point on the main shoreline, which is the northern shore of an unnamed tributary of Back river at position 32–59.19N, 079–56.52W, southwesterly to a point on or near the northern shoreline of Big Island at position 32–59.11N, 079–56;.59W; thence northwesterly to a point on the main shoreline, which is the northern shore of an unnamed tributary of Foster Creek, at position 32–59.16N, 079–57.11W; thence easterly along the main shoreline, which is the northern shore of the unnamed tributaries of Foster Creek and Back River, back to the point beginning at position 32–59.19N, 079–56.52W. All coordinates referenced use datum; NAD 1983. The Captain of the Port has restricted vessel operations in this safety zone. No persons, vehicles or vessels will be allowed to enter or operate within this zone, except as may be authorized by the Captain of the Port, Charleston, South Carolina. This regulation is issued pursuant to 33 U.S.C. 1231, as set out in the authority citation of Part 165.

Regulatory Evaluation

This regulation is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of

Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. Maritime traffic will not be significantly impacted because of the small number of vessels expected to need this safety zone, and the limited area affected by the zone.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. For reasons set forth in the above Regulatory Evaluation, the Coast Guard certifies under 5 U.S.C. 605(b) for the reason stated above that this proposal, if adopted, would not have a significant economic impact on a substantial number of small entities.

Collection of Information

This rule contains no collection-of-information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.).*

Federalism

The Coast Guard has analyzed this proposal under the principles and criteria contained in Executive Order 12612 and has determined that this proposed rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of this rule and concluded that, under paragraph 2.B.2 of Commandant Instruction M16475.1B (as revised by 59 FR 38654, July 29, 1994), this rule is categorically excluded from further environmental documentation. Pursuant to COMDTINST M16475.1B, paragraph (34)(g), an environmental determination has been made that this rule will not significantly affect the environment. A categorical exclusion determination is on file in the rulemaking docket and is available for inspection or copying at the address shown above in the paragraph entitled "For Further Information Contact".

List of Subject in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Safety measures, Waterways.

Regulation

In consideration of the foregoing, subpart C of part 165 of title 33, Code of Federal Regulations, the Coast Guard amends as follows:

PART 165—[AMENDED]

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; 49 CFR 1.46.

2. A new section 165.T96–072 is added to read as follows:

§ 165.T96–072 Safety Zone; Back River and Foster Creek, Charleston, SC.

(a) *Regulated area.* Naval Weapons Station/U.S. Border Patrol Training Academy Small Arms Range. The following area is a safety zone: those portions of unnamed tributaries of the Back River and Foster Creek lying south of the main shoreline and extending southward to the northern shoreline of Big Island (U.S. Naval Reservation) beginning at a point on the main shoreline at position 32–59.19N, 079–56.52W; then to 32–59.11N, 079–56.59W; then to 32–59.16N, 079–57.11W; then back to the point of beginning. All coordinates referenced use datum: NAD 1983.

(b) *Effective dates.* This regulation is effective at 12:01 a.m. Eastern Standard Time (EST) on December 1, 1996 and will terminate at 12 a.m. EST on February 1, 1997 unless sooner terminated by the Captain of the Port, Charleston, SC.

(c) *Regulations.* In accordance with the general regulations in § 165.23 of the this part, entry into the zone is subject to the following requirements:

(1) This safety zone is closed to all persons, vehicles and vessels, except as may be permitted by the Captain of the Port.

(2) Persons desiring to enter or operate vehicles or vessels within the safety zone shall contact the Captain of the Port to obtain permission to do so. Persons given permission to enter or operate in the safety zone shall comply with all directions given them by the Captain of the Port.

(3) The Captain of the Port may be contacted via the Coast Guard Group Charleston operations center at (803) 724–7619 or VHF–FM channel 16.

Dated: November 27, 1996.

M.J. Pontiff,

Commander, U.S. Coast Guard, Captain of the Port, Charleston, South Carolina.

[FR Doc. 96–32835 Filed 12–24–96; 8:45 am]

BILLING CODE 4910–14–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AI43

Adjudication Regulations; Miscellaneous

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: This document amends adjudication regulations by removing obsolete sections, updating authority citations, and making other nonsubstantive changes.

EFFECTIVE DATE: December 26, 1996.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, 810 Vermont Avenue, NW, Washington, DC 20420, telephone (202) 273–7230.

SUPPLEMENTARY INFORMATION: 38 CFR 3.107 contains requirements for processing benefit awards where claims have not been filed by or on behalf of all dependents who may be entitled to monetary benefits. The heading of § 3.107, "Awards where all dependents do not apply", does not accurately reflect its content and we are revising it to read "Awards where not all dependents apply".

38 CFR 3.315(c)(1) (i) and (ii) require basic eligibility determinations under certain circumstances when veterans apply for education benefits under 38 U.S.C. Chapter 34 and Chapter 32, respectively. Since 38 U.S.C. Chapter 34 expired on December 31, 1989, § 3.315(c)(1)(i) is obsolete and we have removed it. The last date that a veteran seeking benefits under 38 U.S.C. Chapter 32 could have entered active duty and not have the two-year service requirement found in 38 U.S.C. 5303A apply was October 16, 1981. If such a veteran also did not meet the 181-day service requirement, that veteran would have been released from active duty before April 16, 1982, and, if found eligible for benefits under 38 U.S.C. Chapter 32, would have had the period of eligibility expire ten years from the date of release from active duty, or no later than April 16, 1992. If such a veteran made a current application for chapter 32 educational benefits, there would be no need for rating board referral in order to adjudicate that claim. Section 3.315(c)(1)(ii) is therefore obsolete and we have removed it.

The references in § 3.315(c)(4) to Post-Korean and Vietnam era service were needed to administer § 3.315(c)(1)(i). Since § 3.315(c)(1)(i) has been removed,

VOL 61 ISS 249 DE 26 1996 UMI

there is no longer any need in § 3.315(c)(4) to refer to service between January 31, 1955, and August 5, 1964, and during the Vietnam era. We have revised § 3.315(c)(4) accordingly. As there is no longer any need to refer to 38 U.S.C. 3452(a) in the authority citation following § 3.315(c), we have removed that reference. Also, that authority citation contains an incorrect reference to "10 U.S.C. 2133(b)". The correct reference is "10 U.S.C. 16133(b)", and we have revised the reference accordingly. Sections 3.315(c)(3)(i) and 3.1000(g) contain incorrect references to "10 U.S.C. Chapter 106". The correct reference is "10 U.S.C. Chapter 1606", and we have revised the references accordingly.

38 CFR 3.400(d) is being deleted because it merely restates a statute and its provisions have become obsolete.

When the Social Security Administration (SSA) has notified the Department of Veterans Affairs (VA) that payments to any individual have been authorized pursuant to section 217(b)(2) of the Social Security Act (42 U.S.C. 417(b)(2)), 38 CFR 3.709 requires VA to notify SSA of any determination that death pension, compensation, or dependency and indemnity compensation is payable to any dependent of the veteran. Section 5117 of Pub. L. 101–508 revised 42 U.S.C. 417(b)(2) so that it applied only to individuals applying for SSA benefits before the end of the 18-month period after the month in which Pub. L. 101–508 was enacted. Since that 18-month period expired on June 1, 1992, 38 CFR 3.709 is obsolete and we have removed it.

38 CFR 3.712(a) concerns the election of improved pension by Spanish-American War veterans. However, there are no Spanish-American War veterans currently receiving monetary benefits from VA. Consequently, § 3.712(a) is no longer required and is removed. Since the remainder of § 3.712 concerns surviving spouses only, we have revised the heading to read "Improved pension elections; surviving spouses of Spanish-American War veterans", and redesignated paragraphs (b)(1) and (b)(2) as paragraphs (a) and (b), respectively.

Pub. L. 95–588 completely revised the statutory framework for VA pension benefits effective January 1, 1979. 38 CFR 3.961 states that pension claims pending on December 31, 1978, will be adjudicated under title 38 U.S.C. as in effect on December 31, 1978, and that pension claims filed after December 31, 1978, will be adjudicated under title 38 U.S.C. as in effect on January 1, 1979 or thereafter. 38 CFR 3.962 states that claims filed after December 31, 1978, will generally be adjudicated under title 38 U.S.C. as in effect on December 31, 1978, if entitlement is based on permanent and total disability that existed or death that occurred prior to January 1, 1979.

Since such claims have long since been adjudicated, §§ 3.961 and 3.962 are obsolete and we have removed them.

This final rule makes nonsubstantive changes. Accordingly, this final rule is promulgated without regard to the notice-and-comment and effective-date provisions of 5 U.S.C. 553.

Because no notice of proposed rulemaking was required in connection with the adoption of this final rule, no regulatory flexibility analysis is required under the Regulatory Flexibility Act (5 U.S.C. 601–612). Even so, the Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act. The final rule only makes nonsubstantive changes.

The Catalog of Federal Domestic Assistance program numbers are 64.104, 64.105, 64.109, and 64.110.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Disability benefits, Health care, Pensions, Veterans, Vietnam.

Approved: November 21, 1996.

Jesse Brown,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR part 3 is amended as follows:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A continues to read as follows:

Authority: 38 U.S.C. 501(a), unless otherwise noted.

2. In § 3.107, the section heading is revised to read as follows:

§ 3.107 Awards where not all dependents apply.

* * * * *

§ 3.315 [Amended]

3. In § 3.315, remove paragraphs (c)(1)(i) and (c)(1)(ii) are removed, and paragraphs (c)(1)(iii) and (c)(1)(iv) are redesignated as paragraphs (c)(1)(i) and (c)(1)(ii), respectively. Paragraph (c)(3)(i) is amended by removing "10 U.S.C. chapter 106" and adding, in its place, "10 U.S.C. Chapter 1606"; and paragraph (c)(4) is amended by removing "after January 31, 1955, and before August 5, 1964, or after May 7, 1975, and § 3.306(b) based on service rendered during the Vietnam era" and adding, in its place, "after May 7, 1975"; and the authority citation following paragraph (c)(4) is revised to read as follows:

§ 3.315 Basic eligibility determinations; dependents, loans, education.

* * * * *

(Authority: 38 U.S.C. 3011(a)(1)(A)(ii), 3012(b)(1), 3202(1)(A), 10 U.S.C. 16133(b))

§ 3.400 [Amended]

4. In § 3.400 paragraph(d) is removed.

§ 3.709 [Removed]

5. Section 3.709 is removed.

§ 3.712 [Amended]

6. In § 3.712, paragraph (a) and the heading for paragraph (b) are removed, paragraphs (b)(1) and (b)(2) are redesignated as paragraphs (a) and (b), respectively; the section heading is revised to read as follows:

§ 3.712 Improved pension elections; surviving spouses of Spanish-American War veterans.

* * * * *

§ 3.961 [Removed]

7. Section 3.961 is removed.

§ 3.962 [Removed]

8. Section 3.962 is removed.

§ 3.1000 [Amended]

9. In § 3.1000, paragraph(g) is amended by removing "10 U.S.C. chapter 106", and adding, in its place, "10 U.S.C. chapter 1606". •

[FR Doc. 96–32726 Filed 12–24–96; 8:45 am]

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 9

[FRL–5670–1]

OMB Approval Numbers Under the Paperwork Reduction Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Technical amendment.

SUMMARY: In compliance with the Paperwork Reduction Act, this document displays the Office of Management and Budget (OMB) control numbers issued under the Paperwork Reduction Act (PRA) for the Criteria for Classification of Solid Waste Disposal Facilities and Practices.

EFFECTIVE DATE: December 26, 1996.

FOR FURTHER INFORMATION CONTACT: Paul Cassidy of the Industrial and Extractive Waste Branch, Office of Solid Waste at (703) 308–7281.

SUPPLEMENTARY INFORMATION: EPA is today amending the table of currently approved information collection request (ICR) control numbers issued by OMB for various regulations. Today's amendment updates the table to accurately display those information requirements promulgated under the Criteria for Classification of Solid Waste Disposal Facilities and Practices which appeared in the **Federal Register** on July 1, 1996 (61 FR 34252). The affected regulations are codified at 40 CFR Part 257—Subpart B. EPA will continue to present OMB control numbers in a consolidated table format to be codified in 40 CFR part 9 of the Agency's regulations, and in each CFR volume containing EPA regulations. The table lists the section numbers with reporting and recordkeeping requirements, and the current OMB control numbers. This display of the OMB control number(s) and its(their) subsequent codification in the Code of Federal Regulations satisfies the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and OMB's implementing regulations at 5 CFR 1320.

This ICR was previously subject to public notice and comment prior to OMB approval. As a result, EPA finds that there is "good cause" under section 553(b)(B) and (d)(3) of the Administrative Procedure Act (5 U.S.C. 553(b)(B) and (d)(3)) to amend this table without further notice and comment. Due to the technical nature of the table, further notice and comment would be unnecessary.

List of Subjects in 40 CFR Part 9

Environmental Protection, reporting and recordkeeping requirements.

Dated: November 25, 1996.

Elliott P. Laws,

Assistant Administrator Office of Solid Waste and Emergency Response.

For the reasons set out in the preamble 40 CFR part 9 is amended as follows:

1. The authority citation for part 9 continues to read as follows:

Authority: 7 U.S.C. 135 *et seq.*, 136–136y; 15 U.S.C. 2001, 2003, 2005, 2006, 2601–2671; 21 U.S.C. 331j, 346a, 348; 31 U.S.C. 9701; 33 U.S.C. 1251 *et seq.*, 1311, 1313d, 1314, 1321, 1326, 1330, 1344, 1345 (d) and (e), 1361; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp. p. 973; 42 U.S.C. 241, 242b, 243, 246, 300f, 300g, 300g–1, 300g–2, 300g–3, 300g–4, 300g–5, 300g–6, 300j–1, 300j–2, 300j–3, 300j–4, 300j–9, 1857 *et seq.*, 6901–6992k, 7401–7671q, 7542, 9601–9657, 11023, 11048.

2. In Section 9.1, the table is amended by adding the new entries under the indicated hearing to read as follows:

§ 9.1 OMB approvals under the Paperwork Reduction Act.

BILLING CODE 6560–50–M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 301–6

[FTR Amendment 55]

RIN 3090–AG23

Federal Travel Regulation; Repeal of Long-Distance Telephone Call Certification Requirement

AGENCY: Office of Governmentwide Policy, GSA.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal Travel Regulation (FTR) to remove the long-distance telephone call certification requirement. This amendment will reduce agency administrative costs by easing the processing of reimbursement claims.

DATES: This final rule is effective March 22, 1997, and applies for travel (including travel incident to a change of official station) performed on or after March 22, 1997.

FOR FURTHER INFORMATION CONTACT: Robert A. Clauson, Travel and Transportation Management Policy Division (MTT), Washington, DC 20405, telephone 202–501–0299.

SUPPLEMENTARY INFORMATION: A multi-agency travel reinvention task force was organized in August 1994 under the auspices of the Joint Financial Management Improvement Program (JFMIP) to reengineer Federal travel rules and procedures. The task force developed 25 recommended travel management improvements published in a JFMIP report entitled *Improving Travel Management Governmentwide*, dated December 1995. On September 23, 1996, the President signed into law the Federal Employee Travel Reform Act of 1996 (Public Law 104–201), which included 8 legislative changes recommended by the JFMIP to improve travel and relocation.

This amendment implements section 1721 of the Act which eliminates the requirement in 31 U.S.C. 1348(b) that the agency head certify each long-distance telephone call as necessary in the interest of the Government.

The General Services Administration (GSA) has determined that this rule is not a significant regulatory action for the purposes of Executive Order 12866 of September 30, 1993. This final rule is not required to be published in the **Federal Register** for notice and comment. Therefore, the Regulatory Flexibility Act does not apply. This rule also is exempt from congressional review prescribed under 5 U.S.C. 801 since it relates solely to agency management and personnel.

List of Subjects in 41 CFR Part 301–6

Government employees, Travel, Travel allowances, Travel and transportation expenses.

For the reasons set out in the preamble, 41 CFR part 301–6 is amended as follows:

PART 301–6—COMMUNICATIONS SERVICES

1. The authority citation for part 301–6 continues to read as follows:

Authority: 5 U.S.C. 5707.

§ 301–6.4 [Amended]

2. Section 301–6.4 is amended by removing the cite "(31 U.S.C. 1348(b))" in paragraph (c), and by removing the reference "Federal Information Resources Management Regulation (FIRMR) (41 CFR 201–21.600 through 201–21.602)" and adding in its place the reference "Federal Property Management Regulations (FPMR), 41 CFR 101–35.201".

§ 301–6.5 [Reserved]

3. Section 301–6.5 is removed and reserved.

Dated: November 27, 1996.

David J. Barram,

Acting Administrator of General Services.

[FR Doc. 96–32713 Filed 12–24–96; 8:45 am]

BILLING CODE 6820–34–M

DEPARTMENT OF DEFENSE

48 CFR Parts 249 and 252

[DFARS Case 96–D321]

Defense Federal Acquisition Regulation Supplement; Downsizing Notice

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: The Director of Defense Procurement has issued a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement Section 825 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104–201). Section 825 repeals the requirements for the Secretary of Defense to notify the Secretary of Labor if a modification or termination for convenience of a major defense contract or subcontract will have a substantial impact on employment.

EFFECTIVE DATE: December 26, 1996.

FOR FURTHER INFORMATION CONTACT: Mr. Richard G. Layser, PDUSD (AT&T) DP (DAR), Defense Acquisition Regulations Council, IMD 3D139, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0131; telefax (703) 602–0350. Please cite DFARS Case 96–D321 in all correspondence related to this issue.

SUPPLEMENTARY INFORMATION:

A. Background

Section 825 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104–201) repeals Sections 4101 and 4201 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101–510; 10 U.S.C. 2391 note). This final rule removes the DFARS language that implemented Sections 4101 and 4201.

C. Regulatory Flexibility Act

This final rule does not constitute a significant revision within the meaning of FAR 1.501 and Public Law 98–577, and publication for public comment is not required. However, comments from small entities concerning the affected DFARS subparts will be considered in accordance with 5 U.S.C. 610. Such comments should cite DFARS Case 96–D321 in correspondence.

D. Paperwork Reduction Act

This final rule removes the information collection requirement previously approved by the Office of Management and Budget (OMB) under OMB Control Number 0704–0327.

List of Subjects in 48 CFR Parts 249 and 252

Government procurement.

Michele P. Peterson,

Executive Editor, Defense Acquisition Regulations Council.

Therefore, 48 CFR Parts 249 and 252 are amended as follows:

1. The authority citation for 48 CFR Parts 249 and 252 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 249—TERMINATION OF CONTRACTS

249.102 [Removed]

2. Section 249.102 is removed.

249.7002 [Removed and Reserved]

3. Section 249.7002 is removed and reserved.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

252.249–7001 [Removed and Reserved]

4. Section 252.249–7001 is removed and reserved..

[FR Doc. 96–32667 Filed 12–24–96; 8:45 am]

BILLING CODE 5000–04–M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[OST Docket No. 1; Amdt. 1–281]

Organization and Delegation of Powers and Duties; Delegation to the Commandant; United States Coast Guard

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: The Secretary of Transportation is delegating to the Commandant, United States Coast Guard, the authority contained in 46 U.S.C. Chapter 33, pertaining to the delegation of authority to classification societies to review and approve commercial vessel plans and conduct commercial vessel inspections and examinations. In order that the Code of Federal Regulations reflect this delegation, a change is necessary.

EFFECTIVE DATE: December 26, 1996.

FOR FURTHER INFORMATION CONTACT: LCDR George P. Cummings, Marine Safety and Environmental Protection (G–MSE–1), (202) 267–2997, U.S. Coast Guard, 2100 Second Street, SW, Washington, DC 20593; or Ms. Gwyneth Radloff, Office of the General Council, C–50, (202) 366–9305, Department of Transportation, 400 Seventh Street, SW, Washington, DC 20590.

SUPPLEMENTARY INFORMATION: Public Law 104–324 is the Coast Guard Authorization Act of 1996, (hereafter referred to as the Act). Section 3316 of title 46, U.S. Code, was amended by the Act to allow the Secretary to delegate to the American Bureau of Shipping or another classification society the authority to approve vessel plans, conduct vessel inspections, and issue a certificate of inspection and other related documents. The Secretary of Transportation is delegating his authority under the Act to the Commandant of the Coast Guard.

This rule adds a specific delegation of authority to 49 CFR 1.46, thus amending the codification to reflect the Secretarial delegation of authority to the Commandant of the Coast Guard.

Since this amendment relates to departmental management, organization, procedure, and practice, notice and comment on it are unnecessary under 5 U.S.C. 553(b). Further, since the amendment expedites the Coast Guard's ability to meet the needs of the U.S. maritime industry, the Secretary finds good cause under 5 U.S.C. 553(d)(3) for the final rule to be effective on the date of publication in the **Federal Register**.

List of Subjects in 49 CFR Part 1

Authority delegations (Government agencies), Organization and functions (Government agencies).

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulations, is amended as follows:

PART 1—[AMENDED]

1. The authority citation for Part 1 continues to read as follows:

Authority: 49 U.S.C. 322; Pub. L. 101–552, 28 U.S.C. 2672, 31 U.S.C. 3711(a)(2).

2. Section 1.46 is amended by adding a new paragraph (ddd) to read as follows:

§ 1.46 Delegations to Commandant of the Coast Guard.

* * * * *

(ddd) Carry out the functions and exercise the authority vested in the Secretary by 46 U.S. Code Chapter 33 pertaining to the delegation of authority to classification societies to review and approve commercial vessel plans and conduct commercial vessel inspections and examinations, as enacted by the Coast Guard Authorization Act of 1996, title 46, section 3316 (classification

societies), Pub. L. 104–324, 110 Stat. 3901.

Issued at Washington, DC, this 18th day of December, 1996.

Federico Peña,

Secretary of Transportation.

[FR Doc. 96–32723 Filed 12–24–96; 8:45 am]

BILLING CODE 4910–62–P

National Highway Traffic Safety Administration

49 CFR Part 572

[Docket No. 74–14; Notice 104]

RIN 2127–AF41

Anthropomorphic Test Dummy; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends the specifications for the Hybrid III test dummy. The dummy is specified by the agency for use in compliance testing under Standard No. 208, *Occupant Crash Protection.* The amendments make minor modifications of the femurs and ankles to improve biofidelity. While there may be some minimal effect on HIC, chest, and femur test data, the improvement in data quality and reliability will more than offset these differences and make the dummy more useful in tests at more severe impact conditions of some research and vehicle development programs. This rule does not include any amendments based on a proposal to adopt a neck shield for the Hybrid III test dummy.

DATES: *Effective Date:* The amendments made in this rule are effective June 25, 1997.

Incorporation by Reference Date: The incorporation by reference of the material listed in this document is approved by the Director of the Federal Register as of June 25, 1997.

Petition Date: Any petitions for reconsideration must be received by NHTSA no later than February 10, 1997.

ADDRESSES: Any petitions for reconsideration should refer to the docket and notice number of this notice and be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: The following persons at the National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590:

For non-legal issues: Mr. Stanley Backaitis, Office of Crashworthiness Standards, NPS–10, telephone (202) 366–4912, facsimile (202) 366–4329, electronic mail "sbackaitis@nhtsa.dot.gov".

For legal issues: Mr. Steve Wood, Office of the Chief Counsel, NCC–20, telephone (202) 366–2992, facsimile (202) 366–3820, electronic mail "swood@nhtsa.dot.gov".

SUPPLEMENTARY INFORMATION: Standard No. 208, *Occupant Crash Protection,* currently permits the use of either the Hybrid III test dummy or the older Hybrid II dummy in compliance testing. Effective September 1, 1997, however, the Standard will specify the use of a single dummy, the Hybrid III dummy. The specifications for the Hybrid III dummy appear in subpart E of 49 CFR part 572.

The Hybrid III dummy has been widely used in recent years. In addition to increasingly using the dummy for Standard No. 208 certification purposes, many manufacturers use this advanced dummy in their research and developmental testing. In addition, NHTSA uses the Hybrid III dummy in its New Car Assessment Program (NCAP).

In petitions for rulemaking, vehicle manufacturers identified three areas in which they believe the dummy should be improved. These areas are (1) increased ankle dorsiflexion motion, (2) use of a soft foam neck shield, and (3) increased femur flexion ranges. The first two of these areas were identified by Ford in a petition submitted in March 1991. The third was identified in petitions submitted by Toyota, Honda, and Nissan between September 1993 and April 1994.

NHTSA granted each of the petitions for rulemaking and conducted extensive analysis, including a test program, of the issues raised in the petitions. Among other actions, the agency consulted with the Society of Automotive Engineers (SAE) Human Biomechanics and Simulations Committee.

Subsequently, on June 30, 1995, the agency published a Notice of Proposed Rulemaking (NPRM) proposing minor modifications of the femurs and ankles of the Hybrid III dummy (60 FR 34213). The NPRM also proposed to specify the use of a neck shield. The NPRM stated that the proposed changes would have no effect on Standard No. 208 test results, but would make the Hybrid III test dummy more useful for use in research and vehicle development programs which involve more severe impact conditions.

The agency received 17 responses to the NPRM. In general, commenters supported the proposed amendments to the femurs and ankles, but not the use of a neck shield. All comments were considered and the most significant ones are addressed below.

Femur/Hip Modifications

In the NPRM, the agency proposed modifications to the femurs at the hip joint to assure the same motion range between the right and left femurs and to prevent metal to metal contact or hard contact impacts from occurring with the pelvis bone at maximum femur flexion. In addition, the agency proposed the addition of a calibration test for hip joint-femur flexion. None of the commenters disagreed with these proposals. However, some commenters raised some issues related to them.

Advocates for Highway and Auto Safety (Advocates) supported the goal of the proposed changes, but questioned whether there would be trade-offs among the various injury measures that affected safety. Since the NPRM was published, the agency has conducted additional testing to evaluate the effects of hip joint changes on the dummy response. This evaluation showed a slight decrease (up to 10%) in passenger chest G's, and a slight increase (up to 5%) in driver chest G's. Head Injury Criteria (HIC) showed an increase of more than 10% in some tests; however, this is not of great concern because it occurred only when there was a low baseline HIC (15% to 60% of the maximum limit). Despite these minor differences, the agency believes the effects of the modifications are positive overall because they will produce more consistent and less spike-contaminated impact responses. These improvements will result from the elimination of non-uniform ranges of motions between the left and right legs, and from the prevention of metallic impacts between the femur shafts and the pelvis.

Two commenters, Ford and Chrysler, supported the proposal but also stated that load transmission from the femurs and hips through the lumbar spine is not biofidelic. Neither commenter provided details regarding how this alleged problem should be addressed. Because the dummy is constructed from different materials than the human body, it can never be completely biofidelic. This final rule addresses identified problems concerning inadequate femur flexion and possible metal-to-metal contacts. As such, the final rule increases the biofidelity of the dummy. Consideration of other areas of biofidelity should be the subject of future research.

Four commenters (Ford, General Motors (GM), Toyota, and, Transportation Research Center (TRC))

raised issues concerning femur loading level during the calibration test. NHTSA proposed a 50 ft-lbf torque maximum between 20 and 34 degrees of rotation and a 250 ft-lbf torque maximum between 44 and 52 degrees. Toyota commented that the 250 ft-lbf loading level was too high and could prematurely damage the femur bumper. GM and TRC also commented that the level was too high and recommended a level of 150 ft-lbf. Comments were also received on the range of femur rotation during the calibration test.

After reviewing these comments, the agency has decided to modify the calibration test. NHTSA agrees that the femur should be capable of flexion rotation of at least 52 degrees without the bumper. But it also agrees that, in bumper loading tests, 250 ft-lbf can compress the bumper to the extent that it could begin to fall apart. The new requirements specify that a load of 50 ft-lbf cannot be exceeded before the femur rotates 36 degrees, and that a load of 150 ft-lbf must be reached after the femur rotates 46 degrees, and before it rotates 52 degrees.

Several commenters recommended adoption of the SAE test procedure for the hip joint (SAE Engineering Aid 23—Final Draft (August 1995)). Because only limited numbers of vehicle manufacturers have experience with this procedure, NHTSA believes that it would be desirable to review it further to determine its objectivity and acceptability. The agency will review the procedure and propose it in a future rulemaking, if appropriate.

The amendments adopted in this final rule include revisions to the upper bone parts (drawings 78051–108, –109) and the addition of bolt-on urethane bumpers (drawings 78051–498–1, –2). The right and left femurs are redesigned to allow identical motion ranges in the dorsiflexion direction. The cost of replacement femurs is estimated at approximately $2,400 per dummy.

Foot/Ankle Modifications

In the NPRM, the agency proposed to modify the ankle to allow 45 degrees of dorsiflexion instead of the current 30 degrees. With one exception, commenters supported this proposal. The exception was Advocates, which expressed concern that the change could alter dummy response and allow increased injuries. Agency research shows no measurable change in dummy response during Standard No. 208 testing as a result of the increased dorsiflexion. Therefore, NHTSA is adopting the changes.

The changes to the ankle rotation to allow increased dorsiflexion necessitate relocation of the center of the ankle joint and a rearrangement of the foot. The modifications to the foot and ankle involve the relocation of the ankle ball joint and associated revisions of the foot skeletal structure, reorientation of the foot plate, and a revised casting of the foot flesh, while retaining essentially the same exterior surfaces. The modified drawings are 78051–600, –601, and –611, and 7310–1, and –2. The cost of a modified foot is $305, or $610 per dummy. The cost of a bumper and its retainer washer is $200 per foot, or $400 per dummy.

Neck Shield

Last, in response to the Ford petition, the agency proposed to specify the use of a neck shield for the Hybrid III dummy. A number of commenters questioned the need for the neck shield, stating that they had not experienced problems that necessitated its use. In addition, commenters questioned whether the design of the neck shield would adversely affect the head/neck interaction.

As indicated in the NPRM, NHTSA has no data indicating that a neck shield is necessary, but was willing to consider specifying its use to alleviate alleged problems if there were no adverse effects. No data was submitted to indicate that a neck shield cannot have the undesirable consequences some commenters suggested. Given this, the agency is not specifying a neck shield for the Hybrid III dummy at this time. NHTSA notes that the dummy specified in Part 572 is the dummy that NHTSA must use in its compliance testing. However, manufacturers are free to use another dummy or even another test when certifying their vehicles, provided they can demonstrate that they have exercised due care in certifying compliance. Therefore, a manufacturer could use the neck shield without it being specified by NHTSA. NHTSA will continue to monitor this issue and would reconsider adopting a specification if a need was demonstrated.

Effective Date

The agency proposed to make the amendments effective 30 days after publication of a final rule. TRW, Ford, GM and Nissan support the proposed effective date. Honda suggested a 90 day effective date, while Volkswagen suggested 180 days. Dummy manufacturers state that some dummy users have already begun using replacement parts for the femur/hip modifications. They also noted that users should be able to obtain any new femur within 30 days, and modified foot/ankle assemblies in less than eight weeks.

To provide maximum flexibility, NHTSA has decided to make this rule effective 180 days following the date of publication. All manufacturers said they would be able to comply with this effective date. NHTSA will begin using the modified dummy for all vehicles manufactured after this date. Manufacturers, of course, may begin using the modified components for their purposes prior to that date.

Other Comments

Commenters also raised issues concerning a lower lumbar spine load cell and the access holes in the pelvis assembly. These issues are outside the scope of the NPRM and cannot be addressed in this final rule. However, NHTSA will consider these comments in a future agency rulemaking.

Rulemaking Analyses and Notices

Executive Order 12866 and DOT Regulatory Policies and Procedures

NHTSA has considered the impact of this rulemaking action under E.O. 12866 and the Department of Transportation's regulatory policies and procedures. This rulemaking document was not reviewed under E.O. 12866, "Regulatory Planning and Review." This action has been determined to be not "significant" under the Department of Transportation's regulatory policies and procedures. Replacement costs for existing dummies would be approximately $3,410. These changes are being made to allow manufacturers to use the same dummy for research purposes as they use for compliance certification purposes. There will be no impact on the ability of manufacturers to comply with NHTSA's standards.

Regulatory Flexibility Act

NHTSA has also considered the impacts of this final rule under the Regulatory Flexibility Act. I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities. As explained above, there will not be a significant economic impact on purchasers of either dummies or vehicles as a result of this rule.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (P.L. 96–511), there are no requirements for information collection associated with this final rule.

National Environmental Policy Act

NHTSA has also analyzed this final rule under the National Environmental

Policy Act and determined that it will not have a significant impact on the human environment.

Executive Order 12612 (Federalism)

NHTSA has analyzed this rule in accordance with the principles and criteria contained in E.O. 12612, and has determined that this rule will not have significant federalism implications to warrant the preparation of a Federalism Assessment.

Civil Justice Reform

This final rule does not have any retroactive effect. Under 49 U.S.C. 30103, whenever a Federal motor vehicle safety standard is in effect, a State may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard, except to the extent that the State requirement imposes a higher level of performance and applies only to vehicles procured for the State's use. 49 U.S.C. 30161 sets forth a procedure for judicial review of final rules establishing, amending or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

List of Subjects in 49 CFR Part 572

Incorporation by reference, Motor vehicle safety.

In consideration of the foregoing, 49 CFR Part 572 is amended as follows:

PART 572—[AMENDED]

1. The authority citation for Part 572 of Title 49 continues to read as follows:

Authority: 49 U.S.C. 322, 30111, 30115, 30117, and 30166; delegation of authority at 49 CFR 1.50.

Subpart E—Hybrid III Test Dummy

2. Section 572.30 is amended by revising paragraph (b) to read as follows:

§ 572.30 Incorporated materials.

(a) * * *

(b) The materials incorporated by reference are available for examination in the general reference section of docket 74–14, Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW, Washington, DC 20590. Copies may be obtained from Reprographic Technologies, 9000 Virginia Manor Road, Beltsville, MD 20705, Telephone (301) 210–5600, Facsimile (301) 419–5069, Attn. Mr. Jay Wall. Drawings and specifications are also on file in the reference library of the Office of the Federal Register, 800 N. Capitol Street, NW., suite 700, Washington, DC.

3. Section 572.31 is amended by revising paragraphs (a)(1), (a)(3), and (a)(4) to read as follows, by removing paragraph (b), by redesignating paragraphs (c) through (f) as paragraphs (b) through (e) and by revising redesignated paragraph (d) to read as follows:

§ 572.31 General description.

(a) * * *

(1) The Anthropomorphic Test Dummy Parts List, dated September 9, 1996, and containing 16 pages.

* * * * *

(3) A General Motors Drawing No. 78051–218, revision S, titled "Hybrid III Anthropomorphic Test Dummy," dated May 20, 1978, the following component assemblies, and subordinate drawings:

Drawing No.	Revision
78051–61 head assembly—complete, dated May 20, 1978	(T)
78051–90 neck assembly—complete, dated May 20, 1978	(A)
78051–89 upper torso assembly—complete, dated May 20, 1978	(K)
78051–70 lower torso assembly—complete, dated August 20, 1996, except for drawing No. 78051–55, "Instrumentation Assembly—Pelvic Accelerometer," dated August 2, 1979.	(E)
86–5001–001 leg assembly—complete (LH), dated March 26, 1996	(A)
86–5001–002 leg assembly—complete (RH), dated March 26, 1996	(A)
78051–123 arm assembly—complete (LH), dated May 20, 1996	(D)
78051–124 arm assembly—complete (RH), dated May 20, 1978	(D)

(4) Disassembly, Inspection, Assembly and Limbs Adjustment Procedures for the Hybrid III dummy, dated September 1996.

* * * * *

(d) The weights, inertial properties and centers of gravity location of component assemblies shall conform to those listed in drawing 78051–338, revision S, titled "Segment Weights, Inertial Properties, Center of Gravity Location—Hybrid III," dated May 20, 1978 of drawing No. 78051–218.

* * * * *

4. Section 572.35 is amended by moving Figure 24 to the end of paragraph (c); revising paragraphs (a) through (c); and adding Figures 25 through 27 after Figure 24 at the end of the section, to read as follows:

§ 572.35 Limbs.

(a) The limbs consist of the following assemblies: leg assemblies 86–5001–001, revisinn A and –002, revision A, and arm assemblies 78051–123, revision D and –124, revision D, and shall conform to the drawings subtended therein.

(b) *Femur impact response.* (1) When each knee of the leg assemblies is impacted in accordance with paragraph (b)(2) of this section, at 6.9 ft/sec ±0.10 ft/sec by the pendulum defined in § 572.36(b), the peak knee impact force, which is a product of pendulum mass and acceleration, shall have a minimum value of not less than 1060 pounds and a maximum value of not more than 1300 pounds.

(2) *Test procedure.* (i) The test material consists of leg assemblies (86–5001–001, revision A) left and (–002, revision A) right with upper leg assemblies (78051–46) left and (78051–47) right removed. The load cell simulator (78051–319, revision A) is used to secure the knee cap assemblies (79051–16, revision B) as shown in Figure 24).

(ii) Soak the test material in a test environment at any temperature between 66 degrees F to 78 degrees F and at a relative humidity from 10% to 70% for a period of at least four hours prior to its application in a test.

(iii) Mount the test material with the leg assembly secured through the load cell simulator to a rigid surface as shown in Figure 24. No contact is permitted between the foot and any other exterior surfaces.

(iv) Place the longitudinal centerline of the test probe so that at contact with the knee it is collinear within 2 degrees with the longitudinal centerline of the femur load cell simulator.

(v) Guide the pendulum so that there is no significant lateral, vertical or rotational movement at time zero.

(vi) Impact the knee with the test probe so that the longitudinal centerline

of the test probe at the instant of impact falls within .5 degrees of a horizontal line parallel to the femur load cell simulator at time zero.

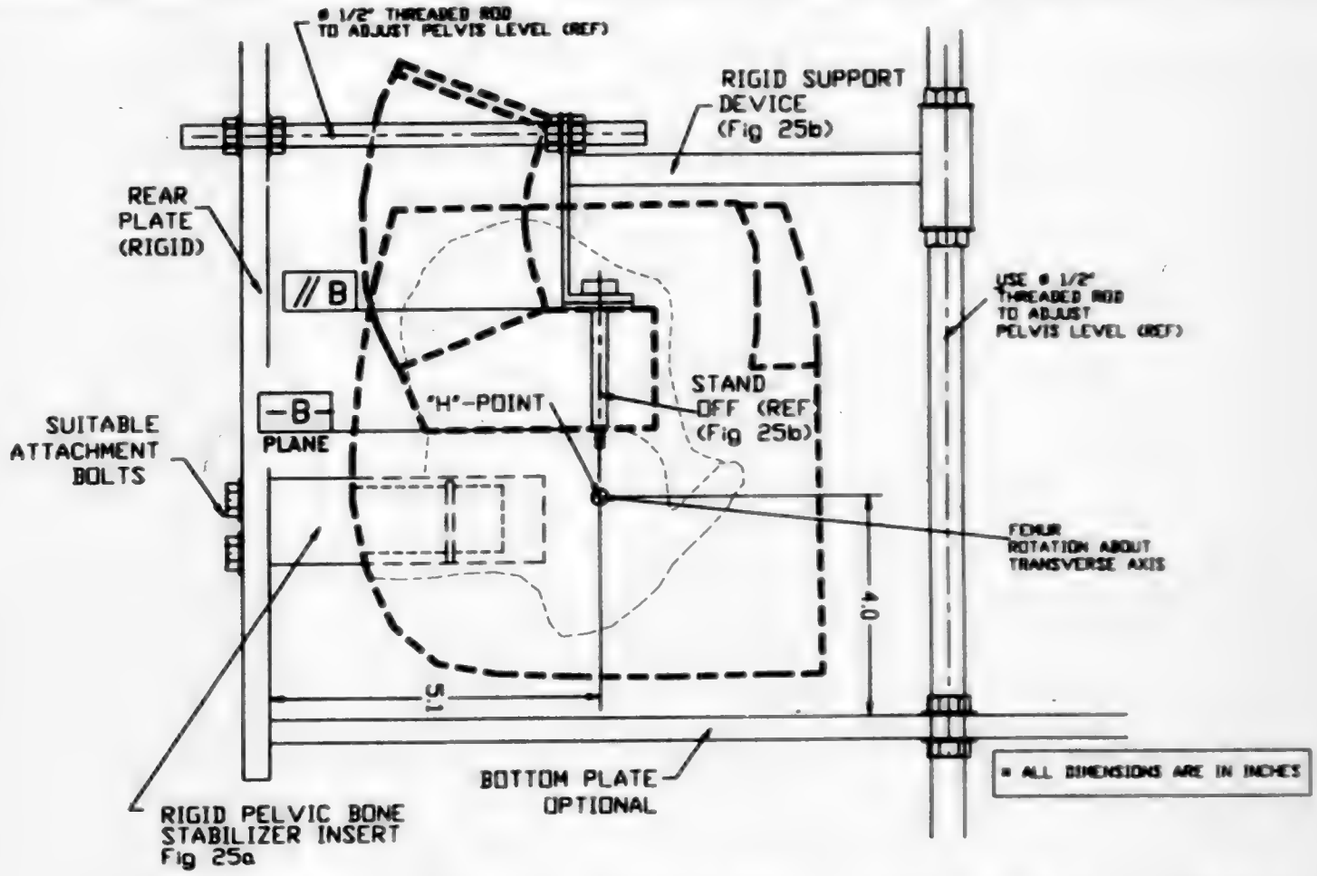
(vii) Time zero is defined as the time of contact between the test probe and the knee.

(c) *Hip joint-femur flexion.* (1) When each femur is rotated in the flexion direction in accordance with paragraph (c)(2) of this section, the femur rotation at 50 ft–lbf of torque will not be more than 36 deg. from its initial horizontal orientation, and at 150 ft–lbf of torque will not be less than 46 deg. or more than 52 deg.

(2) Test procedure. (i) The test material consists of the assembled dummy, part No. 78051–218 (revision S) except that (1) leg assemblies (86–5001–001 and 002) are separated from the dummy by removing the 3/8–16 Socket Head Cap Screw (SHCS) (78051–99) but retaining the structural assembly of the upper legs (78051–43 and –44), (2) the abdominal insert (78051–52) is removed and (3) the instrument cover plate (78051–13) in the pelvic bone is replaced by a rigid pelvic bone stabilizer insert (Figure 25a) and firmly secured.

(ii) Seat the dummy on a rigid seat fixture (Figure 25) and firmly secure it to the seat back by bolting the stabilizer insert and the rigid support device (Figure 25b) to the seat back of the test fixture (Figures 26 and 27) while maintaining the pelvis (78051–58) "B" plane horizontal.

(iii) Insert a lever arm into the femur shaft opening of the upper leg structure assembly (78051–43/44) and firmly secure it using the 3/8–16 socket head cap screws.



(iv) Lift the lever arm parallel to the midsagittal plane at a rotation rate of 5 to 10 deg. per second while maintaining the 1/2 in. shoulder bolt longitudinal centerline horizontal throughout the range of motion until the 150 ft–lbf torque level is reached. Record the torque and angle of rotation of the femur.

(v) Operating environment and temperature are the same as specified in paragraph (c)(3) of this section.

BILLING CODE 4910–59–P

Federal Transit Administration

49 CFR Parts 653 and 654

Prevention of Prohibited Drug Use in Transit Operations; Prevention of Alcohol Misuse in Transit Operations

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of random drug and alcohol testing rate.

SUMMARY: This notice announces the random testing rate for employers subject to the Federal Transit Administration's (FTA) drug and alcohol rules.

EFFECTIVE DATE: January 1, 1997.

FOR FURTHER INFORMATION: Contact Judy Meade, Director of the Office of Safety and Security (202) 366–2896 (telephone) and (202) 366–7951 (fax). Electronic access to this and other documents concerning FTA's drug and alcohol testing rules may be obtained through FTA's Transit Safety and Security Bulletin Board at 1–800–231–2061 or through the FTA World Wide Web home page at http://www.fta.bts.gov; both services are available seven days a week.

SUPPLEMENTARY INFORMATION: The Federal Transit Administration (FTA) required large transit employers to begin drug and alcohol testing "safety-sensitive" employees on January 1, 1995, and to report, annually by March 15 of each year beginning in 1996, the number of "safety-sensitive" employees who had a verified positive for the use of prohibited drugs, and the number of safety-sensitive employees who tested positive for the misuse of alcohol. Large employers are required to annually submit other data, not relevant here, in the same report; these data are available from the FTA as discussed below. Small employers started testing their "safety-sensitive" employees on January 1, 1996 and will begin to report the same information as the large employees beginning on March 15, 1997.

The rules established a random testing rate for prohibited drugs and the misuse of alcohol; specifically, the rules require that employers conduct random drug tests at a rate equivalent to at least 50 percent of its total number of safety-sensitive employees for prohibited drug use and at least 25 percent for the misuse of alcohol. The rules provide that the drug random testing rate will be lowered to 25 percent if the "positive rate" for the entire transit industry is less than one percent for two consecutive years. Once lowered, it may be raised to 50 percent if the positive rate equals or exceeds one percent for any one year. ("Positive rate" means the number of positive results for random drug tests conducted under part 653 plus the number of refusals of random tests required by part 653, divided by the total number of random drug tests conducted under part 653 plus the number of refusals of random tests required by part 653.)

Likewise, the alcohol rule provides that the random rate will be lowered to 10 percent if the "violation rate" for the entire transit industry is less than .5 percent for two consecutive years. It will remain at 25 percent if the "violation rate" is equal to or greater than .5 percent but less than one percent, and it will be raised to 50 percent if the "violation rate" is one percent or greater for any one year. ("Violation rate" means the number of covered employees found during random tests given under part 654 to have an alcohol concentration of .04 or greater, plus the number of employees who refuse a random test required by part 654, divided by the total reported number of employees in the industry given random alcohol tests under part 654 plus the total reported number of employees in the industry who refuse a random test required by part 654.)

FTA has received and analyzed the 1995 data from large transit employers. The "positive rate" for random drug tests was 1.7 percent and the "violation rate" for random alcohol tests was 0.24 percent; therefore, for 1997, transit employers will continue to be required to conduct random drug tests at a rate equivalent to at least 50 percent of the total number of its "safety-sensitive" employees for prohibited drugs and at least 25 percent for the misuse of alcohol.

FTA will be publishing in December a detailed report on the 1995 data collected from large employers. This report may be obtained from the Office of Safety and Security, Federal Transit Administration, 400 Seventh Street, SW, Room 9301, Washington, DC 20590, (202) 366–2896.

Issued: December 20, 1996.

Gordon J. Linton,

Administrator.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 960918264–6350–02; I.D. 091296A]

RIN 0648–AI61

Fisheries of the Exclusive Economic Zone Off Alaska; Individual Fishing Quota Program; Sweep-up Adjustments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues a final rule to implement Amendment 43 to the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (BSAI), Amendment 43 to the Fishery Management Plan for Groundfish of the Gulf of Alaska (GOA), and a regulatory amendment to the halibut individual fishing quota (IFQ) regulations. This action is necessary to increase the consolidation ("sweep-up") levels for small quota share (QS) blocks for Pacific halibut and sablefish managed under the IFQ program. This action is intended to maintain consistency with the objectives of the IFQ program (i.e., prevent excessive consolidation of QS, maintain diversity of the fishing fleet, and allow new entrants into the fishery), while increasing the program's flexibility by allowing a moderately greater amount of QS to be "swept-up" into larger amounts that can be fished more economically.

EFFECTIVE DATE: December 20, 1996.

ADDRESSES: Copies of the final rule and the environmental assessment/regulatory impact review (EA/RIR) for this action may be obtained from: Fisheries Management Division, Alaska Region, NMFS, 709 West 9th Street, Room 453, Juneau, AK 99801, or P.O. Box 21668, Juneau, AK 99802.

FOR FURTHER INFORMATION CONTACT: John Lepore, 907–586–7228.

SUPPLEMENTARY INFORMATION:

Background Information

The U.S. groundfish fisheries of the GOA and the BSAI in the exclusive economic zone are managed by NMFS pursuant to the FMPs for groundfish in the respective management areas. The FMPs were prepared by the North Pacific Fishery Management Council (Council) pursuant to the Magnuson-Stevens

Fishery Conservation and Management Act (Magnuson-Stevens Act) at 16 U.S.C. 1801 *et seq.* and are implemented by regulations for the U.S. fisheries at 50 CFR part 679. The Northern Pacific Halibut Act of 1982 (Halibut Act) at 16 U.S.C. 773 *et seq.* authorizes the Council to develop and NMFS to implement regulations to allocate halibut fishing privileges among U.S. fishermen.

Under these authorities, the Council developed the IFQ program, a limited access management system for the fixed gear Pacific halibut and sablefish fisheries. NMFS approved the IFQ program in November 1993 and fully implemented the program beginning in March 1995. The Magnuson-Stevens Act and the Halibut Act authorize the Council to recommend to NMFS changes to the IFQ program as necessary to conserve and manage the fixed gear Pacific halibut and sablefish fisheries.

Rationale for Amendments 43/43

Before NMFS implemented the IFQ program, the Council recommended that all QS that resulted at initial issuance in less than 20,000 lb (9 metric tons (mt)) of IFQ be "blocked," that is, issued as an inseparable unit. Further information on Amendments 31/35 (Block Amendments) can be found in the preambles to the proposed rule (59 FR 33272, June 28, 1994), and the final rule (59 FR 51135, October 7, 1994). The final rule implementing these amendments was effective prior to the beginning of the first IFQ season in 1995.

The Block Amendments created a variety of block sizes that were available for transfer. One of the primary purposes of the Block Amendments was to create small blocks of QS that could be purchased at a relatively low cost by crew members and new entrants to the IFQ fisheries. As the experience of these fishermen increased and the size of their fishing operations grew, larger amounts of QS were needed to accommodate this growth. One method included in the Block Amendments to accommodate this growth was the "sweep-up" provision, which allows very small blocks of QS to be permanently consolidated. The maximum sweep-up level was set at 1,000 lb (0.45 mt) for Pacific halibut and 3,000 lb (1.4 mt) for sablefish, based on the 1994 total allowable catch (TAC).

After the completion of the first IFQ season, the IFQ longline industry reported that the established sweep-up levels were lower than the harvest amount of a worthwhile fishing trip. Therefore, the IFQ longline industry requested a moderate increase in the sweep-up levels to allow greater amounts of QS to be swept up into larger amounts that can be fished more economically. The Council determined that a moderate increase in the sweep-up levels would likely enhance the opportunity of crew members and small-boat fishermen who seek to increase their QS holdings. The Council also determined that allowing persons to consolidate permanently slightly larger blocks of QS would not circumvent the primary goals of the Block Amendments (i.e., preventing excessive consolidation and maintaining the diversity of the IFQ longline fleet). A proposed rule to implement these changes to the IFQ program was published on September 27, 1996, at 61 FR 50797.

Management Action Pursuant to Amendments 43/43

Amendments 43/43 increase the sweep-up levels for small QS blocks for Pacific halibut and sablefish from the current 1,000 lb (0.45 mt) maximum for Pacific halibut and 3,000 lb (1.4 mt) maximum for sablefish to a 3,000 lb (1.4 mt) maximum and a 5,000 lb (2.3 mt) maximum, respectively. Two other changes are also made to accompany these increases. First, the base year TAC for determining the pounds of IFQ used to determine the first sweep-up levels is now the 1996 TAC, rather than the 1994 TAC. Second, the maximum number of QS units that may be consolidated into a single block in each regulatory area is now fixed and codified. This will eliminate any confusion as to the appropriate sweep-up level in pounds.

Response to Comments

NMFS received a comment from the U.S. Coast Guard stating that its enforcement and safety concerns were addressed by this action. Also, NMFS received a request from the U.S. Department of the Interior (DOI), Office of Environmental Policy and Compliance, that the comment period for the proposed rule be extended until mid-December, 1996, in order to lengthen DOI's review opportunity. NMFS denies the request for an extended comment period. Any extension of the comment period would jeopardize compliance with the FMP review and approval schedule specified in section 304 of the Magnuson-Stevens Act. Furthermore, any extension to the comment period would delay the effective date of this rule, thereby decreasing the time period available for fishermen to consolidate blocked QS prior to the 1997 fishing season.

Classification

The Administrator, Alaska Region, NMFS, determined that Amendments 43 to the Fishery Management Plan for the Groundfish of the Gulf of Alaska and Amendment 43 to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area are necessary for the conservation and management of groundfish in waters off Alaska and halibut in waters in and off Alaska and that they are consistent with the Magnuson-Stevens Act and other applicable laws.

The Assistant Administrator for Fisheries, NOAA, finds that this final rule relieves a restriction, because this action is designed to allow fishermen to increase the efficiency of their operations through relaxed regulatory restrictions on sweep-up levels. Increasing the sweep-up levels as soon as possible will allow these fishermen to take advantage of the provision before the 1997 season. Therefore, a delayed effectiveness date is not required under 5 U.S.C. 553(d)(1).

An EA/RIR was prepared for this rule that describes the management background, the purpose and need for action, the management action alternatives, and the socio-economic impacts of the alternatives. The EA/RIR estimates the total number of small entities affected by this action, and analyzes the economic impact on those small entities. Based on the economic analysis in the EA/RIR, the Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this rule would not have a significant economic impact on a substantial number of small entities. Copies of the EA/RIR can be obtained from NMFS (see **ADDRESSES**).

This final rule will not change the collection of information approved by the Office of Management and Budget, OMB Control Number 0648–0272, for the Pacific halibut and sablefish IFQ program.

This final rule has been determined to be not significant for purposes of E.O. 12866.

List of Subjects in 50 CFR Part 679

Fisheries, Reporting and recordkeeping requirements.

Dated: December 19, 1996.

Nancy Foster,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 679 is amended as follows:

VOL 61 ISS 249 DE 26 1996 UMI

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

1. The authority citation for 50 CFR part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.*, 1801 *et seq.*

2. In § 679.41, paragraph (e)(2) is revised and paragraph (e)(3) is added to read as follows:

§ 679.41 Transfer of QS and IFQ.

* * * * *

(e)* * *

(2) QS blocks for the same IFQ regulatory area and vessel category that represent less than 5,000 lb (2.3 mt) of sablefish IFQ, based on the 1996 TAC share for fixed gear sablefish in a specific IFQ regulatory area and the QS pool for that IFQ regulatory area on January 31, 1996, may be consolidated into larger QS blocks provided that the consolidated blocks do not represent greater than 5,000 lbs (2.3 mt) of sablefish IFQ based on the preceding criteria. A consolidated block cannot be divided and is considered a single block for purposes of use and transferability. The maximum number of QS units that may be consolidated into a single QS block in each IFQ regulatory area is as follows:

(i) Southeast Outside district: 33,270 QS.

(ii) West Yakutat district: 43,390 QS.

(iii) Central Gulf area: 46,055 QS.

(iv) Western Gulf area: 48,410 QS.

(v) Aleutian Islands subarea: 99,210 QS.

(vi) Bering Sea subarea: 91,275 QS.

(3) QS blocks for the same IFQ regulatory area and vessel category that represent less than 3,000 lbs (1.4 mt) of halibut IFQ, based on the 1996 catch limit for halibut in a specific IFQ regulatory area and the QS pool for that IFQ regulatory area on January 31, 1996, may be consolidated into larger QS blocks provided that the consolidated blocks do not represent greater than 3,000 lbs (1.4 mt) of halibut IFQ based on the preceding criteria. A consolidated block cannot be divided and is considered a single block for purposes of use and transferability. The maximum number of QS units that may be consolidated into a single block in each IFQ regulatory area is as follows:

(i) Area 2C: 19,992 QS.

(ii) Area 3A: 27,912 QS.

(iii) Area 3B: 44,193 QS.

(iv) Subarea 4A: 22,947 QS.

(v) Subarea 4B: 15,087 QS.

(vi) Subarea 4C: 30,930 QS.

(vii) Subarea 4D: 26,082 QS.

(viii) Subarea 4E: 0 QS.

Proposed Rules

Federal Register
Vol. 61, No. 249
Thursday, December 26, 1996

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–CE–31–AD]

RIN 2120 AA64

Airworthiness Directives; AeroSpace Technologies of Australia Limited (formerly Government Aircraft Industries), Nomad Models N22S, N22B, and N24A Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to supersede AD 82–25–09 which currently requires repetitively inspecting the pilot and co-pilot control wheel sub-assemblies for cracks, and if cracked, modifying the cracked part on the AeroSpace Technologies of Australia, Limited (ASTA), formerly Government Aircraft Industries (GAF) Nomad Models N22S, N22B, and N24A airplanes. The proposed action would retain the repetitive inspection of the pilot and co-pilot control wheel sub-assemblies for cracks, but would include a modification that would terminate the repetitive inspections by replacing or re-working the control wheel sub-assembly with a part of improved design. This proposed superseding action is prompted by cracking in the control wheel sub-assemblies and the manufacture of an improved part that would terminate the repetitive inspection. The actions specified by the proposed AD are intended to prevent failure of the pilot's and co-pilot's control wheels, which, if not detected and corrected, could result in loss of control of the airplane.

DATES: Comments must be received on or before February 21, 1997.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–31–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from AeroSpace Technologies of Australia, Limited, ASTA DEFENCE, Private Bag No. 4, Beach Road Lara 3212, Victoria, Australia. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Ron Atmur, Aerospace Engineer, Los Angeles Aircraft Certification Office, FAA, 3960 Paramount Blvd., Lakewood, California, 90712; telephone (310) 627–5224; facsimile (310) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 95–CE–31–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–31–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

Airworthiness Directive 82–25–09, Amendment 39–4510 currently requires repetitively inspecting the pilot and co-pilot control wheel sub-assemblies for cracks, and if cracked, modifying the cracked part on the ASTA Nomad Models N22S, N22B, and N24A airplanes. Accomplishment of the proposed modification would terminate the repetitive inspections.

Actions Since Issuance of Previous Rule

The Civil Aviation Safety Authority (CASA) of Australia, which is the airworthiness authority for Australia, notified the FAA that an unsafe condition may exist on ASTA Nomad Models N22S, N22B, and N24A airplanes. The CASA of Australia advises that several incidents have been reported of the pilot's and co-pilot's control wheels developing structural cracks and becoming inoperable, reducing the pilots' ability to control the airplane during flight.

Since the publication of AD 82–25–09, the manufacturer has designed a part of improved design. The proposed action would retain the repetitive inspection of the pilot and co-pilot control wheel sub-assemblies for cracks, but would include a modification that would terminate the repetitive inspections by replacing or re-working the control wheel sub-assembly with a part of improved design.

Applicable Service Information

ASTA has issued Government Aircraft Factories (GAF) Nomad Alert Service Bulletin (SB) AS/B ANMD–27–27, Revision 1, dated November 5, 1982, which specifies repetitively inspecting the control wheel sub-assemblies for cracking, modifying the assemblies by replacing or reworking them when cracks appear, and upon the accumulation of 300 hours time-in-service, modifying the control wheel sub-assemblies by replacing or re-working them with a part of improved design. This modification would be

VOL 61 ISS 249 DEC 26 1996 UMI

considered a terminating action for the repetitive inspections.

The CASA of Australia classified this service bulletin as mandatory and issued CASA of Australia AD/GAF–N22/46 AMDT 1 in order to assure the continued airworthiness of these airplanes in Australia.

FAA's Determination

This airplane model is manufactured in Australia and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the Australian CASA has kept the FAA informed of the situation described above. The FAA has examined the findings of the Australian CASA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of the Provision of the Proposed AD

Since an unsafe condition has been identified that is likely to exist or develop in other ASTA Nomad Models N22S, N22B, and N24A airplanes of the same type design registered for operation in the United States, the proposed AD would supersede AD 82–25–09 with a new AD that would retain the repetitive 100 hour time-in-service (TIS) inspections for cracks on the pilot's and co-pilot's control wheel sub-assembly (part number (P/N) 1/N–45–1208) in the area adjacent to the circumferential weld adjoining the shaft spigot to each control wheel back support plate, modifying any cracked assembly by replacing the assembly with a part of improved design (P/N 2/N–45–1208), or re-working the assembly with approved re-worked parts (P/N 1/N–03–734), and if there are no signs of cracking during these inspections, terminating the repetitive inspections upon the accumulation of 300 hours TIS by accomplishing the modification to control wheel sub-assemblies with parts of improved design. This modification would be considered a terminating action for the repetitive inspections required in AD 82–25–09.

Cost Impact

The FAA estimates that 15 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 6 workhours per airplane to accomplish the proposed action, and that the average labor rate is approximately $60 an hour. Parts cost approximately $1,592 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $23,680 or $1,952 per airplane. This figure is based on the cost of the initial inspection and modification and does not account for the repetitive inspections that may occur prior to the proposed modification. The FAA has no way to determine the number of airplanes that may have already accomplished this action.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Airworthiness Directive (AD) 82–25–09, Amendment 39–4510, and by adding a new AD to read as follows:

Aerospace Technologies of Australia, Limited (ASTA) (formerly Government Aircraft Industries (GAF)):

Docket No. 95–CE–31–AD; Supersedes AD 82–25–09, Amendment 39–4510.

Applicability: Nomad Models N22S, N22B, and N24A airplanes, all serial numbers, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within the next 100 hours time-in-service (TIS) after the effective date of this AD, and thereafter as indicated in this AD, unless already accomplished.

To prevent failure of the pilot's and co-pilot's control wheels, which, if not detected and corrected, could result in loss of control of the airplane, accomplish the following:

(a) Inspect the pilot and co-pilot control wheel sub-assembly (part number (P/N) 1/N–45–1208) for structural cracking in the area adjacent to the circumferential weld adjoining the shaft spigot to each control wheel back support plate in accordance with the "2. *Accomplishment Instructions*" section, "*Part A*—Inspection" paragraphs in Government Aircraft Industries (GAF) Nomad Alert Service Bulletin (SB) AS/B ANMD–27–27, Revision 1, dated November 5, 1982.

(1) If no cracks are visible, repetitively inspect the control wheel sub-assemblies at intervals not to exceed 100 hours TIS in accordance with the "2. *Accomplishment Instructions*" section, "*Part A*—Inspection" paragraphs in GAF Nomad Alert Service Bulletin (SB) AS/B ANMD–27–27, Revision 1, dated November 5, 1982 until the accomplishment of paragraph (b) of this AD.

(2) If cracks are visible during any inspection required by this AD, prior to further flight, modify the control wheel sub-assemblies by replacing or re-working the cracked part with parts of improved design (P/N 2/N–45–1208 or 1/N–03–734 (reworked part)) in accordance with the "2. *Accomplishment Instructions*" section, "*Part B*—Modification by Replacement or Rework" paragraphs in GAF Nomad Alert SB AS/B ANMD–27–27, Revision 1, dated November 5, 1982.

(b) Upon the accumulation of 300 hours TIS after the effective date of this AD, modify the control wheel sub-assemblies (P/N 1/N–45–1208) by replacing the assemblies or re-working the assemblies with parts of improved design (P/N 2/N–45–1208 or P/N 1/N–03–734, respectively) in accordance

with the "2. *Accomplishment Instructions*" section, "*Part B*—Modification by Replacement or Rework" paragraphs in GAF Nomad Alert SB AS/B ANMD–27–27, Revision 1, dated November 5, 1982.

(c) Accomplishment of the modification in paragraph (b) of this AD is considered a terminating action for the repetitive inspections required in paragraph (a)(1) of this AD.

(d) Special flight permits may be issued in accordance with 14 CFR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Los Angeles Aircraft Certification Office, FAA, 3960 Paramount Blvd., Lakewood, California, 90712. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles Aircraft Certification Office. Alternative methods of compliance approved in accordance with AD 82–25–09 (superseded by this action) are considered approved as alternative methods of compliance with this AD.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles Aircraft Certification Office.

(f) All persons affected by this directive may obtain copies of the document referred to herein upon request to AeroSpace Technologies of Australia, Limited, ASTA DEFENCE, Private Bag No. 4, Beach Road Lara 3212, Victoria, Australia, or may examine this document at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(g) This amendment supersedes AD 82–25–09, Amendment 39–4510.

Issued in Kansas City, Missouri, on December 18, 1996.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[Airspace Docket No. 96–AWP–30]

Proposed Revision of Class E Airspace; Victorville, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking; extension of comment period.

SUMMARY: This notice announces the extension of the comment period on a Notice of Proposed Rulemaking (NPRM), which proposes to revise the Class E airspace area at Victorville, CA. This action is being taken due to an administrative oversight, wherein the comment period did not allow adequate time for interested persons to have the opportunity to comment.

DATES: Comments must be received on or before January 30, 1997.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, Operations Branch, AWP–530, Docket No. 96–AWP–30, Air Traffic Division, P.O. Box 92007, Worldway Postal Center, Los Angeles, California, 90009.

SUPPLEMENTARY INFORMATION:

Background

Airspace Docket No. 96–AWP–30, published on November 20, 1996 (61 FR 59042) proposed to revise the Class E airspace area at Victorville, CA. This action will extend the comment period closing date on that airspace docket from November 30, 1996, to January 30, 1997 to allow for a 30-day comment period instead of the existing 10-day abbreviated comment period.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Extension of Comment Period

The comment period closing date Airspace Docket No. 96–AWP–30, is hereby extended to January 30, 1997.

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 14 CFR 11.69.

Issued in Los Angeles, California, on December 10, 1996.

Leonard A. Mobley,

Acting Manager, Air Traffic Division, Western-Pacific Region.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 915

[SPATS No. IA–009–FOR]

Iowa Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing.

SUMMARY: OSM is announcing receipt of a proposed amendment to the Iowa regulatory program (hereinafter the "Iowa program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consists of revisions to the Iowa rules pertaining to repair or compensation for material damage resulting from subsidence caused by underground coal mining operations and to replacement of water supplies adversely impacted by underground coal mining operations. The amendment is intended to revise the Iowa program to be consistent with the corresponding Federal regulations and SMCRA.

DATES: Written comments must be received by 4:00 p.m., c.s.t., January 27, 1997. If requested, a public hearing on the proposed amendment will be held on January 21, 1997. Requests to speak at the hearing must be received by 4:00 p.m., c.s.t., on January 10, 1997.

ADDRESSES: Written comments and requests to speak at the hearing should be mailed or hand delivered to Michael C. Wolfrom, Mid-Continent Regional Coordinating Center, at the address listed below.

Copies of the Iowa program, the propose amendment, a listing of any scheduled public hearings, and all written comments received in response to this document will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Mid-Continent Regional Coordinating Center.

Michael C. Wolfrom, Mid-Continent Regional Coordinating Center, Office of Surface Mining Reclamation and Enforcement, Alton Federal Building, 501 Belle Street, Alton, Illinois, 62002, Telephone: (618) 463–6460.

Iowa Department of Agriculture and Land Stewardship, Division of Soil Conservation, Henry A. Wallace Building, Des Moines, Iowa, 50319, Telephone: (515) 281–6147.

FOR FURTHER INFORMATION CONTACT: Michael C. Wolfrom, Mid-Continent Regional Coordinating Center, Telephone: (618) 463–6460.

SUPPLEMENTARY INFORMATION:

I. Background on the Iowa Program

On January 21, 1981, the Secretary of the Interior conditionally approved the Iowa program, effective April 10, 1981. General background information on the Iowa program, including the Secretary's findings, the disposition of comments, and the conditions of approval of the Iowa program can be found in the January 21, 1981, **Federal Register** (46 FR 5885). Subsequent actions

concerning Iowa's program and program amendments can be found at 30 CFR 915.10, 915.15, and 915.16.

II. Description of the Proposed Amendment

By letter dated December 4, 1996 (Administrative Record No. IA–424), Iowa submitted a proposed amendment to its program pursuant to SMCRA. Iowa submitted the proposed amendment in response to a May 20, 1996, letter (Administrative Record No. IA–420) that OSM sent to Iowa in accordance with 30 CFR 732.17(c). The provisions of the Iowa Administrative Code (IAC) that Iowa proposes to amend are IAC 27–40.4(10), Definitions; IAC 27–40.38(2), PHC determination; IAC 27–40.38(3), Subsidence control plan; IAC 27–40.64(8), Hydrologic balance protection; IAC 27–40.64(6), Subsidence control; and IAC 27–40.64(7), Repair of damage. The substantive changes proposed by Iowa are discussed below.

I. IAC 27–40.4(10) Definitions

At IAC 27–40.4(10), Iowa proposes to add at its incorporation of 30 CFR 701.5 definitions for the terms "Drinking, domestic or residential water supply"; "Material damage"; "Non-commercial building"; "Occupied residential dwelling and structures related thereto"; and "Replacement of water supply."

2. IAC 27–40.38(2) PHC Determination

At IAC 27–40.38(2), Iowa proposes to add at its incorporation of 30 CFR Part 784 the new Federal provision at 30 CFR 784.14(e)(3)(iv), which was effective May 1, 1995.

The substantive provision at paragraph (e)(3)(iv) requires the PHC determination to include findings on whether underground mining activities conducted after October 24, 1992, may result in contamination, diminution, or interruption of a well or spring in existence at the time the permit application is submitted and used for domestic, drinking, or residential purposes within the permit or adjacent areas.

3. IAC 27–40.38(3) Subsidence Control Plan

At IAC 27–40.38(3), Iowa proposes to delete 30 CFR 784.20 as incorporated by reference as in effect on July 1, 1992, and replace it with the revised Federal provisions at 30 CFR 784.20 that were effective May 1, 1995.

The substantive provisions of 30 CFR 784.20(a) require that each permit application for an underground mine include a pre-subsidence survey to identify potentially impacted structures, renewable resource lands, and protected water supplies within the proposed permit and adjacent areas. In addition, the revised rules add specific content requirements for the pre-subsidence survey, including: a detailed map, at a scale of 1:12,000, or larger scale if required by the regulatory authority, identifying the location and type of all structures, renewable resource lands that subsidence may materially damage or diminish the reasonably foreseeable use, and protected water supplies that could be adversely impacted; a narrative addressing the potential impacts of subsidence on these features; and identification of the premining condition of all protected structures and water supplies.

The substantive provisions of 30 CFR 784.20(b) require that a permit application for an underground mine include a subsidence control plan if the survey required by 30 CFR 784.20(a) identifies any domestic, drinking, or residential water supply that could be contaminated, diminished, or interrupted by subsidence. The subsidence control plan must contain the information contained in paragraphs (b)(1) through (b)(6). Paragraph (b)(2) requires that the plan must include a map showing the areas where damage minimization measures will be taken. Paragraph (b)(7) of the revised Federal rules requires that the subsidence control plan include a description of the methods to be used to minimize subsidence damage to protected structures when the proposed mining method involves planned subsidence. The rule allows the owner of the structure to waive this protection. In cases where there is no threat to health or safety, the rule also authorizes the waiver of this requirement if the applicant can demonstrate that the costs of damage minimization exceed anticipated repair costs. Paragraph (b)(8) of the revised rules requires that the subsidence control plan include a description of the measures to be taken to replace any adversely impacted protected water supply.

Iowa proposed minor changes to the provisions to make them State specific, including adding some State regulation citation cross-references and parenthetical notes.

4. IAC 27–40.64(8) Hydrologic Balance Protection

At IAC 27–40.64(8), Iowa proposes to add at its incorporation of 30 CFR Part 817 the new provision at 30 CFR 817.41(j), which was effective May 1, 1995.

The substantive provision of paragraph (j) requires prompt replacement of any drinking, domestic, or residential water supply that is contaminated, diminished, or interrupted by underground mining activities conducted after October 24, 1992.

5. IAC 27–40.64(6) Subsidence Control

IAC 27–40.64(6), Iowa proposes to delete 30 CFR 817.121(a), as incorporated by reference as in effect on July 1, 1992, and to add the actual Federal provision at 30 CFR 817.121(a), which was revised effective May 1, 1995.

The substantive provisions of paragraph (a) provide that, to the extent technologically and economically feasible, permittees using mining methods that involve planned subsidence must conduct their operations in a manner that minimizes subsidence damage to protected structures. The rule allows the owner of the structure to provide a written waiver of this protection. In cases where there is no threat to health or safety, the rule also authorizes the regulatory authority to waive this requirement if the applicant can demonstrate that the costs of damage minimization exceed anticipated repair costs.

6. IAC 27–40.64(7) Repair of Damage

At IAC 27–40.64(7), Iowa proposes to delete 30 CFR 817.121(c) as incorporated by reference as in effect on July 1, 1992, and to add the actual Federal provisions at 30 CFR 817.121(c), which were revised effective May 1, 1995.

The substantive provisions of 30 CFR 817.121(c) (2) and (3) require the permittee to promptly repair, or compensate the owner for, subsidence-related material damage to any noncommercial building or occupied residential dwelling or related structure that existed at the time of mining, provided the subsidence results from underground mining activities conducted after October 24, 1992. The rule also provides that, to the extent required by State law, the permittee must repair or compensate the owner for subsidence-related material damage to all other structures and facilities. The substantive provisions at 30 CFR 817.121(c)(4) establish a rebuttable presumption that the permittee is responsible for any structural damage caused by earth movement within a specified angle of draw from the outermost boundary of any underground mine workings to the land surface. Unless otherwise approved in the permit or the State program based on a geotechnical analysis of the factors affecting potential surface impacts of underground coal mining operations,

the presumption must apply within a 30-degree angle of draw. No presumption exists if the owner of the structure denied the permittee access to conduct the presubsidence survey required under 30 CFR 784.20(a). All relevant and reasonably available information must be considered in determining whether damage was caused by subsidence from underground mining. The substantive provisions of 30 CFR 817.121(c)(5) provide that, if subsidence-related material damage occurs to land, structures, or facilities protected under 30 CFR 817.121(c), the regulatory authority must require the permittee to post additional performance bond in the amount of the estimated repair costs or diminution in value, depending on whether the permittee intends to repair the damage or compensate the owner. Similarly, if an underground mining operation contaminates, diminishes, or interrupts any water supply protected under 30 CFR 817.41(j), the regulatory authority must require the permittee to post additional bond in the amount of the estimated cost of replacing the supply. The permittee must post this bond within 90 days of the date the damage occurred, unless repair, compensation, or replacement is completed within that timeframe. Under certain circumstances, the regulatory authority may extend the 90-day grace period up to a maximum of one year.

Iowa proposed minor modifications to the provisions to make them State program specific, including adding some State regulation citation cross-references and parenthetical notations.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Iowa program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **DATES** or at locations other than the Mid-Continent Regional Coordinating Center will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to speak at the public hearing should contact the person listed under **FOR FURTHER INFORMATION CONTACT** by 4:00 p.m., c.s.t. on January 10, 1997. If no one requests an opportunity to speak at the public hearing, the hearing will not be held.

The location and time of the hearing will be arranged with those persons requesting the hearing. Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions. Any disabled individual who has need for a special accommodation to attend a public hearing should contact the individual listed under **FOR FURTHER INFORMATION CONTACT**

The public hearing will continue on the specific date until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak, and who wish to do so, will be heard following those who have been scheduled. The hearing will end after all persons scheduled to speak and persons present in the audience who wish to speak have been heard.

Public Meeting

If only one person requests an opportunity to speak at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting by contacting the person listed under **FOR FURTHER INFORMATION CONTACT.** All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under **ADDRESSES.** A written summary of each meeting will be made a part of the Administrative Record.

IV. Procedural Determinations

Executive Order 12866

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

Executive Order 12988

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 (Civil Justice Reform) and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Unfunded Mandates

This rule will not impose a cost of $100 million or more in any given year on any governmental entity or the private sector.

List of Subjects in 30 CFR Part 915

Intergovernmental relations, Surface mining, Underground mining.

Dated: December 7, 1996.

Brent Wahlquist,

Regional Director, Mid-Continent Regional Coordinating Center.

Coast Guard

33 CFR Part 117

[CGD05–96–101]

RIN 2115–AE47

Drawbridge Operation Regulations; Corson Inlet, Strathmere, NJ

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of the Cape May County Bridge Commission, the Coast Guard is proposing to change the regulations that govern the operation of the drawbridge across Corson Inlet, mile 0.9, at Strathmere, New Jersey, by requiring a two hour advance notice for drawbridge openings from October 1 to May 15 from 10 p.m. to 6 a.m., seven days a week. This proposed rule is intended to help relieve the bridge owner of the burden of having a bridge tender constantly available at times when there are few or no requests for openings, while still providing for the reasonable needs of navigation.

DATES: Comments must be received on or before February 24, 1997.

ADDRESSES: Comments may be mailed to Commander (Aowb), USCG Atlantic Area, Federal Building, 4th Floor, 431 Crawford Street, Portsmouth, Virginia 23704–5004, or may be hand-delivered to the same address between 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. The telephone number is (757) 398–6222. Comments will become a part of this docket and will be available for inspection and copying at the above address.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, USCG Atlantic Area, at (757) 398–6222.

SUPPLEMENTARY INFORMATION:

Requests for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD05–96–101), the specific section of this rule to which each comment applies, and give reasons for each comment. The Coast Guard requests that all comments and attachments be submitted in an unbound format suitable for copying and electronic filing. If that is not practical, a second copy of any bound material is requested. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Commander, USCG Atlantic Area, at the address listed under **ADDRESSES**. The request should include reasons why a hearing would be beneficial. If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The drawbridge across Corson Inlet, mile 0.9, at Strathmere, New Jersey, is currently required to open on request year round. The Cape May County Bridge Commission (Commission) has requested that the operating schedule for the drawbridge be amended to reduce the periods during which it must open the bridge on signal. In support of its request, the Commission contends that its records show that during the period from October 1 through May 15, no vessels required a drawbridge opening during the hours of 10 p.m. to 6 a.m.

The Coast Guard has reviewed the Commission's bridge logs for 1992 through 1995, copies of which are included in the docket for this rulemaking. According to the logs, no openings occurred between the hours of 10 p.m. and 6 a.m. from October 1 through May 15 in any of these years.

Therefore, the Coast Guard is proposing a new regulation governing the operation of the drawbridge across Corson Inlet, mile 0.9, at Strathmere, New Jersey. The proposed rule would require the bridge to open on signal from May 15 through September 30 and between 6 a.m. and 10 p.m. from October 1 through May 15. The bridge would also open between 10 p.m. and 6 a.m. from October 1 through May 15 if notice is given to the Cape May County Bridge Department two hours in advance of the time that the opening is requested. A sign will be posted at the bridge giving the Cape May County Bridge Department's 24-hour telephone number. The Coast Guard believes that these proposed changes will relieve the burden of requiring a bridgetender to be on duty during periods of little or no vessel traffic while not unduly restricting navigation.

Regulatory Evaluation

This proposed rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposed rule will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). Because it expects the impact of this proposed rule to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal under the principles and criteria contained in Executive Order 12612, and has determined that this proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that under section 2.B.2.e.(32)(e) of Commandant Instruction M16475.1B (as amended, 59 FR 38654, 29 July 1994), this proposed rule is categorically excluded from further environmental documentation.

A Categorical Exclusion Determination statement has been prepared and placed in the rulemaking docket.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations to read as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g); section 117.255 also issued under the authority of Pub. L. 102–587, 106 Stat. 5039.

2. A new section, 117.714, is added to read as follows:

§ 117.714 Corson Inlet.

The draw of the Corson Inlet bridge, mile 0.9, at Strathmere, shall open on signal; except that from October 1 through May 15, from 10 p.m. to 6 a.m., the draw need only open if at least two hours notice is given.

Dated: December 6, 1996.

Kent H. Williams,

Vice Admiral, U.S. Coast Guard, Commander, Atlantic Area.

Prevention of Collisions Between Commercial and Recreational Vessels in the South Passage of the Lake Erie Western Basin

AGENCY: Coast Guard, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Coast Guard is considering a number of options for improvement of navigational safety in an area known as the "South Passage" in the Western Basin of Lake Erie. This is a high traffic area used by both commercial and recreational vessels. Collisions between commercial and recreational vessels in this area, with loss of lives in one case, have given the Coast Guard cause for concern about the long-term safety of the South Passage. The Coast Guard therefore requests public comment on the appropriateness and practicality of various options, some of which include possible regulatory action, to better protect both commercial and recreational vessels from risk of collision in this area. The Coast Guard is providing an advance notice of proposed rulemaking because comments on a range of various options are desired.

DATES: Comments must be received on or before February 24, 1997.

ADDRESSES: Comments and supporting materials should be mailed or delivered to Lieutenant Commander Rhae Giacoma, Assistant Chief, Marine Safety Analysis and Policy Branch, Ninth Coast Guard District, Room 2069, 1240 E. Ninth Coast Guard District, Room 2069, 1240 E. Ninth Street, Cleveland, Ohio, 44199–2060. Please reference the name of the proposal and the docket number in the heading above. If you wish receipt of your mailed comments to be acknowledged, please include a stamped self-addressed envelope or postcard for that purpose. Comments and materials received will be available for public inspection at the above location from 9:00 a.m. to 3:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Rhae Giacoma, Assistant Chief, Marine Safety Analysis and Policy Branch, Ninth Coast Guard District, Room 2069, 1240 E. Ninth Street, Cleveland, Ohio, 44199–2060, (216) 522–3994.

SUPPLEMENTARY INFORMATION:

Request for Comments.

The Coast Guard Strongly encourages all interested parties to participate in this consideration of possible rulemaking by submitting written comments which may consist of data, views, arguments, or other proposals for or against the various options being considered. The Coast Guard is presenting options for a regulated navigation area as one approach for resolving the apparent waterway user conflict in the South Passage area of Western Lake Erie. Proposals for non-regulatory alternatives which would serve the same purpose of enhancing vessel safety in the area are also desired. Although all comments will be considered, interested parties are requested to specifically identify which of the detailed options they are commenting on, the basis for their objection to proposals they dislike, and what alternative option (including the option of no action) they do support.

The Coast Guard does not currently plan to have a public hearing. The Coast Guard sponsored a number of informal workshops which were open to all interested parties and which provided an informative airing of views. At this point, the Coast Guard is more in need of specific, written, and concrete comments. However, further consideration will be given to holding a formal public hearing if one is requested. Such a request should indicate how a public hearing would contribute substantial information or views which cannot be received in written form. If it appears that a public hearing would substantially contribute to this rulemaking, the Coast Guard will announce such a hearing by a later notice in the **Federal Register**. The Coast Guard will consider all comments received before the closing date indicated above, and may amend or revoke this proposal in response to such comments.

Background and Purpose

I. The South Passage

The South Passage is an area of water on the United States side of the Western Basin of Lake Erie, roughly 9 by 4 statute miles, bounded by Kelleys Island and South Bass Island on the north, and by Catawba Island and Point Marblehead on the south. The South Passage is one of two traditional, natural passages through the islands and shallows separating the Western and Central Basins of Lake Erie, the other being the Pelee Passage to the north on the Canadian side of the Western basin. At one time, between 1952 and 1974, it appears that the South Passage was a regular route for large commercial carriers. Since that time, Pelee Passage to the north in Canadian waters has become the preferred route for large commercial vessels transiting through the Western End of Lake Erie. There is still a wide array of both commercial and recreational traffic using some parts of the South Passage, including some large commercial carriers transiting in and out of the Marblehead area on the east side, barges and tow boats in transit both through and across the passage, regular ferry boats transiting across the passage, commercial excursion vessels, transiting recreational crafts, and recreational fishing vessels. In additional to being a natural passage in and out of the basin and a natural area of transit between the mainland and the islands, the South Passage is also a desirable fishing ground where a relatively heavy concentration of small recreational fishing vessels anchor or drift.

II. Accidents in the South Passage

Three collisions between commercial barges in tow and small recreational craft have occurred in the South Passage

during the last five years, one of which resulted in two deaths. (1) On May 1, 1992, a tug with a barge in tow collided with a recreational bass boat in the east end of the South Passage, off the Marblehead and Lakeside area. The bass boat was anchored, the occupants engaged in fishing. There was minor injury to one of the occupants of the bass boat. The Coast Guard took administrative actions against the license of the master of the tug. (2) On October 1, 1994, a tug and barge collided with a recreational motorboat in the west end of the South Passage, slightly to the east of the channel marked by the Starve Island Reef Red #2 buoy and the Scott Point shoal Green #1 buoy. The motorboat was anchored or dragging anchor (until shortly before the collision, when the occupants apparently attempted to raise anchor), the occupants engaged in fishing. Two of the four occupants of the motorboat died by drowning after jumping from the boat just before collision, and the other two occupants suffered minor injuries. The State of Ohio convicted the master of the tug of a misdemeanor and the Coast Guard has filed charges against the licenses of both the master and the operator of the tug. (The licensing action is still in adjudication.) the Coast Guard also required the owners of the tug and barge to make structural changes improving the visibility from the bridge. (3) On June 13, 1995,a tug with a crane barge in tow collided with a recreational motorboat in the east end of the South Passage, approximately one mile northeast of Marblehead light. The one occupant of the motorboat was "drift fishing." No one was injured in the collision. The State of Ohio convicted the operator of the motorboat of a minor misdemeanor and the Coast Guard took administrative action against the license of the operator of the tug. The Coast Guard also required the owners of the crane barge to insure that visibility was not obstructed by the crane.

Although this is not a large number of accidents over a five-year period, the similarity of the events and the inherent dangerousness of collisions between barges and small boats, tragically demonstrated by the two deaths which have occurred, prompted the Coast Guard to conduct a special study of the South Passage in order to determine if there is a systemic problem which should be addressed. The Coast Guard and the State of Ohio have used administrative and criminal procedures to hold individuals (both commercial and recreational vessel operators) accountable in these cases. Although fault may be appropriately assigned to individuals for their failure to keep a proper lookout and exercise due care to avoid collisions in accordance with the principles of good seamanship, this does not negate the possibility that there are systemic problems creating an unusual risk of collision. The purpose of this study is to address those systemic problems. All three collisions occurred between tug/barge combinations and boats engaged in fishing. In one case the recreational boat was anchored, in another it was clearly drifting, and in one case it is uncertain whether it was at anchor or adrift at the time. In two cases it does not appear that the recreational boats were in clearly defined channels. In one case, the 1994 case which resulted in the deaths, the collision occurred in a channel clearly marked by red and green lateral buoys (Reef Red #2 buoy and Scott Point Shoal Green #1 buoy), although it is a matter very much in controversy as to whether or not this constituted a "narrow channel" as that term is used in the Inland Navigational Rules Act of 1980 (33 U.S.C. §§ 2001 et seq., especially Rule 9, 33 U.S.C. § 2009). Whether or not that was a "narrow channel" at the time (which is not a matter to be determined in this forum), the detailed investigation of that case conducted by the Coast Guard did provide some indication of a systemic conflict between recreational and commercial traffic in the South Passage. As the tug and barge approached the west end of the passage, they navigated between two large concentrations of boats north and south of the west end. As they actually entered the navigational channel market by Starve Island Reef Red #2 Buoy on the north and Scott Point Shoal Green #1 Buoy on the South, they found themselves between two packs of 15 or so boats, one clustered around each of the buoys. The recreational vessel that they hit was on the northeast side of the pack around the southern buoy, apparently quite close to the middle of the navigational channel. Given the inherent limits on the maneuverability of barges in tow, it appears that this was a dangerous situation in the making.

III. Consultation With the Marine Community

The Coast Guard solicited information and opinion from a variety of groups in order to obtain a better appreciation of the South Passage and develop ideas for possible improvements in navigational safety. This was an effort to fulfill the spirit of the President's "Regulatory Reinvention Initiative" (Presidential Memorandum of March 4, 1996), in which President Clinton urged Federal agencies to work with the local people affected by regulatory actions in order to achieve a consensus on reasonable solutions whenever possible. Those invited to provide input on the South Passage included tow boat operators, commercial carriers, commercial passenger vessel operators, recreational boating and fishing associations, a professional mariner association and individual mariners, along with representatives of the Ohio Department of Natural Resources, the City of Toledo, and the U.S. Coast Guard Auxiliary. Five informal workgroup sessions were held. The discussions were informal, wide-ranging, sometimes adversarial, and less informative than hoped. Many of the issues discussed were highly controversial, and there was little consensus on any point except the importance of continuing and enhancing existing programs for education of recreational boaters. There was controversy about whether or not there is a particular problem with conflicts between recreational and commercial vessels in the South Passage, with very different, sometimes inconsistent statements being made during the course of the informal discussions. There clearly are a large number of small boats anchored or drifting in various areas around the passage during summer months. However, some participants argued that there is no real problem with "congestion" or conflicting use as such. Other participants in the discussions described some dangerous situations, including near-misses between recreational and commercial vessels. There were comments about the dangerousness of recreational boaters anchoring or drifting in commercial channels, and, conversely, about the dangerousness of barge operators who seem to expect boats to give way as a matter of course. Some participants also expressed concern about boats sometimes blocking the approaches to the ferries running across the passage.

Because the characterization of the passage as "congested" has been controversial (the President of the Great Lakes Sport Fishing Council has found this term particularly objectionable), several points about the use of that term should be clarified. First, it is a relative matter, having more to do with particular, localized concentrations of boats in navigational channels rather than a question of overall density in the passage. Clusters of ten to twenty boats gathered off points or gathered around a buoy, as is common even on weekdays during the summer in the passage, can constitute "congestion" even though

VOL 61 ISS 249 DE 26 1996 UMI

there may be no more than a few hundred boats out in the passage in total and there are large sections of the passage which are clear that day. Second, "congestion" is very relative to the point of view of the mariner in question. The same situation may appear completely uncongested to a recreational boater with freedom to maneuver in any of the large empty spaces of water remaining outside the clusters, and yet appear most definitely congested to the commercial operator forced to pass very close to one of those clusters because of limited scope for maneuver. Finally, the use of the term "congestion" by representatives of the Coast Guard in the workgroup discussions should not have been interpreted as expressing any idea that the South Passage has too much recreational traffic. To the contrary, the Coast Guard views the South Passage as an extremely valuable resource, important to recreation and tourism, which should be fully enjoyed by all. Any adjustments to navigational practices which may help protect the safety of recreational boaters using the passage should serve to encourage rather than discourage continued and expanded use of the passage for fishing and other recreation.

There was considerable dispute about the relative fault between recreational and commercial operators, and an intense controversy about whether the channel between the two buoys which was the site of the fatalities on October 1, 1994 was or was not a "narrow channel" subject to Rule 9 of the Inland Navigational Rules Act (which requires a small vessel to avoid impeding a vessel which cannot safely navigate outside the narrow channel). And there were widely differing opinions about the appropriateness of area-specific navigational regulations, some arguing that a few clear, geographic delineations would greatly enhance safety, others arguing that any regulations beyond the general navigational rules are unnecessary.

Although the workgroup discussions certainly assisted the Coast Guard in delineating issues, it is important for the Coast Guard to now be able to consider written and attributable comments on specific proposals. Also, it is important for the Coast Guard to make sure that any decision be based on comments from all concerned parties, solicited on an equal basis, whether or not they had an opportunity to personally participate in the workgroup sessions.

IV. Working Propositions

In framing the regulatory options presented here, the Coast Guard is proceeding on the basis of the following propositions, which are subject to dispute:

1. There is an obvious danger created when small boats are at anchor or adrift in an area used by a large commercial vessel, particularly if the occupants of the small boats are occupied in fishing and the commercial vessels are restricted in their visibility and maneuverability.

2. Recreational and commercial vessels have a right to make use of the South Passage, neither taking absolute priority over the other, but some regulatory adjustment may be necessary in order to insure than both can do so safety. Although Pelee Passage is now the primary route for large commercial traffic transiting Lake Erie, it is important not to lose the availability of the South Passage (the only passage in United States waters) for commercial traffic. At the same time, recreational use of the islands and fishing grounds in the South Passage area is likely to increase, and should not be impeded.

3. Any local rules promulgated for a particular area such as the South Passage should be consistent with the general statutory rules for navigation. Those general statutory rules obligate one vessel not to impede the passage of another. Section 15 of the Rivers and Harbors Act (33 U.S.C. 409) provides that "It shall not be lawful to tie up or anchor vessels * * * in navigable channels in such a manner as to prevent or obstruct the passage of other vessels. * * *" and Rule 9(b) of the Inland Navigational Rules (33 U.S.C. § 2009(b)) provides that "A vessel of less than 20 meters in length or a sailing vessel shall not impede the passage of a vessel than can safely navigate only within a narrow channel or fairway."

4. The general statutory provisions quoted above do not provide unambiguous guidance in some of these dangerous cases involving commercial and recreational vessels. It is a case by case determination (and certainly a matter of dispute, as evidenced by the discussions which took place in the workgroups) as to whether a particular vessel at anchor is obstructing another or whether any one of dozens of identifiable channels in the South Passage are "narrow channels." It is difficult for an operator of a small recreational boat to know, in fact, whether or not the small vessel is obstructing a large commercial vessel which may or may not be restricted in its ability to maneuver. The recreational operators are usually not familiar with the drafts, stopping distances, and visibility limitations of large commercial vessels, particularly barges in tow. A small boat which is not an obstruction one day when there are few other vessels in a wide channel may well be an obstruction another day when the whole channel is more congested. In the absence of radio communications among the recreational vessels, and between the recreational and commercial vessels, it is difficult for the operators of the recreational vessels to know if they are in violation of these statutory provisions.

5. Other governmental actions of a more general and comprehensive nature may be of relevance in addressing this sort of problem on a nationwide basis. Those include (as suggested during the workgroup discussions), amendments to the Inland Navigational Rules Act of 1980, more extensive Coast Guard regulation of towing vessels (including visibility standards on all sizes of barge and tow combinations), new equipment requirements for recreational boats (such as radar reflectors, anchor balls, or radios), and licensing of recreational vessel operators. However, these proposals are outside the authority of the Commander of the Ninth Coast Guard District and cannot be expected to provide any improvement in the navigational safety in the South Passage in the foreseeable future. The Ninth District has already specified visibility requirements for some tug and barge combinations subject to Coast Guard inspection (including the one involved in the fatal collision on October 1, 1994). The Commander of the Ninth Coast Guard District is certainly prepared to submit a proposal for changes in the navigation rules to the Commandant of the Coast Guard if it appears that such a proposal would enhance safety and be appropriate on a nationwide basis. However, it is not apparent what change in the language of Rule 9 would as a practical matter better define a "narrow channel" in all the circumstances to which that would apply around the nation. At this point (although any written proposal will be read with interest), it seems more useful to address particular problem areas on a case by case basis, taking into account the particular configuration of the waterway and the traffic in the local area.

V. Options Under Consideration

The Coast Guard invites comments on any or all of the following options, and requests that commentors specifically identify the options they are arguing for or against (although comments making arguments in favor of options not listed here will also be considered):

Option 1. Do nothing. The existing accident rate would be deemed

VOL 61 ISS 249 DE 26 1996 UMI

unfortunate but tolerable, perhaps unavoidable. It may be noted that there have been no similar accidents during the 1993 or 1996 navigation seasons, although it should also be noted that neither the Coast Guard nor the State of Ohio has a system for recording and investigating near-misses which may occur on a more frequent basis. On the other hand, it may be argued that the congestion and dangerousness of the system is only likely to increase in the future.

Option 2. Emphasize enforcement and education. Make no changes in the South Passage navigational system, but put more resources into enforcement and educational efforts. The Coast Guard would continue with existing enforcement and education in cooperation with the Ohio Department of Natural Resources, the Coast Guard Auxiliary, the Power Squadron, boating groups, and maritime industry, as resources allow. Particular focus can be put on insuring high standards of professionalism among licensed commercial operators and educating recreational boaters about the dangers inherent in anchoring or drifting in commercial channels. However, Coast Guard resources available for more on the water enforcement or more educational outreach are limited, perhaps declining. Moreover, while operators can be told of the danger and reminded of their obligation to always maintain a good lookout, it is not clear how either enforcement or education can be effective in convincing small boats not to anchor or drift in front of channels needed by commercial vessels in the absence of some unambiguous legal rule prohibiting it.

Option 3. Make nonregulatory changes to the navigational system in the South Passage. The Coast Guard could request that the National Oceanic and Atmospheric Administration add some special delineations and notes to the nautical charts, marking the areas most commonly used by commercial vessels and warning small vessels that these areas may be dangerous for anchoring or drifting. (The areas delineated in the text of the regulatory alternatives proposed here may be taken as examples of lanes or danger areas which could also be delineated on a nonregulatory basis.) However, this may only create more confusion. Would such a marking create a "narrow channel" under Rule 9 or an "obstruction" under the Rivers and Harbors Act? Would a boater be guilty of "negligent operation" under Federal and State law for failing to heed the "nonregulatory" warning? Would it depend on whether or not a commercial vessel was operating in the warning area at the time? Special warning buoys could also be established by the Coast Guard. However, this would tend to create the same confusion about legal effect, and would be a drain on limited resources available to maintain aids to navigation in the Great Lakes.

Option 4. Establish regulated navigation areas in the South Passage. There is a wide variety of special rules which could be established to help avoid collisions. The regulatory options currently under consideration include the following permutations (and others will be considered if proposed by commentors). All mariners are invited to comment on the likely effectiveness of these proposals in protecting against the danger of collision. Operators of recreational boats, fishers, and others who have an economic interest in recreational or fishing activity in the area, are specifically requested to comment on any cost associated with these limited restrictions on anchoring and drifting.

Option 4–A. Designated no-anchor and no-drift lanes. These are narrow lanes for the routes most heavily used by commercial traffic, including (1) the channel between Starve Island Reef and Scott Point Shoal, (2) the approach to the commercial docks on the west side of Kelleys Island, (3) the approach to the commercial docks at Marblehead, and (4) the established ferry routes across the passage, between South Bass Island and Scott Point, and between the south side of Kelleys Island and Marblehead. Within these lanes, vessels of any size would be prohibited from either anchoring or drifting, but would be allowed to navigate in any manner otherwise allowed by the navigation rules as long as not anchored or adrift. A permutation on the theme might be to provide that a vessel would not be prohibited from anchoring or drifting in these lanes if the operator of the vessel is monitoring a marine radio on channel 16 so as to be available to be effectively hailed by an approaching commercial vessel.

This is the most restrictive regulatory option being considered. Under this option, the area marked off for no anchoring or drifting would be approximately 13% of the total area of the South Passage. Other forms of navigation would not be restricted. It may be noted that the proposed lanes are near to, but not at the specific points where the three collisions discussed above occurred. The purpose of the lanes is to provide the most logical routing possible, to and from points of commercial activity, which are as far as possible away from the shallower areas favored for fishing.

Draft Regulatory Text, Option 4–A:

§ 165.905 South Passage of Western Lake Erie—regulated navigation areas.

(a) *Locations.* The following navigational lanes in the South Passage of Western Lake Erie are regulated navigation areas:

(1) South Passage Transit Lane: an area 150 yards to either side of a line (approximately 8¾ statute miles long) running northwesterly (302° T) from a point at 41°33′30″ N, 82°42′43″ W on the east end of South Passage to a point at 41°37′30″ N, 82°51′16″ W on the west end of South Passage.

(2) Kellstone Lane: an area 150 yards to either side of a line (approximately 2⅞ statute miles long) running southwesterly (235° T, on a line of sight from the Kellstone Crib Light to the West Harbor Entrance Channel Light #1) from the Kellstone Crib Light at 41°36′36″ N, 82°43′40″ W to the point of intersection of the South Passage Transit Channel center line at 41°35′15″ N, 82°46′24″ W.

(3) Marblehead Stone Dock Lane: an area 150 yards to either side of a line (approximately 1¼ statute miles long) running northerly (019° T), from the Marblehead Stone Dock Light at 41°32′42″ N, 82°43′48″ W to the point of intersection of the South Passage Transit Channel center line at 41°33′45″ N, 82°43′19″ W.

(4) Catawba Island to South Bass Island Ferry Lane: an area 150 yards to either side of a line (approximately 2¾ statute miles long) running due north (000° T), from the ferry dock on the north side of Catawba Island (41°35′16″ N, 82°50′13″ W) to the ferry dock on the south side of South Bass Island (41°37′43″ N, 82°50′13″ W).

(5) Neuman Marblehead to Kelleys Island Ferry Lane: an area 150 yards to either side of a line (approximately 3½ statute miles long) running northerly (006° T), from the Neuman ferry dock at Marblehead (41°32′39″ N, 82°43′55″ W) to the Newman ferry dock on the south side of Kelleys Island (41°35′42″ N, 82°43′31″ W).

(6) Kellstone Marblehead to Kelleys Island Ferry Lane: an area 150 yards to either side of a line (approximately 3⅜ statute miles long) running northerly (019° T), from the Kellstone ferry dock at Marblehead (41°32′38″ N, 82°43′39″ W) to the Kellstone ferry dock on the south side of Kelleys Island (41°35′21″ N, 82°42′20″ W).

(b) *Regulations.* Vessels shall not anchor or drift in these regulated navigation areas.

Option 4–B. Designated no-anchor and no-drift choke points. This would be the same as Option 4–A, except that it would be limited to smaller areas in critical choke points on the ends of the commercial lanes instead of extending to the whole length of the lanes. These choke points could include (1) the approximately 600 by 1000 yard area immediately south of Starve Island Reef Red Buoy #2 bounded by the 25-foot depth contour, (2) a 300 by 1500 yard rectangle with a long axis of 224° true

running from the light on the end of the Kellstone dock on the east side of Kelleys Island to the middle of the channel between Carpenter point and the Red #2 Buoy off the point, and (3) 300 by 1000 yard areas off each of the ferry docks on South Bass Island, Catawba Island, Kelleys Island, and Marblehead.

Under this option, the area marked off for no anchoring or drifting would be approximately 3% of the total area of the South Passage. Other forms of navigation would not be restricted.

Draft Regulatory Text, Option 4–B:

§ 165.905 South Passage of Western Lake Erie—regulated navigation areas.

(a) *Locations.* The following areas in the South Passage of Western Lake Erie are regulated navigation areas:

(1) Scott Point Shoal and Starve Island Reef Channel: an area 300 yards to either side of a line (approximately 1 statute mile long) running northwesterly (302° T) from a point at 41°36′17″ N, 82°48′19″ W (approximately 300 yards northeast of Scott Point Shoal Green Buoy #1) to a point at 41°36′40″ N, 82°49′16″ W (approximately 300 yards southwest of Starve Island Reef Red Buoy #2).

(2) Kellstone Approach Channel: an area 150 yards to either side of a line (approximately 1¼ statute miles long) running southwesterly (235° T, on a line of sight from the Kellstone Crib Light to the West Harbor Entrance Channel Light #1) from the Kellstone Crib Light at 41°36′36″ N, 82°43′40″ W to a point at 41°36′02″ N, 82°44′50″ W.

(3) Marblehead Stone Dock Approach Channel: an area 150 yards to either side of a line running 019° T for 1000 yards from the Marblehead Stone Dock Light at 41°32′42″ N, 82°43′48″ W.

(4) South Passage Ferry Approach Channels: areas 150 yards to either side of lines 1000 yards long running:

(i) 000° T from the ferry docks on the north side of Catawba Island (41°35′16″ N, 82°50′13″ W);

(ii) 180° T from the ferry dock on the south side of South Bass Island (41°37′43″ N, 82°50′13″ W);

(iii) 0006° T from the Neuman ferry dock at Marblehead (41°32′39″ N, 82°43′55″ W):

(iv) 186° T from the Neuman ferry dock on the south side of Kelleys Island (41°35′42″ N, 82°43′31″ W);

(v) 019° T from the Kellstone ferry dock at Marblehead (41°32′38″ N, 82°43′39″ W); and

(vi) 099° T from the Kellstone ferry dock on the south side of Kelleys Island (41°35′21″ N, 82°42′20″ W).

(b) *Regulations.* Vessels shall not anchor or drift in these regulated navigation areas.

Option 4–C. Designated give-way areas. The same areas indicated above in either Option 4–A or Option 4–B, either lanes or choke points, could be designated as areas in which vessels less than 20 meters in length are obligated to clear the designated area upon the approach of barges, ferries, or other commercial vessels greater than 20 meters in length. In effect, this would be creating a "narrow channel" rule for each of these designated areas. Such a rule may or may not already apply in some of these areas depending on interpretation on the general rules. But this would make it clear and unambiguous, with notice to all parties beforehand. However, it is difficult to specify a practical decision rule for determining how close the approaching large vessel need be before the small vessel would be obligated to clear the channel.

Draft Regulatory Text, Option 4–C:

§ 165.905 South Passage of Western Lake Erie—regulated navigation areas.

(a) *Locations.* [Locations would be the same as those in either Option 4–A or Option 4–B above.]

(B) *Regulations.* In these regulated navigation areas, all vessels less than 20 meters in length shall clear the area upon the approach of barges, ferries, or other commercial vessels greater than 20 meters in length.

Drafting Information

The drafters of this regulation are Lieutenant Commander Rhae Giacoma, Assistant Chief, Marine Safety Analysis and Policy Branch, the project officer, and Commander Eric Reeves, Chief, Marine Safety Analysis and Policy Branch, Marine Safety Division, Ninth Coast Guard District.

The Environment, the Economy, and Federalism

The Coast Guard invites comments on significant effects that any of the actions or nonactions proposed in this notion would have on the environment, economics, or federalism:

(1) Would any of these proposed regulations or other options considered here have a significant environmental impact on the South Passage, Lake Erie, or nearby shore areas? If so, what resources would be impacted? How would the impacts be likely to occur?

(2) Would any of these proposed regulations or other options considered here have a significant economic impact on any small business or other small entity? If so, what are the likely costs? How would those costs be incurred?

(3) Would any of these proposed regulations or other options considered here intrude into areas traditionally not regulated by the Federal Government or otherwise implications for Federal and State relations?

Dated: December 2, 1996.

John A. Bastek,

Captain, U.S. Coast Guard, Acting Commander, Ninth Coast Guard District.

[FR Doc. 96–32836 Filed 12–24–96; 8:45 am]

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL–5668–9]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Notice of intent to delete the Minot Landfill Site from the National Priorities List: request for comments.

SUMMARY: The Environmental Protection Agency (EPA), Region VIII announces its intent to delete the Minot Landfill Site (Site) from the National Priorities List (NPL) and requests public comment on this proposed action. The NPL constitutes Appendix B of 40 CFR Part 300 of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. EPA and the State of North Dakota (State) have determined that the Site as remediated poses no significant threat to public health or the environment and, therefore, further remedial measures pursuant to CERCLA are not appropriate.

DATES: Comments concerning this Site may be submitted on or before January 27, 1997.

ADDRESSES: Comments may be mailed to: Erna Acheson Waterman, Remedial Project Manager, U.S. Environmental Protection Agency, Region VIII, 999 18th Street, Suite 500, Mail Stop EPR–SR, Denver, Colorado 80202–2466.

Comprehensive information on this Site is available through the public docket which is available for viewing at the Minot Landfill site information repositories at the following locations:

Superfund Records Center, U.S. Environmental Protection Agency, Region VIII, 999 18th Street, 5th Floor, Denver, Colorado 80202–2466, (303) 312–6473. Hours of operation are 8:00 a.m. to 4:30 p.m.

Background information from the Regional public docket is also available for viewing at the Minot Landfill Site

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion

I. Introduction

The Environmental Protection Agency (EPA), Region VIII announces its intent to delete the Minot Landfill Site (Site) located in Minot, North Dakota from the National Priorities List (NPL), Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), 40 CFR Part 300, and requests comments on this deletion. EPA identifies sites that appear to present a significant risk to public health, welfare, or the environment and maintains the NPL as a list of these sites. As described in § 300.425(e)(3) of the NCP, sites deleted from the NPL remain eligible for remedial actions in the unlikely event that conditions at the site warrant such action.

The Site is identified as the Old Minot Landfill Site in many of the Site documents. EPA will accept comments on this proposed deletion for thirty days following publication of this notice in the **Federal Register**.

Section II of this notice explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the Minot Landfill Site and explains how the Site meets the deletion criteria.

II. NPL Deletion Criteria

Section 300.425(e) of the NCP provides that releases may be deleted from, or recategorized on the NPL where no further response is appropriate. In making a determination to delete a release from the NPL, EPA shall consider, in consultation with the state, whether any of the following criteria have been met:

(i) Responsible parties or other parties have implemented all appropriate response actions required;

(ii) All appropriate Fund-financed response under CERCLA has been implemented, and no further action by responsible parties is appropriate; or

(iii) The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, taking remedial measures is not appropriate.

For all Remedial Actions (RA) which result in hazardous substances, pollutants, or contaminants remaining at the site, CERCLA requires a review of such action be conducted no less than every five years after initiation of Remedial Action. Pursuant to CERCLA § 121(c), 40 C.F.R § 300.400(f)(4)(ii) and OSWER Directive 9355.7–02, Structure and Components of Five-year Review Guidance, July 26, 1994, EPA Region VIII must conduct a statutory five-year review at this Site prior to the end of the third quarter of 2001 (five years after Remedial Action on-site construction mobilization).

III. Deletion Procedures

EPA Region VIII will accept and evaluate public comments before making a final decision to delete the Minot Landfill Site. The following procedures were used for the intended deletion of this Site:

1. EPA Region VIII has recommended deletion of the Minot Site and has prepared the relevant documents;

2. The State of North Dakota has concurred with EPA's recommendation for deletion;

3. Concurrent with this Notice of Intent to Delete, a notice has been published in local newspapers and has been distributed to appropriate Federal, State and local officials, and other interested parties announcing the commencement of a 30-day public comment period on EPA's Notice of Intent to Delete;

4. The Region has made all relevant documents available in the Regional Office and local Site information repositories;

5. Prior to deletion of this Site, EPA's Regional Office will accept and evaluate public comments on EPA's Notice of Intent to Delete before making a final decision to delete. If necessary, the Agency will prepare a Responsiveness Summary to address any significant comments received. Public notices and copies of the Responsiveness Summary will be made available to local residents by the Regional office.

6. Deletion of the Site from the NPL does not in itself create, alter, or revoke any individual's rights or obligations. The NPL is designed primarily for informational purposes and to assist Agency management. As mentioned in Section II of this Notice, § 300.425(e)(3) of the NCP states that the deletion of a Site from the NPL does not preclude eligibility for future response actions should future Site conditions warrant such action.

7. A deletion occurs when the Regional Administrator places a final notice in the **Federal Register**. Generally, the NPL will reflect deletions in the final update following the Notice.

IV. Basis for Intended Site Deletion

The following summary provides EPA's rationale for recommending deletion of the Minot Landfill Superfund Site.

A. Site Background

The Minot Landfill Superfund Site is located in Section 27, Township 155 North, Range 83 West, approximately one mile southwest of downtown Minot, in Ward County, North Dakota. The Site is situated approximately 2,000 feet south of the Souris River and is located to the east of the intersection of the Burdick Expressway and the combined U.S. Highways 2 and 52 Bypass. The area that received municipal and industrial waste covered approximately 26 acres. Land use in the vicinity of the Site is light industrial and residential, with areas south-west of the Site used for agriculture.

The Site was placed on the National Priorities List (NPL) in 1989, **Federal Register**, Volume 54, No. 61, March 31, 1989, Page 13296.

In 1989, a Removal Action was initiated by the City of Minot. The Removal Action involved installation of a fence around the perimeter of the landfill, construction of surface runoff/erosion control (including swales and storm sewer piping), and seeding of areas disturbed by construction and exposed slopes on the hills located along the southern edge of the site. In 1990, additional work to repair drainage ditches and swales was performed to complete the Removal Action.

B. History

The Site was used to dispose of municipal and industrial waste between 1961 and 1971. The landfill was operated by the City of Minot. An estimated 75 tons/day of waste was placed in the landfill during its operation. The exact composition of the wastes disposed is not known. Discussions with past landfill operators indicate that refuse was received from the City of Minot, other neighboring towns, farms, industries, and military sites. In addition, the landfill likely contains arsenic-contaminated soils and residues, and solvents used in a variety of local industrial applications.

C. Characterization of Risk

Sampling and field studies were conducted by the City of Minot's consultant in order to prepare the Site-

wide Remedial Investigation (RI) Report. The RI Report, completed in 1992, characterized contamination for the entire Site.

Residential, commercial recreational, and agricultural areas are currently located in the vicinity of the Site, and nearly a quarter (8,000) of Minot's population lies within a one-mile radius of the Site. Since the latter part of 1989, most of the Site has been enclosed with a chain-link fence and, consequently, public access to the Site is presently restricted. Future land use for the areas adjacent to the Site is expected to be commercial and light industrial. A Baseline Risk Assessment (BRA) was prepared for the Site to evaluate potential human health risks associated with the Site in absence of any remedial action. Contaminated media that were quantitatively evaluated in the risk assessment were groundwater (including leachate), surface water, soil, sediment, and landfill gases. Potentially exposed receptors evaluated in the BRA were: (1) adult residents and occupational workers who live or work at or in the vicinity of the Site; and (2) active children between the ages of 3 to 12 years who live or play in the vicinity of the Site.

Once the contamination at the Site was characterized, an evaluation was made of the remedial measures that would be necessary to achieve specified cleanup goals. This evaluation and cleanup goals are contained in the Site Feasibility Study (FS), completed in 1992 by the City of Minot's consultant.

Additionally, a geophysical survey investigation, a borrow source investigation, and aerial surveying were performed in April and May 1993, by the City of Minot's consultant.

Upon completion of the Remedial Investigation/Feasibility Study (RI/FS) for the Site, EPA issued a Record of Decision (ROD) for the Site on June 21, 1993. Due to timing conflicts, this ROD did not include the results of the geophysical survey investigation. An Explanation of Significant Differences (ESD) was prepared to address the geophysical survey and additional information related to various components of the remedy presented at a remedial design kickoff meeting on January 23, 1996, between the City of Minot, EPA, North Dakota Department of Health (NDDH) and the City's consultant, Wenck Associates, Inc. (Wenck). The approved ESD for the Old Minot Landfill Superfund Site was issued April 10, 1996.

In April 1996, a Remedial Design Report describing the remedial actions to be implemented at the Minot Landfill Site was approved by the EPA and NDDH.

The Remedial Action at the Site took place during the months of July, August and September 1996. The elements of the Remedial Action are: Grading of the landfill and installation of a vegetated cover; installation of rip-rap around catch basins; installation of drains to collect leachate within the landfill for conveyance to the City of Minot waste water treatment facility; installation of riser pipes to serve as passive gas vents with removable wind turbines to help remove gas from the landfill; installation of seven groundwater monitoring wells and four piezometers to be used in longer term groundwater monitoring. Institutional Controls have been put into place to restrict or control land use within and adjacent to the Site boundaries.

Maintenance of fences, vegetated cover, groundwater monitoring and other longer term aspects of the response actions are addressed in the Monitoring Operations and Contingency Plan which was approved by EPA and the State of North Dakota on November 7, 1996. The Final Remedial Action Completion Report was approved by EPA and the State of North Dakota on November 29, 1996.

V. Community Relations

EPA produced a fact sheet on the site in October 1989. The City of Minot held a public meeting on the landfill in January 1990.

An EPA community involvement coordinator conducted interviews of Minot citizens during the week of September 25, 1990. EPA completed a Community Relations Plan for the Old Minot Landfill in November 1991. A mailing list of key contacts was developed.

EPA established an information repository at the Minot Public Library and placed a public notice announcing the repository's creation and location in the Minot Daily News.

A public notice was placed in the Minot Daily News announcing availability of the Remedial Investigation/Feasibility Study (RI/FS) Work Plan. An information update concerning human health risks at the Site was placed in the Minot Daily News on July 17, 1992.

EPA issued a Proposed Plan for Site cleanup in December 1992 and placed a public notice announcing the availability of the Proposed Plan, the initiation of the public comment period and the date of a Public Hearing on the Proposed Plan in the Minot Daily News. EPA held a public comment period on the Proposed Plan from Januaary 4, 1993 to March 4, 1993, and EPA conducted the public hearing on January 19, 1993 at the Minot City Hall.

The Record of Decision (ROD) was issued on June 21, 1993. A public notice announcing the issuance of the Record of Decision was placed in the Minot Daily News. The ROD contains a Responsiveness Summary that addresses the public comments that were received.

The Community Relations Plan was updated in November 1994.

A public notice announcing changes in the cleanup and the availability of an Explanation of Significant Differences was placed in the Minot Daily News on May 15 and 19, 1996.

Alan Walter, Public Works Director for the City of Minot appeared in the news media and provided information to the public both at the beginning and completion of the Remedial Action.

VI. Summary

The completed remedy results in hazardous substances remaining on-site above levels which allow for unlimited and unrestricted access; therefore institutional controls and operation and maintenance activities will be required.

For all Remedial Actions (RA) which result in hazardous substances, pollutants, or contaminants remaining at the Site CERCLA requires that a review of such action be conducted no less than every five years after initiation of the Remedial Action. Pursuant to CERCLA § 121(c), 40 C.F.R. § 300.400(f)(4)(ii) and OSWER Directive 9355.7–02, Structure and Components of Five-year Review Guidance, July 26, 1994, EPA Region VIII must conduct a statutory five-year review at this Site prior to the end of the third quarter of 2001 (five years after Remedial Action on-site Construction Mobilization). All completion requirements for the Minot Landfill Site have been achieved as outlined in OSWER Directive 9320.2–3A.

EPA, with the concurrence of the State of North Dakota, has determined that all appropriate response actions required by CERCLA at the Minot Landfill Site have been completed, and that no further cleanup by responsible parties is appropriate.

Dated: December 12, 1996.

Jack W. McGraw,

Acting Regional Administrator, U.S. Environmental Protection Agency, Region VIII.

[FR Doc. 96–32659 Filed 12–24–96; 8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 0 and 1

[CC Docket No. 96–238; FCC 96–460]

Formal Complaints Filed Against Common Carriers

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission adopted a Notice of Proposed Rulemaking ("NPRM") seeking comment on proposed changes to the rules for processing formal complaints filed against common carriers. The NPRM proposes rules necessary to implement certain provisions contained in the 1996 Act that prescribe deadlines ranging from 90 days to 5 months for resolution of certain types of complaints against common carriers. The proposed rules require or encourage complainants and defendants to engage in certain pre-filing activities, change service requirements, modify the form of initial pleadings, shorten filing deadlines, eliminate certain pleading opportunities that do not appear useful or necessary, and eliminate or modify the discovery process.

DATES: Written comments by the public on the NPRM and the proposed and/or modified information collections are due January 6, 1996. Reply comments are due on January 31, 1996. Written comments by the Office of Management and Budget (OMB) on the proposed and/or modified information collections on or before February 24, 1997.

ADDRESSES: Comments and reply comments should be sent to the Office of the Secretary, Federal Communications Commission, 1919 M Street, N.W., Suite 222, Washington, D.C. 20554, with a copy to Anita Cheng, Federal Communications Commission, Enforcement Division, 2025 M Street, N.W., Room 6008, Washington, D.C. 20554. Parties should also file one copy of any documents filed in this docket with the Commission's copy contractor, International Transcription Services, Inc., 2100 M Street, N.W., Suite 140, Washington, D.C. 20037. In addition to filing comments with the Secretary, a copy of any comments on the information collections contained herein should be submitted to Dorothy Conway, Federal Communications Commission, Room 234, 1919 M Street, N.W., Washington, DC 20554, or via the Internet to dconway@fcc.gov and to Timothy Fain, OMB Desk Officer, 10236 NEOB, 725—17th Street, N.W., Washington, DC 20503 or via the Internet to fain__t@al.eop.gov.

FOR FURTHER INFORMATION CONTACT: Anita Cheng, Enforcement Division, Common Carrier Bureau, (202) 418–0960. For additional information concerning the information collections contained in the NPRM contact Dorothy Conway at (202) 418–0217, or via the Internet at dconway@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's NPRM in CC Docket No. 96–238, adopted on November 26, 1996 and released November 27, 1996. The full text of the NPRM is available for inspection and copying during normal business hours in the FCC Reference Center, Room 239, 1919 M Street, N.W., Washington, D.C. The complete text of this decision may also be purchased from the Commission's duplicating contractor, International Transcription Services, 2100 M Street, N.W., Suite 140, Washington, D.C. 20037 (202) 857–3800.

Paperwork Reduction Act

The NPRM contains a proposed or modified information collection. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on the information collections contained in the NPRM, as required by the Paperwork Reduction Act of 1995, Public Law No. 104–13. Public and agency comments are due at the same time as other comments on the NPRM; OMB notification of action is due February 24, 1997. Comments should address: (a) whether the proposed or modified information collection is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

OMB Control Number: 3060–0411.

Title: Formal Complaints Against Common Carriers, Sections 1.720 - 1.735.

Type of Review: Revised collection.

Respondents: Individuals or households; business or other for-profit, including small business; not-for-profit institutions; state, local or tribal government.

Section/Title	Number of respondents	Est. time per response (hour(s))	Total annual burden (hours)
a. Designation of Agent for Service	4,965	.5	2,482.5
b. Joint Statement of Stipulated Facts and Pleading Content Requirements	760	3	2,280
c. Orders Memorializing Rulings at Status Conferences	760	1	760
d. Complaint Intake Form	760	.5	380
Total Annual Burden:			5,902.5

Estimated cost per respondent: 0.

Needs and Uses: The information has been and is currently being used by the FCC to determine the sufficiency of complaints and to resolve the merits of disputes between the parties.

The NPRM proposes to require all carriers subject to the Communications Act of 1934, as amended, to file in writing and electronically, a designation of agent for service of process with the Commission, to facilitate service of process in all Commission proceedings.

Regarding changes to the pleading requirements, the NPRM proposes that complaints must contain complete statements of relevant facts and supporting documentation; certification that each complainant has discussed the possibility of settlement with each defendant prior to filing of the complaint; copies or descriptions of documents relevant to the complaint; name, address and telephone number of all individuals with information relevant to the complaint; a computation for any damages claimed. The NPRM also proposes that answers must be filed within 20 days of service of the formal complaint and must contain complete statements of relevant facts and supporting documentation; copies or descriptions of documents

relevant to the pleadings; name, address and telephone number of all individuals with information relevant to the pleadings; and proposes to prohibit general denials. The NPRM proposes to require all pleadings to be accompanied by copies of relevant tariffs. The NPRM proposes to prohibit replies unless authorized by the Commission and when permitted, replies must contain copies or descriptions of documents relevant to the pleadings; name, address and telephone number of all individuals with information relevant to the pleadings. The NPRM proposes to require all motions seeking Commission orders must be accompanied by proposed orders in both hard copy and on computer disk. The NPRM proposes to prohibit amendments to complaints to add new claims or requests for relief. The NPRM further requires parties to submit a joint statement of proposed stipulated facts and key legal issues within 5 days after the answer is filed, as well as requiring all relevant facts and documentation to be contained in each pleading. These proposals will promote agreement on a significant number of disputed facts and legal issues, as well as serving to better inform the Commission of the factual and legal areas in dispute.

The NPRM also proposes to require parties to memorialize jointly, in writing, Commission rulings made in a status conference and to submit such writing, within 24 hours, to the Commission staff person who made such rulings. This proposal would remove the burden of memorializing oral rulings made in status conferences from the Commission to the parties.

Finally, the NPRM proposes to require a complainant to submit a completed intake form with its formal complaint to indicate that the complaint meets the threshold requirements for stating a cause of action. This requirement would help to prevent the filing of procedurally insufficient complaints.

Initial Regulatory Flexibility Analysis

Pursuant to Section 603(a) of the Regulatory Flexibility Act, 5 U.S.C. Section 603(a) (1981), the Commission concluded that the proposals in the NPRM may have some economic impact on small business entities, due to the proposals to require or encourage complainants and defendants to engage in certain pre-filing activities, change service requirements, modify the form of initial pleadings, shorten filing deadlines, eliminate certain pleading opportunities that do not appear useful or necessary, and eliminate or modify the discovery process. Public comment is requested on the Initial Regulatory Flexibility Analysis set forth fully in the NPRM. These comments must be filed in accordance with the same filing deadlines set for comments on the other issues in this NPRM but they must have a separate and distinct heading designating them as responses to the Initial Regulatory Flexibility Analysis.

Need for and Objectives of the Proposed Rules: The Commission is issuing this Complaint NPRM to implement certain complaint provisions contained in the Telecommunications Act of 1996 and to improve generally the speed and effectiveness of its formal complaint process.

Legal Basis: The Complaint NPRM is adopted pursuant to Sections 1, 4(i), 4(j), 207 - 209, 260, 271, 274, and 275 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 154(j), 207 - 209, 260, 271, 274, 275.

Description and Number of Small Entities Which May be Affected: The proposals in this proceeding may have a significant impact on a substantial number of small businesses as defined by Section 601(3) of the Regulatory Flexibility Act. Under the Small Business Act, a "small business concern" is one that: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) meets any additional criteria established by the Small Business Administration (SBA). SBA has defined a small business for Standard Industrial Classification (SIC) categories 4812 (Radiotelephone Communications) and 4813 (Telephone Communications, Except Radiotelephone) as those which have fewer than 1,500 employees.

1. Telephone Companies (SIC 481)

Estimate of Potential Complainants that may be Classified as Small Businesses. Section 208(a) provides that formal complaints against a common carrier may be filed by "[a]ny person, any body politic or municipal organization." The FCC has no control as to the filing frequency of complaints, nor as to the parties that will file complaints. The filing of complaints depends entirely upon the complainant's perception that it possesses a cause of action against a common carrier subject to the Communications Act of 1934, as amended, and it is the complainant's decision to file its complaint with the FCC. Therefore the Commission is unable at this time to estimate the number of future complainants that would qualify as small business concerns under SBA's definition.

Estimate of Potential Defendants that may be Classified as Small Businesses. The United States Bureau of the Census ("the Census Bureau") reports that, at the end of 1992, there were 3,497 firms engaged in providing telephone services, as defined therein, for at least one year. This number encompasses a broad category which contains a variety of different subsets of carriers, including local exchange carriers, interexchange carriers, competitive access providers, cellular carriers, mobile service carriers, operator service providers, pay telephone operators, PCS providers, covered SMR providers, and resellers. It seems certain that some of those 3,497 telephone service firms may not qualify as small entities or small incumbent LECs because they are not "independently owned and operated." For example, a PCS provider that is affiliated with an interexchange carrier having more than 1,500 employees would not meet the definition of a small business. It seems reasonable to conclude, therefore, that fewer than 3,497 telephone service firms are small entity telephone service firms or small incumbent LECs that may be affected by this Order. The Commission seeks comment on this conclusion. The Commission estimates below the potential defendants affected by this order by service category. The Commission seeks comment on these estimates.

Wireline Carriers and Service Providers. SBA has developed a definition of small entities for telephone communications companies other than radiotelephone (wireless) companies. The Census Bureau reports that, there were 2,321 such telephone companies in operation for at least one year at the end of 1992. All but 26 of the 2,321 non-radiotelephone companies listed by the Census Bureau were reported to have fewer than 1,000 employees. Thus, even if all 26 of those companies had more than 1,500 employees, there would still be 2,295 non-radiotelephone companies that might qualify as small entities or small incumbent LECs. Although it seems certain that some of these carriers are not independently owned and operated, the Commission is unable at this time to estimate with greater precision the number of wireline carriers and service providers that would qualify as small business concerns under SBA's definition. Consequently, the Commission estimates that there are fewer than 2,295 small entity telephone communications companies other than radiotelephone companies that may be affected by the decisions and rules adopted in this Order.

Local Exchange Carriers. Neither the Commission nor SBA has developed a definition of small providers of local

exchange services (LECs). The closest applicable definition under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies. The most reliable source of information regarding the number of LECs nationwide of which the Commission is aware appears to be the data that it collects annually in connection with the Telecommunications Relay Service (TRS). According to the Commission's most recent data, 1,347 companies reported that they were engaged in the provision of local exchange services. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, the Commission is unable at this time to estimate with greater precision the number of LECs that would qualify as small business concerns under SBA's definition. Consequently, the Commission estimate that there are fewer than 1,347 small incumbent LECs that may be affected by the decisions and rules adopted in this Order.

Interexchange Carriers. Neither the Commission nor SBA has developed a definition of small entities specifically applicable to providers of interexchange services (IXCs). The closest applicable definition under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies. The most reliable source of information regarding the number of IXCs nationwide of which the Commission is aware appears to be the data collected annually in connection with TRS. According to the Commission's most recent data, 97 companies reported that they were engaged in the provision of interexchange services. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, the Commission is unable at this time to estimate with greater precision the number of IXCs that would qualify as small business concerns under SBA's definition. Consequently, the Commission estimates that there are fewer than 97 small entity IXCs that may be affected by the decisions and rules adopted in this Order.

Competitive Access Providers. Neither the Commission nor SBA has developed a definition of small entities specifically applicable to providers of competitive access services (CAPs). The closest applicable definition under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies. The most reliable source of information regarding the number of CAPs nationwide of which the Commission is aware appears to be the data that it collects annually in connection with the TRS. According to the Commission's most recent data, 30 companies reported that they were engaged in the provision of competitive access services. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, the Commission is unable at this time to estimate with greater precision the number of CAPs that would qualify as small business concerns under SBA's definition. Consequently, the Commission estimates that there are fewer than 30 small entity CAPs that may be affected by the decisions and rules adopted in this Order.

Operator Service Providers. Neither the Commission nor SBA has developed a definition of small entities specifically applicable to providers of operator services. The closest applicable definition under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies. The most reliable source of information regarding the number of operator service providers nationwide of which the Commission is aware appears to be the data that it collects annually in connection with the TRS. According to the Commission's most recent data, 29 companies reported that they were engaged in the provision of operator services. Although it seems certain that some of these companies are not independently owned and operated, or have more than 1,500 employees, the Commission is unable at this time to estimate with greater precision the number of operator service providers that would qualify as small business concerns under SBA's definition. Consequently, the Commission estimates that there are fewer than 29 small entity operator service providers that may be affected by the decisions and rules adopted in this Order.

Pay Telephone Operators. Neither the Commission nor SBA has developed a definition of small entities specifically applicable to pay telephone operators. The closest applicable definition under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies. The most reliable source of information regarding the number of pay telephone operators nationwide of which the Commission is aware appears to be the data that it collects annually in connection with the TRS. According to the Commission's most recent data, 197 companies reported that they were engaged in the provision of pay telephone services. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, the Commission is unable at this time to estimate with greater precision the number of pay telephone operators that would qualify as small business concerns under SBA's definition. Consequently, the Commission estimates that there are fewer than 197 small entity pay telephone operators that may be affected by the decisions and rules adopted in this Order.

Wireless (Radiotelephone) Carriers. SBA has developed a definition of small entities for radiotelephone (wireless) companies. The Census Bureau reports that there were 1,176 such companies in operation for at least one year at the end of 1992. According to SBA's definition, a small business radiotelephone company is one employing fewer than 1,500 persons. The Census Bureau also reported that 1,164 of those radiotelephone companies had fewer than 1,000 employees. Thus, even if all of the remaining 12 companies had more than 1,500 employees, there would still be 1,164 radiotelephone companies that might qualify as small entities if they are independently owned and operated. Although it seems certain that some of these carriers are not independently owned and operated, the Commission is unable at this time to estimate with greater precision the number of radiotelephone carriers and service providers that would qualify as small business concerns under SBA's definition. Consequently, the Commission estimates that there are fewer than 1,164 small entity radiotelephone companies that may be affected by the decisions and rules adopted in this Order.

Cellular Service Carriers. Neither the Commission nor SBA has developed a definition of small entities specifically applicable to providers of cellular services. The closest applicable definition under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies. The most reliable source of information regarding the number of cellular service carriers nationwide of which the Commission is aware appears to be the data that it collects annually in connection with the TRS. According to the Commission's most recent data, 789 companies reported that they were engaged in the provision of cellular services. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, the Commission is unable at this time to estimate with greater precision the number of cellular service carriers that

would qualify as small business concerns under SBA's definition. Consequently, the Commission estimates that there are fewer than 789 small entity cellular service carriers that may be affected by the decisions and rules adopted in this Order.

Mobile Service Carriers. Neither the Commission nor SBA has developed a definition of small entities specifically applicable to mobile service carriers, such as paging companies. The closest applicable definition under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies. The most reliable source of information regarding the number of mobile service carriers nationwide of which the Commission is aware appears to be the data that it collects annually in connection with the TRS. According to the Commission's most recent data, 117 companies reported that they were engaged in the provision of mobile services. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, the Commission is unable at this time to estimate with greater precision the number of mobile service carriers that would qualify under SBA's definition. Consequently, the Commission estimates that there are fewer than 117 small entity mobile service carriers that may be affected by the decisions and rules adopted in this Order.

Broadband PCS Licensees. The broadband PCS spectrum is divided into six frequency blocks designated A through F. As set forth in 47 CFR § 24.720(b), the Commission has defined "small entity" in the auctions for Blocks C and F as a firm that had average gross revenues of less than $40 million in the three previous calendar years. The Commission's definition of a "small entity" in the context of broadband PCS auctions has been approved by SBA. The Commission has auctioned broadband PCS licenses in Blocks A, B, and C. The Commission does not have sufficient data to determine how many small businesses bid successfully for licenses in Blocks A and B. There were 90 winning bidders that qualified as small entities in the Block C auction. Based on this information, the Commission concludes that the number of broadband PCS licensees affected by the decisions in this Order includes, at a minimum, the 90 winning bidders that qualified as small entities in the Block C broadband PCS auction.

At present, no licenses have been awarded for Blocks D, E, and F of broadband PCS spectrum. Therefore, there are no small businesses currently providing these services. However, a total of 1,479 licenses will be awarded in the D, E, and F Block broadband PCS auctions, which are scheduled to begin on August 26, 1996. Of the 153 qualified bidders for the D, E, and F Block PCS auctions, 105 were small businesses. Eligibility for the 493 F Block licenses is limited to entrepreneurs with average gross revenues of less than $125 million. There are 114 eligible bidders for the F Block. The Commission cannot estimate, however, the number of these licenses that will be won by small entities under this definition, nor how many small entities will win D or E Block licenses. Given that nearly all radiotelephone companies have fewer than 1,000 employees and that no reliable estimate of the number of prospective D, E, and F Block licensees can be made, the Commission assumes for purposes of this IRFA, that all of the licenses in the D, E, and F Block Broadband PCS auctions may be awarded to small entities under the Commission's rules, which may be affected by the decisions and rules adopted in this Order.

SMR Licensees. Pursuant to 47 CFR § 90.814(b)(1), the Commission has defined "small entity" in auctions for geographic area 800 MHz and 900 MHz SMR licenses as a firm that had average annual gross revenues of less than $15 million in the three previous calendar years. This definition of a "small entity" in the context of 800 MHz and 900 MHz SMR has been approved by the SBA. The rules adopted in this Order may apply to SMR providers in the 800 MHz and 900 MHz bands that either hold geographic area licenses or have obtained extended implementation authorizations. The Commission does not know how many firms provide 800 MHz or 900 MHz geographic area SMR service pursuant to extended implementation authorizations, nor how many of these providers have annual revenues of less than $15 million. The Commission assumes, for purposes of this IRFA, that all of the extended implementation authorizations may be held by small entities, which may be affected by the decisions and rules adopted in this Order.

The Commission recently held auctions for geographic area licenses in the 900 MHz SMR band. There were 60 winning bidders who qualified as small entities in the 900 MHz auction. Based on this information, the Commission concludes that the number of geographic area SMR licensees affected by the rule adopted in this Order includes these 60 small entities. No auctions have been held for 800 MHz geographic area SMR licenses. Therefore, no small entities currently hold these licenses. A total of 525 licenses will be awarded for the upper 200 channels in the 800 MHz geographic area SMR auction. However, the Commission has not yet determined how many licenses will be awarded for the lower 230 channels in the 800 MHz geographic area SMR auction. There is no basis, moreover, on which to estimate how many small entities will win these licenses. Given that nearly all radiotelephone companies have fewer than 1,000 employees and that no reliable estimate of the number of prospective 800 MHz licensees can be made, the Commission assumes, for purposes of this IRFA, that all of the licenses may be awarded to small entities who, thus, may be affected by the decisions in this Order.

Resellers. Neither the Commission nor SBA has developed a definition of small entities specifically applicable to resellers. The closest applicable definition under SBA rules is for all telephone communications companies. The most reliable source of information regarding the number of resellers nationwide of which the Commission is aware appears to be the data that it collects annually in connection with the TRS. According to the Commission's most recent data, 206 companies reported that they were engaged in the resale of telephone services. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, the Commission is unable at this time to estimate with greater precision the number of resellers that would qualify as small business concerns under SBA's definition. Consequently, the Commission estimates that there are fewer than 206 small entity resellers that may be affected by the decisions and rules adopted in this Order.

2. Cable System Operators (SIC 4841)

Cable Systems: SBA has developed a definition of small entities for cable and other pay television services, which includes all such companies generating less than $11 million in revenue annually. This definition includes cable systems operators, closed circuit television services, direct broadcast satellite services, multipoint distribution systems, satellite master antenna systems and subscription television services. According to the Census Bureau, there were 1,323 such cable and other pay television services generating less than $11 million in revenue that were in operation for at least one year at the end of 1992.

The Commission has developed its own definition of a small cable system operator for the purposes of rate regulation. Under the Commission's rules, a "small cable company," is one serving fewer than 400,000 subscribers nationwide. Based on the Commission's most recent information, the Commission estimates that there were 1,439 cable operators that qualified as small cable system operators at the end of 1995. Since then, some of those companies may have grown to serve over 400,000 subscribers, and others may have been involved in transactions that caused them to be combined with other cable operators. Consequently, the Commission estimates that there are fewer than 1,439 small entity cable system operators that may be affected by the decisions and rules adopted in this Order.

The Communications Act also contains a definition of a small cable system operator, which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000." The Commission has determined that there are 61,700,000 subscribers in the United States. Therefore, the Commission found that an operator serving fewer than 617,000 subscribers shall be deemed a small operator, if its annual revenues, when combined with the total annual revenues of all of its affiliates, do not exceed $250 million in the aggregate. Based on available data, the Commission finds that the number of cable operators serving 617,000 subscribers or less totals 1,450. Although it seems certain that some of these cable system operators are affiliated with entities whose gross annual revenues exceed $250,000,000, the Commission is unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements: Section 1.721 of the proposed rules would require all complainants to complete and submit a Formal Complaint Intake Form with their complaints. The intake form requirement is designed to help complainants avoid procedural and substantive defects that might affect the staff's ability to quickly process complaints and delay full responses by defendant carriers to otherwise legitimate complaints. In addition, the completed form should enable the staff and the defendant carriers to quickly identify the specific statutory provisions under which relief is being sought in the complaint. Because the proposed form would solicit information that would be already contained in the body of the formal complaint, no additional professional skills would be necessary to complete the form.

Potential Impact: Some of the proposed requirements in this Complaint NPRM may have a significant economic impact on small business entities. Generally, this Complaint NPRM proposes to require or encourage complainants and defendants to engage in certain pre-filing activities, change service requirements, modify the form of initial pleadings, shorten filing deadlines, eliminate certain pleading opportunities that do not appear useful or necessary, and modify the discovery process.

Pre-Filing Activities and Discovery: The Commission proposes to require a complainant to do the following: certify that it discussed the possibility of settlement with the defendant carrier's representative(s) prior to filing the complaint and attach certain written documentation. The Commission seeks comment on limiting discovery. The Commission also seeks comment on the feasibility of allowing the parties to a complaint proceeding to agree among themselves to a cost-recovery system as a basis for facilitating the prompt identification and exchange of information. While these proposed rules may place a greater burden on a small business entity to provide better legal and factual support early in the process, the Commission tentatively concludes that it does not significantly alter the level of evidentiary and legal support that would be ultimately required of parties in formal complaint actions pursuant to the current rules. It may, however, make it more difficult for all complainants, including small business, to gather the information needed to prevail on their complaints. Potentially higher initial costs may be somewhat offset by the prompt resolution of complaints and the avoidance of protracted and costly discovery proceedings and briefing requirements. It has been noted, for example, that the overall litigation costs of "rocket docket" cases in the U.S. District Court for the Eastern District of Virginia are lower than the costs of cases that take longer to resolve. Indeed, by requiring better and more complete submissions earlier in the process, this proposed rule reduces the need for discovery and other information filings, thereby significantly reducing the burden on small business entities. The Commission seeks comment on this tentative conclusion and any other potential impact of these proposals on small business entities.

Format and Content Requirements and Other Required Submissions: The Commission proposes to require parties to submit a joint statement of stipulated facts and key legal issues five days after the answer is filed. The Commission also proposes to require all pleadings that seek Commission orders, as well as the orders themselves, to contain proposed findings of fact and conclusions of law, with supporting legal analysis, and to require these submissions to be in both hard copy and on computer disks in "read only" mode and formatted in WordPerfect 5.1 for Windows, or as otherwise directed by the staff in particular cases. The Commission also proposes to require the complaint, answer, and any authorized reply to include: (1) the name, address and telephone number of each individual likely to have discoverable information relevant to the disputed facts alleged in the pleadings, identifying the subjects of information; and (2) a copy of, or a description by category and location of all documents, data compilations and tangible things in the possession, custody, or control of the party that are relevant to the disputed facts alleged with particularity in the pleadings. While these proposed rules may place a greater burden on a small business entity to provide better legal and factual support early in the process, the Commission tentatively concludes that it does not significantly alter the level of evidentiary and legal support that would be ultimately required of parties in formal complaint actions pursuant to the current rules. It may, however, make it more difficult for all complainants, including small business, to gather the information needed to prevail on their complaints. Potentially higher initial costs may be somewhat offset by the prompt resolution of complaints and the avoidance of protracted and costly discovery proceedings and briefing requirements. It has been noted, for example, that the overall litigation costs of "rocket docket" cases in the U.S. District Court for the Eastern District of Virginia are lower than the costs of cases that take longer to resolve. Indeed, by requiring better and more complete submissions earlier in the process, this proposed rule reduces the need for discovery and other information filings, thereby significantly reducing the burden on small business entities. The Commission seeks comment on this

VOL 61 ISS 249 DE 26 1996 UMI

tentative conclusion and any other potential impact of these proposals on small business entities.

Damages. The Commission proposes to allow bifurcation of liability and damages issues by permitting a complainant to file a supplemental complaint for damages after a finding of liability. In such a case, the Commission would defer adjudication of all damages issues until after a finding of liability. The Commission also proposes to require, in certain cases after liability has been found, defendants to place a sum of money in an interest-bearing escrow account, to cover part or all of the damages for which they may be found liable. While the bifurcation of liability and damages issues may require small business entities to postpone litigation of damages issues, any increased costs will be somewhat offset by the prompt resolution of the liability issues in complaints and the avoidance of protracted and costly discovery proceedings and briefing requirements in the initial proceeding. The proposal to require defendants to place a sum of money in an interest-bearing escrow account may have a significant economic impact on defendants that are small business entities without sufficient funds. The Commission seeks comment on this tentative conclusion and any other potential impact of these proposals on small business entities.

Significant Alternatives to the Proposed Rules Which Minimize Significant Economic Impact on Small Entities and Accomplish Stated Objectives: The Commission has included a proposal to waive many of the proposed pleading requirements with respect to complainants and other entities that can demonstrate good cause. Upon an appropriate showing of financial hardship or other public interest factors, the Commission proposes to waive format and content requirements under Section 1.721 of the rules. Furthermore, the proposed rules apply only to Section 208 complaints that are filed with the Commission. Complainants wishing to assure themselves of the ability to utilize full discovery, for example, are not precluded from filing their complaints in federal district court. The impact on small business entities of the proposal to require defendants to place a sum of money in an interest-bearing escrow account would be minimized by the fact that this measure would be implemented under standards similar to those used for determining whether a preliminary injunction is appropriate, *e.g.*, likelihood of success on the merits, irreparable harm, etc. In addition, the Complaint NPRM solicits comments on a variety of alternatives.

Federal Rules that May Overlap, Duplicate, or Conflict with the Proposed Rules: None.

Summary of Notice of Proposed Rule Making

I. Background

1. In February 1996, Congress passed and the President signed the "Telecommunications Act of 1996" ("1996 Act"). The 1996 Act prescribes deadlines ranging from 90 days to 5 months for the resolution of certain types of complaints against the Bell Operating Companies ("BOCs") and other telecommunications carriers that are subject to the 1996 Act's requirements. The complaint provisions added by the 1996 Act that are relevant to this NPRM are Sections 208, 255, 260, 271, 274, and 275. This NPRM proposes rules necessary to implement those complaint resolution provisions.

II. Discussion

2. The NPRM seeks comment on changes to the Commission's current rules for processing formal complaints against carriers that would: (1) require or encourage complainants and defendants to engage in certain pre-filing activities designed to resolve or narrow issues and compile and/or exchange better factual information before resort to the complaint process; (2) eliminate delays in serving complaints on defendant carriers; (3) improve the format and content of complaints, answers and other pleadings filed by parties; (4) eliminate certain pleading opportunities that do not appear useful or necessary; and (5) limit or eliminate discovery.

A. Pre-Filing Procedures and Activities

3. The Commission asks interested parties to identify specific pre-filing activities available to potential complainants and defendants that could serve to settle or narrow disputes, or facilitate the compilation and exchange of relevant documentation or other information prior to the filing of a formal complaint with the Commission. The Commission proposes to require a complainant to certify that it discussed the possibility of settlement with the defendant carrier's representative(s) prior to filing the complaint.

4. The Commission also seeks comment on whether a committee composed of industry members would serve a needed role or useful purpose in addressing disputes over technical and other business disputes, before such disputes are brought before the Commission in the form of formal complaint actions that must be resolved under expedited procedures. Participation in a proceeding before such a committee would be strictly voluntary.

B. Service

5. The primary goal of the Commission in proposing changes to the current service procedures is to prevent the delay caused by those procedures, which implement the Section 208 requirement that the Commission serve formal complaints on defendant carriers. The Commission proposes to authorize or require a complainant to effect service simultaneously on the following persons: the defendant carrier, the Commission, and the appropriate staff office. The complainant would also be required to serve a copy of the complaint and associated attachments directly on the Chief of the division or branch responsible for handling the complaint. The Commission proposes to provide for a separate lock box at the Mellon Bank in Pittsburgh for complaints against wireless telecommunications service providers to help ensure the prompt receipt and handling of such complaints by the Wireless Telecommunications Bureau. The Commission also proposes to establish and maintain an electronic directory, available on the Internet, of agents authorized to receive service of complaints on behalf of carriers that are subject to the provisions of the Act.

6. In applying the requirement in Section 208 of the Act that the Commission serve the complaint on the defendant carrier, the staff routinely reviews complaints in the first instance and determines whether they meet the requirements under the Act and the Commission's rules. To accomplish this objective while eliminating the delay caused by having the Commission serve the defendant, the Commission also proposes to require a complainant to submit a completed intake form with any formal complaint as part of the filing requirement to indicate that the complaint meets the various threshold requirements for stating a cause of action under the Act and the Commission's rules. Finally, the Commission proposes to require parties to serve all subsequent pleadings by facsimile to be followed by mail delivery, or by overnight delivery.

C. Format and Content Requirements

7. The 1996 Act's complaint resolution deadlines necessitate substantial modification of the content requirements for pleadings filed in formal complaint proceedings. These

modifications must have the effect of creating complete records for the disposition of formal complaints. The Commission's overall goals are to improve the utility, quality, and content of the complaint, answer, and other filings submitted by parties in formal complaint cases and to expedite the issuance of orders that resolve procedural and substantive issues.

8. The Commission proposes to require any party to a formal complaint proceeding, in its complaint, answer, or any other pleading required during the complaint process, to include full statements of relevant facts, and to attach to such pleadings supporting documentation and affidavits of persons with knowledge of the facts stated in the pleadings. The Commission also proposes to require all pleadings that seek Commission orders, including complaints, answers, briefs, reply briefs, and motions, as well as the orders themselves, to contain findings of fact and conclusions of law, and to require these submissions to be in both hard copy and on computer disks in "read only" mode and formatted in WordPerfect 5.1 for Windows, or as otherwise directed by the staff in particular cases. In recognition of the fact that many of the proposed pleading requirements could be unduly burdensome on certain individuals or parties, the Commission proposes to waive format and content requirements upon an appropriate showing of financial hardship or other public interest factors. The Commission also proposes to require parties to append copies of relevant tariffs or tariff provisions that are relied upon in a pleading.

D. Answers

9. The Commission proposes to reduce the permissible time for a defendant to file an answer to a complaint from 30 to 20 days after service or receipt of the complaint.

E. Status Conferences

10. The Commission proposes to require that, unless otherwise ordered by the staff, an initial status conference take place in all formal complaint proceedings 10 business days after the defendant files its answer to the complaint. At the status conference, the Commission and parties may discuss claims and defenses, settlement possibilities, scheduling, whether discovery shall be permitted, and if so, a discovery plan. The parties would be required to memorialize jointly, in writing, any Commission rulings made during these status conferences.

F. Discovery

11. The Commission's goal in modifying the discovery rules is to limit or eliminate discovery while still permitting parties the opportunity to develop a sufficient record for resolution of their dispute. It is the Commission's belief that while the parties should continue to bear the burden of developing an adequate record, that burden should be borne earlier in the proceeding, upon the filing of the initial pleadings rather than upon discovery. Therefore the Commission seeks comment on limiting or eliminating discovery as a matter of right. It is anticipated that the proposed requirements for complaints, answers, and proposed stipulated facts will, in a majority of cases, present a sufficient factual record to enable the Commission to rely upon the initial pleadings alone to determine the outcome of the case. The Commission also seeks comment on the feasibility of allowing the parties to a complaint proceeding to agree among themselves to a cost-recovery system as a basis for facilitating the prompt identification and exchange of information.

12. The Commission also proposes to authorize the Bureau, on its own motion, to refer certain disputes to an administrative law judge for expedited hearing on factual issues.

G. Cease, Cease-and-Desist Orders and Other Forms of Interim Relief

13. The Commission sought comment on the legal and evidentiary standards necessary for obtaining cease or cease-and-desist orders pursuant to Title II of the Act and other forms of interim relief in Section 208 formal complaint cases, in order to expedite the issuance of cease or cease-and-desist orders within the 1996 Act's deadlines and to create more certainty regarding the legal and factual basis for granting interim relief.

H. Damages

14. The Commission's goal is to eliminate or minimize the delay endemic to the resolution of damages issues. The Commission proposes to allow bifurcation of liability and damages issues by permitting a complainant to file supplemental complaint for damages after a finding of liability. In such a case, the Commission would defer adjudication of all damages issues until after a finding of liability. This approach would enable the Commission to make a liability finding within the statutory deadline and still preserve the complainant's right to a damage award. The Commission also proposes to require that any complaint seeking an award of damages contain a detailed computation of damages, such that the Commission's adjudication of damages would end with a determination about the sufficiency of the computation formula submitted by the complainant rather than a finding as to the exact amount of damages, if any, owed to the complainant. The Commission also proposes to establish, following a finding of liability, a limited period during which the parties could engage in settlement negotiations or submit their damage claims to voluntary alternative dispute resolution mechanisms in lieu of further proceedings before the Commission. The Commission also seeks comment on a proposal to refer damages issues to an administrative law judge for decision once liability for damages has been determined by the Commission or if the parties agree to mediation by an administrative law judge. The Commission proposes to require, in certain cases after liability has been found, defendants to place a sum of money in an interest-bearing escrow account, to cover part or all of the damages for which they may be found liable.

I. Cross-Complaints and Counterclaims

15. The Commission proposes to allow compulsory counterclaims, those arising out of the same transaction or occurrence that is the subject matter of the opposing party's claim, only if the defendant files them concurrently with the answer. If a defendant fails to file such a compulsory counterclaim with its answer, it will be barred. A defendant may, but is not required to, file permissive counterclaims (those not arising out of the same transaction or occurrence) against the complainant. In addition, a defendant may, but is not required to, file cross-claims that arise out of the same transaction against co-parties. To the extent that the defendant elects to file such permissive counterclaims and cross-claims, it must file these pleadings concurrently with its answer. The defendant always has the option of filing any barred permissive counterclaims or cross-claims in a separate proceeding, provided that the statute of limitations has not run.

16. In addition, the Commission will revise its rules to clarify the applicability of filing fees to both complaints and cross-complaints.

J. Replies

17. The Commission proposes to prohibit replies to oppositions to motions. The Commission also proposes to prohibit replies to answers unless

VOL 61 ISS 249 DE 26 1996 UMI

specifically authorized by the Commission, generally upon a complainant's motion showing that there is good cause to reply to affirmative defenses that are supported by factual allegations that are different from any denials also contained in the answer.

K. Motions

18. In cases where discovery is conducted, the Commission proposes to require parties filing Motions to Compel to certify that they have made a good faith attempt to resolve the matter before filing the motion, in order to limit Commission involvement in conflicts that should be easily resolved. The Commission also proposes to make failure to file an opposition to a motion possible grounds for granting the motion, as well as shorten the deadline for filing oppositions to motions from ten to five business days. Finally, the Commission proposes to prohibit amendment of complaints except for changes necessary under 47 CFR § 1.720(g), which requires that information and supporting authority be current and updated as necessary in a timely manner.

L. Confidential or Proprietary Information and Materials

19. The Commission proposes to allow parties to designate as proprietary any materials generated in the course of a formal complaint, and not limit such designation to materials produced in response to discovery. The Commission also seeks comment on whether additional protections are needed in light of the short complaint resolution deadlines in the 1996 Act and the Commission's proposals in this NPRM to eliminate certain pleading and discovery opportunities.

M. Other Required Submissions

20. The Commission proposes to require parties to submit a joint statement of stipulated facts and key legal issues five days after the answer is filed. The Commission feels that drafting such a statement would promote agreement on a significant number of the disputed facts and legal issues, and that the statement itself would serve as a guide for the Commission to determine whether discovery is necessary in a particular case. Additionally, the Commission seeks comment on streamlining the current briefing process by prohibiting the filing of briefs in cases where discovery is not conducted, by continuing to allow the parties to file briefs, but permitting the staff to limit the scope of such briefs, or by shortening the deadline by which briefs are due. The Commission proposes to limit the page length of briefs to 25 pages for initial briefs and 10 pages for reply briefs.

N. Sanctions

21. The Commission seeks comment on what sanctions and/or remedies would be necessary or appropriate to ensure full compliance with and satisfaction of the proposed rule requirements.

O. Other Matters

22. The Commission seeks comment on two matters presented by certain language in Section 271 relative to other complaint provisions in the Act. First, the Commission sought comment on its tentative conclusion that the phrase "act on" as used in Section 271(d)(6)(B) encompasses actions taken by the Bureau and need not necessarily be final action by the Commission. Second, the Commission noted that the 90-day complaint resolution deadline for Section 271(d) complaints applies only in the absence of an agreement otherwise by the parties to the complaint action. The Commission sought comment on specific procedures and timetables that could be employed to ensure early notification to the Commission of waivers or extension agreements under Section 271(d)(6)(B) and to avoid the unnecessary expenditure of time and resources by the staff and parties to such a complaint action.

III. Comments and Ex Parte Requirements

23. Pursuant to Sections 1.415 and 1.419 of the Commission's rules, 47 CFR §§ 1.415, 1.419, all interested parties may file comments on the matters discussed in the NPRM and on proposed rules contained in the appendices by January 6, 1997 and reply comments on or before January 31, 1997. Parties are also invited to submit, in conjunction with their comments or reply comments, proposed text for rules that the Commission could adopt in this proceeding. Specific rule proposals should be filed as an appendix to a party's comments or reply comments. Such appendices may include only proposed text for rules that would implement proposals set forth in the parties' comments and reply comments in this proceeding, and may not include any comments or arguments. Proposed rules should be provided in the format used for rules in the Code of Federal Regulations, and should otherwise conform to the Comment Filing Procedures set forth in this NPRM.

24. To file formally in this proceeding, participants must file an original and six copies of all comments, reply comments, and supporting comments. If participants want each Commissioner to receive a personal copy of their comments, they must file an original and nine copies. In addition, participants are encouraged to submit two additional copies directly to the Common Carrier Bureau, Enforcement Division, Room 6008, 2025 M Street, N.W., Washington, D.C. 20554. Comments and reply comments should be sent to the Office of the Secretary, Federal Communications Commission, 1919 M Street, N.W., Room 222, Washington, D.C. 20554. Parties should also file one copy of any documents filed in this docket with the Commission's copy contractor, International Transcription Services, Inc., 2100 M Street, N.W., Suite 140, Washington, D.C. 20037. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center, 1919 M Street, N.W., Room 239, Washington, D.C. 20554.

25. In order to facilitate review of comments and reply comments, both by parties and the Commission, comments and reply comments should include a summary of the substantive arguments raised in the pleading.

26. Parties are also asked to submit comments and reply comments on diskette. Such diskette submissions would be in addition to the formal filing requirements addressed above. Parties submitting diskettes should submit them to Anita Cheng, Common Carrier Bureau, Enforcement Division, Room 6008, 2025 M Street, N.W., Washington, D.C. 20554. Each disk must be a standard 3½" magnetic disk, formatted to be readable by high-density 1.44 MB floppy drives operating under MS-DOS (3.X or later versions). Participants are encouraged to submit documents formatted in WordPerfect 5.1 for Windows. Otherwise, parties must submit the documents formatted in both ASCII and any word processing program. The diskette should be submitted in "read only" mode. The diskette should be clearly labelled with the party's name, proceeding, type of pleading (comment or reply comments) and date of submission. The diskette should be accompanied by a cover letter.

27. This is a non-restricted notice and comment rule making proceeding. Ex parte presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in Commission rules. See

generally 47 CFR §§ 1.1202, 1.1203, and 1.1206(a).

IV. Conclusion

28. In this NPRM, the Commission proposes to amend its rules governing the filing of formal complaints to implement certain complaint provisions in the 1996 Act and establish procedures necessary to facilitate the full and fair resolution of complaints filed under such provisions within the deadlines established by the Telecommunications Act of 1996. The Commission's goal is to establish rules of practice and procedure which, by providing a forum for prompt resolution of complaints of unreasonable, discriminatory, or otherwise unlawful conduct by telecommunications carriers, will foster rather than impede robust competition in all telecommunications markets.

VI. Ordering Clauses

29. Accordingly, *it is ordered* that pursuant to Sections 1, 4, 201–205, 208, 215, 218, 220 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154, 201–205, 208, 215, 218 and 220, a *notice of proposed rulemaking* is hereby *adopted*.

30. *It is further ordered* that the Chief of the Common Carrier Bureau is delegated authority to require the submission of additional information, make further inquiries, and modify the dates and procedures if necessary to provide for a more complete record and a more efficient proceeding.

31. *It is further ordered* that the Secretary shall cause a copy of this NPRM, including the Initial Regulatory Flexibility Analysis, to be sent to the Chief Counsel for Advocacy of the Small Business Administration in accordance with Section 603(a) of the Regulatory Flexibility Act, 5 U.S.C. Section 603(a) (1981). The Secretary shall also cause a summary of this Notice to appear in the **Federal Register**.

Rule Changes

Parts 0 and 1 of Title 47 of the Code of Federal Regulations are proposed to be amended as follows:

PART 0—COMMISSION ORGANIZATION

1. The authority citation for Part 0 continues to read as follows:

Authority: Sec. 5, 48 Stat. 1068, as amended, 47 U.S.C. 155, 225, unless otherwise noted.

2. Section 0.291 is proposed to be amended by revising paragraph (d) to read as follows:

§ 0.291 Authority delegated.

* * * * *

(d) *Authority to designate for hearing.* The Chief, Common Carrier Bureau shall not have authority to designate for hearing any formal complaints which present novel questions of law or policy which cannot be resolved under outstanding precedents or guidelines. The Chief, Common Carrier Bureau shall not have authority to designate for hearing any applications except applications for facilities where the issues presented relate solely to whether the applicant has complied with outstanding precedents and guidelines.

* * * * *

PART 1—PRACTICE AND PROCEDURE

3. The authority citation for Part 1 continues to read as follows:

Authority: 47 U.S.C. 151, 154, 303, and 309(j) unless otherwise noted.

4. Section 1.47 is proposed to be amended by revising paragraph (b) and adding new paragraph (h) to read as follows:

§ 1.47 Service of documents and proof of service.

* * * * *

(b) Where any person is required to serve any document filed with the Commission, service shall be made by that person or by his representative on or before the day on which the document is filed.

* * * * *

(h) Every carrier subject to the Communications Act of 1934, as amended, shall designate an agent in the District of Columbia, upon whom service of all notices, process, orders, decisions, and requirements of the Commission may be made for and on behalf of said carrier in any proceeding pending before the Commission. Such designation shall be filed, and updated as necessary, in writing and electronically in the office of the secretary of the Commission. Service of all notices, process, orders, decisions, and requirements of the Commission may be made upon such carrier by leaving a copy thereof with such designated agent at his office or usual place of residence in the District of Columbia. If a carrier fails to designate such an agent, service of any notice or other process in any proceeding before the Commission, or of any order, decision, or requirement of the Commission, may be made by posting such notice, process, order, requirement, or decision in the office of the secretary of the Commission.

5. Section 1.720 is proposed to be amended by revising the introductory paragraph and paragraph (h) to read as follows:

§ 1.720 General pleading requirements.

Formal complaint proceedings are generally resolved on a written record consisting of a complaint, answer, and statement of stipulated facts, but may also include other written submissions such as briefs and responses to written interrogatories. The Bureau in its discretion may designate formal complaint proceedings for resolution by hearing before an Administrative Law Judge, or where appropriate, it may refer certain issues of fact to an Administrative Law Judge for expedited hearing, while responsibility for the overall resolution of the proceeding is retained by the responsible Bureau. All written submissions, both substantively and procedurally, must conform to the following standards:

* * * * *

(h) Specific reference must be made to any tariff provision relied on in support of a claim or defense. Copies of relevant tariffs or relevant portions of tariffs that are relied upon in a pleading shall be appended to the pleading.

* * * * *

6. Section 1.721 is proposed to be amended by revising paragraphs (a)(5), (a)(6), (a)(7), (a)(8), adding paragraphs (a)(9), (a)(10), (a)(11), (a)(12), and adding paragraph (c) to read as follows:

§ 1.721 Format and content.

(a) * * *

(5) A complete statement of facts which, if proven true, would constitute such a violation. All facts must be supported, pursuant to § 1.720(c), by relevant affidavits and documentation, including copies of all applicable agreements, offers, counter-offers, denials, or other relevant correspondence.

(6) Complete detailed explanation of the manner in which a defendant has violated the Act, Commission order, or Commission rule in question, including identification or description and relevant time period, of the communications, transmissions, services, or other carrier conduct

complained of and nature of the injury sustained;

(7) The relief sought, including recovery of damages and the amount of damages claimed, if known;

(8) Certification that each complainant has discussed the possibility of settlement with each defendant prior to the filing of the formal complaint;

(9) Whether suit has been filed in any court or other government agency on the basis of the same cause of action, or whether the complaint itself seeks prospective relief identical to the relief proposed or at issue in a notice-and-comment proceeding that is concurrently before the Commission;

(10) A copy of, or a description by category and location of all documents, data compilations and tangible things in the complainant's possession, custody or control that are relevant to the disputed facts alleged with particularity in the complaint. The complaint may also include an explanation of why any relevant documents are believed to be confidential.

(11) The name, address and telephone number of each individual likely to have discoverable information relevant to the disputed facts alleged with particularity in the complaint, identifying the subjects of information; and

(12) A completed Formal Complaint Intake Form.

* * * * *

(c) Upon showing of good cause by the complainant, the Commission may waive any of the requirements of this section.

Section 1.722 is proposed to be amended by revising the introductory text of paragraph (b) and adding paragraphs (c) and (d) to read as follows:

§ 1.722 Damages.

* * * * *

(b) Damages will not be awarded upon a complaint unless specifically requested. Damages may be awarded, however, upon a supplemental complaint as described more fully in paragraph (c) of this section, based upon a finding of the Commission in the original proceeding. *Provided that:*

* * * * *

(c) In all cases in which recovery of damages is sought, it shall be the responsibility of the complainant to provide a computation of each and every category of damages for which recovery is sought, along with an identification of all relevant documents and materials or such other evidence to be used by the complainant to determine the amount of such damages.

(1) Where the recovery of damages is sought on the original complaint, such original complaint must include the computation of damages and identification of documents, materials and other evidence to be used in such computation described in paragraph (c) of this section.

(2) A complainant electing to seek damages upon a supplemental complaint as provided in paragraph (b) of this section must clearly and unequivocally state such election in the original complaint. In cases in which a complainant clearly and unequivocally states its election to seek damages upon supplemental complaint, the computation and identification of all relevant documents, materials and other evidence described in paragraph (c) of this section need not be provided until such time the complainant files its supplemental complaint.

(3) Where a complainant voluntarily elects to seek the recovery of damages upon a supplemental complaint, the Commission will resolve the liability complaint within the relevant complaint resolution deadlines contained in the Act and defer adjudication of the damage complaint until after the liability complaint has been resolved.

(d) Where a complainant elects in its original complaint to seek the recovery of damages upon a supplemental complaint, the following procedures may apply in the event the Commission determines liability based upon its review of the original complaint:

(1) If the parties agree, issues concerning the amount, if any, of damages may be submitted for mediation to a Commission Administrative Law Judge. Such Administrative Law Judge shall be chosen in the following manner:

(i) By agreement of the parties and the Chief Administrative Law Judge; or

(ii) In the absence of such agreement, the Chief Administrative Law Judge shall designate the Administrative Law Judge.

(2) After the defendant has been determined to be liable in such bifurcated proceeding, the Commission may order the defendant to deposit into an interest bearing escrow account a sum equal to the amount of damages which it finds, upon preliminary investigation, is likely to be ordered after the issue of damages is fully litigated, or some lesser sum which may be appropriate, provided the Commission finds that the grant of this relief is favored on balance upon consideration of the following factors:

(i) Complainant's potential irreparable injury in the absence of such deposit;

(ii) The likelihood that the amount of damages ordered at the conclusion of litigation will be equal to or greater than the amount deposited;

(iii) The balance of the hardships between complainant and defendant; and

(iv) Whether public interest considerations favor the ordering of the deposit..

8. Section 1.724 is proposed to be amended by revising paragraphs (a), (b), and (c) and adding new paragraphs (f), (g) and (h) to read as follows:

§ 1.724 Answers.

(a) Any carrier upon which a copy of a formal complaint is served under this subpart shall answer within 20 days of service of the formal complaint, unless otherwise directed by the Commission.

(b) The answer shall advise the complainant and the Commission fully and completely of the nature of any defense, and shall respond specifically to all material allegations of the complaint. Every effort should be made to narrow the issues in the answer. Any defendant failing to file and serve an answer within the time and in the manner prescribed by this part may be deemed in default and an order may be entered against the defendant in accordance with the allegations contained in the complaint.

(c) The defendant shall state concisely its defenses to each claim asserted and shall admit or deny the averments on which the complainant relies. If the defendant is without knowledge or information sufficient to form a belief as to the truth of an averment, the defendant shall so state and this has the effect of a denial. When a defendant intends in good faith to deny only part of an averment, the defendant shall specify so much of it as is true and shall deny only the remainder. The defendant may make its denials as specific denials of designated averments or paragraphs. General denials are prohibited.

* * * * *

(f) The answer shall include a copy of, or a description by category and location of all documents, data compilations and tangible things in the defendant's possession, custody or control that are relevant to the disputed facts alleged with particularity in the pleadings. The answer may also include an explanation of why any relevant documents are believed to be confidential.

(g) The answer shall also list the name, address and telephone number of each individual likely to have discoverable information relevant to the disputed facts alleged with particularity

in the pleadings, identifying the subjects of information.

(h) Upon showing of good cause by the defendant, the Commission may waive any of the requirements of this section.

9. Section 1.725 is proposed to be revised to read as follows:

§ 1.725 Cross-complaints and counterclaims.

(a) Compulsory counterclaims, those claims arising out of the transaction or occurrence that is the subject matter of the complaint and does not require for its adjudication the presence of third parties of whom the court cannot acquire jurisdiction, must be filed concurrently with the answer or it will be barred.

(b) Permissive counterclaims, those claims not arising out of the transaction or occurrence that is the subject matter of the complaint, must be filed concurrently with the answer in order to be resolved in the same proceeding. If not filed concurrently with the answer, however, the defendant will not be barred from filing such claim in a separate proceeding, provided that the statute of limitations has not run.

(c) Cross-complaints, claims by one party against a co-party arising out of the same transaction or occurrence that is the subject matter of either the complaint or counterclaim therein or relating to any property that is the subject matter of the original matter, must be filed concurrently with the answer in order to be resolved in the same proceeding. If not filed concurrently with the answer, however, the co-party will not be barred from filing such claim in a separate proceeding, provided the statute of limitations has not run.

10. Section 1.726 is proposed to be revised to read as follows:

§ 1.726 Replies.

(a) Replies are prohibited unless authorized by the Commission for good cause shown. If no reply is submitted, the complainant will be deemed to have denied the affirmative defenses.

(b) A complainant wishing to submit a reply must, within five days after the service of the answer, file a motion seeking leave to do so. A copy of the complainant's proposed reply should accompany its motion. A complainant's reply shall respond only to the specific factual allegations made by the defendant supporting its affirmative defenses. Replies which contain other allegations or arguments will not be accepted or considered by the Commission.

(c) Replies shall be accompanied by a copy of, or a description by category and location of all documents, data compilations and tangible things in the complainant's possession, custody or control that are relevant to the disputed facts alleged with particularity in the pleadings. The reply may also include an explanation of why any relevant documents are believed to be confidential. Replies shall also include the name, address and telephone number of each individual likely to have discoverable information relevant to the disputed facts alleged with particularity in the pleadings, identifying the subjects of information.

11. Section 1.727 is proposed to be amended by revising paragraphs (b), (c), (d), and (e) and adding new paragraphs (g) and (h) to read as follows:

§ 1.727 Motions.

* * * * *

(b) Motions that the allegations in the complaint be made more definite and certain are prohibited.

(c) The moving party shall provide a proposed order for adoption, which appropriately incorporates the basis therefor, including proposed findings of fact and conclusions of law relevant to the pleading. The proposed order shall be clearly marked as a "proposed order." The proposed order shall be submitted both as a hard copy and on computer disk in accordance with the requirements of § 1.734(d). The proposed order format should conform to that of a reported FCC order.

(d) A party opposing any motion shall also provide a proposed order for adoption, which appropriately incorporates the basis therefor. The proposed order shall be clearly captioned as a "Proposed Order." The proposed order shall be submitted both as a hard copy and on computer disk in accordance with the requirements of § 1.734(d). The proposed order format should conform to that of a reported FCC order.

(e) Oppositions to motions may be filed within five days after the motion is filed. Oppositions shall be limited to the specific issues and allegations contained in the motion; when a motion is incorporated in an answer to a complaint, an opposition to the motion shall not address any issues presented in the answer that are not also specifically raised in the motion. Failure to oppose any motion may constitute grounds for granting of the motion.

* * * * *

(g) All motions must contain proposed findings of fact and conclusions of law, with supporting legal analysis, relevant to the content of the pleading. All facts relied upon in motions must be supported by documentation or affidavits pursuant to § 1.720(c), except for those facts of which official notice may be taken. Assertions based on information and belief are prohibited.

(h) Amendments or supplements to complaints to add new claims or requests for relief are prohibited. Parties are responsible, however, for the continuing accuracy and completeness of all information and supporting authority furnished in a pending complaint proceeding as required under § 1.720(g).

§ 1.730 [Removed]

12. Section 1.730 is proposed to be removed.

13. Section 1.731 is proposed to be amended by revising the section heading and paragraph (a) to read as follows:

§ 1.731 Confidentiality of information produced or exchanged by the parties.

(a) Any materials generated in the course of a formal complaint proceeding may be designated as proprietary by that party if the party believes in good faith that the materials fall within an exemption to disclosure contained in the Freedom of Information Act (FOIA), 5 U.S.C. 552(b) (1) through (9). Any party asserting confidentiality for such materials shall so indicate by clearly marking each page, or portion thereof, for which a proprietary designation is claimed. If a proprietary designation is challenged, the party claiming confidentiality shall have the burden of demonstrating, by a preponderance of the evidence, that the material designated as proprietary falls under the standards for nondisclosure enunciated in the FOIA.

* * * * *

Section 1.732 is proposed to be amended by revising paragraphs (b), (c), and (d) and adding new paragraph (h) to read as follows:

§ 1.732 Other required written submissions.

* * * * *

(b) In cases when discovery is not conducted, briefs shall be filed concurrently by both complainant and defendant within 90 days from the date a complaint is served. Such briefs shall be no longer than 25 pages.

(c) In cases when discovery is conducted, briefs shall be filed concurrently by both complainant and defendant at such time designated by the staff, typically within 30 days after discovery is completed.

(d) Reply briefs may be submitted by either party within 20 days from the

date initial briefs are due. Reply briefs shall be no longer than 10 pages.

* * * * *

(h) Within 5 days after the answer is filed, the parties shall submit a joint statement of stipulated facts and key legal issues.

15. Section 1.733 is proposed to be amended by revising paragraphs (a) introductory text, (a)(2), (a)(4), (a)(5), (a)(6), (b), and (c) to read as follows:

§ 1.733 Status conference.

(a) In any complaint proceeding, the Commission may, in its discretion, direct the attorneys and/or the parties to appear before it for a status conference. Unless otherwise ordered by the Commission, an initial status conference shall take place within ten business days after the answer is filed, unless otherwise directed by the staff. A status conference may include discussion of:

* * * * *

(2) The necessity for or desirability of additional pleadings or evidentiary submissions;

* * * * *

(4) Settlement of all or some of the matters in controversy by agreement of the parties;

(5) Whether discovery is necessary and, if so, the scope, type and schedule for any discovery;

(6) The schedule for the remainder of the case and the date for further conferences; and

* * * * *

(b) In addition to the status conference referenced in paragraph (a) of this section, any party may also request that a conference be held at any time after the complaint has been filed.

(c) During a status conference, the Commission may issue oral rulings pertaining to a variety of interlocutory matters relevant to the conduct of a formal complaint proceeding including, *inter alia*, procedural matters, discovery, and the submission of briefs or other evidentiary materials. Within 24 hours after a status conference, the parties in attendance, unless otherwise directed, must submit a joint proposed order memorializing the oral rulings made during the conference to the Commission. Commission staff will review and make revisions, if necessary, prior to signing and filing the submission as part of the record. Parties may, but are not required to, tape record the Commission's summary of its oral rulings. Alternatively, parties may use a stenographer to transcribe the oral presentations and exchanges between and among the participating parties, insofar as such communications are not "off-the-record." The cost of such stenographer will be shared equally by the parties.

* * * * *

16. Section 1.734 is proposed to be amended by revising paragraph (c) and adding new paragraph (d) to read as follows:

§ 1.734 Specifications as to pleadings, briefs, and other documents; subscription.

* * * * *

(c) The original of all pleadings and other submissions filed by any party shall be signed by that party, or by the party's attorney. The signing party shall state his or her address, telephone number, facsimile number and the date on which the document was signed. Copies should be conformed to the original. Except when otherwise specifically provided by rule or statute, pleadings need not be verified. The signature of an attorney or party shall be a certificate that the attorney or party has read the pleading, motion, or other paper; that to the best of his or her knowledge, information, and belief formed after reasonable inquiry, it is well grounded in fact and is warranted by existing law or a good faith argument for the extension, modification, or reversal of existing law; and that it is not interposed solely for purposes of delay or for any other improper purpose.

(d) All proposed orders shall be submitted both as hard copies and on a 3.5 inch diskette formatted in an IBM compatible form using MS-DOS 5.0 and WordPerfect 5.1 software. The diskette should be submitted in "read only" mode. The diskette should be clearly labelled with the party's name, proceeding, type of pleading, and date of submission. The diskette should be accompanied by a cover letter. Parties who have submitted copies of tariffs or reports with their hard copies need not include such tariffs or reports on the magnetic disk.

17. Section 1.735 is proposed to be amended by revising paragraphs (b), (d) and (e) to read as follows:

§ 1.735 Copies; service; separate filings against multiple defendants.

* * * * *

(b) The complainant must file an original plus three copies of the complaint, accompanied by the correct fee, in accordance with subpart G of this part. See 47 CFR 1.1105(1)(c). However, if a complaint is addressed against multiple defendants, the complainant shall pay a separate fee and supply three additional copies of the complaint for each additional defendant. For complaints filed with the Common Carrier Bureau, the complainant must also serve a copy on the Chief, Formal Complaints and Investigations Branch. For complaints filed with the Wireless Telecommunications Bureau, the complainant must also serve a copy on the Chief, Enforcement Division. For complaints filed with the International Bureau, the complainant must also serve a copy on the Chief, Telecommunications Division. The requirements of this paragraph also apply to defendants filing cross-complaints.

* * * * *

(d) The complainant shall serve the complaint on the named defendant's registered agent for service of process. If filing a cross-complaint, the defendant/cross-complainant shall serve such cross-complaint on the named cross-defendant's registered agent for service of process and all counsel of record in the complaint proceeding.

(e) All subsequent pleadings and briefs filed in any formal complaint proceeding, as well as all letters, documents or other written submissions, shall be served either by overnight delivery or by facsimile and followed by mail, by the filing party on the counsel of record of all other parties to the proceeding, together with a proof of such service in accordance with the requirements of § 1.47(g).

* * * * *

18. Section 1.1105 is proposed to be amended by revising the entry (1)(c), and adding (1)(d) to read as follows:

§ 1.1105 Schedule of charges for applications and other filings in the common carrier services.

Action	FCC form No.	Fee amount	Payment type code	Address
1. * * *				
c. Formal Complaints/Cross-Complaints and Pole Attachment Compaints/Cross-Complaints, except those relating to wireless telecommunications services, Filing Fee..	Corr. and 159	150	.....	CIZ Federal Communication Commission, Common Carrier Enforcement, P.O. Box 358120, Pittsburgh, PA 15251-5120.

Attachment to the Proposed Rule

FORMAL COMPLAINT INTAKE FORM

Case Name: _____

Complainant Name, Address, Phone and Facsimile Number:

_____

_____

_____

_____

Complaint alleges violation of the following provisions of the Communications Act of 1934, as amended: _____

Answer (Y)es, (N)o or N/A to the following:

___ Complaint conforms to the specifications prescribed by 47 CFR §§ 1.49, 1.734.

___ Complaint complies with the pleading requirements of 47 CFR § 1.720.

___ Complaint conforms to the format and content requirements of 47 CFR § 1.721:

___ Complaint contains a detailed explanation of the manner in which the defendant violated the provisions of the Communications Act of 1934, as amended.

___ Relevant documentation and/or affidavits is attached, including agreements, offers, counter-offers, denials, or other relevant correspondence.

___ Contains certification that complainant has discussed the possibility of settlement with each defendant prior to the filing of the formal complaint.

___ Suit has been filed in another court or government agency on the basis of the same cause of action. If yes, please explain: _____

___ Seeks prospective relief identical to the relief proposed or at issue in a notice-and-comment proceeding that is concurrently before the Commission. If yes, please explain: _____.

___ If damages are sought, contains specified amount and nature of damages claimed.

___ Contains a copy of, or a description by category and location of all documents, data compilations and tangible things in the complainant's possession, custody or control that are relevant to the disputed facts alleged with particularity in the complaint.

___ Contains the name, address and telephone number of each individual likely to have discoverable information relevant to the disputed facts alleged with particularity in the complaint, identifying the subjects of information.

___ All reported FCC orders relied upon have been properly cited in accordance with Section 1.14 of the Commission's Rules, Title 47 Code of Federal Regulations, 47 CFR § 1.14.

___ Copies of cited non-FCC authority are attached.

___ Copy of complaint has been served on defendant's registered agent for service in accordance with [to be amended] 47 CFR § 1.47(b).

___ If more than 10 pages, the complaint contains a table of contents as specified in 47 CFR § 1.49(b).

___ The correct number of copies, required by 47 CFR § 1.51(c)(2) and 47 CFR § 1.51(c)(2) if applicable, have been filed.

___ Complaint has been properly signed and verified in accordance with 47 CFR § 1.52.

___ $150.00 filing fee specified in 47 CFR § 1.1105(1)(c) is attached.

___ If complaint is by multiple complainants, it conforms with the requirements of 47 CFR § 1.723(a).

___ If complaint involves multiple grounds, it complies with the requirements of 47 CFR § 1.723(b).

___ If complaint is directed against multiple defendants, it complies with the requirements of 47 CFR § 1.735 (a)–(b).

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 961203339–6339–01; I.D. 111896B]

RIN 0648–AI88

Fisheries of the Exclusive Economic Zone Off Alaska; Scallop Fishery Off Alaska; Scallop Vessel Moratorium

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes a temporary moratorium on the entry of additional vessels into the scallop fishery off Alaska. This action would implement Amendment 2 to the Fishery Management Plan for the Scallop Fishery off Alaska (FMP) as recommended by the North Pacific Fishery Management Council (Council). The intended effect of Amendment 2 is to curtail increases in fishing capacity and to provide stability for industry while the Council develops a long-term limited access system for this fishery. This action is necessary to promote the conservation and management objectives of the FMP.

DATES: Comments must be received at the following address by February 10, 1997.

ADDRESSES: Comments on the proposed rule must be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802, Attn: Lori J. Gravel. Copies of Amendment 2 and the Environmental Assessment/Regulatory Impact Review/Initial Regulatory Flexibility Analysis (EA/RIR/IRFA) prepared for this action may be obtained from the same address. Send comments regarding burden estimates or any other aspect of the data requirements, including suggestions for reducing the burdens, to NMFS and to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, D.C. 20503, Attn: NOAA Desk Officer.

FOR FURTHER INFORMATION CONTACT: Kent Lind, 907–586–7228.

SUPPLEMENTARY INFORMATION:

Management Authority

The scallop fishery in the exclusive economic zone (EEZ) off Alaska is managed by NMFS under the FMP. The FMP was prepared by the Council under the Magnuson-Stevens Act and approved by NMFS on July 26, 1995. Regulations implementing the FMP are set out at 50 CFR part 679. General regulations that also affect fishing in the EEZ are set out at 50 CFR part 600.

The Council is authorized by the Magnuson-Stevens Act to establish a system for limiting access to a fishery in order to achieve optimum yield if, in developing such a system, the Council and NMFS take into account: (1) Present participation in the fishery, (2)

historical fishing practices in, and dependence on, the fishery, (3) the economics of the fishery, (4) the capability of fishing vessels used in the fishery to engage in other fisheries; (5) the cultural and social framework relevant to the fishery, and (6) any other relevant considerations (16 U.S.C. 1853).

Scallop Management Background

Management of scallops in the EEZ off Alaska was conducted by the Alaska State Department of Fish and Game (ADF&G) from 1968 until the implementation of the Federal FMP and an interim closure of the EEZ to fishing for scallops in 1995. In 1992, ADF&G developed an Interim Fishery Management Plan (IFMP) for scallops, as fishing effort was rapidly increasing and maximum sustainable yield may have been exceeded. The IFMP specified three major management measures: (1) Setting area-specific guideline harvest levels and gear restrictions to prevent localized overharvesting, (2) creating an observer program to monitor the fishery and obtain biological information, and (3) limiting effort via gear restrictions, seasons, minimum size limits, and other measures. Consistent with scallop management actions taken on the east coast, the State of Alaska (State) promulgated regulations that limit crew size to a total of 12, and mandated that weathervane scallops only be shucked manually to control effort. In 1993, the Commissioner of ADF&G declared scallops a High Impact Emerging Fishery (5 AAC 39.210) because of mounting resource concerns. A fishery may be regulated as a high impact emerging commercial fishery if the Commissioner determines that any of the following conditions apply to a species or species group in an area or region: (1) Harvesting effort has recently increased beyond a low sporadic level; (2) interest has been expressed in harvesting the resource by more than a single user group; (3) the level of harvest might be approaching a level that might not be sustainable on a local or regional level; and (4) comprehensive regulations to address issues of conservation, allocation, and conduct of an orderly fishery have not been developed.

In 1993, the Council also began to address the issues of overexploitation and overcapitalization in the scallop fishery. At the January 1993 meeting, the Council determined that the scallop fishery may require Federal management to protect the fishery from overexploitation and further overcapitalization. The Council set a control date of January 20, 1993, to notify the industry that a moratorium for this fishery may be implemented. This control date, which was published in the Council's newsletter, meant that fishermen and/or vessels not participating in the fishery by that date may not be guaranteed future access to the fishery.

The Council was presented with information indicating that the stocks of weathervane scallops were fully exploited and any increase in effort would be detrimental to the stocks and the Nation. Information indicated that dramatic changes in age composition had occurred after the fishing-up period (1980–90), with commensurate declines in harvest. In recent years, many fishermen abandoned historical fishing areas and searched for new areas to maintain catch levels. Increased numbers of small scallops were reported. Additionally, scallops are highly susceptible to overfishing and boom/bust cycles worldwide.

The need to limit access was the primary motivation for the Council to prepare the FMP in lieu of State management of the scallop fishery. As anticipated, effort in the scallop fishery increased in 1993 when 32 scallop permits, representing 21 vessels, were issued by the State. Fifteen of these vessels had made landings by the end of 1993. Even without additional vessels entering the fishery, the Council believed that the 1993 fishery was overcapitalized, meaning that too much capital was invested relative to the fleet size necessary to conduct the fishery. In 1992, seven vessels harvested 1.8 million lb (816 mt), for an average of 257,143 lb (116.6 mt) harvested per vessel. The 1993 quota was set at 890,000 lb (403.7 mt) for areas with specified guideline harvest levels, or about one-half of the 1992 landings. This quota could have been harvested by three or four vessels. In 1993, landings from areas without guideline harvest levels totaled 524,000 lb (237.7 mt), which could have been taken by an additional two vessels. Yet, 15 vessels participated in the 1993 fishery. In 1994, the growth trend in the fishery continued with 16 vessels harvesting 1,235,269 lb (560.3 mt) of scallops.

At its January 1993 meeting, the Council directed staff to proceed with an analysis to evaluate potential Federal management of Alaskan scallops. A vessel moratorium was proposed as an essential element of a Federal management regime to stabilize the size and capitalization of the scallop fleet during the time that the Council considers limited entry alternatives for this fishery.

At its June 1993 meeting, the Council and its advisory panels reviewed a draft EA/RIR/IRFA analysis of management alternatives for the scallop fishery. Also at that meeting, the Council reaffirmed the control date of January 20, 1993, and recommended several revisions to the draft analysis, which was subsequently released for public review on August 9, 1993. At the September 1993 Council meeting, public testimony was received on scallop management, particularly on the qualifying criteria for a moratorium. At that meeting, the Council tentatively identified its preferred alternative of a separate FMP for the scallop fishery, with shared management authority with the State. The preferred alternative also included a vessel moratorium option. However, the Council requested additional analysis to assist with determining appropriate qualifying criteria. Additional analysis was incorporated into the revised draft FMP, including a draft EA/RIR/IRFA, and was released for public review on November 30, 1993.

At its April 1994 meeting, the Council and its advisory bodies reviewed the draft FMP, took public testimony, and voted to adopt a separate FMP for the scallop fishery. Eighteen vessels would qualify under the criteria adopted by the Council in April 1994. The 1994 draft FMP, which deferred most management measures to the State, was based on the premise that all vessels fishing for scallops in the Federal waters off Alaska would also be registered with the State.

While regulations were being drafted to implement the FMP, a vessel that had nullified its registration with the State began fishing for scallops in the Federal waters of the Prince William Sound Registration Area, which the State had already closed after the guideline harvest level of 50,000 lb (22,686 kg) was taken on January 26, 1995. The State did not have authority to stop the vessel from fishing, because it was no longer registered with the State and was fishing in the EEZ. On February 17, 1995, the Council met by emergency teleconference and recommended that NMFS implement an emergency rule to close the EEZ off Alaska to scallop fishing to prevent further uncontrolled harvests in Federal waters. The emergency rule went into effect on February 23, 1995 and was published on March 1, 1995 (60 FR 11054).

At its April 1995 meeting, the Council took additional steps to prevent unregulated and uncontrolled harvests after the emergency rule expired. On April 19, 1995, the Council adopted an FMP, which continued the closure of the EEZ to fishing for scallops for a 1-year period. The FMP was approved by

NMFS on July 26, 1995. Additional information on the FMP and the interim closure of Federal waters to fishing for scallops may be found in the proposed and final rules implementing the FMP (60 FR 24822, May 10, 1995, and 60 FR 42070, August 15, 1995, respectively).

At its June 1995 meeting, the Council considered the testimony and recommendations of its Scientific and Statistical Committee, fishing industry representatives, and the general public on alternative management options for the scallop fishery to replace the interim closure. The Council also reviewed a revised EA/RIR/IRFA that outlined the potential impacts of a full Federal management regime, including a vessel moratorium based on the previously approved qualifying criteria. Based on the above information, the Council adopted Amendment 1 to the FMP authorizing a suite of Federal management measures, including the vessel moratorium.

In April 1996, the Council separated the scallop vessel moratorium from the other management measures contained in Amendment 1 and recommended instead that the moratorium proceed as Amendment 2 to the FMP. The Council took this action so that the development of a vessel moratorium would not delay the reopening of the fishery. Amendment 1 was subsequently approved by NMFS on July 10, 1996 (61 FR 38099, July 23, 1996).

Scallop Vessel Moratorium

The following paragraphs explain each aspect of the proposed scallop vessel moratorium.

Duration of the Moratorium

The temporary vessel moratorium would remain in effect for 3 years from the date of implementation or until repealed or replaced by a permanent limited access program. Amendment 2 would allow the Council to recommend that the moratorium be extended for no more than 2 years if a limited access program were imminent.

Qualification Criteria

Scallop moratorium permits would be issued to the person (or successor in interest) who owned the qualifying vessel when it most recently made qualifying landings. The Council indicated that when vessels were sold during or after the moratorium qualification period, the moratorium rights should attach to the owner of the vessel when it most recently made qualifying landings such that each vessel generates only one moratorium permit. The Council believed that moratorium rights should be assigned to the person who owned a vessel when it qualified for a moratorium permit rather than some subsequent owner who does not have a history of participation in the fishery with that vessel. The Council adopted this approach after the testimony of one scallop fisherman who had a long history of participation in the scallop fishery, but who had sold his qualified vessel prior to the announcement of a moratorium control date and had replaced it with a new vessel that would not qualify under the moratorium.

A vessel would qualify for inclusion in the moratorium if it made a legal landing of scallops during 1991, 1992 or 1993; or during at least 4 separate years from 1980 through 1990. The Council chose this two-tier approach to emphasize recent participation in the fishery by allowing all vessels with any legal landings in 1991, 1992, or 1993 to qualify. Historic participants would qualify under the more restrictive standard of a legal landing during at least 4 separate years from 1980 through 1990.

The Council adopted the 1980 start date for qualification of historic participants, because data prior to 1980 were not available. More important, 1980 marked the first year of the buildup of the scallop fishery and was thus considered to be a reasonable base year for historical participation. Less than three vessels participated in 1974, 1976, 1977, and 1979, and no vessels participated in 1978. The 1990 cutoff date for historic participation was chosen because vessels making landings in 1991, 1992, or 1993 would be included as recent participants. The Council did not include those vessels that participated in 1990, but that did not have sufficient historic participation or more recent participation in the fishery, as moratorium qualified. The Council determined that such vessels had neither recent nor historic dependence on the fishery. Vessels that were in the "pipeline" to fish for Alaskan scallops (i.e., under construction, being refitted, relocated, etc.) but that had not made a required landing, would not qualify under the moratorium. The Council had been discussing a scallop moratorium throughout 1993. The qualification period was extended from the January 20, 1993, control date to the end of 1993 to address the problem of vessels in the "pipeline."

The Council chose not to extend the moratorium qualifying period past 1993 in order to discourage speculative entry while the moratorium was being developed and submitted for review. Additional entry into the fishery during the development and implementation phase would only exacerbate the very problems that the moratorium is intended to solve. Fishermen received extensive notice through the Council process described above that the fishery was being limited in a way that jeopardized any investments they would make in the fishery after 1993. According to ADF&G landing records, at least three vessels have entered the scallop fishery since the moratorium cut-off date, and they would not qualify for moratorium permits. However, participation in the scallop fishery by these vessels has been sporadic. None of these vessels made a single landing during the entire moratorium qualification period of 1980–93, nor have they participated on a consistent basis since the moratorium cut-off date of December 31, 1993.

Area Endorsements

Moratorium permits would include area endorsements for fishing within Registration Area H (Cook Inlet) and/or waters outside Registration Area H. Qualified vessels should have made at least one legal landing of scallops during the qualifying period within an endorsement area to receive an endorsement for that area. No crossovers would be allowed between Registration Area H and waters outside Registration Area H unless a vessel qualifies in both areas.

The Council adopted the area endorsement approach in order to preserve the unique nature of the Cook Inlet scallop fishery, which is conducted exclusively by small boats operating out of Homer. The State has preserved the Cook Inlet scallop fishery as a distinct small boat fishery by limiting Cook Inlet vessels to a single 6–ft (1.83 m) dredge and exempting Cook Inlet vessels from the observer coverage requirements that are in effect for all other registration areas (§ 679.65(c)). According to ADF&G landing data, only one qualifying vessel fished both inside and outside Registration Area H during the qualifying period and would receive endorsements to fish in both areas.

Vessel Reconstruction and Maximum Length Overall (LOA)

To prevent increased capitalization in the scallop fishery, the Council chose to limit increases in vessel LOA due to the reconstruction of vessels during the moratorium to no more than 1.2 times or 20 percent of the LOA of the vessel on the control date of January 20, 1993. For vessels under reconstruction on January 20, 1993, the maximum LOA would be the LOA on the date reconstruction was completed, with no

additional increases allowed. Each scallop moratorium permit would specify a maximum LOA based on the above criteria.

The 20–percent limit was chosen by the Council for the same reasons that a 20–percent limit was established for the groundfish and crab vessel moratorium. The Council believed that limiting increases in vessel size to 20 percent of LOA would allow for some upgrading of vessels to improve stability and safety, while limiting the further overcapitalization that could occur through massive reconstruction of existing vessels.

Transferability

Moratorium permits would be valid on any vessel that is less than or equal to the maximum LOA identified on the permit and that is owned, leased, or operated by the person identified on the moratorium permit. A vessel fishing for scallops would be required to carry a valid moratorium permit on board whenever the vessel is fishing for scallops, or has scallops retained on board. A person could transfer a moratorium permit to another person if a completed transfer application were submitted to NMFS and subsequently approved. In this event, a new permit would be issued in the name of the person who received the transferred permit.

Exemptions

Vessels less than or equal to 26 ft (7.9 m) LOA in the Gulf of Alaska, and less than or equal to 32 ft (9.8 m) LOA in the Bering Sea and Aleutian Islands Area, would be exempt from the scallop moratorium when fishing for scallops with dive gear. The Council wanted to provide for the potential development of cleaner gear types such as dive gear and chose to adopt the same size limits exemption for small vessels as were established for the groundfish and crab vessel moratorium, except that the exemption only applies when fishing with dive gear. An operator of a vessel under the size limits listed above would still be required to carry a valid scallop moratorium permit on board when fishing with dredge gear, or from a vessel that has dredge gear on board.

While commercial harvesting of shellfish and sea cucumbers with dive gear does occur in Alaska waters, safety and technology factors generally limit this type of fishing to shallow, near-shore State waters. NMFS has no record of commercial divers harvesting scallops in Federal waters off Alaska and believes it is unlikely that any commercial divers would choose to attempt such an endeavor. Nevertheless, this exemption would ensure that a vessel moratorium designed to limit further overcapitalization by the dredge fleet would not prevent future exploration with dive gear.

Appeals

NMFS would issue an initial administrative determination to each applicant who is denied a scallop moratorium permit. An initial administrative determination may be appealed by the applicant in accordance with the procedures established for the groundfish and crab moratorium at § 679.43. An initial administrative determination that denies an application for a scallop moratorium permit would authorize the affected person to catch and retain scallops with an interim permit. The interim permit would expire on the effective date of the final agency action relating to the application. An administrative determination denying the issuance of a scallop moratorium permit or application for transfer would be the final agency action for purposes of judicial review.

Technical changes to existing regulations

This proposed rule contains technical changes to the existing definitions of "legal landing", "maximum LOA", "moratorium qualification", "moratorium species", and "qualifying period" set out at § 679.2. These technical changes would be made to clarify which terms apply only to the existing groundfish and crab moratorium and which terms also would apply to the scallop moratorium.

A technical change would also be made to the description of the groundfish and crab moratorium appeals process at § 679.4(c)(10)(i) to specify that appeals are to be sent to the Regional Administrator rather than to the Chief, RAM Division. This change is necessary to make § 679.4(c)(10)(i) consistent with the appeals process described at § 679.43(c). In addition, § 679.43(a) would be revised to indicate that the appeals process described at § 679.43 also applies to scallop moratorium appeals made under § 679.4(g).

Classification

At this time, NMFS has not determined that the FMP amendment that this rule would implement is consistent with the national standards, other provisions of the Magnuson-Stevens Act, and other applicable laws. NMFS, in making that determination will take into account the data, views, and comments received during the comment period.

This proposed rule has been determined to be not significant for the purposes of E.O. 12866.

This proposed rule contains a new collection-of-information requirement subject to the Paperwork Reduction Act (PRA). This collection-of-information requirement has been submitted to OMB for approval. The new information requirements include an application for a moratorium permit and an application for transfer of a moratorium permit. Public reporting burden for these collections of information are estimated to be 0.33 and 0.5 hours, respectively. Send comments regarding reporting burden or any other aspect of the data requirements, including suggestions for reducing the burdens, to NMFS and OMB (see **ADDRESSES**).

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number.

An RIR was prepared for this proposed rule that describes the management background, the purpose and need for action, the management action alternatives, and the social impacts of the alternatives. The RIR also estimates the total number of small entities affected by this action and analyzes the economic impact on those small entities.

The Council prepared an IRFA as part of the RIR, which describes the impact this proposed rule would have on small entities, if adopted. The analysis shows that the economic effects of this proposed rule to the regulated community would be significant and positive. By limiting participation at current levels, the temporary moratorium would prevent further overcapitalization of the fleet and reduce the potential for overfishing of the scallop resource. Most commercial fishing vessels harvesting scallops off Alaska meet the definition of a small entity under the RFA. In 1994, 86 percent of the scallop harvests off Alaska were taken from Federal waters and 11 of the 16 vessels harvesting scallops participated in no other fishery. Eighteen vessels would qualify for the moratorium under the qualification criteria adopted by the Council. According to ADF&G landing records, at least three vessels have entered the scallop fishery since the moratorium cut-off date and would not qualify for moratorium permits. However, participation in the scallop fishery by

VOL 61 ISS 249 DE 26 1996 UMI

these three vessels has been sporadic. None of these vessels made a single landing during the entire moratorium qualification period of 1980–93, nor have they participated on a consistent basis since the moratorium cut-off date of December 31, 1993, and none of these three vessels has re-entered the fishery since the re-opening of Federal waters to February February fishing for scallops on August 1, 1996, under Amendment 1 to the FMP. Fishermen received extensive notice through the Council process that the fishery was being limited in a way that jeopardized any investments they made in the fishery after 1993. Copies of the EA/RIR/IRFA are available from NMFS (see **ADDRESSES**).

List of Subjects in 50 CFR Part 679

Fisheries, Reporting and recordkeeping requirements.

Dated: December 19, 1996.

Nancy Foster,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 679 is proposed to be amended as follows:

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

1. The authority citation for part 679 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*, 773 *et seq.*

2. In § 679.2, the definitions of "Legal landing", "Maximum LOA" introductory text, "Moratorium qualification", "Moratorium species", and "Qualifying period" are revised to read as follows:

§ 679.2 Definitions.

* * * * *

Legal landing (applicable through [insert date 3 years after the effective date of the final rule]) means any amount of a moratorium species that was or is landed in compliance with Federal and state commercial fishing regulations in effect at the time of the landing.

* * * * *

Maximum LOA (applicable through December 31, 1998), with respect to a vessel's eligibility for a groundfish or crab moratorium permit, means: * * *

* * * * *

Moratorium qualification (applicable through December 31, 1998) with respect to the groundfish and crab vessel moratorium program means a transferable prerequisite for a moratorium permit.

Moratorium species means:

(1) (Applicable through [insert date 3 years after the effective date of the final rule]) any scallop species.

(2) (Applicable through December 31, 1998) any moratorium crab species or moratorium groundfish species.

* * * * *

Qualifying period (applicable through December 31, 1998) with respect to the groundfish and crab vessel moratorium program means the period to qualify for the moratorium from January 1, 1988, through February 9, 1992.

* * * * *

3. In § 679.4, paragraph (c)(10)(i) is revised and a new paragraph (g) is added to read as follows:

§ 679.4 Permits.

* * * * *

(c) * * *

(10) *Appeal*—(i) *Determination.* The Chief, RAM Division, will issue an initial administrative determination to each applicant who is denied a moratorium permit by that official. An initial administrative determination may be appealed by the applicant in accordance with § 679.43. The initial administrative determination will be the final agency action if a written appeal is not received by the Regional Administrator, within the period specified at § 679.43.

* * * * *

(g) *Scallop moratorium permits* (applicable through [Insert date three years after the effective date of the final rule])—(1) *General*—(i) *Applicability.* Except as provided under paragraph (g)(2) of this section, any vessel used to take or retain any scallop species in Federal waters must have a valid scallop moratorium permit on board the vessel at all times when the vessel is engaged in fishing for scallops in Federal waters or has scallops taken from Federal waters retained on board. Any vessel used to take or retain scallops in Federal waters within Scallop Registration Area H must have a scallop moratorium permit endorsed for Registration Area H. Any vessel used to take or retain scallop species in Federal waters outside Registration Area H must have a scallop moratorium permit endorsed for Federal waters exclusive of Registration Area H.

(ii) *Duration.* The scallop moratorium permit is valid for the duration of the moratorium unless otherwise specified.

(iii) *Validity.* A scallop moratorium permit issued under this paragraph is valid only if:

(A) The vessel is owned, leased, or operated by the person named on the moratorium permit.

(B) The vessel's LOA does not exceed the maximum LOA specified on the permit.

(C) The permit has not been revoked or suspended under 15 CFR part 904.

(iv) *Inspection.* A scallop moratorium permit must be presented for inspection upon the request of any authorized officer.

(2) *Exemptions.* A vessel that has an LOA of less than or equal to 26 ft (7.9 m) in the GOA, and less than or equal to 32 ft (9.8 m) in the BSAI and that does not have dredge gear on board is exempt from the requirements of this paragraph (g) when fishing for scallops with dive gear.

(3) *Qualification criteria*—(i) *Qualifying period.* A vessel would qualify for a moratorium permit if the vessel made a legal landing of scallops during 1991, 1992 or 1993 or during at least 4 separate years from 1980 through 1990.

(ii) *Area endorsements.* A scallop moratorium permit may contain an area endorsement for Federal waters within Registration Area H and for Federal waters outside Registration Area H.

(A) *Registration Area H.* A scallop moratorium permit may be endorsed for fishing in Federal waters within Registration Area H if a qualifying vessel made a legal landing of scallops taken inside Registration Area H during the qualifying period defined at paragraph (g)(3)(i) of this section.

(B) *Waters outside Registration Area H.* A scallop moratorium permit may be endorsed for fishing in Federal waters outside Registration Area H if the qualifying vessel made a legal landing of scallops taken in waters outside Registration Area H during the qualifying period defined at paragraph (g)(3)(i) of this section.

(iii) *Legal landings.* Evidence of legal landings shall be limited to documentation of state or Federal catch reports that indicate the amount of scallops harvested, the registration area or location in which they were caught, the vessel used to catch them, and the date of harvesting, landing, or reporting.

(4) *Maximum LOA*—(i) All scallop moratorium permits will specify a maximum LOA, which will be 1.2 times the LOA of the qualifying vessel on January 20, 1993, unless the qualifying vessel was under reconstruction on January 20, 1993.

(ii) If a qualifying vessel was under reconstruction on January 20, 1993, the maximum LOA will be the LOA on the date reconstruction was completed.

(5) *Application for permit.* A scallop moratorium permit will be issued to the person or successor in interest who was the owner of a qualifying vessel when

it most recently made qualifying landings under paragraph (g)(3) of this section, if he/she submits to the Regional Administrator a complete scallop moratorium permit application that is subsequently approved. A complete application for a scallop moratorium permit must include the following information:

(i) Name(s), signature(s), business address(es), and telephone and fax numbers of the person(s) who owned the vessel when the most recent qualifying landing of scallops occurred.

(ii) Name of the qualifying vessel, state registration number of the vessel and the USCG number of the vessel, if any.

(iii) Valid documentation of the vessel's basis for moratorium qualification, if requested by the Regional Administrator due to an absence of landings records for the vessel for the qualifying period.

(iv) Reliable documentation of the vessel's qualifying LOA, if requested by the Regional Administrator, such as a vessel survey, builder's plan, state or Federal registration certificate, or other reliable and probative documents that clearly identify the vessel and its LOA, and that are dated on or before January 20, 1993.

(v) Name(s) and signature(s) of the person(s) who is/are the owner(s) of the vessel or the person(s) responsible for representing the vessel owner.

(vi) If the qualifying vessel was under reconstruction on January 20, 1993, the permit application must contain the following additional information:

(A) A legible copy of written contracts or written agreements with the firm that performed reconstruction of the vessel and that relate to that reconstruction.

(B) An affidavit signed by the vessel owner(s, and the owner/manager of the firm that performed the reconstruction specifying the beginning and ending dates of the reconstruction.

(C) An affidavit signed by the vessel owner(s) specifying the LOA of the reconstructed vessel.

(6) *Vessel ownership.* Evidence of vessel ownership shall be limited to the following documents, in order of priority:

(i) For vessels required to be documented under the laws of the United States, the USCG abstract of title issued in respect to that vessel.

(ii) A certificate of registration that is determinative as to vessel ownership.

(iii) A bill of sale.

(7) *Permit transfer.* A complete application for approval of transfer of a scallop moratorium permit must include the following information:

(i) Name(s), business address(es), and telephone and fax numbers of the applicant(s) including the holders of the scallop moratorium permit that is to be transferred and the person who is to receive the transferred scallop moratorium permit.

(ii) Name(s) and signature(s) of the person(s) from whom moratorium qualification would be transferred or their representative, and the person(s) who would receive the transferred moratorium qualification or their representative.

(iii) A legible copy of a contract or agreement to transfer the moratorium permit in question must be included with the application for transfer that specifies the person(s) from whom the scallop moratorium permit is to be transferred, the date of the transfer agreement, name(s) and signature(s) of the current holder(s) of the permit, and name(s) and signature(s) of person(s) to whom the scallop moratorium permit is to be transferred.

(8) *Appeal*—(i) *Determination.* The Chief, RAM Division, will issue an initial administrative determination to an applicant upon denial of a scallop moratorium permit by that official. An initial administrative determination may be appealed by the applicant in accordance with § 679.43. The initial administrative determination will be the final agency action if a written appeal is not received by the Regional Administrator postmarked within the period specified at § 679.43.

(ii) *Permit denial.* An initial administrative determination that denies an application for a scallop moratorium permit may authorize the affected person to take or retain scallops. The authorization expires on the effective date of the final agency action relating to the application.

(iii) *Final action.* An administrative determination denying the issuance of a scallop moratorium permit is the final agency action for purposes of judicial review.

4. In § 679.43, paragraph (a) is revised to read as follows:

§ 679.43 Determinations and appeals.

(a) *General.* This section describes the procedure for appealing initial administrative determinations made under this subpart as well as § 679.4(c), § 679.4(g) and portions of subpart C of this part that apply to the halibut and sablefish CDQ program.

BILLING CODE 3510–22–F

VOL 61 ISS 249 DEC 26 1996 UMI

Notices

Federal Register
Vol. 61, No. 249
Thursday, December 26, 1996

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Docket No. FV96–944–2, FV96–980–1, FV96–999–3]

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed collection; comments requested.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), this notice announces the Agricultural Marketing Service's (AMS) intention to request an extension for a currently approved information collection for specified exempt import commodities.

DATES: Comments on this notice must be received by February 24, 1997 to be assured of consideration.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, USDA, AMS, Fruit and Vegetable Division, Marketing Order Administration Branch, P.O. Box 96456, Room 2525–S, Washington, D.C. 20090–6456; or, FAX: (202) 720–5698. All comments should reference the docket number, the date, and page number of this issue of the **Federal Register**. Comments will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR ADDITIONAL INFORMATION CONTACT: Shoshana Avrishon, USDA, AMS, Marketing Order Administration Branch, Fruit and Vegetable Division, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone: 202–720–6467.

SUPPLEMENTARY INFORMATION:

Title: Specified Commodities Imported into the United States Exempt from Import Requirements.

OMB Number: 0581–0167.

Expiration Date of Approval: March 31, 1997.

Type of Request: Extension of currently approved information collection.

Abstract: Section 8e of the Agricultural Marketing Agreement Act of 1937, As Amended; 7 U.S.C. 601–674 (Act) requires that whenever the Secretary of Agriculture issues grade, size, quality, or maturity regulations under domestic marketing orders for certain commodities, the same or comparable regulations on imports of those commodities must be issued. Import regulations apply only during those periods when domestic marketing order regulations are in effect. Currently, the following commodities are subject to Section 8e import regulations: avocados, dates (other than dates for processing), filberts, grapefruit, table grapes, kiwifruit, limes, olives (other than Spanish-style olives), onions, oranges, Irish potatoes, prunes, raisins, tomatoes, and walnuts. However, imports of these commodities are exempt from such requirements if they are imported for such outlets as processing, charity, animal feed, seed, and distribution to relief agencies, when those outlets are exempt under the applicable marketing order.

Safeguard procedures in the form of importer and receiver reporting requirements are used to ensure that the imported commodity is provided to authorized exempt outlets. The safeguard procedures are similar to the reports currently required by most domestic marketing orders. The import regulations require importers and receivers of imported fruit, vegetable, and specialty crops to submit a form, as provided in sections 944.350, 980.501, and 999.500.

An importer wishing to import commodities for exempt purposes must complete, in triplicate, prior to importation, an Importer's Exempt Commodity Form (FV–6). Copy one is presented to the U.S. Customs Service. The importer files copy two with the Marketing Order Administration Branch (MOAB) of the Fruit and Vegetable Division, AMS, within two days after the commodity enters the United States. The third copy of the form accompanies the exempt shipment to its intended destination. The receiver certifies that the commodity has been received and that it will be utilized for authorized exempt purposes. The receiver then files copy three with MOAB, within two days after receiving the commodity.

The Department of Agriculture (Department) utilizes this information to ensure that imported goods destined for exempt outlets are given no less favorable treatment than that afforded to domestic goods destined for such exempt outlets. These exemptions are consistent with Section 8e import regulations under the Act.

This form requires the minimum amount of information necessary to effectively carry out the requirements of the orders, and its use is necessary to fulfill the intent of the Act as expressed in the orders, and to administer Section 8e compliance activities.

The information collected is used primarily by authorized representatives of the Department, including AMS, Fruit and Vegetable Division regional and headquarters staff. AMS is the primary user of the information.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 10 minutes per response.

Respondents: Importers and receivers of exempt commodities.

Estimated Number of Respondents: 714.

Estimated Number of Responses per Respondent: 3.

Estimated Total Annual Burden on Respondents: 119 hours.

Comments are invited on: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and, (4) ways to minimize the burden of the collection of information on those who respond, including use of automated, electronic, mechanical, or other technologies.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Dated: December 17, 1996.

Robert C. Keeney,

Director, Fruit and Vegetable Division.

[FR Doc. 96–32852 Filed 12–24–96; 8:45 am]

BILLING CODE 3410–02–P

Forest Service

Red Mountain Project—Twin, Muddy Creek, and Gee Timber Sales, Wallowa-Whitman National Forest, Baker County, Oregon

AGENCY: Forest Service, USDA.

ACTION: Cancellation of a notice of intent to prepare an environmental impact statement.

SUMMARY: On December 17, 1990, a notice of intent to prepare an environmental impact statement (EIS) for the Red Mountain Project, on the Baker District of the Wallowa-Whitman National Forest, was published in the **Federal Register** (55 FR 51739). A notice of availability for the draft EIS for the Red Mountain Project was published in the **Federal Register** on March 8, 1996 (61 FR 9450). USDA, Forest Service, has decided to cancel the preparation of a final EIS analyzing timber sale proposals and related activities within an unloaded portion of the east face of Elkhorn Ridge. The notice of intent is hereby rescinded.

FOR FURTHER INFORMATION: Questions may be addressed to Joanne Britton, Environmental Coordinator, Baker Ranger District, 3165 10th Street, Baker City, Oregon, 97814, telephone: 541–523–4476.

Dated: December 10, 1996.

R.M. Richmond,

Forest Supervisor.

BILLING CODE 3410–11–M

Olympic Provincial Interagency Executive Committee (PIEC), Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Olympic PIEC Advisory Committee will meet on January 24, 1997 at the Jamestown S'Klallam Tribal Community Center, 1033 Old Blyn Highway, Sequim, Washington. The meeting will begin at 9:30 a.m. and continue until 3:00 p.m. Agenda topics to be covered include: (1) Review of Field Trip; (2) Quilcene District Overview of Watershed Analysis, Projects, Access & Travel Management Updates; (3) Second half of FY97 Priorities for Restoration Projects; (4) Regional Ecosystem Office: role and relation to PACs; (5) Adaptive Management Area planning and strategies; (6) Open Forum; and (7) Public Comments. All Olympic Province Advisory Committee meetings are open to the public. Interested citizens are encouraged to attend.

FOR FURTHER INFORMATION CONTACT: Direct questions regarding this meeting to Kate Snow, Province Liaison, USDA, Quilcene Ranger District, P.O. Box 280, Quilcene, WA 98376, (360) 765–2211 or Ronald R. Humphrey, Forest Supervisor, at (360) 956–2301.

Dated: December 18, 1996.

Ronald R. Humphrey,

Forest Supervisor.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 121996A]

Small Takes of Ringed Seals Incidental to On-Ice Seismic Activity

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of issuance of letters of authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act (MMPA) as amended, and implementing regulations, notification is hereby given that letters of authorization to take ringed seals incidental to on-ice seismic operations in the Beaufort Sea off Alaska were issued on December 19, 1996, to BP Exploration, Western Geophysical, and Northern Geophysical of America, all of Anchorage, AK.

EFFECTIVE DATE: These letters of authorization are effective from January 1, 1997, through May 31, 1997.

ADDRESSES: The applications and letters are available for review in the following offices: Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910 and Western Alaska Field Office, NMFS, 701 C Street, Anchorage, AK 99513.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Hollingshead, Office of Protected Resources, NMFS, (301) 713–2055 or Ron Morris, Western Alaska Field Office, NMFS, (907) 271–5006.

SUPPLEMENTARY INFORMATION: Section 101(a)(5)(A) of the MMPA (16 U.S.C. 1361 *et seq.*) directs NMFS to allow, on request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region, if certain findings are made and regulations are issued. Under the MMPA, the term "taking" means to harass, hunt, capture or kill or to attempt to harass, hunt, capture or kill marine mammals.

Permission may be granted for periods up to 5 years if the Secretary of Commerce finds, after notification and opportunity for public comment, that the taking will have a negligible impact on the species or stock(s) of marine mammals and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses. In addition, NMFS must prescribe regulations that include permissible methods of taking and other means effecting the least practicable adverse impact on the species and its habitat and on the availability of the species for subsistence uses, paying particular attention to rookeries, mating grounds and areas of similar significance. The regulations must include requirements pertaining to the monitoring and reporting of such taking. Regulations governing the taking of ringed seals incidental to on-ice seismic activities were published on January 13, 1993 (58 FR 4091), and remain in effect until December 31 1997.

Summary of Requests

NMFS received requests for letters of authorization on the dates specified from (1) Northern Geophysical of America, 2361 Cinnabar Loop, Anchorage, AK 99507 (September 10, 1996), (2) Western Geophysical Inc. 351 E. International Airport Road, Anchorage, AK 99518–1299 (September 18, 1996), and (3) BP Exploration (Alaska) Inc., 900 East Benson Blvd. P.O. Box 196612, Anchorage, AK 99519–6612 (October 7, 1996). All letters request a take by harassment of a small number of ringed seals incidental to on-ice seismic work in the Beaufort Sea, AK.

Issuance of these letters of authorization is based on findings that the total takings will have a negligible impact on the ringed seal species or stock and will not have an unmitigable adverse impact on the availability of this species for subsistence uses.

Dated: December 19, 1996.

Patricia Montanio,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

Marine Mammals; Scientific Research Permit No. 1021 (P532C)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of permit.

SUMMARY: Notice is hereby given that Texas A&M University at Galveston, P.O. Box 1675, Galveston, TX 77551 (Principal Investigator: Dr. Randall W. Davis, Co-investigators: Dr. William E. Evans, Dr. Robert Benson, Dr. Bernd Würsig, Mr. Troy S. Sparks and Mr. Spencer Lynn), has been issued a permit to tag, biopsy dart, capture/release various cetacean species for purposes of scientific research. The NMFS decision on project 1 involving low frequency sounds on sperm whales was deferred pending an environmental review.

ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the following office(s):

Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910 (301/713–2289); and

Regional Administrator, Southeast Region, NMFS, 9721 Executive Center Drive North, St. Petersburg, FL 33702–2532.

SUPPLEMENTARY INFORMATION: On August 26, 1996, notice was published in the **Federal Register** (61 FR 43737) that a request for a scientific research permit to take various cetacean species had been submitted by the above-named organization. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered fish and wildlife (50 CFR 222.25).

Issuance of this permit as required by the ESA was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of this permit; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: December 17, 1996.

Ann D. Terbush,

Chief, Permits and Documentation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–F

COMMODITY FUTURES TRADING COMMISSION

Chicago Board of Trade Futures Contracts in Corn and Soybeans; Notice That Delivery Point Specifications Must Be Amended

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of, and request for public comment on, Notification to chicago board of trade to amend delivery specifications.

SUMMARY: The Commodity Futures Trading Commission ("Commission") has notified the Board of Trade of the City of Chicago ("CBT"), under Section 5a(a)(10) of the Commodity Exchange Act ("Act"), 7 U.S.C. 7a(a)(10), that the delivery terms of the CBT corn and soybean futures contracts no longer accomplish the objectives of that section of the Act; and that the CBT has seventy-five days from the date of this notice to submit proposed amendments to those contracts which will accomplish the objectives of that section.

The Commission has determined that publication of the notification to the CBT for public comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATES: Comments must be received by February 24, 1997.

ADDRESSES: Comments should be mailed to the Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, N.W., Washington, D.C. 20581, attention: Office of the Secretariat; transmitted by facsimile at (202) 418–5521; or transmitted electronically at [secretary@cftc.gov]. Reference should be made to "Corn and Soybean Delivery Points."

FOR FURTHER INFORMATION CONTACT: Blake Imel, Acting Director, or Paul M. Architzel, Chief Counsel, Division of Economic Analysis, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, N.W., Washington, D.C. 20581, (202) 418–5260, or electronically, Mr. Architzel at [PArchitzel@cftc.gov].

SUPPLEMENTARY INFORMATION: Section 5a(a)(10) of the Act provides that as a condition of contract market designation, boards of trade are required to:

permit the delivery of any commodity, on contracts of sale thereof for future delivery, of such grade or grades, at such point or points and at such quality and locational price differentials as will tend to prevent or diminish price manipulation, market congestion, or the abnormal movement of such commodity in interstate commerce. If the Commission after investigation finds that the rules and regulations adopted by a contract market permitting delivery of any commodity on contracts of sale thereof for future delivery, do not accomplish the objectives of this subsection, then the Commission shall notify the contract market of its finding and afford the contract market an opportunity to make appropriate changes in such rules and regulations.

The Commission, by letter dated December 19, 1996, notified the CBT under Section 5a(a)(10) of the Act, that its futures contracts for corn and soybeans no longer were in compliance with the requirements of that section of the Act. The text of that notification is set-forth below.

December 19, 1996.

Patrick Arbor

Chairman, Chicago Board of Trade, 141 W. Jackson Blvd., Chicago, Illinois 60604

Re: Delivery Point Specifications of the Corn and Soybean Futures Contracts.

Dear Chairman Arbor: The Commodity Futures Trading Commission ("CFTC" or "Commission") hereby notifies the Board of Trade of the City of Chicago ("CBT or Exchange") under Section 5a(a)(10) of the Commodity Exchange Act ("Act"), 7 U.S.C. 7a(a)(10), that the delivery terms of the CBT corn and soybean futures contracts no longer accomplish the statutory objectives of "permit[ting] the delivery of any commodity * * * at such point or points and at such quality and locational price differentials as will tend to prevent or diminish price manipulation, market congestion, or the abnormal movement of such commodity in interstate commerce." [1]

The Commission, as detailed below, bases this finding on the following: (1) the continuing diminution of the role of terminal markets in the cash market for grain; (2) the increasing shift of the locus of the main channels of commodity flows away from the delivery points on the contracts, particularly the par-delivery point of Chicago; (3) the continuing decline in cash market activity generally at the contracts' delivery points, particularly Chicago; and (4) the serious, precipitous drop in regular warehouse storage capacity at the Chicago delivery point

[1] The full text of Section 5a(a)(10) of the Commodity Exchange Act is appended to this letter.

over the past fourteen months. These conclusions are supported by a number of CFTC staff inquiries into these issues and by four separate, comprehensive studies of these issues completed in 1991 (one of which was sponsored by the CBT). Each of these inquiries and studies identified the above trends and indicated that deliverable supplies on the subject contracts were not available in normal cash market channels in amounts sufficient to tend to prevent or to diminish price manipulation, market congestion, or the abnormal movement of such commodity in interstate commerce.

Although the CBT has attempted previously to respond to these problems by amending the contracts, those steps, such as the addition of St. Louis as a delivery point, have proven to be ineffective. With the recent precipitous drop in warehouse capacity in Chicago, the problem has reached a critical juncture. Recognizing this, the CBT convened a Task Force to consider changes to the grain contracts. More than a year after the Task Force began its deliberations, the Exchange membership rejected the modifications to the terms of the corn and soybean contracts recommended by the CBT's Board of Directors.

And, as provided under section 5a(a)(10) of the Act, the Commission hereby notifies the CBT that the Exchange is afforded the opportunity to submit for Commission approval proposed amendments to the delivery terms of the corn and soybean futures contracts that will accomplish the statutory objectives by March 4, 1997, a period of seventy-five days from the date of this letter. In determining whether its proposal is adequate to accomplish the objectives of section 5a(a)(10) of the Act, the CBT should be guided by a number of illustrative alternatives provided below. Failure to respond in a manner which in the Commission's judgment is "necessary to accomplish the objectives" of this section of the Act will result in further proceedings under section 5a(a)(10).

In light of the Commission's determination that the CBT's futures contracts in corn and soybeans no longer comply with the requirements of section 5a(a)(10) of the Act, the CBT should refrain from listing additional months for trading in those contracts during the pendency of these proceedings.

By limiting this notification under Section 5a(a)(10) of the Act to the CBT's futures contracts for corn and soybeans, the Commission is not thereby making any determination regarding any other CBT futures contract. The Commission notes, however, that the delivery specifications for the CBT wheat futures contract are also subject to many of the same trends which have affected adversely the corn and soybean contracts. In light of the importance of these issues, the Commission determined to limit this Section 5a(a)(10) notification to the corn and soybean contracts, which have been fully considered by the CBT in the first instance. The Commission believes that such a full consideration by the CBT of the delivery specifications of its wheat contract is also warranted and should be undertaken immediately. The Commission is of the view that this reconsideration should be completed within 120 days.

In notifying the CBT of the Commission's finding that the terms of the corn and soybean futures contracts do not accomplish the objectives of Section 5a(a)(10) of the Act, the Commission is not questioning the continued utility of the contracts for hedging or price basing under ordinary conditions or their role as the world's premiere futures contracts for corn and soybeans. Rather, the Commission's action, as explained in greater detail below, is predicated upon its finding that bringing the delivery terms of the contracts into closer alignment with an otherwise broad and active cash market is necessary to meet the requirements of Section 5a(a)(10), tending to prevent or to diminish price manipulation, market congestion, or the abnormal movement of such commodities in interstate commerce.

I. Background.

The CBT's corn and soybean futures contracts are major United States (U.S.) futures markets and principal vehicles for hedging and pricing by U.S. firms with commercial interests in these two important agricultural commodities. They rank among the most actively traded commodity futures contracts in the world and are used extensively by foreign commercial interests. In this regard, for the 1995/96 crop year, the average daily open interest was nearly two billion bushels for CBT corn futures and approached one billion bushels for CBT soybean futures. The total trading volume over the same period was approximately 95 billion bushels for corn futures and 70 billion bushels for soybean futures.

These activity levels for corn represent a greater than eight-fold increase in the levels of volume and open interest experienced in these markets in the early 1970s. For soybeans, these current levels are more than four times the levels experienced in the early 1970s. This increased overall level of trading activity can be attributed to an approximate 80 percent increase in the combined U.S. annual production of corn and soybeans over the last 25 years; a steadily decreasing level of federal crop price support activities, which has led to increased commercial uncertainty and need for hedging; and an increased internationalization of cash markets for feed grains and soybeans, which has also led to increased foreign participation in these futures markets for purposes of hedging and price-basing.

The preponderant use of these markets is commercial in nature. For example, in mid-November of this year, reportable commercial traders held 60 and 70 percent of the reportable long and short sides, respectively, of the soybean futures market and 85 and 64 percent of the reportable long and short sides, respectively, of the corn market.[2] Presumably, commercial traders also held a substantial proportion of the non-reportable positions.

The predominant economic function of the CBT corn and soybean futures markets is risk-transfer and price-basing, rather than merchandising or title transfer for the underlying commodity. Consistent with this, the preponderance of positions established in these markets are liquidated through the purchase or sale of offsetting futures contracts, rather than through making or taking delivery of the commodity. Nonetheless, the orderly convergence of futures prices and cash market merchandising values is essential to these contracts' risk-transfer and price-basing functions, and this convergence is dependent on the unimpeded opportunity of market participants to conduct arbitrage between the cash and futures markets. As a result, it is essential that the delivery specifications of these contracts effectively link futures trading to a substantial segment of the underlying cash markets.

The manner in which cash and futures prices are linked through the delivery mechanism is straightforward. If, at contract expiration, short position holders believe that expiring futures prices are higher than the current value of the commodity, they can satisfy their contractual obligations by acquisition and delivery of the physical commodity, rather than through the purchase of offsetting futures contracts. Likewise, if long position holders believe that

[2] Reportable traders are individuals or firms that hold futures positions of 500,000 bushels or more in soybeans or 750,000 bushels or more in corn in any one contract month through any U.S. or foreign broker.

VOL 61 ISS 249 DE 26 1996 UMI

expiring futures prices are lower than the current merchandising value of the commodity, they can require delivery in lieu of selling offsetting contracts in the futures market. To the extent that this arbitrage process is not impeded, convergence of cash and futures prices at contract expiration is assured.

The terms of delivery are critical in determining the degree of arbitrage between cash and futures markets and the strength of the linkage between cash and futures prices. When contract delivery terms do not correspond to a substantial segment of the cash market, the strength of the arbitrage linkage is diminished. In particular, when the futures market requires delivery at a location or of grades for which the commodity is not sufficiently available, short position holders may not be able to acquire the commodity or gain access to the delivery facilities in the event they believe that cash and futures prices are misaligned. Long position holders, seeking to profit from their positions, have no incentive to liquidate their positions through offset, and futures prices may take a course that is independent of the cash market. The resulting market congestion, or distortion of prices, is disruptive to proper functioning of the futures market, because prices no longer reflect cash market fundamentals. Thus, the nature of the delivery terms is critical to use of the CBT's corn and soybean futures contracts throughout the U.S. and abroad in the hedging and pricing of corn and soybean transactions and directly determines the degree to which the prices of the futures markets may be manipulated or otherwise become independent of fundamental conditions in those cash markets.

As discussed in detail below, the CBT's corn and soybean contracts currently specify delivery through the use of warehouse receipts for stocks held in specified facilities at Chicago, Toledo, and St. Louis. It is the location of these delivery points, as well as the nature of the delivery instrument, that is the subject of the Commission's analysis regarding the CBT's compliance with the provisions of Section 5a(a)(10) of the Act.

II. General Cash Market Trends

Chicago and Toledo, the primary delivery points of the CBT's corn and soybean futures contracts, are now situated at the periphery of current major cash market channels for these commodities. Their declining importance as cash market centers is the result of long-term trends in the storage, transportation, and processing of grains. As discussed below, these trends include: (1) increasing shipment of corn and soybeans from production areas directly to domestic users or export locations, bypassing intermediate locations such as terminal markets; (2) increasing processor use of corn and soybeans in production areas, to produce food, feed, and other products, thereby reducing the relative quantity of corn and soybeans shipped to locations outside of production areas including terminal markets; (3) substantially declining export activity from the Great Lakes relative to the growth of exports from Gulf of Mexico and Pacific Northwest ports; and (4) increasing decentralization in grain storage capacity, with marked increases in both on-farm and commercial storage capacity in production areas.

1. Changes in Transportation Patterns

The increasing shipment of corn and soybeans directly from production areas to domestic users or export locations, bypassing the traditional terminal markets, is related, in large part, to the deregulation of railroad freight rates. Prior to rail freight-rate deregulation in 1980, a practice called "transit" or

"proportional billing" permitted grain to be shipped from production areas to an intermediate point for storage, such as a traditional terminal market, and then to the final destination at a single, fixed rate. After 1980, negotiated point-to-point rates replaced transit billing, favoring direct shipments of corn and soybeans to domestic users or export locations, to the detriment of traditional terminal markets located at major railroad centers such as Chicago.

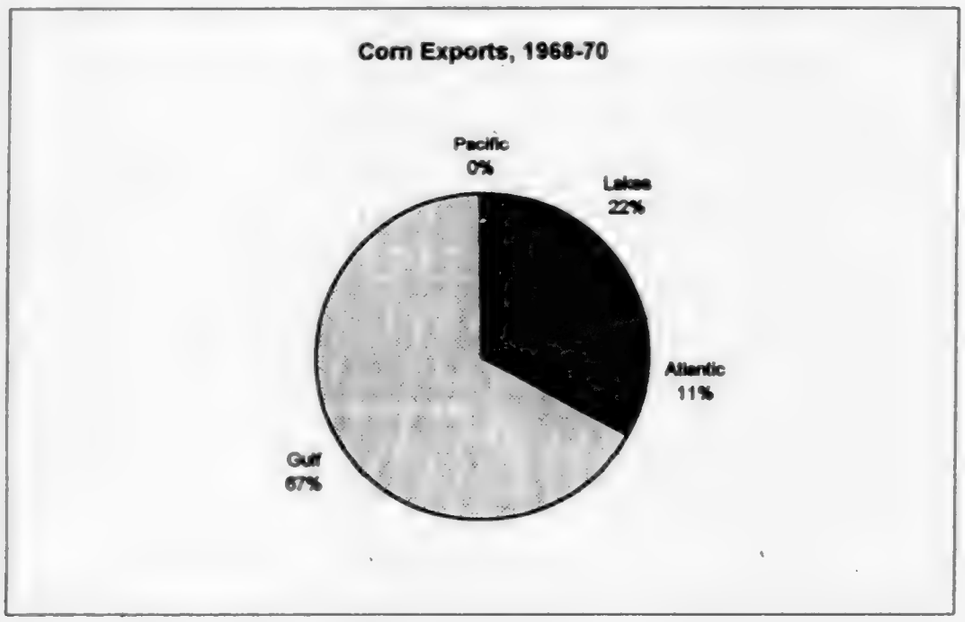
2. Processing Trends

Substantial increases in corn and soybean processing at new and existing locations within the major production areas has further reduced the role of traditional terminal markets. According to U. S. Department of Agriculture (USDA) data, the quantity of corn processed into corn sweeteners, ethanol, and other products quadrupled between 1970 and 1995 (from about 400 million bushels to over 1.6 billion bushels) and the quantity of soybeans crushed in the U.S. approximately doubled over the same time period (from about 760 million bushels to about 1.34 billion bushels). Most of these new or expanded facilities are located in production areas, in which the processors obtain their supplies of corn and soybeans directly from nearby grain warehouses or producers. Moreover, even processing facilities located at terminal markets now purchase the majority of their supply directly from lower-cost production-area locations rather than from terminal market elevators. The inability to participate in this growth sector of the cash market has further eroded the relative importance of traditional terminal-market elevators.

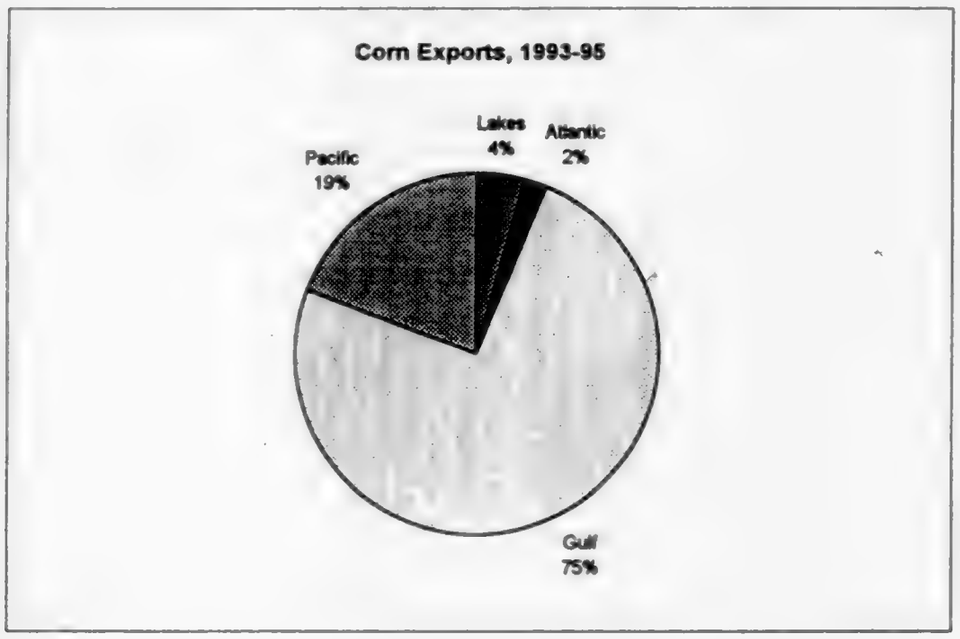
3. Export Marketing Channel Changes

Over the past 25 years, corn and soybean exports have grown dramatically. However, the trends favor the all-year export facilities of the lower Mississippi River. In addition, the growth in exports to Asia has favored export facilities at Pacific Northwest ports. The growth in exports from these two areas has relatively disadvantaged the third major export route—the Great Lakes. More fundamentally, corn and soybean exports from the Great Lakes have declined absolutely, as well. This decline is, in part, attributable to the fall in exports to Northern European countries where Great Lakes ports sometimes have a cost advantage relative to other U.S. ports. In addition, exports from the Great Lakes are limited by the relatively high cost of shipping corn and soybeans by vessel from Great Lakes ports. This is partially due to the fact that the St. Lawrence Seaway, through which all vessels from Great Lakes ports must pass, can accommodate only relatively small vessels, which tend to charge higher freight rates for grain shipments than those assessed by larger vessels. In view of this consideration, corn and soybeans frequently are transferred from such smaller ships to larger vessels at Canadian ports.

These changes have significantly eroded the role, and general business activity, of the Great Lakes ports and the traditional terminal markets located there. For example, USDA data indicate that average annual exports of corn from Chicago and Toledo combined fell by 33 percent between 1968–70 and 1993–95. Average annual soybean exports from Toledo and Chicago over this same period fell by 53 percent. In addition, the percentage of total U.S. exports of corn and soybeans accounted for by Chicago and Toledo combined declined from an average of about 17 percent in the 1968–70 period to an average of about four percent in the 1993–95 period.



As the following charts indicate, the decline in the export role of Chicago and Toledo has been associated with, and is in contrast to, the increasing importance of corn and soybean exports through ports on the Gulf of Mexico and on the Pacific Coast.[3]



BILLING CODE 6351-01-P

[3] Ports located on the lower Mississippi River accounted for about 93 percent of average annual soybean and corn exports from Gulf of Mexico ports over the period 1993–95. Virtually all Pacific Coast exports of corn and soybeans move through Pacific Northwest ports located on the Columbia River and Puget Sound.

BILLING CODE 6351-01-C

4. Geographic Changes in Storage Capacity Location

Finally, the role of some terminal markets as grain storage centers has declined as increasing storage capacity has been constructed in production areas, both off-farm and on-farm. Increases in off-farm storage capacity in production areas is due, in part, to the deregulation of rail freight rates, increased processing activity in production areas, and the need for additional storage capacity due to the significant growth in corn and soybean production in recent decades. In addition, on-farm storage capacity has increased significantly over the past 25 years to allow producers to maintain harvesting efficiency and access to lower cost storage. As a result, the role of terminal markets as storage centers has greatly diminished.

III. Cash Market Conditions at CBT Delivery Points.

As indicated above, general cash market trends disfavor traditional terminal markets such as Chicago. Moreover, cash market activity in Chicago and Toledo, the primary delivery locations for the CBT's corn and soybean futures contracts, has declined substantially, both on an absolute and relative basis, in recent decades. USDA production data and CBT data on grain receipts by elevators and processors at the primary delivery locations indicate that, despite U.S. corn production nearly doubling from 1970 to 1995, total corn receipts at Chicago and Toledo combined increased only by about 26 percent from 1970 to 1995, representing a mere 2.5 percent of total U.S. corn production in 1995. These data also indicate that, while U.S. soybean production also nearly doubled over this period, total soybean receipts in these locations actually fell by about 64 percent during the 1970–95 period, representing less than 2 percent of total 1995 U.S. soybean production. These trends illustrate the peripheral nature of the delivery points of the CBT's corn and soybean futures contracts to the cash market for these commodities.

The decline in the importance of the primary CBT delivery locations relative to the cash market is further illustrated by the trends in storage capacity at these locations in relation to changes in storage capacity in states which contain primary production areas for corn and soybeans. In particular, USDA data indicate that, from January 1, 1970, to December 1, 1995, total off-farm storage capacity in Illinois more than doubled, whereas CBT data for the same period indicate that the registered storage capacity of regular elevators at Chicago remained essentially constant until 1995, when it fell by about 58 percent. Similarly, during the period January 1, 1978, through December 1, 1995, total off-farm storage capacity in Illinois, Indiana and Ohio combined increased by about 42 percent, whereas total regular storage capacity in Chicago and Toledo combined declined by about 15 percent. This decline includes the 25 percent decrease in total regular storage capacity during 1995.

The decline in the cash market importance of the primary CBT delivery points has not been uniform. Rather, the declining cash-market importance of Chicago, the par delivery point, has recently been particularly acute.

1. Cash Market Trends at Chicago

Chicago's decreasing cash market role has been reflected over the years in a gradual loss in regular elevator storage capacity and in the number of firms operating such elevators. As discussed in more detail below, this loss has recently become precipitous. According to CBT data, in 1970, five firms operated seven regular elevators with a total registered storage capacity of about 52.4 million bushels. Currently, there are only three firms operating three regular elevators, with a total registered storage capacity of 22.8 million bushels. Further, one of the three remaining regular elevators, representing about 8.1 million bushels of storage capacity, recently ceased accepting grain and soybeans and appears to be closing down its operations, leaving total registered storage capacity at 14.7 million bushels.

Currently, soybean cash market activity in the Chicago area is limited to the merchandising by regular elevators of soybeans received from production locations, generally at harvest time. In this regard, total annual soybean receipts by regular CBT elevators declined by about 86 percent from 1970 to 1995, to about 8 million bushels. The merchandising role played by CBT regular elevators essentially is limited to shipping soybeans into export channels, either by barge to lower Mississippi River export points or via vessels through the Great Lakes and the St. Lawrence Seaway.

The existing corn cash market in the Chicago area primarily consists of purchases of corn by two local processing facilities and the merchandising by regular elevators of corn received from production locations. Annual receipts of corn in Chicago in 1995 totaled 112 million bushels, remaining relatively unchanged since 1970. CBT data indicate that a very small share of these receipts is received by regular elevators, with these elevators accounting for only about 14 percent of total corn receipts in 1995. Further, corn processing facilities in Chicago purchase essentially all of their annual corn requirements directly from production areas rather than from regular elevators. As with soybeans, regular elevators merchandise the limited quantities of corn they receive primarily into export channels.

USDA data indicate that average corn exports via the Great Lakes, during the period 1993–95, declined in absolute terms by over 60 percent relative to the average levels observed in 1968–70 and, as a percentage of total U.S. exports, from about 11.3 to 1.2 percent.[4] These data also indicate that average soybean exports via the Great Lakes declined by approximately 70 percent between these same two time periods and, as a percentage of total U.S. exports, from about 7.3 to about 1.1 percent.

2. Cash Market at Toledo

Corn and soybean cash market activity in Toledo has been less affected by these trends than the par delivery point of Chicago. Since Toledo was added as a delivery point for corn and soybeans in the mid- to late 1970s, the number of regular elevators in Toledo has remained relatively stable, although overall registered storage capacity has increased from about 36 million bushels in 1978 to about 57 million bushels today. Currently, there are seven regular elevators at the Toledo delivery point. The cash market for corn and soybeans at Toledo consists exclusively of the merchandising activities of the regular elevators; there are no processing facilities for these commodities at this location.

From 1970 to 1995, annual receipts of corn at Toledo doubled, increasing to an average of about 65 million bushels during 1994–95. Despite the overall doubling of receipts, however, average corn exports via the Great Lakes, during the period 1993–95, exceeded by only about 20 percent the average levels observed in 1968–70. In contrast, soybean receipts at Toledo declined in absolute amount by about 30 percent over this same period to an average of about 30 million bushels during 1994–95. Average soybean exports from Toledo declined by an even greater amount—approximately 47 percent between these same two time periods. Thus, while these data indicate that

[4] These data actually overstate the level of corn and soybean exports from Chicago, because the USDA's export data for Chicago also include exports from Milwaukee.

VOL 61 ISS 249 DE 26 1996 UMI

Toledo, unlike Chicago, has retained a larger measure of cash market activity, it is of a decidedly mixed nature.

3. Cash Market Conditions at St. Louis

Cash market activity at the contracts' St. Louis delivery point is of a substantially different nature than at the contracts' two primary delivery points. This location primarily serves as a barge loading area for corn and soybeans for shipment to the lower Mississippi River export market. The four regular elevators currently at St. Louis have a registered storage capacity of 12.2 million bushels. CBT data indicate that these elevators handle relatively large quantities of corn and soybeans. Specifically, receipts of corn averaged 52 million bushels during the period 1994–95, while receipts of soybeans averaged 23 million bushels over this same period. Similar quantities of corn and soybeans were shipped (almost exclusively by barge) during these two years. However, regular elevators at this location do not store significant quantities of corn or soybeans for extended periods of time due to the need to keep storage space unencumbered in order efficiently to conduct the unloading/loading process. Accordingly, because delivery on the CBT's corn and soybean contracts calls for the issuance of warehouse receipts that require regular elevators to store the commodity until the receipt is redeemed, there have been only a token number of futures deliveries at St. Louis.

IV. History of Revisions to the CBT Corn and Soybean Futures Delivery Point Specifications—1973 to 1993

The trends discussed above are long-term in nature. There has been an equally long history of modest attempts, made only in response to the urging of the federal regulator, to address the effect of these trends on the continued viability of the delivery terms of these futures contracts, while retaining the primacy of Chicago. Until the 1970's, Chicago was the sole delivery point on the CBT's corn and soybean futures contracts. At that time, a number of problem liquidations and price manipulation investigations in these futures markets focused attention on the inadequacy of Chicago as a delivery point and the need for additional delivery points. In particular, in the summer of 1973, both futures markets experienced problem liquidations, due, in part, to a general tightness in supplies associated with large Soviet grain purchases. Later that year, Congressional hearings were held in response to these problems. Ultimately, as part of far-reaching amendments to the Act, Section 5a(a)(10) was added, providing for new federal authority to address directly the delivery point provisions of futures contracts.

1. Proposals to Add Toledo and St. Louis

In 1974, the CBT submitted proposals to the USDA's Commodity Exchange Authority, the Commission's predecessor agency, to add Toledo and St. Louis as delivery points on the corn and soybean contracts at a discount of 5 cents per bushel to Chicago.[5] The CBT never placed these amendments into effect, because the proposed discounts were thought to be too great relative to cash market pricing relationships between Chicago and the proposed delivery points. In 1975, these same amendments were resubmitted to the newly formed CFTC for its approval. The Commission approved the proposal for corn (effective with the December 1976 contract month); and the CBT withdrew the soybean proposal. In 1978, the CBT resubmitted the proposal to add Toledo (but not St. Louis) as a delivery point for the soybean contract at a discount of 8 cents per bushel. The Commission approved those amendments, effective with the November 1979 contract month.

2. Proposal to Add St. Louis as a Soybean Futures Delivery Point

In July 1989, a commercial long trader held large long positions that exceeded the amount of soybeans that short traders were able to deliver at the contract's then existing delivery points and indicated that it would stand for delivery on its positions. This prompted the CBT to declare a market emergency, taking action to ensure an orderly liquidation of that futures contract month. In response to the outpouring of concerns over the adequacy of the contract's delivery provisions expressed by market participants after this incident, the CBT in 1990 proposed a number of changes to its soybean and grain futures contracts. These included adding St. Louis as a delivery point for soybeans at a discount of 4 cents per bushel to Chicago. Based upon evidence that the proposed discount for St. Louis delivery was too great relative to cash market pricing relationships, the Commission returned this submission for further justification under Commission Rule 1.41(b). The Commission also reiterated its view that the CBT should consider more substantive changes to its soybean and grain futures contracts in order to ensure adequate deliverable supplies.

In response to the heightened concerns over the adequacy of the CBT grain and soybean delivery points renewed by the July 1989 market emergency, the National Grain and Feed Association, the CBT, the General Accounting Office, and the Commission all conducted or sponsored studies on the delivery terms of the soybean and grain futures contracts. These separate studies were all completed in 1991. They generally found that long-term trends in the structure of the grain industry had affected adversely the viability of the cash markets at Chicago and Toledo. Their specific conclusions are summarized below.

a. MidAmerica Institute

The CBT commissioned the MidAmerica Institute to conduct a study of its corn and soybean futures contracts. The study concluded that, based on an analysis of cash and futures price data for the 1984–89 period, the delivery process for these contracts effectively resulted in the convergence of futures prices and cash prices at the contracts' Chicago and Toledo delivery points. The study noted, however, that the Chicago-Great Lakes-East Coast cash market for grains and soybeans had declined markedly in importance relative to the Mississippi-Gulf of Mexico area. The study concluded that this decline had reduced the benefits of retaining Chicago as the primary delivery point and of relying upon Toledo as the alternative delivery point. In this respect, the study concluded that Chicago had become a relatively low price point because it is located near the origin, rather than at the destination, of grain and soybean flows for most of the year. The study indicated that this feature enhances the potential for manipulation, since deliverable supplies may only be increased to address a manipulation attempt by drawing these commodities from higher value locations. The study noted that such an action to increase deliverable supplies is costly and that a manipulator can profitably exploit this cost to inflate futures prices artificially under conditions that recur periodically in grain markets. The study also noted that the decline in Chicago's tributary area means that more hedgers must bear additional basis risk when Chicago is the primary delivery point.

This increased susceptibility to manipulation and basis risk, the study concluded, could be ameliorated by improving the alignment of the contracts' delivery mechanisms with

[5] Toledo was established by the CBT as a delivery point for its wheat futures contract in the early 1970s.

prevailing cash market conditions and pricing relationships. In particular, the addition of an effective Mississippi River delivery point, such as St. Louis, and the establishment of price differentials for all delivery locations at levels reflecting typical cash price relationships, was recommended. The addition of a delivery point at an active cash market location such as St. Louis, the Institute noted, would enhance the futures contracts' hedging performance by improving the extent to which their prices reflect prices in primary cash market channels. In this regard, however, the MidAmerica Institute cautioned that, because of their limited storage capacity and throughput nature, the addition of St. Louis warehouses would only modestly enhance deterrence of manipulative activity.[6]

b. Food Research Institute

The Food Research Institute of Stanford University was commissioned by the National Grain and Feed Association to study these issues as well. This study concluded that deliverable stocks at the contracts' delivery points were, in the years preceding the study's completion in 1991, too low relative to the size of positions normally held by the largest traders. It concluded that, in this respect, positions held by the largest traders were of such a size relative to deliverable stocks that neither delivery nor the threat of delivery was a credible alternative. Moreover, this limited level of deliverable stocks was not due to any warehouse capacity constraints existing at that time, but rather to the general inexorable decline of cash market activity at grain terminal markets—Chicago, in particular.

The Food Research Institute recommended that the CBT address this fundamental problem by rethinking its specifications requiring delivery of grain and soybeans in-store via warehouse receipts. Suggested alternatives included barge delivery, incorporating aspects of a call on production, or delivery at Mississippi River export facilities, with the receiver given the option as to when the product is loaded upon one month's notice.[7]

[6] Providing for emergency barge or rail delivery, or for some mechanism of ensuring access of throughput elevators in the vicinity of that city to the delivery process, would, according to the MidAmerica Institute, address these shortcomings in St. Louis as a potential additional delivery point.

[7] The Food Research Institute study suggested that the CBT consider adopting the delivery procedures used on the New York Mercantile Exchange's crude and heating oil futures contracts if the CBT selects a Gulf of Mexico delivery point system.

c. The CFTC

The Commission staff's study of the contracts' delivery terms reviewed and analyzed the general cash market trends and the specific cash market conditions at Chicago and Toledo during the period 1960 through 1990. The study found that Chicago and, to a lesser extent, Toledo had declined substantially as storage locations for corn and soybeans to be exported via the Great Lakes and shipped to other U.S. destinations for domestic consumption purposes. In addition, the study analyzed several potential alternative delivery-point specifications for the corn and soybean futures contracts, which would locate the contracts' delivery points within the commodities' primary cash market channels. These included delivering corn and soybeans in-store at Central Illinois warehouses via warehouse receipts; making delivery at Illinois River barge-loading, or Mississippi River vessel-loading export facilities via shipping certificates; and cash settlement. The study concluded that these alternatives, by aligning the contracts' terms more closely with the underlying cash markets for corn and soybeans, would thereby reduce the potential for market problems and concomitant regulatory interventions.

d. General Accounting Office (GAO)

At the request of the Chairman of the Agriculture Committee of the U.S. House of Representatives, the GAO completed a review of the CBT grain and soybean futures delivery-point issues in 1991. The GAO conducted interviews of interested parties, including CBT and Commission officials, and reviewed the above-noted studies prepared by the MidAmerica Institute and the Stanford University Food Research Institute.

In its study, the GAO noted that CBT officials believed that changing delivery points might interfere with the economic purposes of futures trading and that surveillance and disciplinary action programs rather than changing delivery points might be better suited to preventing potential market manipulation. The GAO noted that, in contrast, the Commission was reluctant not to alter futures contract terms that in its judgement resulted in an increased threat of manipulation and required an excessive level of regulatory intervention to prevent frequent market congestion, price distortions or manipulation. The GAO also noted that the MidAmerica and Food Research Institute studies supported the need for the CBT and the Commission to assess alternatives for improving how delivery points for grain and soybean futures contracts meet the economic purposes and anti-manipulation goals of the Act.

e. Symposium on CBT Grain and Soybean Delivery Point Issues

In conjunction with the completion of these studies, in September 1991, the Commission sponsored a symposium to discuss these issues. Attendees at that symposium represented a broad cross section of interested parties, including major grain companies, academic institutions, the CBT, and the Commission. Members of the grain industry generally agreed that the performance of the futures contracts under their current delivery specifications was not satisfactory in all respects, but disagreed on the degree of the problem and the nature of the possible solutions. Although acknowledging that Chicago was a declining cash market, a CBT representative nevertheless maintained that Chicago was still a viable delivery point based upon the variety of transportation alternatives available to long traders taking delivery at that location. The CBT representative further indicated that the CBT was continuing to study the situation and develop appropriate revisions to the contracts' delivery specifications.

f. Final CBT Proposals Responding to July 1989 Soybean Incident

In 1992, the CBT re-submitted its proposal to add St. Louis as a delivery point for soybeans, at a premium of 8 cents per bushel rather than at a discount of 4 cents per bushel as previously proposed in 1990. The CBT also proposed to revise the price differential for St. Louis corn futures deliveries to a premium of 7 cents per bushel from the then existing 4 cents per bushel discount and to reduce the discount for the delivery of corn in Toledo to 3 from 4 cents per bushel. Although approving these proposals in April 1992 for implementation beginning with the December 1993 corn contract month and the November 1993 soybean contract month, the Commission, in its approval letter, stated that it:

> understands that the addition of St. Louis as a delivery point for soybeans and wheat and revisions to locational differentials for corn were intended by the Exchange to provide additional deliverable supplies for these contracts. Nevertheless, the Commission is concerned that these changes may not be sufficiently responsive to the long run changes in the cash market, and therefore may not significantly alleviate concerns about the contracts' specifications in either the immediate future or the long run.

VOL 61 ISS 249 DE 26 1996 UMI

In particular, in view of the long term trends in the cash market, the Commission is concerned about the continued reliance on warehouse receipts in terminal markets as the sole source of deliverable supplies for each of these contracts. Further, the Commission notes that the limited warehouse space at St. Louis may be devoted primarily to "through-put" merchandising activities and, as a result, operators of these facilities may be reluctant to make significant space and/or receipts available for purposes of futures delivery.

The Commission concluded by again putting the CBT on notice that:

[i]n consideration of this, the Commission believes that the CBT should continue its efforts to develop comprehensive contract revisions that will enhance deliverable supply and reduce the need for formal and informal market intervention by the Exchange or the Commission. It is the Commission's belief that such revisions may require linking contract terms more directly to commodity flows or to decentralized storage. In the Commission's view, continued active consideration of this matter is particularly advisable in view of the possibility of further declines in the viability of the Chicago delivery area and the time necessary to develop and fully implement more substantive contract changes.

V. Recent Events—1995 to the Present

As predicted by the Commission in 1992, the CBT's response to the continuing deterioration of the cash market at its delivery points proved to be a solution of limited effect and short duration. In the fall of 1995, three of the existing six Chicago delivery warehouses ceased operations. As a result, Chicago delivery capacity was immediately reduced by more than half—from 53.9 to 22.8 million bushels. Significant as this drop in capacity is, it must be kept in mind that actual supplies available in those warehouses have been a fraction of the total capacity. Nevertheless, the precipitous drop in warehouse capacity served to reawaken concerns over the viability of the contracts' delivery points.[8]

Commission Chairman Mary Schapiro, in an October 11, 1995, letter to the CBT, expressed once again the Commission's concerns regarding the adequacy of the contracts' delivery provisions, stressing that the Commission's concerns were heightened by this further deterioration. Chairman Schapiro requested that the Exchange keep the Commission staff informed on a frequent basis of the progress of a Special Task Force established by the CBT to study the situation. Chairman Schapiro's letter further noted the Commission's recommendation that the Exchange not limit its consideration to short-term responses to the closure of the above-noted Chicago regular elevators. The letter noted, specifically, that the Exchange should consider, in the context of long-run cash market trends, comprehensive contract revisions that would enhance deliverable supply and provide a viable price-basing service for the international grain industry.

1. CBT Task Force.

As noted above, the halving of deliverable storage capacity at Chicago prompted the CBT to form a Special Task Force on September 25, 1995, to determine what changes, if any, were needed to be made to the contracts' delivery terms to ensure adequate deliverable supplies. The Special Task Force held numerous meetings from the date of its establishment through early June 1996. It invited a significant number of individuals, representing a broad cross section of the industry and other interests, to express their views. It considered in depth the merits of a number of suggested alternatives. The Special Task Force's Chairman also briefed the Commission on its progress.

On June 4, 1996, the CBT Special Task Force issued its final recommendations for changing the delivery provisions of the grain futures contracts. The Special Task Force recommended: (1) adding delivery points in East Central Illinois, Northern Illinois River locations, and Milwaukee, Wisconsin, for the corn and soybean contracts, with warehouse receipts continuing to serve as the delivery instrument; (2) reducing the locational price differentials for delivery of corn, soybeans, and wheat at Toledo, Ohio; (3) deleting St. Louis as a delivery point for the corn, soybean, and wheat futures contracts; (4) reducing the daily barge load-out requirement for Chicago elevators from 3 to 2 barges, but permitting the receivers of corn or soybeans to request up to 4 barges per day, which the Chicago warehouseman could provide either entirely from the Chicago elevator or through a combination of loadings at the Chicago elevator and a separate loading point along the Northern Illinois River; and (5) establishing higher minimum financial requirements for regular warehousemen.

2. March 1996 Wheat Expiration Problem

In the midst of the Special Task Force's deliberations, the March 1996 wheat futures contract experienced a problematic liquidation.[9] On the last trading day of this future, a major commercial trader maintained a significant long position against export sales contracts and a major commercial trader who did not own wheat in deliverable position maintained a significant short position until the final few minutes of trading. The commercial short trader and several other short position holders elected to offset their positions rather than make delivery. During the final minutes of trading, this buying interest was met by a lack of selling interest—the large commercial long trader had determined to stand for delivery and had not entered any orders on the close. As a result, wheat futures prices were bid sharply higher, from about $5.00 to over $7.00 per bushel during and after the close of trading. Although the Commission staff report [10] on this incident was not addressed to the causal links, if any, between the delivery specifications for the contract and the problem liquidation, the recent problem in the expiration of the March wheat futures contract may foreshadow similar problems for the corn and soybean futures contracts.

3. CBT Action on Proposals to Revise the Contracts

On September 18, 1996, the CBT's Board of Directors considered the Special Task Force's recommendations and approved for membership balloting all of the Special Task Force's recommended changes except the proposal to add East Central Illinois as a delivery area. On October 17, 1996, the Exchange membership voted to reject the recommended changes by a margin approximately of 2 to 1.

4. More Recent Developments

In the last week of October 1996, Commission staff were notified that one of the three remaining Chicago elevators, operated by Countrymark, has stopped accepting soybeans and grain for the indefinite future. Accordingly, at

[8] Moreover, as also anticipated by the Commission in 1992, there have been few, if any, warehouse receipts registered for delivery on the soybean (or wheat) futures contracts at St. Louis, since it became a soybean (and wheat) delivery point in 1993. In addition, despite the substantial increase in the locational price differential applicable to St. Louis corn futures deliveries under the 1992 amendments, there continues to be very little futures delivery activity in corn at that location.

[9] As noted above, although this notification under section 5a(a)(10) of the Act applies only to the CBT corn and soybean futures contracts, many of the same trends affecting the corn and soybean futures contracts have affected the wheat futures contract, as well. The Commission is requesting the CBT to conduct an in-depth reconsideration of the delivery specifications for its wheat contract within the next 120 days, similar to that which it undertook for its corn and soybeans futures contracts.

[10] See, Report on Chicago Board of Trade March 1996 Wheat Future Expiration on March 20, 1996, (November 26, 1996).

present, there are only two functioning regular Chicago elevators. They have a combined rated storage capacity of 14.7 million bushels.[11]

VI. Requirements of Section 5a(a)(10) of the Act

The Commodity Exchange Act was extensively amended in 1974. Those amendments substantially expanded the Act's scope, created a regulatory system for the trading of all commodity futures contracts, and created the Commission as an independent regulatory agency to administer and to enforce the Act's provisions. Many of these amendments were designed to address apparent weaknesses in the prior statutory scheme. In this regard, the Commission's predecessor agency, charged with administering the Act, testified before the House Committee on Agriculture, that:

> For many years, the Department has been urging the exchanges to provide an adequate number of delivery points in the production areas and along the routes by which the various commodities move from the producer to the consumer. The need for such points is readily apparent. On July 20, 1973, the last trading day for July corn on the Chicago Board of Trade, the futures price rose $1.20 per bushel. * * * Transportation problems made it difficult to move corn into the Chicago area and warehouses in that area were either filled or reluctant to accept corn coming in for delivery on the futures contract. The result was that many who would have made delivery had there been provision for delivery at other points where supplies are ordinarily available * * * were * * * forced to buy futures contracts at an escalating price largely caused, not by an overall change in the supply or demand for corn, but an artificial shortage. * * *
>
> [T]he establishment of * * * additional delivery points * * * ought to be made by the exchanges in the first instance. Our concern here is simply making sure that if they do not do the job properly, adequate authority is present for the regulatory agency to take action should such be desirable.

H.R. Rep. No. 975, 93rd Cong. 2d Sess. 77 (1974).

In recognition of the crucial role played by adequate deliverable supplies in promoting orderly markets, Congress enacted Section 5a(a)(10) of the Act, which specifies, in part, that each contract market is required to:

> permit the delivery of any commodity, on contracts for sale thereof for future delivery of such grade or grades, at such point or points and at such quality and locational price differentials as will tend to prevent or diminish price manipulation, market congestion, or the abnormal movement of such commodity in interstate commerce.

7 U.S.C. § 7a(a)(10).

Moreover, Congress granted the Commission authority under Section 5a(a)(10) of the Act to determine whether exchange rules regarding delivery terms fail to accomplish these objectives and to take appropriate remedial action.

As an aid to the exchanges in meeting the statutory requirements for designation, including the provisions of Section 5a(a)(10), the newly formed Commission published Guideline No. 1 (now codified at 17 CFR Part 5, Appendix A). As explained in Guideline No. 1, to demonstrate continuing compliance with the Act, exchanges must provide evidence that each individual contract term conforms with the underlying cash market and provides for a deliverable supply that will not be conducive to price manipulation or distortion and which can be expected to be available to the short trader, and saleable by the long trader at its cash market value in normal cash marketing channels.[12]

VII. Compliance of the CBT's Corn and Soybean Delivery Point Specifications with Section 5a(a)(10) of the Act

The Commission believes that the CBT's corn and soybean futures contracts currently do not meet the requirements of Section 5a(a)(10) of the Act that delivery terms be specified which "tend to diminish price manipulation, market congestion, or the abnormal movement of such commodity in interstate commerce." As noted, the current level of total regular capacity in Chicago available for the storage of deliverable corn, soybeans, wheat, and oats has been reduced by about 60 percent since the fall of 1995, as three of the six regular Chicago warehouse operators closed operations. Moreover, effective regular storage capacity could decline to even lower levels (about 12 million bushels of effectively available storage capacity) in the very near future in view of the potential that another existing regular elevator may cease operations. With the withdrawal of three—and now, apparently four—elevators at the contracts' Chicago delivery point, the available deliverable supplies potentially have been reduced to levels which increase the futures contracts' susceptibility to price manipulation or distortion.

The recent closure of these elevators in Chicago greatly exacerbates a deliverable supply situation that is already severely limited due to the low levels of cash market activity in Chicago. These closures confirm that Chicago is at the periphery of normal cash market channels for corn and soybeans. The reduced number of regular warehouses, the frequently low levels of stocks available, and the lack of commodity flows to Chicago resulting from normal cash market activities increase the likelihood that futures prices may become distorted and that abnormal interstate movements of corn or soybeans may be required to meet futures delivery requirements.

Moreover, this situation is not confined to Chicago, the primary delivery point on the contracts. The inadequacy of the contracts' overall delivery point specifications is suggested by the very low deliverable supply conditions frequently observed at season-end for the corn and soybean futures contracts during recent years. As shown in Chart 3, season-end deliverable stocks of corn at all CBT delivery points combined have often fallen to very low levels from 1980 to the present, independent of the recent precipitous decline in regular storage capacity in Chicago. In particular, deliverable stocks of corn fell to as low as 2 million bushels (400 contracts) on September 1, 1990. As shown in Chart 4, since 1980, deliverable stocks of soybeans at all delivery points combined also have declined to levels as low as 1.2 million bushels (240 contracts) in 1985 and 1.05 million bushels (210 contracts) in 1996.[13]

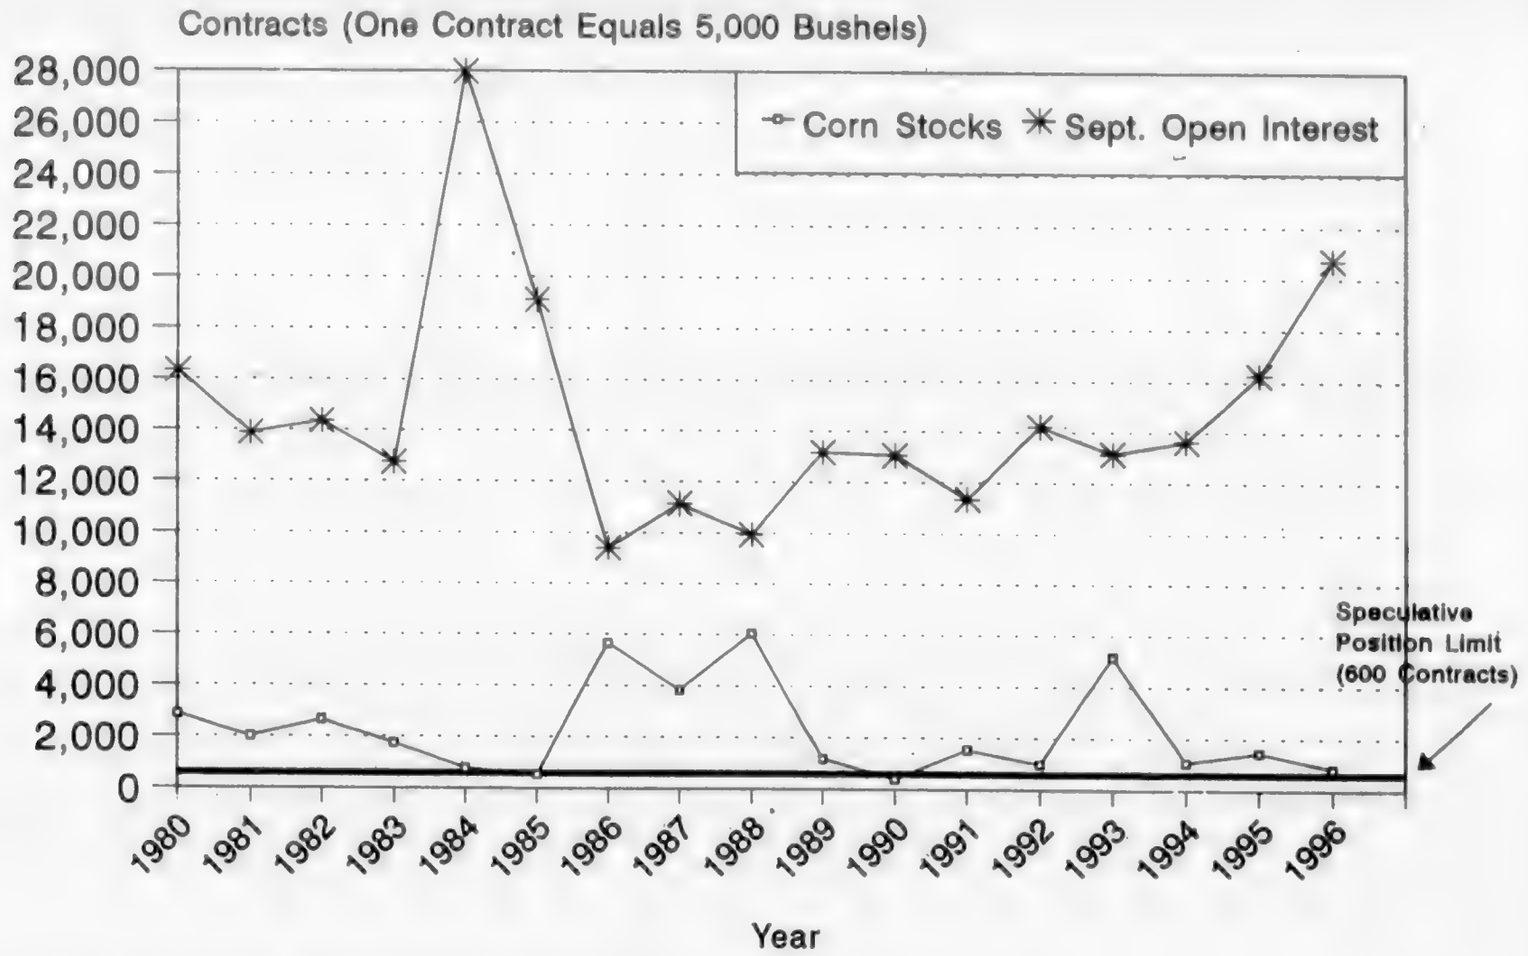
[11] Trade sources indicate that, if the latest elevator to stop accepting grain and soybeans closes, the effective regular storage capacity in Chicago which is available to hold grain and soybeans will be reduced to an even lower level, to about 12.0 to 12.5 million bushels. These lower effective capacity estimates reflect the fact that a certain proportion of storage within an elevator must be kept empty to allow blending of the stored grain and soybeans and for the efficient movement of these commodities into and out of the facility.

[12] Specifically, with respect to delivery points, Guideline No. 1 provides that exchanges must consider: (1) the nature of the cash market at the delivery point; (2) the composition of the market at that point; (3) the normal commercial practice for establishing cash market values and the availability of published cash prices reflecting the value of the deliverable commodity; (4) the level of deliverable supplies normally available, including the seasonal distribution of such supplies; and (5) any locational price differentials that would be applicable to the delivery points, including the economic basis for discounts or premiums, or lack thereof, applying to delivery points. In addition, Guideline No. 1 specifies that contract markets must provide information which describes the delivery facilities, including: (1) the type of delivery facility at each delivery point; (2) the number and total capacity of facilities meeting contract requirements; (3) the proportions of such capacity expected to be available for traders who may wish to make delivery, and seasonal changes in such proportions; and (4) the extent to which ownership and control of such facilities is dispersed or concentrated.

[13] The low levels of corn and soybean stocks at the contracts' delivery points observed in September 1996 were associated with low stock levels throughout the U.S. Nevertheless, it is clear that low stocks at the contracts' delivery points are

Further, effective deliverable stocks of corn (stocks at Toledo and Chicago minus stocks at St. Louis) have declined to even lower levels on other occasions.[14] For instance, on September 1, 1996, effective corn stocks fell to about 1.1 million bushels (about 220 contracts).

BILLING CODE 6351-01-P



---

also a problem in years where U.S. stock levels are not at uniformly low levels.

[14] As discussed above, there have been very few deliveries at St. Louis since this location became a delivery point in the 1970s. The lack of deliveries at this point reflects the fact that elevators in St. Louis, unlike the regular elevators in Chicago and Toledo, operate as barge-loading facilities rather than storage facilities. Corn and soybeans received at St. Louis elevators are stored only temporarily until they can be loaded into barges.

VOL 61 ISS 249 DE 26 1996 UMI

Charts 3 and 4 also indicate the comparative levels of open interest for the expiring September contract month and the spot month speculative position limits for the corn and soybean futures contracts. These figures indicate, for instance, that total stock levels frequently have fallen to levels near or below the maximum number of contracts a single speculative trader may hold during the delivery periods of expiring contract months (600 contracts). Moreover, commercial firms may have been granted exemptions from these limits for purposes of bona fide hedging. These comparisons show that the potential requirements for futures delivery frequently exceed, by a substantial degree, the level of deliverable stocks available for futures contracts. They thereby indicate the increased potential for market problems as well as the increased potential for regulatory intervention required to ensure that positions are liquidated in an orderly fashion.

Moreover, the recent loss of substantial regular warehouse capacity likely will cause further deterioration in the chronically low deliverable stock situation. The primary factor drawing deliverable supplies to Chicago has been the existence of warehouse capacity for futures contract deliveries at that location, rather than traditional cash market demand. Numerous trade sources and cash market experts have verified that the cash market flow of corn and soybeans to Chicago elevators for purposes other than futures delivery is weak or non-existent. Accordingly, the Commission believes that the recent decline in the number of grain merchandisers in Chicago will necessarily result in a further decline of stocks from the low levels depicted in the charts.

In such situations, where stocks are available for delivery only at chronically low-levels due to the location of a contract's delivery points at the periphery of cash market channels, futures prices can more become distorted relative to cash market prices. This results from the need to attract the necessary quantities of corn or soybeans, which are otherwise not normally available, to the contracts' delivery points to fulfill delivery requirements. Thus, when the delivery points for a futures contract are not located within active cash market channels for the underlying commodity, the likelihood increases that abnormal interstate movements of the commodity will be required to meet futures delivery requirements. In contrast, when a contract's delivery points are located within active cash market channels for a commodity, deliverable supplies readily can be made available for delivery from stocks at, or flows of the commodity through, the contract's delivery points at a price that is representative of prevailing cash market prices for the commodity.

These circumstances were clearly envisioned by the MidAmerica Institute study discussed above, which concluded that because Chicago had become a low price point, deliverable supplies required to respond to an attempted manipulation could only be drawn from higher value locations, thereby enhancing the potential for, and possible profitability of, market manipulations.[15]

The situation is critical in that, except for cash-settled contracts, the threat of delivery is the mechanism through which the market forces futures and cash prices to converge. To the extent that delivery is not a viable alternative because of inadequate deliverable supplies, trading will increasingly require regulatory intervention to remain orderly, particularly during contract month expirations.

Accordingly, the Commission has determined to notify the CBT under the provisions of Section 5a(a)(10) of the Act, that for the reasons discussed above, and in light of the CBT's failure to date to take appropriate corrective action, the Commission finds that the CBT rules specifying the terms of its corn and soybean futures contracts do not accomplish the Section 5a(a)(10) objectives of "tend[ing] to prevent or diminish price manipulation, market congestion, or the abnormal movement of such commodity in interstate commerce."

Further, the Commission hereby notifies the CBT, under the provisions of Section 5a(a)(10) of the Act, that the CBT has until March 4, 1997 to adopt and submit for Commission approval "appropriate changes" to CBT rules.

VIII. Alternative Contract Specifications.

To avoid further proceedings under Section 5a(a)(10), the CBT must make changes to the contracts which, in the opinion of the Commission, are necessary to accomplish the objectives of this subsection of the Act. Although the Commission has not reached a conclusion as to the exact nature of the changes which are "necessary to accomplish the objectives" of providing delivery terms "as will tend to prevent or diminish price manipulation," it is providing guidance to the CBT on a range of possibilities which could constitute "appropriate changes" by providing for the necessary, viable linkage with the cash market. By providing these alternatives, the Commission is not limiting the CBT's ability to respond to this Section 5a(a)(10) notification, nor is it specifying exact design criteria. Rather, these are examples of various means by which the Commission believes the objectives of the section could be met. In any event, the particular contract specifications proposed by the CBT in response to this notification, in order to meet the statutory requirement, should provide for a linkage with the cash market through specific terms which are in conformity with a substantial segment of that underlying market.

1. Modified CBT Special Task Force Proposal

The contract amendments recommended by the CBT Special Task Force, with certain modifications, could potentially provide for the necessary increase in deliverable supplies. Under the Special Task Force proposal, futures delivery would continue to be made at all locations by the transfer of a warehouse receipt for grain in store. Chicago and Toledo would continue as delivery points, with Chicago remaining the par delivery location, St. Louis being deleted, and existing discounts for Toledo delivery being reduced to 2 from 3 cents per bushel for corn and to 4 from 8 cents per bushel for soybeans.

The Special Task Force also proposed that delivery be permitted at regular warehouses in Milwaukee, in East Central Illinois (ECI), and on the Northern Illinois River (NIR).[16] Vessel deliveries of corn and soybeans in Milwaukee would be at par, with rail and barge deliveries subject to a discount of 8 cents per bushel. Corn and soybeans in store at regular ECI warehouses would be deliverable at discounts of 4 cents and 8 cents per bushel, respectively.[17] Futures delivery at NIR warehouses would be at par for corn and at a discount of 4 cents per bushel for soybeans.

---

[15] The inclusion of Toledo does not cure this fundamental flaw because it, too, is on the periphery of the cash market.

[16] The ECI delivery area would encompass the counties of Champaign, Coles, Douglas, Ford, and Iroquois. The NIR delivery area would consist of that part of the Illinois River that lies between Creve Coeur and Chicago.

[17] The recommended changes also would permit delivery receivers to require ECI regular warehouses to load the delivery corn and soybeans into barges at NIR barge-loading facilities at a premium of 4 cents per bushel. This provision implies that corn would be deliverable in barges on the NIR at par, while soybeans would be deliverable on the NIR at a discount of 4 cents per bushel.

However, as to this proposal, the following changes would be necessary to provide for an economically effective linkage of the futures contracts with the cash market:

1. In view of the infrequent participation of St. Louis as a delivery point, as well as the similarly limited storage capacity and through-put nature of the barge-loading warehouses on the NIR, the Special Task Force proposal to permit delivery in NIR barge-loading warehouses must be modified to allow delivery at off-water warehouses located within a specified distance of this portion of the Illinois River, in order to make warehouses located on the NIR an effective source of deliverable supplies.[18] The specified area should encompass corn and soybean storage facilities that typically store these commodities on a seasonal basis and from which substantial deliverable supplies would be available.

2. The recommended locational price differentials for delivery in store at Toledo, the ECI, and warehouses located on or near the NIR should be modified so that they reflect commonly observed cash price relationships with the contracts' other delivery locations. Specifically, for deliveries at NIR barge-loading facilities, the price differential levels selected should reflect the fact that corn and soybeans become more highly valued the further south the delivery location is on the NIR.

2. Illinois River Shipping Certificate Delivery Alternative

An alternative specification that could also result in the necessary increase to deliverable supplies would replace the existing warehouse-receipt-delivery instrument with a shipping certificate and provide for delivery at Illinois River barge loading facilities, in addition to the contracts' existing Chicago, Toledo, and St. Louis delivery points.[19] The Illinois River delivery area could be specified to include all or a substantial part of that River. The contracts' par pricing location could be shifted to a delivery location/area that has an active cash market, with locational price discounts for other delivery points/areas set at levels that fall within the range of commonly observed cash price differences between the specified delivery locations.

3. Lower Mississippi River Export Alternative

This alternative would eliminate the contracts' existing delivery locations and delivery instrument in favor of an export-oriented contract with a shipping certificate as the delivery instrument. The shipping certificate would call for delivery at export locations on the lower Mississippi River.[20]

4. Cash Settlement Alternative

This alternative would replace the contracts' existing delivery provisions with cash settlement provisions. The cash price index could be based on the USDA-quoted prices for corn and soybeans in the primary production or export market areas on the last day of trading or any other method of calculating a cash-settlement price consistent with Guideline No. 1.

Section 5a(a)(10) of the Act authorizes the Commission to change or supplement the terms and conditions of futures contracts. The Commission would prefer, however, not to take such an action. Rather, the Commission looks forward to receiving for its approval proposed modifications from the CBT to the delivery specifications for the CBT's corn and soybean futures contracts which satisfactorily address the issues discussed in this letter. In the event that the Commission fails to receive such proposed amendments by March 4, 1997, the Commission is prepared to take appropriate action under Section 5a(a)(10) of the Act to address the situation.

By the Commission,
Jean A. Webb,
Secretary of the Commission.

The Commission has determined that publication of the notification to the CBT for public comment will assist the Commission in its consideration of these issues, including in particular, the eventual response of the CBT. Accordingly, the Commission is requesting written data, views or arguments from interested members of the public. Commenters are specifically requested to address the following issues:

1. To what extent do the current CBT delivery specifications for corn and soybeans reflect the structure of the cash market for the underlying commodity? To the extent the terms of the contracts depart from commodity flows in the cash market, does this have any detrimental impact on the trading of these contracts?

2. What is the likely effect of failing to modify the current terms of the contract?

3. To what extent would the alternatives listed by the Commission increase deliverable supplies on the contracts, and would such increases be sufficient under the Act?

4. The Commission identified several changes to the CBT Task Force's recommendations necessary to provide "a meaningful increase in the level of economically deliverable supplies available for futures delivery." To what extent is it necessary to permit delivery in off-water warehouses if delivery on the contract continues to call for warehouse receipts at warehouses on the Illinois river, which largely tend to be through-put facilities? What is the range of discounts or premiums commonly observed in the cash market for corn and soybeans that would be deliverable in Toledo, East Central Illinois, or the Northern Illinois River, compared to Chicago?

5. Is modification of the contracts' delivery provisions likely to enhance or detract from their hedging or price-basing utility?

6. On a related issue, to what extent do the current CBT delivery specifications for the futures contract for wheat reflect the structure of the cash market for the underlying commodity? To the extent that the terms of the futures contract depart from commodity flows in the cash market, does this have any detrimental impact of the trading of futures contracts for wheat?

7. What is the likely effect of failing to modify the current delivery specifications of the wheat contract?

8. What alternatives to the current delivery specifications would increase deliverable supplies on the wheat contract, while maintaining its utility for hedging and price basing?

Issued in Washington, D.C., this 19th day of December, 1996, by the Commodity Futures Trading Commission.

Jean A. Webb,

Secretary of the Commission.

[FR Doc. 96–32708 Filed 12–24–96; 8:45 am]

BILLING CODE 6351–01–P

[18] As recommended by the Special Task Force for deliveries at ECI warehouses, the receiver of corn and soybeans in an off-water warehouse could be given the option of taking delivery of corn and soybeans in barges from regular warehouses on the NIR or by rail from the off-water facility.

[19] The terms of the shipping certificate could be specified in several different ways. For example, the shipping certificate could require that the issuer ship corn or soybeans in rail cars or trucks to a location nominated by the buyer within the specified delivery areas, with the buyer having the option of requiring that the corn or soybeans be loaded into barges at a specified premium.

[20] As in alternative 2, the shipping certificate's terms may be specified in different ways. In this case, for example, the shipping certificate could require the issuer to deliver corn or soybeans in barges or rail cars to an export location on the lower Mississippi River specified by the buyer, with provision for delivery corn and soybeans to be loaded into vessels at a specified premium.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Partnership Council Meeting

AGENCY: Department of Defense.

ACTION: Notice of meeting.

VOL 61 ISS 249 DE 26 1996 UMI

SUMMARY: The Department of Defense (DoD) announces a meeting of the Defense Partnership Council. Notice of this meeting is required under the Federal Advisory Committee Act. This meeting is open to the public. The topics to be covered are the Federal Managers Association (FMA) membership on the Council and a discussion of general DoD Human Resources initiatives.

DATES: The meeting is to be held January 22, 1997, in room 1E801, Conference Room 7, the Pentagon, from 1:00 p.m. until 3:00 p.m. Comments should be received by January 14, 1997, in order to be considered at the January 22 meeting.

ADDRESSES: We invite interested persons and organizations to submit written comments or recommendations. Mail or deliver your comments or recommendations to Mr. Kenneth Oprisko at the address shown below. Seating is limited and available on a first-come, first-served basis. Individuals wishing to attend who do not possess an appropriate Pentagon building pass should call the below listed telephone number to obtain instructions for entry into the Pentagon. Handicapped individuals wishing to attend should also call the below listed telephone number to obtain accommodations.

FOR FURTHER INFORMATION CONTACT: Mr. Kenneth Oprisko, Chief, Labor Relations Branch, Field Advisory Services Division, Defense Civilian Personnel Management Service, 1400 Key Blvd., Suite B–200, Arlington, VA 22209–5144, (703), ext. 704.

Dated: December 19, 1996.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

Department of the Navy

Notice of Availability and Public Hearings for the Draft Environmental Impact Statement (DEIS) for Base Realignment Action for the Naval Sea System Command Relocation to the Washington Navy Yard, Washington, DC

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR Parts 1500–1508), the Department of the Navy (DoN) prepared and filed with the U.S. Environmental Protection Agency a DEIS evaluating the environmental effects of relocating the Naval Sea System Command Headquarters (NAVSEA) from leased space in Arlington, Virginia to the Washington Navy Yard or other government-owned property in the metropolitan Washington, DC area.

In response to the recommendations of the 1995 Department of Defense Base Realignment and Closure Commission (BRAC–95) and legislative requirements of the 1990 Base Realignment and Closure Act (Pub. L. 101–510), the Navy will relocate approximately 4,100 NAVSEA personnel to the Washington Navy Yard (WNY) in Washington, DC. The Navy's DEIS addresses the environmental impacts associated with an increase of personnel at the WNY, as well as, renovation, demolition and new construction of facilities at the installation necessary to accommodate relocated personnel.

The Washington Navy Yard (WNY) occupies 68 acres along the Anacostia River in southeast Washington, DC. Development at the installation began in the early 1800's and continued in response to National defense efforts. Little if any undeveloped land is currently available for new construction at the WNY. The four alternatives considered in the DEIS center around a small group of existing structures and involve variations of renovation and/or demolition and new construction. The BRAC–95 relocation of NAVSEA corresponds to the current use of the WNY as an administrative center and long range plans to convert underutilized facilities at the installation into office space.

The DEIS has been distributed to various Federal, state, and local agencies, elected officials, special interest groups, and three local libraries. A limited number of single copies are available, and may be obtained by contacting the Navy representative listed at the end of this notice. A public hearing to inform the public of the DEIS findings and to solicit comments will be held on January 23, 1997, in Building 101 at the WNY. The meeting facilities will be open at 6:30 PM with the Navy's formal presentation beginning at 7:00 PM.

Interested parties are invited to attend and participate in the Public Hearing. Oral statements will be heard and transcribed by a stenographer; however, to ensure accuracy of the record, all statements should be submitted in writing. In the interest of available time, each speaker will be asked to limit his/her comments to five minutes. If longer statements are to be presented, they should be summarized for the public hearing and submitted in long-form at the hearing or mailed to the address listed at the end of this announcement. All statements, both oral and written, will become part of the public record.

ADDRESSES: Written comments on the DEIS should be mailed to: Department of the Navy, Naval Facilities Engineering Command, Engineering Field Activity—Chesapeake, Mr. Hank Riek (Code 20E), 901 M Street SE, Building 212, Washington Navy Yard, Washington, DC 20374–5018. Comments must be received no later than February 10, 1997. Additional information concerning this notice may be obtained by contacting the Navy at (202) 685–3064, facsimile (202) 685–3350.

Dated: December 20, 1996.

D.E. Koenig,

LCDR, JAGC, USN, Federal Register Liaison Officer.

BILLING CODE 3810–FF–M

DEPARTMENT OF ENERGY

Record of Decision Programmatic Environmental Impact Statement for Stockpile Stewardship and Management

AGENCY: Department of Energy.

ACTION: Record of decision.

SUMMARY: The Department of Energy (DOE) is issuing this Record of Decision for the Stockpile Stewardship and Management Program, the program through which DOE carries out its statutory responsibility for the United States nuclear weapons program. This Record of Decision is based on the information and analysis contained in the Final Programmatic Environmental Impact Statement (PEIS) for Stockpile Stewardship and Management (DOE/EIS–0236) and other factors, including the mission responsibilities of the Department, and comments received on the Draft and Final PEIS. DOE's decisions will continue the ongoing Office of Defense Programs missions at eight DOE sites, making appropriate adjustments consistent with post-Cold War national security policies. Selected facilities for enhanced experimental capability will be constructed and operated; manufacturing capability at existing weapons industrial plants will be maintained; however, manufacturing capacity will be appropriately downsized; plutonium pit component manufacturing capability will be reestablished.

More specifically, for Stockpile Stewardship, the Department has

decided to: (1) Construct and operate the National Ignition Facility at the Lawrence Livermore National Laboratory; (2) construct and operate the Contained Firing Facility at the Lawrence Livermore National Laboratory; and (3) construct and operate the Atlas Facility at the Los Alamos National Laboratory. Additionally, the Department has decided to transfer a small amount of plutonium-242 material from the Savannah River Site to the Los Alamos National Laboratory to support stockpile stewardship activities.

With respect to Stockpile Management, the Department has decided to: (1) Downsize weapons assembly/disassembly capacity at the Pantex Plant; (2) downsize high explosive component fabrication capacity at the Pantex Plant; (3) downsize weapons secondary and case component fabrication capacity at the Y–12 Plant at the Oak Ridge Reservation; (4) downsize weapons nonnuclear component fabrication capacity at the Kansas City Plant; and (5) reestablish pit fabrication capability, with a small capacity, at the Los Alamos National Laboratory.

FOR FURTHER INFORMATION CONTACT: For further information on the Final Programmatic Environmental Impact Statement, or this Record of Decision, please call 800–776–2765, or write to: Jay Rose, Director, Reconfiguration Group, Office of Technical and Environmental Support, DP–45, United States Department of Energy, 1000 Independence Avenue SW, Washington, D.C. 20585.

The Stockpile Stewardship and Management Program maintains an Internet Home Page at http://web.fie.com/fedix/doeoor.html. This can also be accessed by modem by dialing toll-free (800) 783–3349 or (301) 258–0953 in the Washington, D.C. metropolitan area.

For information on the DOE's National Environmental Policy Act (NEPA) process, please contact: Carol M. Borgstrom, Director, Office of NEPA Policy and Assistance, EH–42, United States Department of Energy, 1000 Independence Ave. SW., Washington, D.C. 20585, (202) 586–4600 or leave a message at (800) 472–2756.

SUPPLEMENTARY INFORMATION:

Background

Since the inception of nuclear weapons in the 1940s, DOE and its predecessor agencies have been responsible for the stewardship and management of the nation's stockpile. Through the system of national laboratories and industrial facilities known collectively as the Nuclear Weapons Complex (Complex), DOE has provided the nation with nuclear weapons and ensured that those weapons remain safe and reliable. The Stockpile Stewardship and Management PEIS analyzes the potential consequences to human health and the environment if certain changes to the Complex are implemented to support DOE's Stockpile Stewardship and Management Program.

The term "stockpile stewardship" refers to core competencies in activities associated with research, design, development, and testing of nuclear weapons, and the assessment and certification of their safety and reliability under a Comprehensive Test Ban Treaty. Historically, these activities have been performed at the three DOE weapons laboratories (Los Alamos National Laboratory in New Mexico, Lawrence Livermore National Laboratory in California, and Sandia National Laboratories in New Mexico and California) and the Nevada Test Site. The term "stockpile management" refers to core competencies in activities associated with the production, maintenance, surveillance, and disassembly of the nuclear weapons in the stockpile. Historically, these activities have been performed at the DOE nuclear weapons industrial facilities (currently, the Y–12 Plant in Tennessee, the Kansas City Plant in Missouri, the Pantex Plant in Texas and the Savannah River Site in South Carolina).

In response to the end of the Cold War and changes in the world's political regimes, the emphasis of the United States nuclear weapons program has shifted dramatically from developing and producing new-design weapons to dismantlement and maintenance of a smaller enduring stockpile. In accordance with national security policy, including the terms of the Strategic Arms Reduction Talk (START) Treaties, the nuclear weapons stockpile is being significantly reduced. The United States is no longer producing new-design nuclear weapons, and DOE has closed or consolidated some of its former weapons industrial facilities. Additionally, in 1992, the United States declared a moratorium on underground nuclear testing. President Clinton extended this moratorium and decided, in August 1995, to pursue a "zero-yield" Comprehensive Test Ban Treaty that he signed in September 1996.

Even with these significant changes, however, DOE's responsibilities for the nuclear weapons stockpile continue. The President and Congress have directed DOE to maintain the core intellectual and technical competencies of the United States in nuclear weapons and to maintain the safety and reliability of the enduring nuclear weapons stockpile. In response to this direction, DOE has developed a science-based Stockpile Stewardship and Management Program to provide a single, highly integrated technical program for maintaining core competencies and ensuring the continued safety and reliability of the stockpile. The Stockpile Stewardship and Management Program has evolved from programs that served this mission over previous decades.

With no new-design nuclear weapons production, DOE expects existing weapons to remain in the stockpile well into the next century. This means that the weapons will age beyond original expectations. Because underground nuclear testing will no longer be available, alternative means must be developed in order to assess and certify the weapons' continued safety and reliability. To meet these new challenges, DOE's Stockpile Stewardship and Management Program has been developed to increase understanding of the basic phenomena associated with nuclear weapons, to provide better predictive understanding of the safety and reliability of weapons, and to ensure a strong scientific and technical basis for future United States nuclear weapons policy objectives.

DOE prepared this Record of Decision pursuant to the Council on Environmental Quality (CEQ) Regulations for implementing the procedural provisions of the National Environmental Policy Act (NEPA) (40 CFR Parts 1500–1508) and the Department of Energy regulations implementing NEPA (10 CFR Part 1021). In making this Record of Decision for the Stockpile Stewardship and Management Program, the Department considered the analysis from the Final Programmatic Environmental Impact Statement (PEIS) for the Stockpile Stewardship and Management Program (DOE/EIS–0236), issued in November 1996, along with other factors such as DOE statutory mission requirements, national security policy, cost, schedule, and technical risks. Additional technical descriptions and assessments of cost, schedule and technical risk are found in the Analysis of Stockpile Management Alternatives (DOE/AL, July 1996), the Stockpile Management Preferred Alternatives Report (DOE/AL, July 1996), and the Technology Basis and Site Comparison Evaluation for the National Ignition Facility (DOE/OAK, September 1996).

UMI
VOL
61
ISS

1996
UMI

In February 1996, DOE published the Draft PEIS for Stockpile Stewardship and Management, which evaluated the siting, construction, and operation of proposed stockpile stewardship facilities and the siting, construction, and operation of facilities proposed for stockpile management at eight alternative sites within the Complex. The 60-day public comment period for the Draft PEIS began on March 8, 1996, and ended on May 7, 1996.

During the comment period, public meetings were held in Los Alamos, Albuquerque and Santa Fe, New Mexico; North Las Vegas, Nevada; Oak Ridge, Tennessee; Kansas City, Missouri; Livermore, California; Washington, D.C.; Amarillo, Texas; and North Augusta, South Carolina. In response to requests from the public, five of the public meetings were joint meetings to obtain comments on both the Stockpile Stewardship and Management Draft PEIS and the Department's Storage and Disposition of Weapons-Usable Fissile Materials Draft PEIS, which were being prepared concurrently. Two of the joint meetings (Amarillo and North Augusta) also addressed issues associated with another EIS then in preparation, the Site-Wide Draft Environmental Impact Statement for the Continued Operation of the Pantex Plant and Associated Storage of Nuclear Weapon Components. In addition, the public was encouraged to provide comments via mail, fax, electronic bulletin board (Internet), and telephone (toll-free 800 number).

Volume IV of the Final PEIS, the Comment Response Document, describes the public comment process in detail, presents comment summaries and responses, and provides copies of all comments received.

The PEIS includes a classified appendix that provides additional information about weapons physics as it relates to the proposed actions for enhanced experimental capability, the stewardship need for plutonium-242 and its transfer to a weapons laboratory, and a number of the classified appendices to unclassified documents summarized or referenced in the PEIS. Applicable regulations provide that Environmental Impact Statements which address classified proposals may be restricted from public dissemination; consistent with the regulations, however, the Department has organized the PEIS so that classified information is segregated in order that the unclassified portions can be made available to the public [40 CFR 1507.3; 10 CFR 1021.340(a)].

For the National Ignition Facility, Contained Firing Facility, and the Atlas Facility, the PEIS included project specific environmental analyses (Appendices I, J and K of the PEIS) to address the detailed environmental impacts associated with siting, construction and operation. Based upon this Record of Decision, the Department intends to proceed with the construction and operation of these three facilities with no further National Environmental Policy Act reviews.

Proposed Actions

Broadly stated, all of the existing basic capabilities of the Complex continue to be required both technically and by national security policy objectives established by the President and Congress. The Stockpile Stewardship and Management PEIS concentrates on three major proposed actions that result from the national security policy constraints placed on the Program. The three major proposed actions are: (1) Providing enhanced experimental capability; (2) rightsizing the industrial base; and (3) reestablishing manufacturing capability and a small capacity for plutonium pit components (the pit is the central core of a nuclear weapon containing plutonium and/or highly enriched uranium that is surrounded by a layer of high explosive). Additionally, the Department considered the transfer of a small amount of plutonium-242 from the Savannah River Site to Los Alamos National Laboratory or Lawrence Livermore National Laboratory in support of stockpile stewardship activities.

1. Proposed Action (1)—Providing Enhanced Experimental Capability for Stockpile Stewardship

Historically, nuclear testing provided the Department with an unambiguous high confidence in the safety and reliability of weapons in the stockpile. As described in Chapters 2 and 3 of the PEIS, without underground nuclear testing, DOE must rely on experimental and computational capabilities, especially in weapons physics, to assess and predict the consequences of problems that may occur in an aging stockpile.

DOE concluded that other approaches to stockpile stewardship would not ensure nuclear weapon safety and reliability, and that such approaches are therefore not reasonable. In addition, DOE concluded that only the three facilities discussed below are sufficiently well understood that they could be proposed and evaluated in detail in the PEIS (see Section 3.1.2 of the PEIS, and the sections below entitled, "Next Generation Experimental Facilities for Stockpile Stewardship," and "Other Considerations.")

DOE has considered that there are differing opinions on the technical merit of DOE's proposed actions with regard to enhanced experimental capability. Nuclear weapons design information, including the complex physics of nuclear weapon explosions, is generally classified for reasons of national security and nonproliferation. Even if this information were unclassified, the physics problems remain extremely complex; hence, the reason why nuclear testing was so important to the past program. Both the classification of information and technical complexity of the issues form natural barriers to public communication. The technical complexity, alone, engenders significant debate among qualified experts, especially in the area of high energy density physics.

The PEIS attempts to explain the weapon physics issues in an unclassified, comprehensible manner regarding its relation to mission purpose and need (Chapter 2), proposed actions and alternatives (Section 3.3), and project-specific technical detail (Volume III). In the absence of nuclear testing, there are two basic alternatives: (1) Rely on existing facilities, as described by the No Action alternative, as sources of experimental data; and (2) pursue the enhanced capability of the proposed facilities to provide the sources of experimental data needed.

The nuclear weapons phenomena involved in enhanced experimental capability can be broadly grouped into three categories: (1) Physics of nuclear weapons primaries (the primary contains the main high explosive and the plutonium pit); (2) physics of nuclear weapons secondaries (the secondary contains highly enriched uranium, lithium deuteride and other materials to produce a thermonuclear explosion); and (3) weapons effects (the effects of radiation on nuclear weapons and military systems). Because there are no proposed actions in the PEIS for new facilities designed primarily for weapons effects testing, this issue is not discussed further in this Record of Decision. The physics of nuclear weapons primaries and secondaries are described below, as well as alternatives that are assessed in the PEIS. More detail on the physics of nuclear weapons can be found in Section 2.4.1, 3.3, and Appendices I and K of the PEIS.

1.A. Physics of Nuclear Weapons Primaries

With respect to the physics phenomena from the implosion of the primary, experimental facilities provide physics and computational model validation, material behavior information, improved understanding of the implosion and the ability to assess the effects of defects. Proposed new facilities and site alternatives considered, along with the existing facilities which are part of the No Action alternative, are discussed below.

1.A.1 Alternatives. 1.A.1.1 No Action. The principal diagnostic tools DOE currently uses to study initiation of nuclear weapons primaries are hydrodynamic tests and dynamic experiments (see Section 3.3 of the PEIS). Under the No Action alternative, DOE would continue to use the hydrodynamic and dynamic testing facilities currently available at Los Alamos National Laboratory (LANL), Lawrence Livermore National Laboratory (LLNL), and the Nevada Test Site (NTS), including the Dual-Axis Radiographic Hydrodynamic Test (DARHT) facility currently under construction at LANL (see Section 1.6.2 of the PEIS).

1.A.1.2 Action Alternative—Construct and Operate the Contained Firing Facility (CFF) at Lawrence Livermore National Laboratory (LLNL). Under this alternative, the capabilities of the CFF would be added to the existing facilities at LLNL used to study the physics of primaries. Specifically, the CFF would be an addition to the existing Flash X-Ray Facility (FXR) at LLNL Site 300, Building 801. The facility would provide an enclosed blast chamber to contain debris from high explosive experiments that support the stockpile stewardship program. The containment enclosure would reduce the environmental, safety, and health impacts of current outdoor testing. The enclosure would also improve the quality of diagnostics data derived from testing by better controlling experimental conditions. Because the CFF is an upgrade to an existing facility, sites other than Building 801, at LLNL, would have significant technical disadvantages, and were not evaluated in detail.

1.A.2 Comparison of Alternatives. 1.A.2.1 Cost and Technical Factors. The CFF addition to the existing FXR Facility would cost about $50 million to construct and take about two years to complete. The CFF would improve the quality of diagnostics data derived from testing. Improving diagnostic capability to understand weapon primary behavior is crucial to DOE's ability to continue to certify the safety and reliability of the stockpile in the absence of nuclear testing.

1.A.2.2 Environmental Factors. DOE prepared a Project Specific Analysis (Appendix J of the PEIS) to address the environmental impacts associated with construction and operation of the CFF. Because the proposal for the CFF involves modification to the existing FXR Facility, construction impacts would be negligible. Very little land would be disturbed (less than 1 acre) and the construction activities would largely involve internal modifications to the existing facility.

Impacts associated with operation would also be negligible. The CFF enclosure would reduce gaseous and particulate air emissions from explosives testing, reduce the generation of solid low-level radioactive waste, reduce testing noise, and improve the safety of testing by controlling fragment dispersion. The CFF would not utilize any significant quantities of natural resources, and would not cause any significant socioeconomic impacts at LLNL. LLNL has adequate existing waste management facilities to treat, store, and/or dispose of wastes that would be generated by the CFF. Impacts to human health from CFF operation are expected to be within regulatory limits, and extremely small.

1.A.3 Environmentally Preferable Alternative. The environmentally preferable alternative is to construct and operate the CFF as an addition to FXR, at LLNL. Although this alternative would require construction and additional land utilization, the impacts associated with the construction and operation of this facility are minor and offset by the environmental benefits of the CFF. The CFF would contain releases to the atmosphere from the conventional high explosive detonations presently being conducted uncontained at the FXR Facility, which would continue operation under the No Action alternative.

1.A.4 Decision. DOE's decision is to proceed with the construction and operation of the CFF at Site 300, Building 801, at LLNL. This action is consistent with existing operations at Site 300 and LLNL land-use plans and policies.

Mitigation. The mitigation measures appropriate to the CFF construction and operation will be formalized in a CFF Mitigation Action Plan. The plan will be issued by the DOE and monitored for compliance by its representatives during construction and operation of the CFF. Construction and operation of the CFF are not expected to incur environmental impacts other than those associated with a temporary construction lay-down area. Dust suppression and storm water runoff mitigation technologies will be applied to reduce these impacts to insignificance. A preconstruction survey monitoring for endangered species will be conducted no more than 60 days prior to construction start-up.

1.B. Physics of Nuclear Weapons Secondaries

The energy released by the fission of the nuclear weapons primary activates the secondary assembly, creating a thermonuclear (fusion) explosion. However, the physics of nuclear weapons secondaries deals with the interaction of many dynamic physics processes, including hydrodynamics, thermodynamics, fission, and fusion. Experimental facilities provide improved understanding of thermonuclear ignition, secondary physics and computational model validation, and material behavior information. These facilities will also be useful for investigating other physics phenomena related to the nuclear weapon primary and weapons effects (see Appendices I and K of the PEIS).

1.B.1 Alternatives. 1.B.1.1 No Action. The No Action alternative would limit DOE to the use of existing facilities. The principal facilities currently available are the Nova Facility at Lawrence Livermore National Laboratory (LLNL), and the Pegasus II Facility at Los Alamos National Laboratory (LANL).

1.B.1.2 Action Alternative—Construct and Operate the National Ignition Facility (NIF). Under this alternative, the capabilities of the NIF would add to the existing facilities used to study the physics of secondaries. The NIF would house the world's most powerful laser, focusing 192 laser beams onto a target containing isotopes of hydrogen. NIF experiments are designed to address, to various degrees, certain weapons issues connected with fusion ignition and boosting; weapon effects; radiation transport; and secondary implosion, ignition, and output. Most of these processes occur at very high energy density (i.e., at high temperatures and pressures) and are relevant to a weapon's performance. The NIF would achieve higher temperatures and pressures, albeit in a very small volume, than any other existing or proposed stockpile stewardship facility. The energy available to conduct experiments with the NIF would be about 50 times that available with Nova. Five alternative locations at four DOE sites were studied for the NIF: LLNL, LANL, NTS—Area 22 main site location

and North Las Vegas Facility (NLVF), and Sandia National Laboratories (SNL), New Mexico.

1.B.1.3 Action Alternative—Construct and Operate the Atlas Facility. Under this alternative, the Atlas Facility would be added to the existing facilities used to study the physics of secondaries. The Atlas Facility, a pulsed-power experimental facility that builds upon special equipment existing at LANL TA–35 (the technical area which contains the existing pulsed-power infrastructure), would provide the capability to create pressures and volumes necessary to accurately benchmark weapon-related computational predictions. The need to perform experiments with macroscopic pulsed-power targets, as well as with lasers, exists not only because of the limits of measurement diagnostics and improved ease of measurement at larger scale, but also because some of the physical phenomena that must be investigated cannot readily be scaled down to smaller sizes without affecting some parameters of importance. Existing facilities are not adequate to analyze some secondary physics issues.

1.B.2 *Comparison of Alternatives.* The capabilities that would be provided by the two proposed facilities, the NIF and the Atlas Facility, are independent components needed to improve the understanding of the physics of nuclear weapon secondaries. As explained in Section 3.3 and Appendices I and K of the PEIS, because each facility responds to a different need and provides different capabilities related to nuclear weapons secondaries, they are complementary proposals.

1.B.2.1 Cost and Technical Factors. National Ignition Facility. Total capital costs for construction of the NIF at LLNL would be approximately $1.1 billion. The capital and life-cycle comparative cost evaluation indicates the LLNL site will have the lowest capital and the lowest overall costs (by about 5%) of the alternative sites considered. Construction is anticipated to take about five years.

In regard to technical risk, LLNL has the most extensive experience in developing, designing, constructing, and operating high power, large-aperture, solid-state lasers and optical components. The extensive solid-state laser infrastructure, equipment, and facilities at LLNL exceed those of the alternative sites. LLNL has improved this infrastructure continuously as it has built a succession of highly sophisticated solid-state lasers. LLNL also has the most extensive surrounding high-technology infrastructure.

The Inertial Confinement Fusion Program (ICF) and the NIF have been supported by a succession of independent technical reviews conducted by the National Academy of Sciences (NAS), the Fusion Policy Advisory Committee (FPAC), the Inertial Confinement Fusion Advisory Committee (ICFAC), and the JASON Committee (a group of independent experts who evaluated the Science Based Stockpile Stewardship (SBSS) program). These reviews enabled the Department to plan the next reasonable steps to further the pursuit of ICF goals and to evaluate their relationship to SBSS. In September 1990, the NAS concluded that a solid state glass laser, as proposed for NIF, was the only driver capable of achieving ignition within a decade. Also in September 1990, as part of the Inertial Fusion Energy plan, the FPAC urged support for the ICF ignition facility, driven by a solid state glass laser as recommended by the NAS, as the most important next step in the investigation of inertial fusion energy's potential. In May 1994, the ICFAC stated that they believed that the ICF research and development program has a key role to play in "science-based stewardship." They continued by saying that an essential ingredient in this role will be the achievement of ignition of a fusion capsule in the laboratory. In February 1996, their final report concludes that good progress in target physics continues and that DOE should proceed with the next step in the NIF project. In November 1994, the JASON Committee strongly endorsed the NIF, calling it "the most scientifically valuable of the programs proposed for SBSS." They did not identify any other technologies that could provide the technical capabilities of the NIF. In March 1996, the JASON Committee reiterated their previous comment about the NIF and further concluded, "that the present ICF Program does make an important contribution to SBSS, and that the NIF will substantially increase this contribution * * *" The committee recommended proceeding with the NIF.

Atlas Facility. Capital costs to build the Atlas Facility are estimated to be about $43 million. Construction will take about four years. Because LANL has more extensive expertise in microsecond pulsed-power than any other DOE site, and because the Atlas Facility would utilize the extensive existing infrastructure and special equipment available at LANL, no other DOE sites were considered for the Atlas Facility. Proceeding with the construction of the Atlas Facility is also consistent with the November 1994 JASON Committee review mentioned above.

1.B.2.2 Environmental Factors. National Ignition Facility. DOE prepared a Project Specific Analysis (Appendix I of the PEIS) to address the environmental impacts associated with construction and operation of the NIF. Potential environmental impacts were assessed for the No Action alternative and two design capabilities (i.e., Conceptual Design and Enhanced Design options) at all five candidate locations.

The analysis indicates that there would be few differences in the environmental impacts between the candidate sites and little environmental impact in any case. The maximum daily particulate matter concentration in the air during site clearing would exceed applicable air quality standards for suspended particles less than 10 microns in diameter (PM10) at LLNL and the North Las Vegas Facility (NLVF). However, the ambient air quality impacts would be localized and of short duration. Land requirements would be greatest at NTS (45.0 acres), although this acreage is less that 1 percent of the uncommitted land at NTS. Conversely, the least amount of uncommitted land that would be required for NIF would be 7.9 acres at the NLVF. However, this acreage represents the largest percentage of uncommitted land at a candidate site (56 percent). Of greater significance would be the quality of the habitat of the uncommitted land that would be affected by NIF construction. The highest quality habitats that would be affected are forest (9.9 acres) at LANL or desert (45 acres) at NTS. At the other candidate sites, habitat disturbance would occur to previously disturbed grassland (LLNL and SNL) or to an area of sparse vegetation (NLVF). The risk to the public from a facility accident involving the release of radioactive material would be greatest at NLVF and SNL, although the potential for the actual occurrence of such an accident would be extremely low.

Atlas Facility. DOE prepared a Project Specific Analysis (Appendix K of the PEIS) to address the environmental impacts associated with construction and operation of the Atlas Facility. Because the proposal for the Atlas Facility involves modification to the existing facilities within LANL's TA–35, construction impacts are expected to be small. Very little land (0.1 acre) would be disturbed and the construction activities would largely involve internal modifications to existing facilities.

Impacts associated with operations would also be negligible. The Atlas

Facility would not utilize any significant quantities of natural resources, would not cause any significant socioeconomic changes at LANL, and would not generate significant quantities of wastes. LANL has adequate existing waste management facilities to treat, store, and dispose of wastes that would be generated by the Atlas Facility. Impacts to human health from Atlas Facility operations are expected to be small and within regulatory limits.

1.B.3 Environmentally Preferable Alternative. National Ignition Facility. The environmentally preferable alternative is the No Action alternative. However, in the absence of underground nuclear testing, it is the Department's technical judgment that its ability to carry out its statutory mission responsibilities would be impaired without the capabilities that would be provided by the NIF. For this reason, the No Action alternative with regard to the NIF is not reasonable.

Based on the PEIS analysis of the action alternatives, siting the NIF at LLNL would have low or no adverse environmental impacts for most environmental resource categories (land use, air quality and noise, water biota, cultural, paleontologic, socioeconomic, human health, and waste management) and would have the highest beneficial socioeconomic impacts, compared to other site alternatives. After balancing the overall potential environmental impacts at the other candidate sites against LLNL, DOE concluded that none of the alternative candidate sites is environmentally preferable to LLNL for the NIF.

Atlas Facility. The environmentally preferable alternative is the No Action alternative. However, in the absence of underground nuclear testing, it is the Department's technical judgment that its ability to carry out its statutory mission responsibilities would be impaired without the capabilities that would be provided by the Atlas Facility. For this reason, the No Action alternative with regard to the Atlas Facility is not reasonable.

Because the Atlas Facility would rely upon existing facilities and special equipment already located at LANL, no additional site alternatives were analyzed. As discussed above, the single action alternative, to construct and operate the Atlas Facility at LANL TA–35, would result in negligible environmental impact.

1.B.4 Decision. National Ignition Facility. DOE's decision is to proceed with the construction and operation of the NIF (enhanced design option) at LLNL. Without the improved experimental capabilities offered by the NIF, DOE would lack the ability to evaluate significant weapon performance issues, which could adversely affect confidence in the nation's nuclear deterrent. Among the alternatives determined to be reasonable, construction and operation of the NIF at LLNL is environmentally preferable, the least cost and, due to LLNL's existing infrastructure for laser technology, the least technical risk.

Mitigation. The NIF mitigation measures appropriate to the LLNL site as identified in the PEIS (Appendix I, Paragraph I.4.7), will be formalized in a NIF Mitigation Action Plan. The plan will be issued by the DOE and monitored for compliance by its representatives during construction of the NIF. Mitigation measures appropriate to NIF operations will be incorporated in operating plans and procedures. A brief summary of the mitigation actions that will be taken follows.

Construction materials will be stored in temporary laydown areas. When construction is complete, a Reclamation Plan will be developed and actions taken to restore the construction material laydown areas to their original condition. To assure that the public is aware of the NIF construction activities the public will be informed, through the local news media, that elevated noise levels will occur for several months during construction of the NIF. Visual monitoring will be done to determine the effectiveness of conventional water-spraying dust control measures to assure that air quality standards are not exceeded. A Storm Water Pollution Prevention Plan will be developed and a Storm Water Permit will be obtained from the San Francisco Bay Region Water Quality Control Board for storm water discharges during construction. No more than 60 days before the start of construction, a special status species survey will be conducted for protected and sensitive biological resources within the NIF site and laydown areas, and mitigation actions taken as necessary. Exclusion or buffer zones will be established to avoid any sensitive locations. Appropriate mitigation measures will be implemented to avoid or minimize potential adverse impacts to protected and sensitive resources, such as state and federally-listed threatened and endangered species. Construction crews will be informed of any environmental concerns that exist and requested to avoid sensitive areas. An alternative construction entrance will be utilized to prevent traffic congestion during major construction activities such as major concrete pours.

For external combustion boilers, a permit will be obtained from the San Francisco Bay Area Air Quality Management District to comply with local area air quality standards. Hazardous materials will be inventoried and moved out of the area during flood conditions during NIF construction and operation. A Facility Safety Plan and Construction Safety Plan will be developed that will identify safety requirements for construction and operation of the NIF. A Waste Minimization Plan will be developed for the operational phase to evaluate the potential net reduction of hazardous, radioactive, and mixed waste streams. Other mitigation measures, identified in Sections I.4.7.2.4 and I.4.7.2.5 of Volume III of the PEIS, will be implemented to the extent practicable.

Atlas Facility. DOE's decision is to proceed with the construction and operation of the Atlas Facility at LANL's TA–35. Without improved experimental capabilities offered by the Atlas Facility, DOE would lack the ability to evaluate significant weapon performance issues, which could adversely affect confidence in the nation's nuclear deterrent. Among the alternatives determined to be reasonable, construction and operation of the Atlas Facility is environmentally preferable, the least cost, and the least technical risk.

Mitigation. The mitigation measures appropriate to the Atlas Facility construction and operation will be formalized in an Atlas Facility Mitigation Action Plan. The plan will be issued by the DOE and monitored for compliance by its representatives during construction and operation of the Atlas facility. There is a potential for public exposure to nonstatic magnetic fields from the Atlas Facility for short periods when operated. Monitoring at various locations around the Atlas Facility will be conducted to insure fields greater than 1 Gauss (a measure of electromagnetism) do not cause adverse impacts. Warning signs and other administrative controls, such as road closures, will be put in place prior to the operation of the Atlas Facility, as necessary.

1.C. Next Generation Experimental Facilities for Stockpile Stewardship

Related to the proposed actions for enhanced experimental facilities is the issue of next generation experimental facilities. In commenting on the Draft PEIS, some commentors suggested that potential next generation experimental facilities be analyzed as part of the proposed action. The Final PEIS

includes a discussion of potential next generation experimental facilities and the reasons why they are not proposed actions or alternatives (Section 3.3.4). These facilities, while contemplated on the basis of anticipated technical need, have not reached the stage of design maturity through research and development for DOE to include a decisionmaking analysis at this time.

However, the PEIS does describe, in general terms or by reference, what is known today about their potential environmental impacts. The environmental impacts from these facilities as contemplated today would not be significantly different from existing "similar" facilities. By characterizing the potential impacts in this way, the decisionmaker was aware of the potential program-level cumulative impacts of the next generation facilities when deciding whether to pursue a program of enhanced experimental capability. If DOE were to propose to construct and operate such next generation facilities in the future, appropriate NEPA review would be performed.

1.D. Transport and Storage of Plutonium-242

As a result of the Record of Decision for the Interim Management of Nuclear Materials at the Savannah River Site EIS (DOE/EIS–0220), existing plutonium-242 in nitrate solutions at H-Canyon at SRS will be stabilized by conversion to plutonium oxide in the HB-line. The plutonium-242 oxide would then be stored. The PEIS evaluates the need for plutonium-242 for stockpile stewardship activities and transport and storage of this material.

1.D.1 Alternatives. 1.D.1.1 No Action. Under the No Action alternative, the plutonium-242 material would remain at SRS and be stored in existing facilities at either the FB-Line or Building 235F.

1.D.1.2 Action Alternative 1—Store Plutonium-242 at the Los Alamos National Laboratory (LANL). Under this alternative, the plutonium-242 would be transported to LANL and stored in an existing plutonium facility.

1.D.1.3 Action Alternative 2—Store Plutonium-242 at the Lawrence Livermore National Laboratory (LLNL). Under this alternative, the plutonium-242 would be transported to LLNL and stored in Building 332.

1.D.2 Comparison of Alternatives. 1.D.2.1 Cost and Technical Factors. Transporting the plutonium-242 material would only require a fraction of one Safe, Secure Trailer shipment, and the costs are not significant. Because there is existing storage capacity at all three sites, the storage costs are comparable and not significant.

The programmatic need for shipment of this material is contained in a classified appendix to the Final PEIS. If the plutonium-242 material were not transported to LANL or LLNL, it could not be used for stockpile stewardship purposes.

1.D.2.2 Environmental Factors. The small quantity of plutonium-242 material is within the quantities of materials historically stored at all three sites. Regardless of the storage location for this material, there would be negligible environmental impacts. A high-bounding case analysis of the risk from the transport of this material (see Section 4.19 of the PEIS) indicates low risk for either LANL or LLNL.

1.D.3 Environmentally Preferable Alternative. For plutonium storage, the No Action alternative is the environmentally preferable alternative because there would be no potential impacts associated with transportation. However, the No Action alternative would not enable the plutonium-242 material to be used as needed for stockpile stewardship purposes, and is, therefore, not considered reasonable. For the action alternatives, storage at LANL is the environmentally preferable alternative because there is slightly less risk associated with transportation from SRS (due to the shorter distance from SRS).

1.D.4 Decision. DOE's decision is to transport the plutonium-242 material to LANL and store this material in an existing plutonium facility. LANL currently performs most of the plutonium activities for the Stockpile Stewardship and Management Program and has the necessary facilities for storing this material. LLNL, although a reasonable alternative, is currently reducing its inventory of plutonium.

2. Proposed Action (2)—Rightsizing the Industrial Base

With a reduced nuclear weapons stockpile, the capacity to manufacture nuclear weapons components and assemble or disassemble nuclear weapons can be reduced. For each required mission capability, the Department evaluated a No Action alternative, a downsize-in-place alternative, and an alternative that would transfer the mission to a weapons laboratory or to the Nevada Test Site (NTS). For pit component fabrication (a capability which no longer exists due to the closure of the Rocky Flats Plant in 1992), the Department evaluated reestablishing this capability, with an attendant small capacity, at Los Alamos National Laboratory (LANL) or the Savannah River Site (SRS), in addition to the No Action alternative (see Proposed Action 3).

2.A. Weapons Assembly/Disassembly

Weapons assembly/disassembly provides the capability to disassemble (dismantle) retired weapons, assemble nuclear and nonnuclear components into nuclear weapons, and perform weapons surveillance. In addition, this mission includes the capability to conduct nonintrusive modification pit reuse (external modifications to the pit) at the weapons assembly/disassembly facility. This mission also includes an option to store strategic reserves of nuclear components (pits and secondaries).

2.A.1 Alternatives. 2.A.1.1 No Action. Under the No Action alternative, this mission would continue at Pantex in current facilities, but Pantex would not develop the capability to perform nonintrusive modification pit reuse. Currently, nonintrusive modification pit reuse can only be performed at the plutonium research and development (R&D) facilities at LANL and LLNL.

2.A.1.2 Action Alternative 1—Downsize the Pantex Plant. This alternative would downsize and consolidate assembly/disassembly facilities and operations. Downsizing of the assembly/disassembly operation at Pantex would consist of an in-place decrease in facility footprint and relocation into modern existing facilities, mostly within Zone 12. No new construction would be required at Pantex; however, relocation and reinstallation of equipment would be required. The capabilities for nonintrusive modification pit reuse would be established in existing facilities within Zone 12. These facilities would also have the capability to support pit recertification and requalification operations.

2.A.1.3 Action Alternative 2—Relocate to the Nevada Test Site (NTS). This alternative is based on the use of the existing Device Assembly Facility and other plant infrastructure available at the NTS site that is required to maintain the capability for underground nuclear testing and experimentation. Because the Device Assembly Facility is not large enough to meet assembly/disassembly mission requirements, new construction would be required.

2.A.2 Comparison of Alternatives. 2.A.2.1 Cost and Technical Factors. Downsizing the Pantex Plant is the lower cost action alternative. Significant capital construction (about $250 million in 1995 dollars) would be required if the mission were relocated to NTS.

VOL 61 ISS 249 DE 26 1996 UMI

Downsizing Pantex presents less technical risk than relocation to NTS because of the need to relocate and requalify processes at NTS, the uncertainty in availability of key personnel, and the one year gap in operations that would be necessary while the transition occurred.

2.A.2.2 Environmental Factors. Downsizing the Pantex Plant would have a net positive effect on environmental impacts compared to the No Action alternative. No land would be disturbed, groundwater withdrawals would be reduced, and accident risks would also be less than the No Action alternative because of the consolidation of the facility footprint (smaller area) into Zone 12. Socioeconomic impacts at Pantex would result because of reductions in workload that will occur when the current weapons dismantlement backlog is eliminated in about three years. The additional socioeconomic impacts due to facility downsizing after this dismantlement is complete are relatively small.

Transferring the assembly/disassembly mission to NTS would entail upgrading and expanding the Device Assembly Facility. It is estimated that 18.5 additional acres would be disturbed. Although cultural and biotic resources are not expected to be impacted, the presence of a federally listed endangered species (the desert tortoise) at NTS would require a site survey to determine the potential for impacts. Water requirements to support the assembly/disassembly mission at NTS would amount to about 4 percent more than normal projected usage. Transferring the assembly/disassembly mission to NTS would create positive socioeconomic impacts at NTS, and significant negative socioeconomic impacts at Pantex.

Risks to worker health would be essentially the same at either location. Worker exposure to radiation is expected to be about equal for the NTS and the downsizing of Pantex alternatives. Radiation exposure to members of the public from normal operation would be well within regulatory limits at both sites. Although the remoteness of the NTS site yields a lower potential accident risk, the risk to the public from an accident at Pantex is very low. Relocation to NTS would also eliminate the risk associated with the transport of low level waste from Pantex to the NTS for disposal. These transportation risks, however, are very low.

2.A.3 Environmentally Preferable Alternative. The environmentally preferable alternative is to downsize existing capabilities at Pantex. No land would be disturbed, groundwater withdrawals would be reduced compared to usage under the No Action alternative, and accident risks would also be less than under the No Action alternative because of the consolidation of the facility footprint into Zone 12.

2.A.4 Decision. DOE's decision is to downsize the existing assembly/disassembly facilities presently located at the Pantex Plant. This is the environmentally preferable alternative, it exhibits the least technical risk, and is also the least-cost alternative.

2.B. High Explosives Fabrication

The high explosives fabrication mission includes capabilities required for manufacturing process development, formulation, synthesis, main charge manufacturing and energetic component manufacture. The high explosives fabrication mission also supports some high explosives surveillance and some stockpile stewardship activities.

2.B.1 Alternatives. 2.B.1.1 No Action. Under No Action, Pantex would continue fabrication and surveillance of high explosives components for nuclear weapons. Los Alamos National Laboratory (LANL) and Lawrence Livermore National Laboratory (LLNL) would continue to perform weapon high explosives research and development, some surveillance, and high explosives safety studies.

2.B.1.2 Action Alternative 1—Downsize at the Pantex Plant. This alternative would downsize and consolidate current high explosives operations and facilities at the Pantex Plant. Only minor modifications to existing facilities within Zones 11 and 12 would be required. This alternative would be considered only in conjunction with maintaining the weapons assembly/disassembly mission at Pantex.

2.B.1.3 Action Alternative 2—Relocate to the Los Alamos National Laboratory (LANL). This alternative would transfer high explosives operations from Pantex to LANL. This alternative would use existing LANL research and development facilities, which have sufficient capacity for high explosives requirements. There would be no new building construction and no significant modifications required.

2.B.1.4 Action Alternative 3—Relocate to the Lawrence Livermore National Laboratory (LLNL). This alternative would transfer high explosives operations from Pantex to LLNL, and would use existing LLNL research and development facilities. It would also require construction of one new facility for storage of high explosives at Site 300.

2.B.1.5 Action Alternative 4—Relocate to both the Los Alamos National Laboratory and the Lawrence Livermore National Laboratory. This option would involve splitting the high explosives mission between the two laboratories to protect core competencies at both. Since its impact is bounded by the previous two options, this option was not analyzed further in the PEIS.

2.B.2 Comparison of Alternatives. 2.B.2.1 Cost and Technical Factors. The costs to perform the high explosives mission are not large, and are comparable for all site alternatives. The current high explosives fabrication mission at Pantex costs about $17 million per year. The future high explosives fabrication mission will be relatively small, costing $2–3 million per year (assuming the selected site has other missions to absorb site overhead).

Since the U.S. does not have plans to develop new-design weapons, there is a concern that the laboratories will lose their core competencies in the area of high explosives technology. However, these competencies can be retained through greater teaming and integration of plant and laboratory capabilities and activities. This approach would attempt to protect core competence at the weapons laboratories in high explosives technology while retaining the overall fabrication mission at Pantex, the site with historical production experience.

2.B.2.2 Environmental Factors. Environmental impacts from facility modification and operation are comparable for all alternatives, and are less than current operations. However, relocation of the high explosives fabrication mission to LANL or LLNL would result in minor additional environmental impacts due to the increased level of operations at those sites compared to the No Action alternative, and the small construction required at LLNL (less than 2.5 acres). Socioeconomic impacts are relatively small for all alternatives. There are no radiological risks to workers or the public associated with the high explosives fabrication mission. Risks to neighboring populations from credible facility accidents would be small for all alternatives.

2.B.3 Environmentally Preferable Alternative. For high explosives fabrication, the environmentally preferable alternative is to downsize existing capabilities at the Pantex Plant. Environmental impacts under this alternative would be lower than under the No Action alternative.

2.B.4 Decision. DOE's decision is to downsize the existing high explosives fabrication facilities at the Pantex Plant.

This is the environmentally preferable alternative, the least-cost alternative and, when coupled with greater teaming and integration of plant and laboratory capabilities, has low technical risk. This decision is also consistent with Section 3140 of the National Defense Authorization Act for Fiscal Year 1997 (Pub. L. 104–201), which requires that the high explosives fabrication mission be performed at Pantex.

2.C. Secondary and Case Fabrication

The secondary and case fabrication mission includes activities to support fabrication, surveillance and inspection of secondaries and components. Functional capabilities for these services include operations to physically and chemically process, machine, inspect, assemble, and disassemble secondary and case materials. Materials include depleted uranium, enriched uranium, uranium alloys, isotopically enriched lithium hydride and lithium deuteride, and other materials.

2.C.1 Alternatives. 2.C.1.1 No Action. Under the No Action alternative, DOE would continue secondary and case fabrication at the Y–12 Plant at Oak Ridge. The Y–12 Plant would maintain the capability to produce and assemble secondaries, cases, and related nonnuclear weapon components.

2.C.1.2 Action Alternative 1—Downsize the Y–12 Plant at Oak Ridge. This alternative would downsize the existing secondary and case fabrication facilities at the Y–12 Plant at Oak Ridge. The downsized facilities would only require approximately 14 percent of the existing Y–12 Plant floor space, and no new facility construction would be needed to support the secondary and case fabrication mission. Modifications to the existing buildings would be required, both to implement the downsized mission and to upgrade the buildings to meet natural phenomena requirements (e.g., seismic events).

2.C.1.3 Action Alternative 2—Relocate to the Los Alamos National Laboratory (LANL). This alternative would transfer the secondary and case fabrication operations to 11 existing buildings at LANL using manufacturing processes proven at the Y–12 Plant. The secondary and case fabrication facilities at LLNL would principally involve modifications to six buildings.

2.C.2 Comparison of Alternatives. 2.C.2.1 Cost and Technical Factors. Downsizing the Y–12 Plant at Oak Ridge is the least-cost alternative because of significant facility modification costs (about $130 million at LANL and about $185 million at LLNL, both in 1995 dollars) that would be required if the mission were relocated. Downsizing the Y–12 Plant also presents less technical risk than relocation to the other sites because a production infrastructure for secondaries and cases currently exists at the Y–12 Plant and processes would not need to be relocated and requalified. In addition, downsizing the Y–12 Plant provides greater program flexibility by allowing some additional capacity to be maintained in a standby mode at minimal cost.

2.C.2.2 Environmental Factors. Downsizing the Y–12 Plant would not impact land, cultural or biotic resources. Downsizing would improve the efficiency of operations and significantly reduce natural resource requirements. Negative socioeconomic impacts associated with downsizing would be somewhat mitigated by positive socioeconomic impacts associated with the decontamination and decommissioning of facilities no longer required.

Transferring the secondary and case fabrication mission to either LANL or LLNL would have small positive socioeconomic impacts at those sites and a large negative socioeconomic impact at Oak Ridge due to the phaseout of this mission. For the relocation to LLNL alternative, a small area of land (less than one acre) would be disturbed, but impacts to cultural and biotic resources are not expected. Transfer of the secondary and case fabrication mission from Oak Ridge would entail small, one time impacts associated with moving the strategic reserve of highly enriched uranium to a new location.

Radiation exposure to workers is expected to be about equal for all three action alternatives and well within regulatory limits. Potential radiological impacts from accidents were determined to be about equal for Oak Ridge and LANL, and slightly higher for LLNL due to its closer proximity to populated areas.

2.C.3 Environmentally Preferable Alternative. For secondary and case manufacturing, the environmentally preferable alternative is to downsize the Y–12 Plant at Oak Ridge. Downsizing the Y–12 Plant would not impact land, cultural, or biotic resources. Downsizing would improve the efficiency of operations and significantly reduce natural resource requirements compared to the No Action alternative.

2.C.4 Decision. DOE's decision is to downsize the existing secondary and case fabrication facilities located at the Y–12 Plant at Oak Ridge. This is the environmentally preferable alternative, has the least technical risk, and is the least-cost alternative.

2.D. Nonnuclear Fabrication

Nonnuclear fabrication consists of the fabrication of electrical, electronic, electro-mechanical, and mechanical components (plastics, metals, composites), the assembly of arming, fuzing, and firing systems, and surveillance inspection and testing of nonnuclear components.

2.D.1 Alternatives. 2.D.1.1 No Action. The No Action alternative would maintain these activities at their present location at the Kansas City Plant (KCP), Sandia National Laboratories (SNL), and Los Alamos National Laboratory (LANL). KCP manufactures nonnuclear weapon components and conducts surveillance testing on them. SNL conducts system engineering of nuclear weapons, designs and develops nonnuclear components, conducts field and laboratory nonnuclear testing, manufactures some nonnuclear weapons components, and provides safety and reliability assessments of the stockpile. LANL also manufactures a few nonnuclear weapons components and conducts surveillance on certain nonnuclear weapons components.

2.D.1.2 Action Alternative 1—Downsize the Kansas City Plant (KCP). The downsized nonnuclear fabrication alternative consists of three major factory segments designed around electronics, mechanical, and engineered materials product lines, procuring some components from outside sources, and reducing the KCP facility area. This alternative consists of downsizing and consolidating existing facilities and would require facility modification but no new construction.

2.D.1.3 Action Alternative 2—Relocate to the Los Alamos National Laboratory (LANL), Lawrence Livermore National Laboratory (LLNL), and Sandia National Laboratories (SNL). This alternative would use the existing expertise, capability, and infrastructure at LANL, LLNL, and SNL to satisfy fabrication requirements for nonnuclear components. This alternative would transfer the majority of current KCP missions to SNL, except for nuclear system plastic components, which would go either to LANL or LLNL, and high energy detonator inert components,

which would go to LANL. In addition, there is an option of moving the reservoir mission to either SNL or LANL. This alternative would require construction of a new stand-alone production site at SNL, consisting of six new buildings and renovations or minor modifications to some existing buildings.

2.D.2 Comparison of Alternatives. 2.D.2.1 Cost and Technical Factors. Because of significant facility construction or modification costs to relocate the mission (about $235 million in 1995 dollars), downsizing the KCP is the least-cost alternative. Downsizing KCP also presents significantly less technical risk than relocation to the other sites, because a production infrastructure for nonnuclear components currently exists and processes would not need to be relocated and requalified.

2.D.2.2 Environmental Comparison. For the alternative that would downsize KCP, the construction activities would involve internal modifications to the existing facility. No land would be disturbed. For the alternative that would transfer the KCP mission to the laboratories, construction impacts would involve internal facility modifications at LANL and LLNL. At SNL, approximately 22 acres of land would be disturbed to construct new facilities. This represents 6 percent of the undisturbed land at SNL. Potential impacts to cultural and biotic resources could occur.

There are minimal air impacts for both alternatives. Water requirements for a downsized facility at KCP would be reduced 31 percent compared to No Action. For the alternative that would transfer the mission to the laboratories, groundwater use would increase by less than 1 percent over No Action usage at LANL and LLNL, but would increase by 64 percent over No Action usage at SNL. This would still represent only 29 percent of the groundwater rights and thus, no adverse impacts are expected. Transferring the nonnuclear mission to the laboratories would have small positive socioeconomic impacts at those sites, and a large negative socioeconomic impact at KCP due to the phaseout of this mission.

There are no radiological risks to workers or the public associated with the nonnuclear fabrication mission, and there are no significant adverse impacts associated with normal operations. Accident profiles at the sites would not change as a result of downsizing at KCP or transferring the nonnuclear fabrication mission to the laboratories. Risks to neighboring populations from credible facility accidents would be small for all alternatives. All three sites have adequate existing waste management facilities to treat, store, and dispose of wastes that would be generated by this mission.

2.D.3 Environmentally Preferable Alternative. The environmentally preferable alternative is to downsize existing facilities at the KCP. The relocation of this mission to SNL, LANL or LLNL would entail additional environmental impacts associated with the construction and operation of new facilities.

2.D.4 Decision. DOE's decision is to downsize the existing facilities at the KCP. This is the environmentally preferable alternative, it exhibits the least technical risk, and is also the least-cost alternative.

3. Proposed Action (3)—Reestablishing Manufacturing Capability and Capacity for Pit Components

This capability, hereafter referred to as pit fabrication, includes all activities necessary to fabricate new pits, to modify the internal features of existing pits (intrusive modification), and to recertify or requalify pits.

3.A.1 Alternatives. 3.A.1.1 No Action. Under the No Action alternative, DOE would continue to use existing capabilities at the Los Alamos National Laboratory (LANL) and the Lawrence Livermore National Laboratory (LLNL). LANL maintains a limited capability to fabricate plutonium components using its plutonium research and development facility, and performs surveillance to provide safety and reliability assessments of the stockpile. In addition, less extensive capabilities would continue at LLNL to support material and process technology development.

3.A.1.2 Action Alternative 1—Reestablish Capability at the Los Alamos National Laboratory (LANL). This alternative would reconfigure the plutonium facility at LANL to fulfill the pit fabrication mission. This alternative would locate pit manufacturing in existing facilities. Existing equipment would be retained as much as possible, but some equipment would need to be upgraded.

3.A.1.3 Action Alternative 2—Reestablish Capability at the Savannah River Site (SRS). This alternative would establish a pit fabrication facility at SRS within existing facilities, but with new equipment and systems. Facilities are available at the SRS, in F-Area and H-Area, which could house all the process functions required for the manufacture of plutonium pits. New equipment and systems would be required for the pit fabrication facility.

3.A.2 Comparison of Alternatives. 3.A.2.1 Cost and Technical Factors Technical risk associated with each alternative was assessed by comparing the relative experience of each site in the pertinent production capability areas. No pits are currently being produced for the nuclear weapon stockpile, and neither site has done so in the recent past. However, LANL has recently provided pits for nuclear explosive testing, and is currently producing plutonium-238 heat sources for National Aeronautics and Space Administration (NASA) programs. Also, LANL continues to perform pit surveillance and technology development activities directly related to the required capabilities for pit fabrication.

SRS is currently processing and shipping plutonium-238 to LANL to support fabrication of NASA heat sources. Although SRS has a health, safety, and security infrastructure for plutonium operations, the historical mission for the site was separation and production of plutonium metal for shipment to other sites for weapons program use. Consequently, SRS has no experience with the kinds of capabilities required for precision nuclear component manufacturing and the ancillary supporting functions.

The required workload for the fabrication of new replacement pits is small. DOE foresees only the replacement of pits destroyed in routine surveillance testing unless a near-term, life-limiting phenomenon is discovered in stockpile pits. Historical pit surveillance data and pit life studies do not predict a near-term problem. However, data are limited for weapons older than 25 years, and for the youngest weapons in the stockpile.

The technological capability to manufacture all of the pit designs in the enduring stockpile provides an inherent capacity to manufacture about 50 pits per year in single shift operations. During weapon refurbishment to replace other components, DOE expects most pits to be requalified and reused. About 20 pits per year are expected to be required to replace pits destroyed in routine surveillance testing. A capacity of about 50 pits per year is, therefore, judged to be sufficient for the next 10 or more years.

The construction costs for providing such a limited pit fabrication capacity are less at LANL (about $310 million in 1995 dollars) than at SRS (about $490 million in 1995 dollars). This is largely because the capability would be additive to existing capabilities at LANL

VOL 61 ISS 249 DE 26 1996 UMI

while a completely new stand-alone capability would be required at SRS. Both estimates include the costs of planned refurbishment of the LANL plutonium facility for its ongoing pit surveillance and stockpile stewardship missions. In addition, annual operating costs would be considerably less at LANL (about $30 million versus $60 million at SRS) because the mission would be additive to other existing missions and would not have to carry all facility overhead costs.

The technical risk at LANL would be less, due to the existing experience base for stockpile stewardship and pit surveillance missions. The LANL capability would also be in place at least two years earlier than the SRS alternative.

In reestablishing plutonium pit fabrication capability, DOE considered establishing a larger fabrication capacity more in line with the capacity planned for other manufacturing functions. Larger capacity was rejected, however, because of the small current demand for the fabrication of replacement pits, and the significant, but currently undefined, time period before additional capacity may be needed.

3.A.2.2 Environmental Factors—Upgrades to existing facilities would be required for each alternative, and no new land would be disturbed. During operations, both alternatives would utilize similar facilities, procedures, and natural resources. Therefore, both alternatives would result in similar operational environmental impacts for most natural resource areas. Impacts to air quality would be minimal and well within established standards. At SRS, water requirements would be provided from surface water, which is plentiful, and no adverse impacts would be expected. At LANL, groundwater would be used. Water requirements for this mission, which would be less than 1 percent of projected No Action usage, could be adequately met without exceeding the groundwater allotment at LANL.

Socioeconomic impacts are comparable for either alternative, although SRS would require more additional new workers. Worker exposure to radiation would be larger at SRS due to the larger added workforce, but within regulatory limits for both alternatives. Both sites have adequate existing waste management facilities to treat, store, and dispose of wastes that would be generated by the pit fabrication mission. Risks to neighboring populations from normal operations or credible facility accidents would be small for both alternatives.

3.A.3 Environmentally Preferable Alternative. For pit manufacturing, the No Action alternative is the environmentally preferable alternative. Under the No Action alternative, no new construction would be required, and the Department would continue with the existing pit research and development capability at LANL and LLNL. However, DOE would not have the capability to replace the pit component in stockpile weapons if necessary, nor protect against stockpile attrition through surveillance testing. Thus, No Action is not a reasonable alternative.

Of the two action alternatives, which would reestablish pit manufacturing capabilities at either LANL or SRS, LANL is the environmentally preferable alternative. Although overall environmental impacts are projected to be similar between the two sites, LANL was judged to be preferable due to the fact that the radiological risks to workers during normal operations are projected to be less than at SRS.

3.A.4 Decision. DOE's decision is to reestablish the pit fabrication capability, at a small capacity, at LANL. This is the environmentally preferable alternative, it exhibits the least technical risk, and is also the least-cost alternative. This decision limits the plutonium fabrication facility plans to a facility sized to meet expected programmatic requirements over the next ten or more years. It is not sized to have sufficient capacity to remanufacture new plutonium pits at the same production rate as that of their original manufacture. DOE will perform development and demonstration work at its operating plutonium facilities over the next several years to study alternative facility concepts for larger capacity. Environmental analysis of this larger capacity has not been performed at this time because of the uncertainty in the need for such capacity and the uncertainty in the facility technology that would be utilized. Should a larger pit fabrication capacity be required in the future, appropriate environmental and siting analysis would be performed at that time.

Mitigation. Specific mitigation measures are not addressed for the stockpile management decisions of this ROD, although many potential mitigation measures are identified in the PEIS. In accordance with the Stockpile Stewardship and Management Program's two-tiered NEPA Strategy, these specific mitigation measures will be addressed, as necessary, on a site-by-site basis, in any site-specific NEPA analyses needed to implement the stockpile management decisions of this ROD.

Strategic Reserve Storage

The PEIS also evaluates storage alternatives for strategic reserve material (plutonium and highly enriched uranium that has not been declared surplus to national security needs). However, a decision on storage of strategic reserve materials will be made later in the Record of Decision on the Final PEIS for the Storage and Disposition of Weapons-Usable Fissile Materials in conjunction with decisions on the storage of surplus materials. The preferred alternatives for strategic reserve storage described in both the Final PEIS for Stockpile Stewardship and Management and the Final PEIS for the Storage and Disposition of Weapons-Usable Fissile Materials are consistent. The preferred alternatives are: (1) Highly enriched uranium strategic reserve storage at Y–12; and (2) plutonium pit strategic reserve storage in Zone 12 at Pantex.

Other Considerations

DOE has considered a wide range of views on alternatives for the Stockpile Stewardship and Management Program. However, it is national security policy, as established by the President and Congress, that must define the complex balance between U.S. national security policy objectives for nuclear deterrence, arms control and nonproliferation.

Chapter 2 of the PEIS describes the national security policy framework that defines the purpose and need for DOE's nuclear weapons mission for the foreseeable future. That chapter also describes the development of proposed actions and reasonable alternatives in response to recent changes in national security policy, and puts those changes in a broad technical perspective. Successive levels of technical detail are provided in Volume I, Chapter 3 and Volumes II and III of the PEIS. The discussions that follow refer to the appropriate sections of the PEIS to avoid unnecessary repetition.

While the terms "stockpile stewardship" and "stockpile management" are relatively new, the Program is not new when considered in terms of its substructure capabilities. What the terms are meant to convey is a post-Cold War change in Program focus away from large-scale development and production of new-design nuclear weapons with nuclear testing, to one that focuses on the safety and reliability of a smaller, aging stockpile without nuclear testing. Even with this change in focus, however, national security policies require DOE

to maintain the historical capabilities of the ongoing Program. The actions selected in this Record of Decision flow logically from the mission purpose and need, given the policy constraints placed on the Program by the President and Congress. Enhanced experimental capability (represented by the National Ignition Facility, Contained Firing Facility, and Atlas Facility) is needed because, in the absence of nuclear testing, it will provide the surrogate source of experimental data that are needed to continually assess and certify a safe and reliable stockpile. Rightsized manufacturing capacities at the Y–12 Plant (Oak Ridge), the Kansas City Plant, and Pantex will most efficiently conform to the reduced requirements of a smaller, aging stockpile in the absence of new-design weapon production. A reestablished pit manufacturing capability at LANL will restore a required capability of the Program that was temporarily lost as a consequence of the closure of the Rocky Flats Plant.

The question of alternatives for the Stockpile Stewardship and Management Program is complex because maintaining a nuclear weapons stockpile, whatever its size, requires a complete integrated set of technical capabilities as well as an appropriately sized manufacturing capacity. The technical capabilities are generally characterized as research, design, development, and testing; reliability assessment and certification; and manufacturing and surveillance operations (Section 2.2 and Figure 2.7–2 of the PEIS). From a technical point of view, none of these capabilities can be deleted if DOE is to maintain a safe and reliable stockpile (Section 2.4 of the PEIS). Indeed, DOE has been directed by the President and Congress to maintain these capabilities (Section 2.4 of the PEIS).

Commentors on the PEIS questioned the different treatment of stewardship and management alternatives, mainly the lack of programmatic alternatives to science based stockpile stewardship. Stewardship and management alternatives were treated differently in the PEIS because they address fundamentally different problems. Stockpile stewardship capabilities form the basis of DOE's judgments about the safety, reliability, and performance of U.S. nuclear weapons and, in a larger context, U.S. judgments about the nuclear weapons capabilities of others (Section 2.4.1 of the PEIS). DOE did not consider it reasonable to propose stewardship alternatives that would diminish, rather than enhance, stewardship capabilities, particularly given the fact that historic confidence in the safety and performance of the stockpile was derived from the nuclear testing that is no longer part of the ongoing stewardship program. National security policy requires DOE to maintain, and in some areas enhance, the stewardship capabilities of the three weapons laboratories and NTS (Section 2.2 of the PEIS). The PEIS explains the basis for this conclusion in a technical context, including the need for two independent nuclear design laboratories (Section 2.4.1 of the PEIS). Therefore, the PEIS did not propose any actions that would otherwise diminish ongoing stewardship missions.

In the PEIS, the Department determined that there is only one reasonable programmatic alternative for stockpile stewardship: enhanced experimental capability (see Section 3.1.2). This determination is consistent with a previous review made in November 1994 by the JASON Committee, a group of independent experts who evaluated the Science-Based Stockpile Stewardship (SBSS) program. The JASON Committee concluded that "[a] strong SBSS program, such as we recommend in this report, is an essential component for the U.S. to maintain confidence in the performance of a safe and reliable nuclear deterrent under a comprehensive test ban." The JASON Committee further concluded that "[in] the absence of nuclear weapons testing, improved understanding of the warheads and their behavior over time will be derived from computer simulations and analyses benchmarked against past data and new, more comprehensive diagnostic information obtained from carefully designed laboratory experiments. Toward this goal, the SBSS calls for the construction of a number of experimental facilities which have applications both in basic scientific research and in research directed towards strengthening the underlying scientific understanding in the weapons program."

Section 3.1.2.4 of the PEIS discussed four possible programmatic stewardship alternatives to enhanced experimental capability and concluded that none of them were reasonable stand-alone alternatives. These included: denuclearization (eliminate nuclear weapons in the relative near term); restoration (continue to rely on underground nuclear testing); remanufacturing (reproduce exact replicas of proven designs); and maintenance (rely on enhanced surveillance and revalidation to detect and correct problems). Both denuclearization and restoration are inconsistent with United States national security policy. Furthermore, while remanufacturing and maintenance already are, and will continue to be key components of the Program, neither would provide sufficient technical assurance that problems that may arise in the stockpile will be effectively diagnosed and corrected.

Prior to the issuance of the Final PEIS, some commentors expressed concern that the Department had not considered other programmatic alternatives for stockpile stewardship (i.e., remanufacturing). In response to their concerns, the Department asked Dr. Sidney D. Drell, of the JASON Committee, to review the issue of remanufacturing as a reasonable alternative to enhanced experimental capabilities.

In an October 28, 1996, letter to the Secretary of Energy, Dr. Drell and another member of the JASON Committee, Dr. Richard L. Garwin, stated that "we must not only maintain a cadre of first-class weapon scientists and engineers. We must also expand the existing science based understanding of the stockpile. The existing S&T [Science and Technology] base, including existing above-ground experimental facilities, is not adequate to the task of stewardship over the long term for an aging deterrent in the absence of nuclear tests. These requirements cannot be met if the SSMP [Stockpile Stewardship and Management Program] as planned by the Department of Energy is replaced simply by a program of remanufacturing or refurbishing existing weapons without paying careful attention to the need of maintaining weapons design capability, expanding our science based understanding of the stockpile, and providing the sources of experimental data needed to validate enhanced computer simulations." They concluded that "[w]hile remanufacturing is a necessary component of SSMP, it is not a reasonable alternative to the pursuit of a science-based stockpile stewardship or the need for enhanced experimental capability."

National security policy also requires DOE to maintain a full complement of stockpile management capabilities and appropriate manufacturing capacity, albeit for a smaller post-Cold War stockpile. Unlike stockpile stewardship capabilities, a smaller stockpile does permit some reasonable siting alternatives for stockpile management capabilities and capacities to accomplish the mission purpose and need within the current national security policy framework (Section 2.4.2 of the PEIS).

One important consideration in developing the PEIS was the possibility

VOL 61 ISS 249 DE 26 1996 UMI

that future international treaties may lead to a smaller U.S. stockpile, i.e., less than the currently defined START II protocol-sized stockpile. The PEIS analyzed each of the two stockpile sizes currently defined and directed by national security policy, a START I Treaty stockpile (6000 accountable strategic weapons) and a START II protocol-sized stockpile (3500 accountable strategic weapons). In addition, the PEIS analyzed a hypothetical 1,000-weapon stockpile for the purpose of providing a sensitivity analysis for decisions on manufacturing capacity. The Nuclear Weapons Stockpile Memorandum (NWSM) process that specifies the types of weapons and quantities of each weapon type in the stockpile is described in Section 1.1 of the PEIS. The classified NWSM is developed based on Department of Defense force structure requirements necessary to maintain nuclear deterrence and comply with existing arms control treaties while pursuing further arms control reductions. The PEIS describes this complex process, and explains why DOE does not believe it reasonable to speculate on additional stockpile sizes, which would necessarily entail the use of a large number of arbitrary assumptions (Section 2.2 of the PEIS). Nevertheless, DOE has considered the possibility that future national security policy could define a path to a smaller stockpile. Therefore, the analysis in the PEIS is very flexible in its approach to potential changes in stockpile size.

It is important to note in this regard that, just as stockpile stewardship capabilities are currently viewed by the United States as furthering U.S. nonproliferation objectives by making the "zero-yield" Comprehensive Test Ban Treaty feasible, it is reasonable to assume that confidence in U.S. stewardship capabilities would remain as important, if not more important, in future negotiations to reduce the stockpile further. The path to even a very small (tens or hundreds of weapons) or a zero stockpile would require the negotiation of complex international treaties, most likely with provisions that require intrusive international verification inspections of nuclear weapons-related facilities. Therefore, DOE believes it reasonable to assume that complex treaty negotiations, when coupled with complex implementation provisions, could possibly stretch over several decades. On such a gradual path to a very small or zero stockpile, stockpile size alone would not change the purpose and need, proposed actions, or alternatives in the PEIS as they relate to stewardship capabilities. The issues of maintaining the core competencies of the United States in nuclear weapons, and the technical problems of a smaller, aging stockpile in the absence of nuclear testing, would remain the same.

With regard to stockpile management capability and capacity, the PEIS evaluates reasonable approaches for a gradual path to a very small or zero stockpile. At some point on this path, further downsizing of existing industrial plants or the alternative of consolidating manufacturing functions at stewardship sites would become more attractive as manufacturing capacity becomes a less important consideration. In the near term, however, the decisions to downsize the existing industrial plants would still be reasonable because the projected downsizing investment would be recouped within a few years through reduced operating expense, and downsizing in the near term is consistent with potential longer-term decisions regarding plant closures. With regard to reestablishing pit manufacturing capability, DOE does not intend to establish a greater manufacturing capacity than is inherent in reestablishing the basic manufacturing capability. Thus, on a gradual path to a very small or zero stockpile, stockpile size alone would not change the purpose and need, proposed actions, or alternatives in the PEIS with regard to stockpile management capabilities and capacities.

Conclusions

With the issuance of this Record of Decision, the Department is making the decisions necessary to: (1) construct and operate three enhanced experimental facilities (the National Ignition Facility at LLNL, the Contained Firing Facility at LLNL, and the Atlas Facility at LANL); (2) downsize the existing weapons industrial plants (Y–12 at Oak Ridge, the Kansas City Plant, and Pantex); and (3) reestablish the plutonium pit component manufacturing capability at LANL. Additionally, the Department has decided to transfer a small amount of plutonium-242 material from SRS to LANL for stockpile stewardship activities.

During the 30 day period following the Environmental Protection Agency's notice that the Final PEIS had been filed, the Department received four letters from government organizations in response to the Final PEIS. Two of the letters, from the Tennessee Historical Commission and the State of Missouri Office of Administration, expressed no objection or comment. A third letter, from the Environmental Protection Agency, indicated that the Agency's prior comments on the Draft PEIS had been adequately addressed in the Final PEIS, and that the Agency had no objections to the project as proposed. The fourth letter, from the New Mexico Environmental Department, provided comments on the nomenclature used to describe water resources in and around the Los Alamos National Laboratory. These comments do not change the analysis in the PEIS, but they have been considered in preparing this Record of Decision. In making these decisions, all practicable means to avoid or minimize environmental harm from the alternatives selected have been adopted.

These decisions will help enable the Department to assess and certify the safety and reliability of the nation's nuclear weapons stockpile, while also supporting a zero-yield Comprehensive Test Ban Treaty. These decisions will allow for the closing and ultimate remediation of unnecessary industrial facilities, and reduce the cost of existing manufacturing operations. These decisions reestablish the required national security capability of plutonium pit fabrication. These decisions are consistent with, and supportive of, national security policy requirements established by the President and Congress for nuclear deterrence, arms control, and nonproliferation, including the safeguards established for U.S. entry into the Comprehensive Test Ban Treaty. Finally, these decisions will help enable the Department to maintain the core intellectual and technical competencies of the United States in nuclear weapons, and maintain a safe and reliable nuclear weapons stockpile.

Issued in Washington DC, December 19, 1996.

Hazel R. O'Leary,

Secretary.

Office of Energy Research

Joint Program on Terrestrial Ecology and Global Change Notice 97–02

AGENCY: Department of Energy (DOE), National Science Foundation (NSF), National Aeronautics and Space Administration (NASA), U.S. Department of Agriculture (USDA), Environmental Protection Agency (EPA).

ACTION: Notice inviting grant applications.

SUMMARY: In concert with the U.S. Global Change Research Program

(USGCRP) and with the intent of enhancing interagency collaboration, the Department of Energy (DOE), the National Science Foundation (NSF), the National Aeronautics and Space Administration (NASA), the United States Department of Agriculture (USDA), and the Environmental Protection Agency (EPA) announce their interest in receiving applications for support of grants that seek to augment research on terrestrial ecology as it relates to global environmental changes. This request for applications encourages multi-disciplinary applications involving companion experimental/manipulative and modeling efforts to provide critically needed data and information for improved predictions of global change phenomena in three equally important areas: (1) the consequences of global-scale environmental changes on terrestrial ecosystems, (2) the role of terrestrial ecosystems as a source or sink of carbon dioxide and other trace gases, and (3) the interactions and feedback between terrestrial ecosystems and the atmosphere and between linked ecosystems at watershed and landscape scales.

This request for applications extends the research begun as a result of the first two Terrestrial Ecology and Global Change (TECO) competitions in FY 1995 and FY 1996. It also extends current USGCRP activities supported by the five participating agencies that are relevant to this notice. These activities include the NSF Ecological Rates of Change (EROC), Water, Energy, Atmosphere, Vegetation and Earth (WEAVE), Land Margin Ecosystem Research (LMER), and Ecological Diversity (ED), the DOE Program on Ecosystem Research (PER), Terrestrial Carbon Processes (TCP), and the National Institute for Global Environmental Change (NIGEC), the NASA programs on Terrestrial Ecology and Land Cover and Land Use Change, the USDA programs on Forest/Range/Crop/Aquatic Ecosystems, Soils and Soil Biology, and Plant Responses to the Environment (PRE), and the EPA program on Regional Ecological Vulnerabilities to Climate Change.

Applications submitted in response to this interagency announcement are to be submitted to DOE. Each agency supporting an award, however, will act as the sole administrative unit for that award. All successful awards will be identified with the joint effort. The participating agencies will jointly manage the TECO program throughout the entire phase from the receipt and review of applications until the close-out of awards.

It is expected that 15–18 awards up to 3 years in duration and not exceeding $500,000 per year will be issued subject to the availability of FY 1997 funds. Applications submitted under this notice will be managed, prior to award selection decisions, in accordance with the DOE Office of Energy Research's (ER's) Financial Assistance Program Regulation 10 CFR Part 605 as published in the **Federal Register** September 3, 1992, (57 FR 40582).

DATES: Submission of an original and 18 copies of each application must be received no later than 4:30 p.m. E.S.T., February 28, 1997, in order to be accepted under this notice and to permit timely consideration for award by the participating agencies during FY 1997.

ADDRESSES: Formal applications referencing Program Notice 97–02 on the cover page must be sent to: U.S. Department of Energy, Office of Energy Research, Grants and Contracts Division, ER–64, 19901 Germantown Road, Germantown, MD 20874–1290, Attn: Program Notice 97–02. The above address for formal applications must also be used when submitting formal applications by U.S. Postal Service Express Mail, any commercial mail delivery service, or when hand carried by the applicant.

FOR FURTHER INFORMATION CONTACT: Dr. Jerry Elwood, Office of Energy Research, U.S. Department of Energy, Office of Health and Environmental Research, ER–74, 19901 Germantown Road, Germantown, MD 20874–1290, telephone: (301) 903–4583, E-mail: jerry.elwood@oer.doe.gov; Dr. Roger Dahlman, Office of Energy Research, Office of Health and Environmental Research, ER–74, 19901 Germantown Rd., Germantown, MD 20874–1290, telephone: (301) 903–4951, E-mail: roger.dahlman@oer.doe.gov; Dr. Scott Collins, Division of Environmental Biology, Room 635 National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230, telephone: (703) 306–1479, E-mail: scollins@nsf.gov; Dr. Andy Phillips, Division of Integrative Biology and Neuroscience, Room 685, National Science Foundation, 4201 Wilson Blvd. Arlington, VA 22230, telephone: (703) 306–1421, E-mail: jphillip@nsf.gov; Dr. Diane E. SUPPLEMENTARY INFORMATION: In concert with the U.S. Global Change Research Program (USGCRP) and with the intent of enhancing interagency collaboration, the National Science Foundation (NSF), the Department of Energy (DOE) , the National Aeronautics and Space Administration (NASA), the United States Department of Agriculture (USDA), and the Environmental Protection Agency (EPA) seek to augment terrestrial ecological research with this special competition. This competition will allow more comprehensive research on the combined response of terrestrial ecosystems to global-scale environmental changes that are occurring or are expected to occur and the influence of terrestrial ecosystems on environmental phenomena.

In recent decades, extensive efforts have been made to characterize and monitor the distribution and state of terrestrial ecosystems. Various global-scale environmental changes that are known or have the potential to affect terrestrial ecosystems have already been documented (e.g., increasing atmospheric CO_2 and other trace gases, global average increase in temperature, decreasing stratospheric ozone and increases in tropospheric ozone, and land transformations, including changes in land cover and land use). Some of these changes are expected to continue, if not increase due to continuing human activities. Other potential global-scale environmental changes could occur in the future due directly or indirectly to human activities (e.g., altered precipitation patterns, increased severity and frequency of extreme events related to climate change). Presently, what is lacking is an understanding of the potential

combined effects of global-scale environmental changes on essential ecosystem components, functions, and processes, particularly the effects of multiple and interacting environmental changes such as changes in climate and atmospheric composition and land transformations that are outside the range normally experienced by terrestrial ecosystems. There are also significant uncertainties regarding the role of terrestrial ecosystems in affecting global-scale changes and how natural and human-induced changes in terrestrial ecosystems may influence global phenomena. It is unclear from existing information how the essential functions of species or ecosystems are being or will be affected by global environmental changes in the future, on scales from individual organisms to populations, communities, ecosystems, landscapes and subcontinental regions. Without the ability to make such projections, implications for the sustainability of ecosystems as a support system for humans remain uncertain.

The goal for this research is to improve the scientific understanding of how species, ecological characteristics and processes, and ecosystems effect and are affected by global change over a range of time scales. To enhance capabilities to assess the probable consequences of multiple influences (e.g., concurrent changes in climate, atmospheric composition, land transformations/land use) and their feedback effects. The research also will increase the capability for extending experimentally-derived information obtained at smaller geographical scales (e.g., plot-size, stand-level, patch-size) and shorter time frames (e.g., growing seasons) to landscape and larger scales (e.g., regions, river basins) at longer temporal intervals (e.g., decades, centuries).

To achieve this scientific understanding, innovative field experiments and observational studies are needed to address interactions of ecological processes and combinations of effects related to global change; to relate observed effects to causative factors; and to test predictive response models. Also, to improve predictability, new modeling efforts will be needed for extrapolating information to other systems and across multiple scales that will contribute to the development of regional and subcontinental models and ecological models that are fully interactive with other Earth system models (e.g., Dynamic Global Vegetation Models). Agencies involved in this interagency announcement encourage multi-disciplinary applications involving companion experimental, manipulative and modeling efforts to provide critically needed data and understanding for improved predictions of global change phenomena in the following, equally important areas:

(1) Consequences of Global Change on Ecosystems.

The goal of research in this area is to provide a stronger scientific basis for understanding, predicting, and assessing the effects of human-induced and natural influences on terrestrial ecosystems, including aquatic ecosystems imbedded within terrestrial ecosystems (e.g., streams, lakes, wetlands). It is hypothesized that ecosystems are changing or will change in response to climate and land use changes of the past century and predicted future changes due to the enhanced greenhouse effect and increasing demands on land for food, fiber, and other human uses. Understanding the consequences of these and other global-scale changes on terrestrial ecosystems, organisms, and resources presents unprecedented challenges because many other types of change are occurring simultaneously. There is a need to understand how existing terrestrial ecosystems are likely to respond to ongoing or predicted environmental changes, and to relate observed changes to likely causes using experimental approaches that examine phenomena at multiple scales. There is also a need to consider the adaptive potential of terrestrial ecosystems to environmental changes and to incorporate the influence of ongoing adaptive changes through time. Also, the research needs to provide the quantitative information for models that generalize from selected study sites to broader areas at local, regional and global levels at multiple temporal scales.

The focus of research on consequences should be on improving the scientific understanding of how the structure and function of terrestrial ecosystems will respond to global change, including changes in land use and land cover, climate, and atmospheric composition. The research should improve the scientific basis for assessing the vulnerability of different ecosystems to global changes, including the potential beneficial and adverse effects of such changes on ecosystem components and processes of utilitarian and/or intrinsic value to humans. This capability should also include projecting potential ecological effects of future environments that many ecological communities may not yet have experienced, and the potential role of natural selection in driving these changes. Experimental and modeling research is encouraged:

* To understand and predict how ecosystem processes (e.g., net primary production, respiration, net ecosystem productivity) are affected by combinations of altered atmospheric CO_2 and other trace gas concentrations (e.g., ozone), different climate conditions, changing resource constraints (e.g., nutrients, water and light), and changing land-use patterns (e.g., urban/suburban sprawl, conversion of forest to other uses);
* To identify and quantify the mechanism(s) or process(es) controlling observed responses to altered climatic and atmospheric conditions and altered land cover or land use, and to understand both the potential for these mechanisms and processes to undergo adaptation to the changes through physiological adaptations and natural selection, and the consequences of adaptive responses and evolutionary changes on ecosystem function;
* To investigate trends, patterns, and relationships among vegetation, climate, and land use to document and understand the interaction between natural and human-dominated systems;
* To determine how biological and ecological responses to global-scale environmental changes are manifested at higher levels of ecosystem hierarchy (populations, communities, ecosystem, landscape) of terrestrial environments;
* To identify changes in structural components (e.g., landscape pattern, community structure, architectural properties of vegetation), caused by different atmospheric, climatic, and land-use activities that will predict the future structure and distribution of ecosystems;
* To understand and predict the effects of combinations of altered CO_2, climate conditions, changing resource constraints and land-use change on biodiversity (e.g., genetic diversity, species diversity, habitat diversity).

(2) Carbon, CO_2, and Other Trace Gases Related to Global Change

The goal of research in this area is to improve the scientific basis for understanding, predicting and assessing the quantitative role of the terrestrial biosphere as a source or sink of radiatively active trace gases such as carbon dioxide, methane, and nitrous oxide. The combined results of process, observation, and global modeling studies strongly suggest that terrestrial ecosystems must be taking up and storing significant amounts of carbon each year, yet we do not know where it is going, how long this might continue, and whether this storage will be

permanent or only temporary. Improved databases, experiments and process models are needed:

* To understand complex interactions that control exchange of CO_2 and other trace gases between the biosphere and the atmosphere for representative terrestrial ecosystems;
* To develop databases for the use, intercomparison, and testing of process-based models of net ecosystem productivity, including data to quantify carbon content of terrestrial ecosystems and estimate how sources and sinks of carbon are changing;
* To measure continental atmospheric CO_2, carbon isotopes, and oxygen to better quantify processes of terrestrial carbon cycles.

(3) Ecosystem Feedbacks to Global Change

The goal of research in this area is to improve the scientific understanding of the full range of interactions and feedbacks between terrestrial ecosystems and the atmosphere (e.g., water and energy exchange, aerosol exchange, nutrient fluxes), and between linked ecosystems at a landscape scale by, for example, biotic propagule dispersal, land-water interactions, biogeochemical linkages. Research is encouraged on how species composition, ecological properties and processes, changes in land use or land management practices influence the ability of ecosystems, for example:

* To control or modify physical factors such as albedo, regional precipitation, wind speed, and particulate movement in water and air;
* To control the movement of biological propagules between ecosystems and affect the spread of indigenous and non-indigenous species, including pest species across the landscape.
* To control biogeochemical cycling and nutrient deposition, retention and transport that affect soil fertility, and water quality;
* To regulate the exchange of energy, water, trace gases, aerosols, and biotic materials between the atmosphere and terrestrial environment under variable and/or changing climatic conditions.

Research is also encouraged on the development and testing of coupled land-atmosphere models that include interactive surface-atmosphere processes in integrative global models.

Research proposed for this competition is encouraged to take advantage of existing programs, research sites and facilities, or data sets of other agencies with multi-disciplinary efforts. Examples of such existing efforts are: NASA field campaigns (FIFE, BOREAS), DOE's National Environmental Research Parks (NERPS), Free-Air CO_2 Enrichment (FACE) field sites, the Atmospheric Radiation Measurement (ARM) Southern Great Plains site, and Program on Ecosystem Research (PER) sites, NSF's Long Term Ecological Research (LTER) sites and Land Margin Ecosystem Research (LMER) sites, and USDA's Management Systems Evaluation Areas (MSEA). Applications involving the establishment of new long-term research facilities or study sites must clearly demonstrate the need for such facilities, including the unique research opportunities they would provide.

In addition to interest in applications in these three areas, one-year scoping applications will also be considered that involve developing and demonstrating the feasibility of new experimental approaches and/or facilities for field studies to investigate the responses and/or feedback effects of terrestrial ecosystems to global environmental changes. The agencies involved in the TECO program recognize the need for new, innovative field experimental approaches and facilities to study interactive effects of environmental changes on terrestrial ecosystems. Accordingly, this announcement also seeks one-year scoping applications to design and test the feasibility of new approaches and/or field experimental systems for studying the effects of environmental changes on ecosystems. Such scoping applications should be clearly identified as such in the title of the application.

Administrative Information

To provide a consistent format for the submission and review of grant applications submitted under this notice, the preparation and submission of grant applications must follow the guidelines given in the Application Guide for the Office of Energy Research Financial Assistance Program 10 CFR Part 605.

Information about the development and submission of applications, eligibility, limitations, evaluation, the selection process, and other policies and procedures may be found in 10 CFR Part 605, and in the Application Guide for the Office of Energy Research Financial Assistance Program. The Application Guide is available from the U.S. Department of Energy, Office of Energy Research, ER–74, 19901 Germantown Road, Germantown, MD 20874–1290. Telephone requests may be made by calling (301) 903–3338. Electronic access to ER's Financial Assistance Application Guide and forms is possible via the World Wide Web at: http://www.er.doe.gov/production/grants/grants.html.

Interested scientists at Federal agencies and Federally owned or operated laboratories, including Federal-Funded Research and Development Centers (FFRDC) must contact the web site http://www.er.doe.gov/production/grants/lab97__02.html for information on this program, or seek information from a relevant agency contact listed above under the section entitled **FOR FURTHER INFORMATION CONTACT.**

All U.S. institutions eligible to receive grant support from DOE, NSF, NASA, USDA, and EPA may submit applications in response to this notice. NSF will not fund applications from FFRDCs.

Applications will be subjected to formal merit review (peer review) and will be evaluated against the following evaluation criteria which are listed in descending order of importance codified at 10 CFR 605.10(d):

1. Scientific and/or Technical Merit of the Project.
2. Appropriateness of the Proposed Methods or Approach.
3. Competency of Applicant's Personnel and Adequacy of Proposed Resources.
4. Reasonableness and Appropriateness of the Proposed Budget.

As part of the evaluation, program policy factors such as the relevance of the proposed research to the terms of the announcement and an agency's programmatic needs, are also criteria used in the selection process. Note that external peer reviewers are selected with regard to both their scientific expertise and the absence of conflicts-of-interest. Both Federal and Non-federal reviewers may be used, and submission of an application constitutes agreement that this is acceptable to the investigator(s) and the submitting institution.

Applications must not exceed 15 pages for the project description section; visual materials and tables count toward the 15 page limit. No letters of endorsement or other appendices are allowed. Applications may request funding for projects with a duration not to exceed three years and a total budget not to exceed $500,000 per year. Final selection of awards by participating agencies will be determined by the review panel's recommendations and programmatic considerations. Each award will be supported by a single agency. Overall the estimated amount of funding for this program is $7M in FY 1997, depending on the availability of funds from each agency. Principal investigators may be requested to modify their budgets and work plans to

comply with special requirements of the particular agency supporting their award. The principal investigator of an award will be requested to travel to Washington, DC for an annual meeting of all principal investigators to discuss additional collaboration, sharing of information and interaction of efforts among successful projects funded through TECO and other global change programs mentioned above. Budget requests should include travel costs to attend such a meeting.

DOE awards made as a result of this notice will be administered in accordance with the DOE Office of Energy Research Financial Assistance Program (10 CFR Part 605).

NSF awards made as a result of this notice will be administered in accordance with the terms of conditions of SF GC–1, Grant General Condition or FDP–II, Federal Demonstration Project. Copies of these documents are available at no cost from the NSF Form and Publication Unit, telephone: (703) 306–1130, or via E-mail: (internet: pubs@nsf.gov). More comprehensive information is contained in the NSF grant Policy Manual (NSF 95–26, July 1995), for sale through the Superintendent of Documents, Government Printing Office, Washington, DC 20402. The telephone number at GPO is (202) 783–3238 for subscription information.

NASA grant or cooperative agreement awards made as a result of this notice will be administered in accordance with the NASA Grant and Cooperative Agreement Handbook (NHB 5800.1).

USDA award authority for this program is contained in section 2(b) of the Act of August 4, 1965, as amended (7 U.S.C. 450i(b)). Under this program, subject to the availability of funds, the Secretary may award competitive research grants for periods not to exceed five years for the support of research projects to further the programs of the Department of Agriculture (USDA). Applications may be submitted by any state agricultural experiment station, college, private organization, corporation, or individual. Applications from scientists at non-United States organizations will not be considered for support. Pursuant to Section 712 of Public Law 103–330 (the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1995) funds available in fiscal year 1995 to pay indirect costs on research grants award competitively by CSREES may not exceed 14 per centum of the total Federal funds provided under each award. In addition, pursuant to Section 719(b) of Public Law 103–330, in the case of any equipment or product that may be authorized to be purchased with the funds provided under this Program, entities are encouraged to purchase only American-made equipment or products.

The Catalog of Federal Domestic Assistance Number for this program is 81.049, and the solicitation control number is ERFAP 10 CFR Part 605.

Issued in Washington DC on December 18, 1995.

John Rodney Clark,

Associate Director for Resource Management, Office of Energy Research.

[FR Doc. 96–32758 Filed 12–24–96; 8:45 am]

BILLING CODE 6450–01–P

Federal Energy Regulatory Commission

[Docket No. RP97–72–001]

ANR Pipeline Company; Notice of Compliance Filing

December 19, 1996.

Take notice that on December 16, 1996, ANR Pipeline Company (ANR) tendered for filing, as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following revised tariff sheets, proposed to become effective January 1, 1997:

Second Revised Sheet No. 37
Original Sheet No. 37A
Fifth Revised Sheet No. 39
Sixth Revised Sheet No. 120

ANR states that these tariff changes, regarding scheduling of its Rate Schedule FTS–2 service, are being submitted in compliance with the Commission's November 29, 1996 Order Accepting and Suspending Tariff Sheets Subject to Refund and Condition in the captioned proceeding.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Inspection Room.

Lois D. Cashell,

Secretary.

[FR Doc. 96–32736 Filed 12–24–96; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP97–20–002]

El Paso Natural Gas Company; Notice of Compliance Filing

December 19, 1996.

Take notice that on December 16, 1996, pursuant to Subpart C of 154 of the Commission's Regulations Under the Natural Gas Act and in Compliance with the Commission's order issued November 15, 1996 at Docket No. RP97–20–000, El Paso Natural Gas Company (El Paso) tendered for filing and acceptance the revised pro forma tariff sheets to its FERC Gas Tariff, Third Revised Volume No. 1 and Second Revised Volume No. 1–A, identified below.

Pro Forma Third Revised Volume No. 1

Substitute First Revised Sheet No. 302

Pro Forma Second Revised Volume No. 1–A

Substitute Second Revised Sheet No. 202
Original Sheet No. 202A
Substitute Original Sheet No. 210A
Substitute First Revised sheet No. 211
Substitute Second Revised sheet No. 214
Substitute Third Revised sheet No. 217

El Paso states that the pro forma tariff sheet are being tendered to list the Gas Industry Standards Board (GISB) Standards that are incorporated by reference and to revise the intra-day scheduling and pooling provisions. The tendered pro forma tariff sheets are proposed to become effective April 1, 1997.

El Paso states that copies of the filing were served upon all parties of record in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before January 6, 1997. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 96–32733 Filed 12–24–96; 8:45 am]

BILLING CODE 6717–01–M

Notice of Application to Grant Permission to Carl Donaldson to Construct a Small Commercial Marina

December 19, 1996.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Non-Project Use of Project Lands and Waters.

b. *Project Name and No:* Lake Sinclair Project, FERC Project No. 1951–043.

c. *Date Filed:* August 15, 1996.

d. Applicant: Georgia Power Company.

e. *Location:* Hancock County, Georgia, Sandy Run Subdivision of the Holiday, Shores Development on Lake Sinclair near Sparta.

f. *Filed pursuant to:* Federal Power Act, 16 U.S.C. § 791(a)–825(r).

g. *Applicant Contact:* Mr. Larry J. Wall, Georgia Power Company, Connector Building, 2nd Floor, 333 Piedmont Avenue, Atlanta, Georgia 30308; (404) 526–2054.

h. *FERC Contact:* Steve Naugle, (202) 219–2805.

i. *Comment Date:* January 27, 1997.

j. *Description of the filing:* Georgia Power Company requests approval to grant permission to Mr. Carl Donaldson to construct certain facilities within the project boundary as part of a proposed small commercial marina on Lake Sinclair. The marina facilities that would be constructed within the project boundary include a boat ramp; two service docks, one of which would have fuel service for boats; 14 boat-slip piers; retaining walls along the shoreline; two above-ground, self-contained fuel storage tanks; a convenience store; and associated access drives and parking areas, portions of which extend outside the project boundary. The marina would also include an existing boat ramp, two existing access drives and parking areas, four existing and two proposed rental cottages, and an existing on-shore boat storage shelter.

k. *This notice also consists of the following standard paragraphs:* B, C1, D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Document—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Lois D. Cashell,

Secretary.

[FR Doc. 96–32731 Filed 12–24–96; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP90–239–005]

Gulf States Transmission Corporation; Notice of Application

December 19, 1996.

Take notice that on December 13, 1996, Gulf States Transmission Corporation (GSTC), 1324 North Hearn, Suite 300, Shreveport, Louisiana 71107, filed in Docket No. CP90–239–005, an application to amend the certificate issued on July 26, 1990 in Docket No. CP90–239–000, pursuant to Section 7(c) of the Natural Gas Act (NGA) and Part 157 of the Federal Energy Regulatory Commission's (Commission) regulations, to authorize GSTC to set its transportation rates based on 95% of the effective capacity, or, in the alternative, to authorize GSTC to file under Section 4 of the NGA for market-based rates, all as more fully set forth in the petition on file with the Commission and open to public inspection.

Specifically, GSTC seeks to modify the currently effective certificate condition that requires GSTC's transmission rates to be set at 95% of the proposed design capacity, 15,000 Mcf/d, by changing the condition to read: "GSTC's transmission rates are to be set at 95% of the effective capacity of 75,00 Mcf/d." In the alternative, GSTC requests that the Commission find that GSTC lacks the ability to exercise market power in the relevant product and geographic markets, and amend GSTC's certificate to authorize GSTC to file under Section 4 of the NGA for market-based rates.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 9, 1997, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for GSTC to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

[FR Doc. 96–32728 Filed 12–24–96; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP97–43–000]

Koch Gateway Pipeline Company; Notice of Technical Conference

December 19, 1996.

In the order issued on November 27, 1996,[1] in the above-captioned proceeding, the Commission found that the filing raises issues for which a technical conference is to be convened.

The conference to address the issues identified in the November 27 order has been scheduled for Tuesday, January 14, 1997, at 10:00 a.m. in a room to be designated at the offices of the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426.

All interested persons and Staff are permitted to attend.

Lois D. Cashell,

Secretary.

[FR Doc. 96–32735 Filed 12–24–96; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP97–19–002]

Mojave Pipeline Company; Notice of Compliance Filing

December 19, 1996.

Take notice that on December 16, 1996, pursuant to Subpart C of 154 of the Commission's Regulations Under the Natural Gas Act and in compliance with the Commission's order issued November 15, 1996 at Docket No. RP97–19–000, Mojave Pipeline Company (Mojave) tendered for filing and acceptance revised pro forma tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1.

Pro Forma First Revised Volume No. 1

Substitute First Revised Sheet No. 103
Original Sheet No. 103A
Substitute Original Sheet No. 117A

Mojave states that the pro forma tariff sheets are being tendered to list the Gas Industry Standards Board (GISB) Standards that are incorporated by reference and to revise the intra-day scheduling and pooling provisions. The tendered pro forma tariff sheets are proposed to become effective April 1, 1997.

Mojave states that copies of the filing were served upon all parties of record in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before January 6, 1997. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 96–32733 Filed 12–24–96; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP97–193–000]

NorAm Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

December 19, 1996.

Take notice that on December 16, 1996, NorAm Gas Transmission Company (NGT) tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, the tariff sheets listed in Appendix A to the filing, with an effective date of December 31, 1996.

NGT states that the filing is being made to comply with Order No. 582.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with sections 385.211 and 385.214 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Inspection Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. RP94–149–008, RP94–145–007, (Consolidated) and RP95–141–005, (Not Consolidated)]

Pacific Gas Transmission Company; Notice of Refund Report

December 19, 1996.

Take notice that on December 16, 1996, Pacific Gas Transmission Company (PGT) submitted a report of refunds made in conjunction with the Stipulation and Agreement in the above-referenced proceedings. PGT states this report is filed in compliance with the March 21, 1996 Stipulation and Agreement (Stipulation), which the Commission approved by its Order of September 11, 1996 in these proceedings (76 FERC ¶ 61,246).

PGT states that refunds were made between November 15 and November 20, 1996 in accordance with the provisions of the Stipulation. PGT further states that copies of this report, with exception of Appendices F and G, are being served upon its jurisdictional customers and interested state regulatory agencies, as well as the official service list compiled by the Secretary in the above-referenced proceedings. Customers receiving refunds were previously provided with the applicable portions of Appendices F and G to the report. The applicable portions of Appendices F and G are being served on the customers' counsel of record in these proceedings and interested state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules of Practice and Procedure. All such protests must be filed on or before December 27, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP97–154–000]

Williams Natural Gas Company; Notice of Request Under Blanket Authorization

December 19, 1996.

Take notice that on December 13, 1996, Williams Natural Gas Company (WNG), One Williams Center, Tulsa, Oklahoma 74101, filed in Docket No. CP97–154–000, a request pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.212) for authorization to utilize facilities, originally installed for the delivery of NGPA Section 311 transportation gas to Mannford Public

[1] 77 FERC ¶ 61,228 (1996).

Works Authority (Mannford) in Creek County, Oklahoma, for purposes other than NGPA Section 311 transportation, under WNG's blanket certificate authorization issued in Docket No. CP82–479–000, pursuant to Section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

WNG explains that after the Section 311 facilities were installed and the Section 311 agreement was signed with Mannford, a local distribution company, an end-user behind Mannford asked about the possibility of arranging transportation on his own behalf. WNG states that it is now seeking authority to deliver Section 284 gas through the facilities as well.

WNG describes the facilities as consisting of a 3-inch tap connection, a single-run positive displacement meter with two pressure cuts, and over-pressure protection, located in Section 20, Township 19 North, Range 8 East, Creek County Oklahoma. WNG says it began delivering gas to Mannford through these Section 311 facilities on November 22, 1996, with the initial delivery being 311 Dth. WNG states that the cost to construct these facilities was approximately $50,848, which will be recouped through a new production area TSS agreement, which replaced Mannford's previous STS–P agreement. WNG explains that these facilities are an additional delivery point for Mannford and will handle all of Mannford's load through the summer and will be used in conjunction with the existing orifice meter setting through the winter months. WNG asserts that the use of the two meter settings will enable WNG to more accurately measure fluctuating gas volumes.

WNG states that the requested change is not prohibited by an existing tariff and that it has sufficient capacity to accomplish the deliveries without detriment or disadvantage to its other customers. WNG asserts that the operation of these facilities will have no impact on WNG's peak day or annual deliveries. WNG states it has sent a copy of this filing to the Oklahoma Corporation Commission.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 96–32729 Filed 12–24–96; 8:45 am]

BILLING CODE 6717–01–M

[Project No. 137–002–CA]

Pacific Gas and Electric Company; Notice of Availability of Draft Environmental Assessment

December 19, 1996.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 19 CFR Part 380 (Order No. 486, 52 F.R. 47897), the Office of Hydropower Licensing has reviewed the application for relicensing the Mokelumne River Hydroelectric Project, located in Alpine, Amador, and Calaveras Countries, California, and has prepared a Draft Environmental Assessment (DEA) for the project. In the DEA, the Commission's staff has analyzed the potential environmental impacts of the existing project and has concluded that approval of the project, with appropriate environmental protection measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the DEA are available for review in the Public Reference Branch, Room 2–A, of the Commission's offices at 888 First Street, N.E., Washington, D.C. 20426.

Any comments should be filed within 30 days from the date of this notice and should be addressed to Lois D. Cashell, Secretary, Federal Energy Regulatory Commission, 888 First Street N.E., Room 1–A, Washington, D.C. 20426. Please affix "Mokelumne River Hydroelectric Project No. 137" to all comments. For further information, please contact Tom Dean at (202) 219–2778.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Notice of Cases Filed With the Office of Hearings and Appeals; Week of November 18 Through November 22, 1996

During the Week of November 18 through November 22, 1996, the appeals, applications, petitions or other requests listed in this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Any person who will be aggrieved by the DOE action sought in any of these cases may file written comments on the application within ten days of publication of this Notice or the date of receipt of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20585–0107.

Dated: December 17, 1996.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of November 18 through November 22, 1996]

Date	Name and location of applicant	Case No.	Type of submission
November 15, 1996.	William H. Payne, Washington, DC	VFA–0243	Appeal of an information request denial. If granted: The October 10, 1996 Freedom of Information Request Denial issued by the Office of Inspector General would be rescinded, and William H. Payne would receive access to certain Department of Energy information.
November 20, 1996.	Personnel security hearing	VSO–0124	Request for hearing under 10 CFR Part 710. If granted: An individual employed by a Contractor of the Department of Energy would receive a hearing under 10 CFR Part 710.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of November 18 through November 22, 1996]

Date	Name and location of applicant	Case No.	Type of submission
November 20, 1996.	Personnel security hearing	VSO–0125	Request for hearing under 10 CFR Part 710. If granted: An individual employed by a Contractor of the Department of Energy would receive a hearing under 10 CFR Part 710.
November 21, 1996.	James L. Hecht, Wilmington, DE	VFA–0244	Appeal of an information request denial. If granted: The October 29, 1996 Freedom of Information Request Denial issued by the Office of Energy Efficiency and Renewable Energy would be rescinded, and James L. Hecht would receive access to certain DOE information.
November 22, 1996.	Personnel security hearing	VSO–0126	Request for hearing under 10 CFR Part 710. If granted: An individual employed by a Contractor of the Department of Energy would receive a hearing under 10 CFR Part 710.
November 22, 1996.	Personnel security hearing	VSA–0103	Request for review of opinion under 10 CFR Part 710. If granted: The October 24, 1996 Opinion of the Office of Hearings and Appeals, Case No. VSO–0103, would be reviewed at the request of an individual employed by the Department of Energy.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–30112A; FRL–5396–3]

Chlorothalonil; Notice of Withdrawal of Administrative Exception Request to Worker Protection Standard's Prohibition of Early Entry into Pesticide-Treated Areas to Harvest Muskmelons by Hand

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of withdrawal of petition.

SUMMARY: The State of Indiana has notified EPA that it is withdrawing its petition for an exception to the 48–hour restricted entry interval (REI) for chlorothalonil on muskmelon fields.

EFFECTIVE DATE: This document became effective December 9, 1996.

FOR FURTHER INFORMATION CONTACT: Joshua First, Office of Pesticide Programs, Field Operations Division (7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number, and e-mail address: Rm. 1121, 1921 Jefferson Davis Highway, Crystal Mall 1B2, Arlington, VA, 703–305–7437, e-mail: first.joshua@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On August 21, 1992 (57 FR 38102), EPA issued a final rule revising the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR part 170). The WPS became fully implemented on January 1, 1995. The WPS contains requirements for training, notification of pesticide applications, use of personal protective equipment (PPE), decontamination, and emergency medical assistance. The WPS also set new restricted entry intervals (REIs) for thousands of pesticide products; many of the REIs were increased. Chlorothalonil's REI on muskmelons increased from 12 hours to 48 hours.

II. Early Entry Exceptions

In general, § 170.112 of the WPS prohibits agricultural workers from entering a pesticide-treated area during a REI. REIs are specified on the pesticide product label and typically range from 12 to 72 hours. Product-specific longer REIs have been set for a few pesticides.

Under § 170.112(e) of the WPS, EPA may establish exceptions to the Standard's provision of prohibiting early entry to perform routine hand labor tasks. Before implementing such changes, however, EPA is required to provide a 30–day public comment period. EPA will grant or deny a request for an exception based on a risk-benefit analysis. However, as required by 40 CFR 170.112(e)(3), the analysis must take into account both the added risks and the benefits from allowing early entry to perform hand labor tasks.

III. Indiana's Petition for an Exception and Subsequent Retraction of the Petition

Late in March 1996, EPA received a petition from the State of Indiana. Indiana petitioned the Agency under § 170.112(e) to allow early entry by workers into chlorothalonil-treated muskmelon fields to perform hand labor harvesting. The current REI for chlorothalonil remains at 48 hours after application. Although a specific REI was not requested in the petition, Indiana requested entry as soon as feasible following the application of the fungicide, before the expiration of the REI. Indiana's petition stated that muskmelon growers would suffer substantial economic losses if they could not harvest their crop on a daily basis. The requested time period for the exception was from June 15 through August 30, 1996. EPA published a Notice of Receipt for the petition in the **Federal Register** of June 7, 1996 (61 FR 29096) (FRL–5373–8) and provided a 30–day public comment period.

In early July 1996, following the 30-day public comment period on the petition, EPA began its analysis of the comments that were received. On July 17, 1996, Indiana officially withdrew its petition in a retraction letter to Daniel M. Barolo, Director, Office of Pesticide Programs.

Cartilage Technologies, Inc.; Application to Register a Pesticide Product

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of an application to register a pesticide product containing an active ingredient not included in any currently registered product pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATES: Written comments must be submitted by January 27, 1997.

ADDRESSES: By mail, submit written comments identified by the document control number [OPP–30426] and the file symbol (69167–R) to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Environmental Protection Agency, Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will be accepted on disks in Wordperfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [OPP–30426]. No "Confidential Business Information" (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submission can be found below in this document.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: By mail: John Tice, Biopesticides and Pollution Prevention Division (7501W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. CS51B6, Westfield Building North Tower, 2800 Crystal Drive, Arlington, VA 22202, (703) 308–8295; e-mail: tice.john@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: EPA received an application from Cartilage Technologies, Inc., 200 Clearbrook Road, Elmsford, NY 10523, to register the pesticide product Stoplite For Babies (EPA File Symbol 69197–R), an insect repellent, containing the active ingredient geranium oil at 0.4 percent, an active ingredient not included in any currently registered product pursuant to the provisions of section 3(c)(4) of FIFRA. The product is classified for general use as an insect repellent to repel biting insects. Notice of receipt of the application does not imply a decision by the Agency on the application.

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. The procedure for requesting data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

A record has been established for this notice under docket number [OPP–30426] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Written comments filed pursuant to this notice, will be available in the Public Response and Program Resources Branch, Field Operations Division at the address provided from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. It is suggested that persons interested in reviewing the application file, telephone this office at (703–305–5805), to ensure that the file is available on the date of intended visit.

Authority: 7 U.S.C. 136.

Registration Policies Pertaining to Rodenticide Baits and Other Vertebrate Pesticides

AGENCY: Environmental Protection Agency (EPA).

ACTION: Draft PR Notice; notice of availability.

SUMMARY: EPA announces the availability of a draft pesticide regulation (PR) notice that summarizes policies affecting the registrations of rodenticide baits and other vertebrate pesticide products, which include toxicants and repellents. The PR notice outlines historical policies which are largely or completely specific to vertebrate pesticides, especially rodenticide baits. Most of these policies pertain to where the Agency draws distinctions among products based upon formulations, bait forms, and packaging arrangements. The PR notice also announces a proposed new policy under which it would be possible for rodenticide baits of a common formulation to be sold in placepacks of

different sizes under a single registration number.

DATES: Written comments, identified by the document control number [OPP–00448], must be received on or before February 24, 1997.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. Copies of the draft notice may be requested from the Public Response and Program Resources Branch by telephone (703) 305–5805) or by writing to the Washington, DC, address indicated above.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [OPP–00448]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

Information submitted as a comment concerning this document may be claimed confidential by marking any or all of that information as "Confidential Business Information" (CBI) . Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Room 1128 at the Virginia address given above, from 8:30 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: William W. Jacobs, Insecticide-Rodenticide Branch, Registration Division (7505C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Room 259, CM #2, 1921 Jefferson Davis Highway, Arlington, (703) 305–6406.

SUPPLEMENTARY INFORMATION:

EPA has established a record for this notice of availability under docket number [OPP–00448] (including any comments and data submitted electronically). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments may be sent directly to EPA at:

opp-docket@epamail.epa.gov.

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice of availability, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer any comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

SUPPLEMENTARY INFORMATION: EPA has received a pesticide petition (PP) 6F4649 from American Cyanamid Company, P.O. Box 400, Princeton, NJ 08543–0400, proposing pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FDDCA), 21 U.S.C. section 346a(d), to amend 40 CFR

part 180 by establishing a tolerance for residues of the herbicide AC 299263 in or on the raw agricultural commodity soybean seed at 0.1 ppm. The proposed analytical method is HPLC Method M2248.01.

Pursuant to section 408(d)(2)(A)(i) of the FFDCA, as amended, American Cyanamid Company has submitted the following summary of information, data, and arguments in support of their pesticide petition. This summary was prepared by American Cyanamid Company and EPA has not fully evaluated the merits of the petition.

EPA edited the summary to clarify that the conclusions and arguments were the petitioner's and not necessarily EPA's and to remove certain extraneous material.

I. Petition Summary

On November 30, 1995, American Cyanamid Company petitioned the EPA, under pesticide petition (PP) 6F4649, for a permanent tolerance of 0.1 ppm for the residues of AC 299263 on soybean seed.

Section 408(b)(2)(A) of the amended FFDCA allows EPA to establish a tolerance only if the Administrator determines that there is a "reasonable certainty that no harm will result from the aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information."

All of the studies required for the proposed use pattern have been completed and submitted to EPA for review. The available information indicates there is a reasonable certainty that no harm will result from various types of exposure.

The following is a summary of the information submitted to EPA to support the establishment, under section 408(b)(2)(D) of the amended FFDCA, of a tolerance for AC 299263 on soybean seed.

A. Residue Chemistry

1. *Plant metabolism*. The qualitative nature of the residues of AC 299263 in soybeans is adequately understood. Parent compound is the only residue of concern. The requirement for a processing study was waived by EPA based on the results of field trials at rates up to 5x the maximum label rate. In these trials, there was no measurable residue of AC 299263 in soybean seed above the validated sensitivity of the method (0.05 ppm). In addition, results from the plant metabolism study showed no detectable residues of AC 299263 in oil obtained from soybean seed which had been treated at an exaggerated use rate.

2. *Analytical method*. A practical analytical method (HPLC Method M2248.01) for detecting and measuring levels of AC 299263 in soybean seed has been submitted to EPA. This method is appropriate for enforcement purposes.

3. *Magnitude of residues*. No apparent residues of AC 299263 were observed in soybean seed at or above 0.05 ppm (the limit of quantitation for the analytical method). These field studies, conducted at 1–5x the highest intended label use rate, clearly support the proposed tolerance of 0.1 ppm.

B. Toxicological Profile

A complete battery of mammalian toxicity studies supports the tolerance for AC 299263 on soybean seed. The data base is complete, valid and reliable, and all studies have been submitted to EPA for review.

1. *Acute toxicity*. Based on EPA criteria, AC 299263 technical material is relatively non-toxic via the oral and inhalation routes of exposure (Category IV), and is only slightly toxic (Category III) via dermal exposure.

Acute oral toxicity in rats: LD50 > 5,000 mg/kg

Acute dermal toxicity in rabbits: LD50 > 4,000 mg/kg

Acute inhalation toxicity in rats: LC50 > 6.3 mg/l (analytical)

Primary eye irritation in rabbits: Slightly to moderately irritating

Primary dermal irritation in rabbits: Non-irritating to slightly irritating

Dermal sensitization in guinea pigs: Non-sensitizer

2. *Genotoxicity*. The results from a battery of three *in vitro* and one *in vivo* genetic toxicity tests with AC 299263 show that this compound is not mutagenic or genotoxic.

Gene mutation - Ames: Negative

In vitro structural chromosomal aberration assay: Negative

In vitro CHO/HGPRT assay: Negative

In vivo micronucleus aberration assay: Negative

3. *Reproductive and developmental toxicity*. Results of these studies indicate that AC 299263 is not a reproductive toxicant, a developmental toxicant, or a teratogen.

Teratology in rats: NOEL (maternal) = 500 mg/kg/day NOEL (fetal/developmental) = 1000 mg/kg/day*

Teratology in rabbits: NOEL (maternal) = 300 mg/kg/day NOEL (fetal/developmental) = 900 mg/kg/day*

Two-Generation reproduction in rats: NOEL (parental and reproductive) = 20,000 ppm* (~ 1639 mg/kg/day)

* highest concentration tested

4. *Subchronic toxicity*. No treatment-related adverse effects were noted in subchronic toxicity studies at the highest doses tested.

28-Day dermal in rats: NOEL = 1000 mg/kg/day*

13-Week oral feeding in rats: NOEL = 20,000 ppm* (~ 1661 mg/kg/day)

90-Day oral feeding in dogs: NOEL = 40,000 ppm* (~ 1368 mg/kg/day)

* highest concentration tested

5. *Chronic toxicity*. The low order of mammalian toxicity of AC 299263 technical is also evident from the chronic dietary toxicity studies. These studies showed no increased mortalities or clinical signs of toxicity attributed to AC 299263 treatment. There was no gross or microscopic evidence of treatment-related lesions or carcinogenicity in the three chronic studies conducted in dogs, mice, or rats.

1-Year chronic toxicity in dogs: NOEL = 40,000 ppm* (~ 1,165 mg/kg/day)

18-Month chronic toxicity and carcinogenicity in mice: NOEL = 7,000 ppm* (~ 1201 mg/kg/day)

24-Month chronic toxicity and carcinogenicity in rats: NOEL = 20,000 ppm* (~ 1,167 mg/kg/day)

* highest concentration tested

6. *Animal metabolism*. The qualitative nature of the residues of AC 299263 in animals is adequately understood. Based on metabolism studies with goats, hens and rats, there is no reasonable expectation that measurable AC 299263-related residues will occur in meat, milk, poultry or eggs from the proposed use.

7. *Metabolite toxicology*. No toxicologically significant metabolites were detected in plant or animal metabolism studies. Therefore, no metabolites are required to be regulated.

8. *Endocrine effects*. Collective organ weights and histopathological findings from the two-generation rat reproductive study, as well as from the subchronic and chronic toxicity studies in two or more animal species, demonstrate no apparent estrogenic effects or effects on the endocrine system. There is no information available which suggests that AC 299263 would be associated with endocrine effects.

C. Aggregate Exposure

1. *Dietary exposure*.– (i) *Food*. The Theoretical Maximum Residue Concentrations (TMRC) of AC 299263 on or in soybean seed are:

0.000036 mg/kg b.w./day for the general U.S. population

0.000252 mg/kg b.w./day for non-nursing infants

0.000064 mg/kg b.w./day for children 1 to 6 years of age

0.000050 mg/kg b.w./day for children 7 to 12 years of age

VOL 61 ISS 249 DE 26 1996 UMI

These TMRC values are calculated from the proposed 0.1 ppm tolerance of AC 299263 on soybean seed using a "worse case" estimate of dietary exposure. This conservative estimate assumes that 100 percent of all soybeans are treated with AC 299263 and that the residues of AC 299263 on soybean seed are at the tolerance level (0.1 ppm). In fact, no apparent residues were observed in soybean seed at or above the 0.05 ppm limit of quantitation of the residue method.

There are no other established tolerances for AC 299263, and there are no other registered uses for AC 299263 on food or feed crops.

(ii) *Drinking water.* There is no available information about AC 299263 exposures via levels in drinking water. Studies verify that the use of AC 299263 in soybeans, at the proposed application rate of 0.04 lb. ai/acre, has a low potential for ground water contamination. Results from field dissipation studies showed rapid initial degradation of AC 299263 in soil, and additional studies indicate that AC 299263 is resistant to desorption with time. Furthermore, AC 299263 soil metabolites suggest a "moderate to strong" soil binding potential.

EPA has not established a Maximum Concentration Level for AC 299263 in drinking water under the Safe Drinking Water Act, because it is unlikely to be found in ground water. Because of the very low level of mammalian toxicity of parent AC 299263 and its two major soil metabolites, there is no health risk to humans from exposure to parent or soil metabolites in ground water. A Lifetime Health Advisory level for AC 299263 in drinking water calculated by EPA procedures would be 81.55 mg/liter, assuming a 20% relative contribution from water.

There is a reasonable certainty that no harm will result from dietary exposure to AC 299263, because dietary exposure to residues on food will use only a small fraction of the Reference Dose (including exposure of sensitive populations), and exposure through drinking water is expected to be insignificant.

2. *Non-dietary exposure.* There is no available information quantifying non-dietary exposure to AC 299263. However, based on the physical and chemical characteristics of the compound, the proposed use pattern and available information concerning its environmental fate, non-dietary exposure is expected to be negligible.

D. Cumulative Effects

AC 299263 belongs to the imidazolinone class of compounds. The herbicidal activity of the imidazolinones is due to the inhibition of acetohydroxy acid synthase (AHAS), an enzyme only found in plants. AHAS is part of the biosynthetic pathway leading to the formation of branched chain amino acids. Animals lack AHAS and this biosynthetic pathway. This lack of AHAS contributes to the extremely low toxicity of AC 299263 in mammals. Although other registered imidazolinones have a similar herbicidal mode of action, there is no information available to suggest that these compounds exhibit a similar toxicity profile in the mammalian system. Since AC 299263 is relatively non-toxic, cumulative effects of residues of AC 299263 and other compounds are not anticipated.

E. Safety Determination

1. *U.S. population.* Based on a RfD of 11.65 mg/kg b.w./day, supported by a NOEL of 40,000 ppm or 1165 mg/kg b.w./day from the 1-year dog study and a safety (uncertainty) factor of 100, the "worse case" estimate of chronic dietary exposure of AC 299263 in soybean seed will utilize approximately 0.0003 percent of the RfD for the general U.S. population. EPA generally has no concern for exposures below 100 percent of the RfD because the RfD represents the level at or below which daily aggregate dietary exposure over a lifetime will not pose appreciable risks to human health. The complete and reliable toxicity data and the conservative chronic exposure assumptions support the conclusion that there is a "reasonable certainty of no harm" from aggregate exposure to AC 299263 residues.

2. *Infants and children.* The conservative estimates, as described above, indicate that dietary exposure of AC 299263 on soybeans will utilize approximately 0.002 percent of the RfD for non-nursing infants, approximately 0.0006 percent of the RfD for children ages 1 to 6, and approximately 0.0004 percent of the RfD for children ages 7 to 12.

No developmental, reproductive, or fetotoxic effects were noted at the highest doses of AC 299263 tested in guideline studies. The only maternal effects in the rat and rabbit teratology studies were decreased body weights, body weight gains, and absolute and relative feed consumption in the higher dose groups of each study.

Based on the current toxicological data requirements, the data base relative to pre-and post-natal effects for children is complete, valid, and reliable. Results from the teratology studies and the two-generation reproduction study, which support NOELs for fetal/developmental effects or reproductive/offspring effects, respectively, equivalent to the highest concentrations tested, suggest that there is no additional sensitivity of infants and children to residues of AC 299263. Therefore, an additional safety (uncertainty) factor is not warranted, and the RfD of 11.65 mg/kg b.w./day, which utilizes a 100-fold safety factor, is appropriate to assure a reasonable certainty of no harm to infants and children.

F. International Tolerances

There is no Codex maximum residue level established for residues of AC 299263 on soybean seed.

II. Administrative Matters

Interested persons are invited to submit comments on this notice of filing. Comments must bear a notation indicating the document control number, [PF–680]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address give above from 8:30 a.m. to 4 p.m., Monday through Friday, except legal holidays.

A record has been established for this notice under docket number [PF–680] including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address

in "ADDRESSES" at the beginning of this document.

List of Subjects

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 17, 1996.

Peter Caulkins,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–F

[OPPT–59357; FRL–5581–7]

Certain Chemical; Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME–97–3. The test marketing conditions are described below.

DATES: This notice becomes effective December 19, 1996. Written comments will be received until January 10, 1997.

ADDRESSES: Written comments, identified by the docket number [OPPT–59357] and the specific TME number [TME 97–3] should be sent to: TSCA nonconfidential center (NCIC), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. NEB–607 (7407), 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD (202) 554–0551.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: ncic@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by [OPPT–59357]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on these notices may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found under "SUPPLEMENTARY INFORMATION".

FOR FURTHER INFORMATION CONTACT: Darlene Jones, New Chemicals Branch, Chemical Control Division (7405), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–447, 401 M St. SW., Washington, DC 20460, (202) 260–2279; jones.darlene@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to human health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury.

EPA hereby approves TME–97–3. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present an unreasonable risk of injury to human health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

A notice of receipt of the application was not published in advance of approval. Therefore, an opportunity to submit comments is being offered at this time. EPA may modify or revoke the test marketing exemption if comments are received which cast significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury.

The following additional restrictions apply to TME–97–3. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the Company shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. The applicant must maintain records of the quantity of the TME substance produced and the date of manufacture.

2. The applicant must maintain records of dates of the shipments to each customer and the quantities supplied in each shipment.

3. The applicant must maintain copies of the bill of lading that accompanies each shipment of the TME substance.

TME–97–3.

Date of Receipt: October 30, 1996.

Close of Review Period: December 20, 1996 (inclusive of a voluntary suspension). The extended comment period will close January 10, 1997.

Applicant: Confidential.

Chemical: (G) Ammonium Benzophenonecarboxylate.

Use: (G) Dispersing Agent.

Production Volume: Confidential.

Number of Customers: Confidential.

Test Marketing Period: Confidential.

Risk Assessment: EPA identified no significant human health or environmental concerns. Therefore, the test market activities will not present an unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury to health or the environment.

A record has been established for this notice under docket number OPPT–59357 (including comments and data submitted electronically as described above). A public version of this record, including printed page versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 12 noon to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in the TSCA nonconfidential information center (NCIC), Rm. NEB–607, 401 M St., SW., Washington, DC 20460. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official records for these notices, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

RIN 3046–AA45

Agency Information Collection Activities: Proposed Collection; Comments Request

AGENCY: Equal Employment Opportunity Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 5, the Commission announces that it intends to submit to the Office of Management and Budget (OMB) a request for an extension without change the existing collection requirements under 29 CFR Part 1602 *et seq.*, Recordkeeping and Reporting Requirement under Title VII and the ADA. The Commission is seeking public comments on the proposed extension.

DATES: Written comments on this notice must be submitted on or before February 24, 1997.

ADDRESSES: Comments should be submitted to Frances M. Hart, Executive Officer, Executive Secretariat, Equal Employment Opportunity Commission, 10th Floor, 1801 L Street, N.W., Washington, D.C. 20507. As a convenience to commentators, the Executive Secretariat will accept comments transmitted by facsimile ("FAX") machine. The telephone number of the FAX receiver is (202) 7663–4114. (This is not a toll free number.) Only comments of six or fewer pages will be accepted via FAX transmittal. This limitation is necessary to assure access to the equipment. Receipt of FAX transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Executive Secretariat staff at (202) 663–4078 (voice) or (202) 663–4074 (TDD). (These are not toll free telephone numbers.) Copies of comments submitted by the public will be available for review at the Commission's library, Room 6502, 1801 L Street, N.W., Washington, D.C. 20507 between the hours of 9:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Nicholas M. Inzeo, Deputy Legal Counsel, Thomas J. Schlageter, Assistant Legal Counsel or Stephanie D. Garner, Senior Attorney, at (202) 663–4670 or TDD (202) 663–7026. This notice is also available in the following formats: large print, braille, audio tape and electronic file on computer disk. Requests for this notice in an alternative format should be made to the Publications Center at 1–800–669–3362.

SUPPLEMENTARY INFORMATION: The Equal Employment Opportunity Commission (EEOC) enforces Title VII of the Civil Rights Act of 1964 and Title I of the Americans with Disabilities Act, which prohibit discrimination on the basis of race, color, religion, sex, national origin or disability. Sections 709(c) of Title VII and section 107(a) of the ADA authorize the EEOC to issue recordkeeping and reporting regulations that are deemed reasonable, necessary or appropriate. EEOC has promulgated recordkeeping regulations under those authorities that are contained in 29 CFR 1602. Those regulations do not require the creation of any particular records but generally require employers to preserve any personnel and employment records it makes or keeps for a period of one year. The EEOC seeks extension of these regulations without change.

Collection Title: Recordkeeping and Reporting under Title VII and the ADA.
OMB Control Number: 3046–0040.
Description of Affected Public: Employers with 15 or more employees are subject to Title VII and the ADA.
Responses: 627,000
Reporting Hours: One
Federal Cost: None
Number of Forms: None
Abstract: Section 709(c) of Title VII, 42 U.S.C. 2000e–8(c) and section 107(a) of the ADA, 42 U.S.C. 12117(a) require the Commission to establish regulations pursuant to which employers subject to those Acts shall make and preserve certain records to assist the EEOC in assuring compliance with the Acts' nondiscrimination requirements in employment.

This is a recordkeeping requirement. Any of the records maintained which are subsequently disclosed to the EEOC during an investigation are protected from public disclosure by the confidentiality provisions of section 706(b) and 709(e) of Title VII because they are incorporated by reference into the ADA at section 107(a).

Burden Statement: The EEOC estimates that there will be no increased burden on employers. All employers subject to Title VII are subject to the ADA, and the same EEOC records retention requirements are applicable to both. As all employers with 15 or more employees are already required by the EEOC's Title VII regulations on recordkeeping to maintain the same records, and the extension does not require reports or the creation or maintenance of new documents, there is no increased burden.

Pursuant to the Paperwork Reduction Act of 1995, and OMB regulation 5 CFR 1320.8(d)(1), the Commission solicits public comment to enable it to:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the Commission's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of the Commission's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Dated: December 19, 1996.

For the Commission.

Maria Borrero,

Executive Director.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 96–469]

Procedures for Bell Operating Company Applications Under New Section 271 of the Communications Act

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Commission has released a Public Notice which establishes various procedural requirements and policies relating to the Commission's processing of Bell operating company applications to provide in-region, interLATA services pursuant to new section 271 of the Communications Act of 1934, as amended, 47 U.S.C. § 271 (Act), Section 271 provides for applications on a State-by-State basis.

FOR FURTHER INFORMATION CONTACT: Florence Grasso, Common Carrier Bureau, Policy and Program Planning Division. (202) 418–1580.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

OMB Control Number: 3060–0756

Expiration Date: 06/30/97

Title: Procedures for Bell Operating Company Applications under New Section 271 of the Communications Act.

Respondents: Business or other for-profit; federal government; and state, local or tribal government.

Public reporting burden for the collection of information is estimated as follows:

Information collection	No. of respondents (approx.)	Annual hour burden per response	Total annual burden
Submission of applications by the BOCs	7	120 hours per application (7 (companies) × 7 (estimated filings each) × 120 (hours)).	5,880
Submission of written consultations by the State Regulatory Commissions.	49	120	5,880
Submission of written consultations by the Department of Justice.	1	4,900 (49 (states) × 100 (hours per state))	4,900

Total Annual Burden: 16,600.

Frequency of Response: One-time, unless an application must be resubmitted.

Estimated Costs Per Respondent: $0.

Needs and Uses: The Commission issued a Public Notice (FCC 96–469) on December 6, 1996 which established various procedural requirements and policies relating to the Commission's processing of Bell operating company applications to provide in-region, interLATA services pursuant to new section 271 of the Communications Act of 1934, as amended, 47 U.S.C. § 271(Act). Section 271 provides for applications on a State-by-State basis.

Synopsis of Public Notice

A. Application Filing Requirements

Applicants must file an original and six copies of each section 271 application. By "application," we mean (1) a stand-alone document entitled Brief in Support of Application by [Bell company name] for Provision of In-Region, InterLATA Services in [State name] and (2) any supporting documentation. The content of both parts of the application is addressed later in this Public Notice.

The Applicant's Brief in Support shall also be submitted on a 3.5 inch computer diskette formatted in WordPerfect 5.1. If electronically available, the supporting documentation must be included on the computer diskette as well. With respect to supporting materials that are not provided on diskette, the applicant should include a note at the end of the electronic version of the Brief in Support indicating that such materials are on file with the Commission. All filings submitted on diskette will be posted on the internet for public inspection at http://www.fcc.gov. We also urge the applicant to post its electronic filings on its own internet home page and to inform us of such posting in the Brief in Support.

If the applicant wants each Commissioner to receive a copy of the section 271 application, the applicant should file an original plus eleven copies. The original, all copies, and the diskette should be sent to the Office of the Secretary, Federal Communications Commission, Washington, D.C. 20554.Applications will be available for public inspection during regular business hours in the Reference Center of the Federal Communications Commission, Room 239, 1919 M Street, N.W., Washington, D.C. 20554. The applicant must also submit a copy of the application simultaneously to (i) the Department of Justice c/o Donald J. Russell, Telecommunications Task Force, Antitrust Division, Room 8205, 555 Fourth Street, NW., Washington, D.C. 20001, (ii) the relevant State regulatory commission, and (iii) the Commission's copy contractor, ITS, Inc., 2100 M Street, N.W., Suite 140, Washington, D.C. 20037, tel. (202) 857–3800.

B. Preliminary Matters

Section 271(d)(3) states that "[t]he Commission shall not approve the authorization requested in an application * * * unless it finds" three specified conditions to be met. We expect that a section 271 application, as originally filed, will include all of the factual evidence on which the applicant would have the Commission rely in making its findings thereon. In the event that the applicant submits (in replies or ex parte filings) factual evidence that changes its application in a material respect, the Commission reserves the right to deem such submission a new application and start the 90-day review process anew. All factual assertions made by any applicant (or any commenter) must be supported by credible evidence or will not be entitled to any weight.

Because the statute affords us only 90 days to review the application, we encourage the applicant to meet with likely objectors in order to attempt to narrow the issues in dispute. As noted in Section C of this Public Notice, we require that either the application itself or a supplemental statement filed within five days after the application contain a signed statement that describes efforts that the applicant has made to narrow the issues in dispute and the results of those efforts.

C. Content of Applications

Applications shall conform to the Commission's general rules relating to applications. As noted above, applications shall have two parts: (1) a Brief in Support of Application by [Bell company name] for Provisions of In-Region, InterLATA Services in [State name] and (2) any supporting documentation, such as records of State proceedings, interconnection agreements, affidavits, etc. The Brief in Support may not exceed 100 pages. There is no page limit, however, on supporting documentation.

The Brief in Support should contain the following items:

(a) a table of contents;

(b) a concise summary of the substantive arguments presented in the Brief;

(c) a statement identifying all of the negotiations and/or arbitrations under section 252, including the dates on which the agreements were approved under section 252 and the status of any federal court challenges to the agreements pursuant to section 252(e)(6);

(d) a statement identifying how the applicant meets the requirements of section 271(c)(1), including a list of the specific agreements on which the applicant bases its application if it

intends to rely on a subset of the list set forth in item (c) above;

(e) a statement summarizing the status and findings of the relevant State proceedings (if any) examining the applicant's compliance with section 271 or portions thereof;

(f) a statement describing the efforts the applicant has made to meet with likely objectors to narrow the issues in dispute and the results of those efforts (as indicated above, this statement may be filed separately from the application; but not later than five days after the filing of the application);

(g) all legal and factual arguments that three requirements of section 271(d)(3) have been met, supported as necessary with selected excerpts from the supporting documentation (with appropriate citations) (Item (g) is obviously the core item of the Brief in Support, and may be quite lengthy. It may help to divide it, therefore, into three subsections, one corresponding to each of three requirements set forth in section 271(d)(3));

(h) an Anti-Drug Abuse Act certification as required by 47 CFR § 1.2002; and

(i) an affidavit signed by an officer or duly authorized employee certifying that all information supplied in the application is true and accurate.

The name of the applicant, the date the application is filed, and the State to which it relates should appear in the upper right-hand corner of each page of the Brief in Support.

As for the supporting documentation, we require that it contain, at a minimum, the complete public record, as it exists on the date of filing, of the relevant State proceedings (if any) examining the applicant's compliance with section 271 or portions therof. In addition, supporting documentation, including any records of interconnection agreements, affidavits, etc., shall be provided in appendices, separated by tabs and divided into volumes as appropriate.

D. Comments by Interested Third Parties

After an application has been filed, the Common Carrier Bureau will issue a public notice (Initial Public Notice) establishing the specific due dates for the various filings set forth below. Simultaneously with the issuance of the Initial Public Notice, the Bureau will notify the Department of Justice and the affected State of our receipt of the application. Interested third parties will have approximately 20 days from the issuance of the Initial Public Notice to file comments in opposition or support, which may not exceed 50 pages. The specific due date for comments will be set forth in the Initial Public Notice. The name of the commenter, the name of the applicant, and the State to which the application relates should appear in the upper right-hand corner of each page. Supporting documentation is welcome without page limits. To file comments (or any other filing set forth below) in a section 271 proceeding, commenters need to follow the applicable procedures outlined in section A of this Public Notice.

E. State Commission and Department of Justice Written Consultations

Many State commissions have already commenced proceedings to examine Bell company compliance with section 271 or portions thereof. In light of this fact and in light of the shortness of the 90-day period for deciding a section 271 application, we require that the relevant State commission file any written consultation not later than approximately 20 days after the issuance of the Initial Public Notice. The specific due date for the State's written consultation will be set forth in the Initial Public Notice. The relevant State commission shall also follow the applicable procedures outlined in section A of this Public Notice.

Any written consultation by the Department of Justice (which, by the Act's express terms, must become part of the record) must be filed not later than approximately 35 days after the issuance of the Initial Public Notice. The specific due date for the Department's written consultation will be set forth in the Initial Public Notice. The Department of Justice shall also follow the applicable procedures outlined in section A of this Public Notice.

The State commission and the Department of Justice are also welcome to file a reply pursuant to section F of this Public Notice, as well as written *ex parte* submissions in accordance with section G of this Public Notice.

F. Replies

All participants in the proceeding—the applicant, interested third parties, the relevant State commission, and the Department of Justice—may file a reply to any comment made by any other participant. Such replies are limited to 35 pages and will be due approximately 45 days after the Initial Public Notice is issued. The specific due date for replies will be set forth in the Initial Public Notice. Reply comments may not raise new arguments that are not directly responsive to arguments other participants have raised, nor may the replies be repetitive of arguments made by that party in the application or initial comments. The name of the submitter, the name of the applicant (if different), and the State to which the application relates should appear in the upper right-hand corner of each page. Supporting documentation is welcome without page limits.

G. Ex Parte Rules—Non-Restricted Proceeding

Because of the broad policy issues involved, section 271 application proceedings initially will be considered non-restricted proceedings. Accordingly, *ex parte* presentations will be permitted, provided they are disclosed in conformance with Commission *ex parte* rules. Because of the statutory timeframe, however, we strongly encourage parties to set forth their views comprehensively in the formal filings specified above (e.g., the Brief in Support, oppositions, supporting comments, etc.) and not to rely on subsequent *ex parte* presentations. In any event, parties may not file more than a total of 20 pages of written *ex parte* submissions. This 20-page limit does not include: (1) Written *ex parte* submissions made solely to disclose an oral *ex parte* contact; (2) written material submitted at the time of an oral presentation to Commission staff that provides a brief outline of the presentation; (3) written material filed in response to direct requests from Commission staff; or (4) written factual exhibits. *Ex parte* submissions in excess of the 20-page limit will not be considered part of the record.

For purposes of these proceedings, and in light of the explicit role the Act give to the Department of Justice and the State commissions under section 271, any oral *ex parte* presentations from the Department of Justice and the relevant State commission will be deemed to be exempt *ex parte* presentations. To the extent that we obtain through such oral *ex parte* presentations new factual information on which we may rely in our decision-making process, the party submitting the information (the Department of Justice or the relevant State commission) shall prepare a summary for inclusion in the record in accordance with Commission rules, unless such a summary is being prepared by Commission staff. We also waive any page limits for written *ex parte* submissions by the Department of Justice or the relevant State commission.

Notwithstanding the above, the Commission may, by subsequent public notice, prohibit all communication with Commission personnel regarding the application during a seven-day period preceding the anticipated release date of the Commission's order regarding the

application. On this last point, we note that the notice and comment and effective date provisions of the Administrative Procedure Act are not applicable to these procedural requirements and policies. See 5 U.S.C. § 553 (b), (d).

This Public Notice contains new information collections subject to the Paperwork Reduction Act of 1995. Accordingly, we are presently requesting emergency approval from the Office of Management and Budget for these collections. When the Commission receives such approval, it will issue a Public Notice to that effect, after which the procedural requirements and policies contained herein will become effective.

Federal Communications Commission.

LaVera F. Marshal,

Acting Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act, including whether the acquisition of the nonbanking company can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 21, 1997.

A. Federal Reserve Bank of Philadelphia (Michael E. Collins, Senior Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. Fulton Financial Corporation, Lancaster, Pennsylvania; to acquire 100 percent of the voting shares of The Woodstown National Bank & Trust Company, Woodstown, New Jersey.

B. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. The Colonial BancGroup, Inc., Montgomery, Alabama; to merge with Shamrock Holding, Inc., Evergreen, Alabama, and thereby indirectly acquire The Union Bank, Evergreen, Alabama.

C. Federal Reserve Bank of Minneapolis (Karen L. Grandstrand, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. BankWest Financial, Kalispell, Montana; to become a bank holding company by acquiring 100 percent of the voting shares of BankWest, National Association, Kalispell, Montana.

Board of Governors of the Federal Reserve System, December 19, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 96–32741 Filed 12–24–96; 8:45 am]

BILLING CODE 6210–01–F

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR Part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.25 of Regulation Y (12 CFR 225.25) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act, including whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue

concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 10, 1997.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. Compass Bancshares, Inc., Birmingham, Alabama; Compass Banks of Texas, Inc., Birmingham, Alabama; Compass Bancorporation of Texas, Inc., Wilmington, Delaware; to acquire Horizon Bancorp, Inc., Austin, Texas, and Horizon Bank & Trust, SSB, Austin, Texas, and thereby engage in operating a savings association, pursuant to § 225.25(b)(9) of the Board's Regulation Y. These activities will be conducted throughout the State of Texas.

Board of Governors of the Federal Reserve System, December 19, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

[Docket No. R–0953]

Fair Credit Reporting

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice; request for comments.

SUMMARY: The Board solicits comment on issues to be addressed in a study concerning the public availability and use of social security numbers and other sensitive identifying information about consumers. The Board's study is required by the Economic Growth and Regulatory Paperwork Reduction Act of 1996.

DATES: Comments must be received on or before January 31, 1997.

ADDRESSES: Comments should refer to Docket No. R–0953, and may be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, DC 20551. Comments also may be delivered to Room B–2222 of the Eccles Building between 8:45 a.m. and 5:15 p.m. weekdays, or to the guard station in the Eccles Building courtyard on 20th Street, N.W. (between Constitution avenue and C Street) at any time. Comments may be inspected in Room MP–500 of the Martin Building between 9:00 a.m. and 5:00 p.m. weekdays, except as provided in 12 CFR 261.8 of the Board's rules regarding the availability of information.

FOR FURTHER INFORMATION CONTACT: Jane Jensen Gell or Sheilah Goodman, Staff Attorneys, Division of Consumer and Community Affairs, at (202) 452–2412 or (202) 452–3667; for users of Telecommunications Device for the Deaf (TDD) *only*, please contact Dorothea Thompson at (202) 452–3544.

SUPPLEMENTARY INFORMATION:

I. Background

On September 30, 1996, the President signed into law the Economic Growth and Paperwork Reduction Act of 1996 (Pub. L. 104–208, 110 Stat. 3009) (the 1996 Act). The 1996 Act amends several consumer credit laws, including the Fair Credit Reporting Act (FCRA) (15 U.S.C. 1681). An amendment to the FCRA directs the Board of Governors of the Federal Reserve System (Board), in consultation with the Federal Trade Commission (the Commission) and the federal financial regulatory agencies, to conduct a study to determine the availability to the public of sensitive identifying information about consumers, the possibility that such information could be used for financial fraud, and the potential for fraud or risk of loss, if any, to insured depository institutions. By March 31, 1997, the Board must report the results of the study to the Congress, including any suggestions for legislative change. The Board solicits the comment of interested parties on these issues. The comments received will be used in the Board's study. Because of the short time frame the Congress gave the Board to study this matter, all comments must be received by January 31, 1997.

II. Availability of Sensitive Consumer Information

The Congress became concerned about the availability of sensitive identifying information about consumers after a widely-publicized incident in which a large database service offered personal information for sale—including individuals' social security numbers— from one of its electronic databases. After a few days, the service discontinued the practice of making social security numbers available but continued to permit users to search for information by social security number. At about the same time, members of Congress learned of situations in which such identifying information was being used for financial fraud. In addition, testimony at a recent Federal Trade Commission hearing highlighted how easy it is to obtain identifying information about a consumer and to use that information to fraudulently receive credit in the consumer's name—without the knowledge of the consumer or the credit granting institution. This practice is often referred to as "identity theft." Armed with such information, criminals can request and receive credit or negotiate checks in the consumer's name, with devastating results for the consumer.

Sometimes identity theft begins with the use of publicly available information. A government employee who participated in the Commission hearings related such an incident. General information about this witness was listed in a publicly-available government directory. Using that information, an unknown individual was able to obtain a copy of the employee's college transcript, which showed his social security number. The individual was able subsequently to get a copy of the employee's birth certificate using the social security number. The thief then had all he needed to "assume" the employee's identity and use the information to commit fraud.

III. Request for Comment

In response to concerns about the availability of identifying information about consumers, and anecdotal evidence suggesting an increase in identity theft and financial fraud, the Congress has directed the Board to conduct a study regarding the availability to the public of sensitive information used to identify consumers. The Board is to determine whether there are organizations "engaged in the business of making sensitive consumer identification information, including social security numbers, mothers' maiden names, prior addresses and dates of birth, available to the general public." To help make this determination, the Board solicits comment on the following issues:

1. What is or should be considered sensitive consumer information for purposes of the study?

2. What information is currently used, or might be used in the future, to identify individuals, and what types of public or private organizations, repositories, or databases make such

information available to certain entities or to the general public?

3. How is the information obtained (for example, by phone, through the mail, or on the Internet), what costs are associated with obtaining the information, what are the specific uses for which the information is obtained, and does the furnisher place any restrictions on the distribution or use of this information on the purchaser? If so, how does the furnisher ensure that use of the data is limited to its intended purposes?

4. Is the compilation, sale, and use of sensitive identifying information about consumers subject to industry guidelines or regulations, and if not, what guidelines, regulatory or legal requirements might be appropriate?

If sensitive information about consumers is available, the Board must determine whether the availability of the information creates "undue potential for fraud and risk of loss to insured depository institutions." In order to make this assessment, the Board seeks comment on the following issues:

5. How is sensitive identifying information about consumers used for financial fraud (for example, to obtain a credit card in another person's name)?

6. What types of identifying information about consumers are most meaningful in granting and verifying credit, and how can consumers, financial institutions, and others control the fraudulent use of this information?

7. What magnitude of financial loss do institutions attribute to fraudulent use of consumer information?

Finally, if the Board determines that additional laws are needed to lessen the risks of fraud and loss to the banking system, the Board is directed to make legislative recommendations to the Congress. Accordingly, the Board is seeking comment on the following issues:

8. What, if any, legislative changes should be considered to help protect sensitive identifying information about consumers?

9. What, if any, legislative changes should be considered to limit the use of such information and reduce the risk of fraud or other loss to the banking system?

IV. Form of Comment Letters

Comment letters should refer to Docket No. R–0953, and, when possible, should use a standard courier typeface with a type size of 10 or 12 characters per inch. This will enable the Board to convert the text to machine-readable form through electronic scanning, and will facilitate automated retrieval of comments for review. Also, if accompanied by an original document in paper form, comments may be submitted on 3½ inch or 5¼ inch computer diskettes in any IBM-compatible DOS-based format.

By order of the Board of Governors of the Federal Reserve System, December 17, 1996.

William W. Wiles,

Secretary of the Board.

[FR Doc. 96–32495 Filed 12–24–96; 8:45 am]

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Regional Offices; Statement of Organization, Functions, and Delegations of Authority

This notice amends Part K of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (DHHS), Administration for Children and Families (ACF) as follows: Chapter KD, The Regional Offices of the Administration for Children and Families (61 FR 50029), as last amended, September 24, 1996. This Notice reflects the organizational changes for Regions 4, 8 and 9 and the reorganizations for Region 3 and X.

I. Amend Notice 61 FR 50029, dated September 24, 1996, Roman numeral I, 13th line to read "amended, May 1, 1995."

II. Amend Chapter KD as follows:

a. KD.10 Organization. Delete in its entirety and replace with the following:

KD.10 Organization. Regions 4, 8 and 9 are organized as follows:

Office of the Regional Administrator (KD8A)
Office of the Regional Hub Director (KD4A and KD9A)
Office of Financial Operations (KD4B, KD8B and KD9B)
Office of Family Security (KD4C, KD8C and KD9C)
Office of Family Supportive Services (KD4D, KD8D and KD9D)

b. KD.20 Functions. Delete Paragraph A in its entirety and replace with the following:

KD.20 Functions (For Region 8). A. The Office of the Regional Administrator is headed by a Regional Administrator who reports to the Assistant Secretary for Children and Families. In addition, the Office of the Regional Administrator has a Deputy Regional Administrator who reports to the Regional Administrator. The Office provides executive leadership and direction to state, county, city, territorial and tribal governments, as well as public and private local grantees to ensure effective and efficient program and financial management. It ensures that these entities conform to federal laws, regulations, policies and procedures governing the programs, and exercises all delegated authorities and responsibilities for oversight of the programs. The Office takes action to approve the state plans and submits recommendations to the Assistant Secretary for Children and Families concerning state plan disapproval.

The Office contributes to the development of national policy based on regional perspectives on all ACF programs. It oversees ACF operations, the management of ACF regional staff; coordinates activities across regional programs; and assures that goals and objectives are met and departmental and agency initiatives are carried out. The Office alerts the Assistant Secretary for Children and Families to problems and issues that may have significant regional or national impact. It represents ACF at the regional level in executive communications within ACF, with the HHS Regional Director, other HHS operating division, other federal agencies, and public or private local organizations representing children and families.

Within the Office of the Regional Administrator, an Administrative staff assists the Regional Administrator and Deputy Regional Administrator in providing day-to-day support for regional administrative functions, including budget, internal systems, employees relations, and human resource development activities. The Staff develops and implements the regional planning process. It tracks, monitors and reports on regional progress in the attainment of ACF national goals and objectives. The Staff coordinates public awareness activities, information and education campaign in accordance with the ACF Office of Public Affairs and in conjunction with the HHS Regional Director. It assists the Regional Administrator in management of cross-cutting initiatives and activities among the regional components, and ensures effective and efficient management of internal automation processes.

c. After the end of KD2.20 Functions (60 FR 21211, 05/01/95), Paragraph D, and before KD5.10 Organization (60 FR 34284, 06/30/95), insert the following:

KD3.10 Organization. The Administration for Children and Families, Region 3, is organized as follows: Office of the Regional

Administrator (KD3A) Office of Program and Administrative Support (KD3B) Office of Family Services (KD3C) Office of Child Development and Developmental Disabilities (KD3D).

KD3.20 Functions. A. The Office of the Regional Administrator is headed by a Regional Administrator. The Office provides executive leadership and directives to state, county, city, territorial and tribal governments, as well as public and private local grantees to ensure effective and efficient program and financial management. It ensures that these entities conform to federal laws, regulations, policies and procedures governing the programs, and exercises all delegated authorities and responsibilities for oversight of the programs.

The Office takes action to approve state plans and submits recommendations to the Assistant Secretary for Children and Families concerning state plan disapproval, where applicable. The Office contributes to the development of national policy based on perspectives on all ACF programs. It oversees ACF operations and the management of ACF regional staff; coordinates activities across regional programs; and assures that goals and objectives are met and departmental and agency initiatives are carried out. The Office alerts the Assistant Secretary for Children and Families to problems and issues that may have significant regional or national impact. The Office represents ACF at the regional level in executive communications without ACF, with the HHS Regional Director, other HHS operating divisions, other federal agencies, and public or private local organizations representing children and families.

B. The Office of Program Administrative Support is headed by an Assistant Regional Administrator who reports to the Regional Administrator. The Office assists the Regional Administrator in providing day-to-day support for regional administrative functions, including budget, performance management, procurement, property management, financial management, external and internal systems, statistical analysis, employee relations and human resource development activities.

The Office provides expertise in business and other non-programmatic areas of grant administration and helps ensure that states and grantees fulfill requirements of law, regulations and administrative policies. It establishes regional financial management priorities. The Office provides cost allocation and financial support to the Office of Family Services and the Office of Child Development and Developmental Disabilities.

The Office oversees the management and coordination of automated systems in the region, and provides data management and statistical analysis support to all Regional Office components. Data management responsibilities include the development of automated system applications to support and enhance program, fiscal, administrative and quality control operations, and the compilation and analysis of data on demographic and service trends that assist in monitoring and oversight responsibilities. Statistical analysis functions include the review of state and federal sampling procedures. The Office is responsible for the effective and efficient management of internal ACF automation processes and for oversight of state systems projects for ACF programs.

In coordination with other Regional Office components, it monitors state systems projects and is the focal point for technical assistance to states and grantees on the development and enhancement of automated systems. The Office represents the Regional Administrator on administrative matters and on internal and State systems matters with ACF central office, states, contractors and grantees. It alerts the Regional Administrator to problems or issues that have significant implications for functional areas under its jurisdiction.

C. The Office of Family Services is headed by an Assistant Regional Administrator who reports to the Regional Administrator. The Office is responsible for providing centralized management, financial management services, and technical administration of ACF formula, block and entitlement programs such as Aid to Families with Dependent Children (AFDC), Child Support Enforcement (CSE), Job Opportunities and Basic Skills Training (JOBS). Foster Care and Adoption Assistance, Child Welfare, Family Preservation and Support Services, Child Abuse and Neglect and the discretionary Runaway and Homeless Youth Program.

The Office provides policy guidance to state, county, city or town and tribal governments and public and private organizations to assure consistent and uniform adherence to federal requirements governing formula and entitlement programs. State plans are reviewed and recommendations concerning state plan approval or disapproval are made to the Regional Administrator. The Office provides technical assistance to entities responsible for administering these programs resolve identified problems, ensures that appropriate procedures and practices are adopted, monitors the program to ensure their efficiency and effectiveness, establishes regional financial management priorities and reviews cost allocation plans, and monitors state systems projects for the CSE, AFDC, Child Welfare, and JOBS programs.

The Office provides financial management services for ACF formula and entitlement grants in the region as well as for the Runaway and Homeless Youth Program which is a discretionary grant. The Office issues discretionary grant awards based on a review of project objectives, budget projections, and proposed funding levels. The Office also reviews cost estimates and reports for ACF entitlement and formula grant programs and recommends funding levels. The Office performs systematic fiscal reviews and makes recommendations to the Regional Administrator to approve, defer or disallow claims for federal financial participation in ACF formula and entitlement grant programs. As applicable, recommendations are made on the clearance and closure of audits, paying particular attention to financial management deficiencies that decrease the efficiency and effectiveness of the ACF programs and taking steps to monitor the resolution of such deficiencies. The Office represents the Regional Administrator in dealing with the ACF Program Offices on all program and financial policy matters under its jurisdiction. Alerts or early warnings are provided to the Regional Administrator regarding problems or issues that may have significant implications for the programs.

D. The Office of Child Development and Developmental Disabilities is headed by an Assistant Regional Administrator who reports to the Regional Administrator. The Office is responsible for providing centralized management, financial management services, and technical administration of ACF discretionary and formula grant programs such as Head Start, Child Care and Developmental Disabilities programs.

In that regard, the Office provides policy guidance to state, county, city or town and tribal governments and public and private organizations to assure consistent with uniform adherence to federal requirements. The Office provides technical assistance to entities responsible for administering these programs to ensure that appropriate procedures and practices are adopted,

VOL 61 ISS 249 DE 26 1996 UMI

and monitors the programs to ensure their efficiency and effectiveness.

The Office performs systematic fiscal reviews; makes recommendations to the Regional Administrator to approve or disallow costs under ACF discretionary grant programs; and makes recommendations to the Regional Administrator concerning state plan approval or disapproval, as applicable. The Office issues discretionary grant awards based on a review of project objectives, budget projections, and proposed funding levels. As applicable, recommendations are made on the clearance and closure of audits of grantee programs, paying particular attention to financial management deficiencies that decrease the efficiency and effectiveness of the ACF programs and taking steps to monitor the resolution of such deficiencies. The Office oversees the management and coordination of office automation systems in the region such as the PC Cost and HS Cost systems for budget analysis on Head Start Applications and monitors grantee systems projects such as the Head Start Program Information Report, Head Start Management Tracking System and the Head Start Bulletin Board. The Office represents the Regional Administrator in dealing with ACF program offices on all program policy and financial matters under its jurisdiction. Alerts or early warnings are provided to the Regional Administrator regarding problems or issues that may have significant implications on the programs.

d. After the end of KD7.20 Functions (61 FR 3937, 02/02/96), Paragraph D, insert the following:

KDX.10 Organization. The Administration for Children and Families, Regional X, is organized as follows: Management Team (KDXA) Service Delivery Teams (KDXE) Support Teams (KDXF)

KDX.20 Functions. A. The Management Team consists of the Regional Administrator, a Deputy Regional Administrator, and three Supervisory Program Specialists who report directly to the Deputy. In addition to being a team member, the Regional Administrator is responsible for alerting the Assistant Secretary for Children and Families to problems and issues that may have significant regional or national impact.

The Team provides executive leadership to state, county, city, and tribal governments, as well as public and private local grantees to ensure effective, efficient, results-oriented program and financial management. ACF's primary goal is to assist vulnerable and dependent children and families to achieve economic independence, stability, and self-reliance. The Team partners with state, local, and tribal organizations to promote adherence to federal laws, regulations, policies and procedures governing the programs, and exercises all delegated authorities and responsibilities for oversight of the programs. The Team takes action to approve state and tribal plans and submits recommendations to the Assistant Secretary for Children and Families concerning plan disapproval.

The Team contributes to the development of national policy based on regional perspectives on all ACF programs. It oversees ACF operations; manages ACF regional staff; coordinates activities across regional programs; and assures that goals and objectives are met and departmental and agency initiatives are carried out.

The Team represents ACF at the regional level in executive communications within ACF, the HHS Regional Director, other HHS operating divisions, other federal agencies, Tribal and Native American Organizations, and public or private local organizations representing children and families.

In order to ensure that agency goals are accomplished, the Management Team provides leadership to grantees through a staff organized in Service Delivery Teams. ACF programs and functions are grouped within teams according to current ACF programs and/or initiatives. Each team is charged with achieving measurable progress towards ACF goals through their work with state, local, and tribal grantees, the public, other federal agencies, and internally within the Department. The regional team structure is designed to allow ACF to respond quickly in a dynamic and changing environment to achieve ACF and HHS goals.

B. The Service Delivery Teams (SDTs) report directly to the Management Team. The SDTs are responsible for providing centralized management and technical administration of ACF formula, block, discretionary, and entitlement grants and programs to assist families achieve economic independence and self-sufficiency, and to promote safe, healthy, and permanent environments in which children can grow. The SDTs review and recommend approval or disapproval of State and tribal plans to the Management Team. SDTs recommend issuance of certain grant awards based on a review of project objectives, budget projections, and proposed funding levels.

The SDTs provide policy guidance to state, local, and tribal governments, and public and private organizations to foster consistent and uniform adherence to federal requirements governing formula, block, and entitlement programs. The SDTs provide technical assistance to states, grantees, and tribes to resolve identified problems; ensure that appropriate procedures and practices are adopted; develop and implement outcome-based performance measures; and to monitor the programs to ensure their efficiency and effectiveness.

The SDTs represent the Management Team in dealing with the ACF Program Offices on all program and policy matters under their jurisdiction. Alerts or early warnings are provided to the Management Team regarding problems or issues that may have significant implications for the programs.

C. The Support Teams provide administrative and management support to the Regional Administrator and Management Team. Members of the Support Teams report directly to the Regional Administrator or a member of the Management Team. Functions within the Team include day-to-day operational management of regional administrative functions such as, budget, performance management, procurement, property management, employee relations, human resource development activities, planning and coordination, and office automation systems.

The Team includes experts in cash assistance and supportive services programs who serve as resources to all teams on issues which cross-cut the organization, such as legislative policy up-dates, partnership agreements, result measurements, policy guidance, and monitoring state systems projects for ACF programs.

Team members also provide leadership in regional financial management matters to the Service Delivery Teams and the Management Team, including reviewing cost estimates and reports for ACF grant programs, recommending funding levels, and performing systematic fiscal reviews. Approve grant awards based on a review of project objectives, budget projections, and approved funding plans. Provide funds accounting for discretionary grant programs. Establish regional financial management priorities and review cost allocation plans.

Dated: December 18, 1996.

Olivia A. Golden,

Acting Assistant Secretary for Children and Families.

BILLING CODE 4184–01–M

Agency Information Collection Activities: Proposed Collection: Comment Request

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, has submitted to the Office of Management and Budget (OMB) the following proposals for the collection of information. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. *Type of Request:* Revision of a currently approved collection; *Title of Information Collection:* Medicaid Management Information System (MMIS); *Form No.:* HCFA–R–0004; *Use:* The Medicaid Management Information System (MMIS) is a State-operated, Federally mandated computer system used for automated Medicaid claims processing and information retrieval for program management. Data elements represent the Federally imposed recordkeeping requirements of MMIS; Frequency: Annually; *Affected Public:* Business or other for profit; State, local, or tribal government; *Number of Respondents:* 50; *Total Annual Responses:* 50; *Total Annual Hours:* 2,206,250.

To request copies of the proposed paperwork collection referenced above, E-mail your request, including your address, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections should be sent within 60 days of this notice directly to the HCFA Paperwork Clearance Officer designated at the following address: HCFA, Office of Financial and Human Resources, Management Analysis and Planning Staff, Attention: Linda Mansfield Room C2–26–17, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Dated: December 17, 1996.

Edwin J. Glatzel,

Director, Management Analysis and Planning Staff, Office of Financial and Human Resources, Health Care Financing Administration.

[FR Doc. 96–32823 Filed 12–24–96; 8:45 am]

BILLING CODE 4120–03–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4120–N–03]

Assessment of the Reasonable Revitalization Potential of Certain Public Housing Required by Law; Amendment to Timeframes

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: On September 26, 1996, the Department published a notice which implements section 202 of the Omnibus Consolidated Rescissions and Appropriations Act of 1996. Section 202 requires PHAs to identify certain distressed public housing developments that will be required to be replaced with tenant-based assistance if they cannot be revitalized by any reasonable means. In that eventuality, households in occupancy would be offered tenant-based or project-based assistance and would be relocated—if sufficient housing will not be maintained, rehabilitated, or replaced on the current site—to other decent, safe, sanitary, and affordable housing which is, to the maximum extent practicable, housing of their choice. This notice amends the timeframes that the Department set in the September 26, 1996 notice for accomplishing the standards necessary for compliance with section 202. The timeframes are being amended because comments on the September 26, 1996 notice were due by November 25, 1996, and the Department wishes to (1) adequately respond to all comments and (2) give PHAs sufficient time to comply with the Section 202 requirements, including any revisions. PHAs should position themselves to respond in a timely manner by beginning to collect the necessary data. The same data is likely to be required in order to comply with Section 202, regardless of any possible changes to the notice. Except for the amendments to the timeframes made by this notice, all of the requirements of the September 26, 1996 notice continue to be in effect.

EFFECTIVE DATE: December 26, 1996.

FOR FURTHER INFORMATION CONTACT: Rod Solomon, Senior Director for Policy and Legislation, Public and Indian Housing, Room 4116, Department of Housing and Urban Development, 451 7th Street, SW, Washington, DC 20410, telephone (202) 708–0713. For hearing or speech impaired persons, this number may be accessed via TTY by contacting the Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: General Requirement and Scope

Section 202 of the Omnibus Consolidated Rescissions and Appropriations Act of 1996 (Pub.L. 104–134, 110 STAT. 1321–279, 42 U.S.C. 1437l note) ("OCRA") requires PHAs to identify certain distressed public housing developments that will be required to be addressed. Households in occupancy would be offered tenant-based or project-based assistance (that can include other public housing units) and would be relocated—if sufficient housing will not be maintained, rehabilitated, or replaced on the current site—to other decent, safe, sanitary, and affordable housing which is, to the maximum extent practicable, housing of their choice. After residents are relocated, the distressed developments (or affected buildings) for which no reasonable means of revitalization exists will be removed from the public housing inventory.

On September 26, 1996, at 61 FR 50632, the Department published a notice to implement section 202 of OCRA. The notice established the standards for conducting the assessments and the conversion plan. It also set forth certain timeframes for meeting those standards. This notice amends the timeframes set in that notice in order to be equitable to all of the housing authorities that will be assessed. The following new deadlines for submissions to HUD field offices, therefore, are scheduled:

Accomplish Standards A to C by January 31, 1997
(was December 29, 1996)

Accomplish Standard D by March 31, 1997
(was December 29, 1996)

Accomplish Standard E by June 30, 1997
(was February 27, 1997)

Submit conversion plan by September 26, 1997
(was August 26, 1997)

fFor clarification of the provision in the September 26, 1996 notice regarding the PHAs' requirement to develop their plans in consultation with affected public housing residents, PHAs should

provide, as an initial step, copies of their submissions for Standards A to C to the appropriate tenant councils and resident groups before or immediately after these submissions are provided to HUD.

Dated: December 19, 1996.

Michael B. Janis,

General Deputy Assistant Secretary for Public and Indian Housing.

[FR Doc. 96–32768 Filed 12–20–96; 12:32 pm]

BILLING CODE 4210–33–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

California Desert District Advisory Council; Renewal

AGENCY: Bureau of Land Management, Interior.

ACTION: California Desert District Advisory Council—notice of renewal.

SUMMARY: This notice is published in accordance with Section 9(a)(2) of the Federal Advisory Committee Act of 1972 Public Law 92–463. Notice is hereby given that the Secretary of the Interior has renewed the Bureau of Land Management's (BLM) California Desert District Advisory Council.

The purpose of the Council is to provide counsel and advice to the BLM District Manager concerning planning and management of the public land resources within the BLM California Desert District and implementation of the comprehensive, long-range plan for the management, use, development, and protection of the public lands within the California Desert Conservation Area.

FOR FURTHER INFORMATION CONTACT: Melanie Wilson, Intergovernmental Affairs (600), Bureau of Land Management, 1620 L Street, N.W., Room 1050, Washington, D.C. 20240, telephone (202) 452–0377 or (202) 208–7701.

Dated: December 9, 1996.

Bruce Babbitt,

Secretary of the Interior.

BILLING CODE 4310–84–P

Fish and Wildlife Service

Endangered and Threatened Species Permit Applications

ACTION: Notice of receipt of applications.

SUMMARY: The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*).

Permit No. 820730

Applicant: Robert Sivinski, Santa Fe, New Mexico

The applicant requests a permit to collect new populations of all federally listed plant species that potentially occur in New Mexico for the purposes of resource management and plant conservation.

Permit No. PRT–821356

Applicant: Dr. Lawrence E. Stevens, Flagstaff, Arizona

The applicant requests a permit to conduct laboratory and field monitoring studies and collect the Kanab ambersnail (*Oxyloma haydeni kanabensis*) as eggs in egg masses in Grand Canyon National Park and vicinity.

Permit No. 821369

Applicant: Rhonda Sidnèr, Tucson, Arizona

The applicant requests a permit to conduct presence/absence surveys of lesser long-nosed bats (*Leptonycteris curasoae*) on Ft. Huachuca, Arizona.

Permit No. 821577

Applicant: Duane Shroufe, Arizona Game and Fish Department, Phoenix, Arizona. The applicant requests a permit to allow take of a voucher specimen of the New Mexico ridgenose rattlesnake (*Crotalus willardi obscurus*) from the Peloncillo Mountains, Cochise County, Arizona for the purpose of documenting occurrence of this taxon in the state of Arizona. Applicant also requests a permit to take any resident endangered/threatened fish or wildlife listed below for conservation purposes, provided: (1) the taking is not reasonably anticipated to result in death or permanent disabling of the specimen; (2) the speciment is not removed from the State of Arizona without prior written permission from the U.S. Fish and Wildlife Service; or (3) the live specimen is not held in captivity for more than 45 consecutive days.

Birds

peregrine falcon (*Falco peregrinus*)
aplomado falcon (*Falco femoralis*)
Yuma clapper rail (*Rallus longirostris yumanensis*)
masked bobwhite (*Collinus virginianus*
bald eagle (*Haliaeetus leucocephalus*)
southwestern willow flycatcher (*Empidonax trillii extimus*)
Mexican spotted owl (*Strix occidentalis*)

Fish

bonytail chub (*Gila elegans*)
humpback chub (*G. cypha*)
yaqui chub (*G. purpurea*)
Virgin River chub (*G. robusta seminuda*)
desert pupfish (*Cyprinodon macularius macularius*)
Quitobaquito pupfish (*C. m. eremus*)
Colorado squawfish (*Ptychocheilus lucius*)
Gila topminnow (*Poeciliopsis occidentalis*)
Gila trout (*Oncorhynchus gilae*)
woundfin (*Plagopterus argentissimus*)
razorback sucker (*Xyrauchen texanus*)

Reptiles

desert tortoise (*Gopherus agassizii*)

Mammals

lesser long-nosed bat (*Leptoncyteris curasoae*)
black-footed ferret (*Mustela nigripes*)
Mount Graham red squirrel (*Tamiasciurus hudsonicus*)
Hualapai Mexican vole (*Microptus mexicanus*)
jaguarundi (*Felis yagouaroundi*)
ocelot (*F. Paradalis*)
Mexican gray wolf (*Canis lupus bailey*)
Sonoran pronghorn (*Antilocapra americana sonoriensis*)

Invertebrates

Kanab ambersnail (Oxyloma haydeni kanabensis)

Permit No. 821801

Applicant: Robert Tafanelli, Las Cruces, New Mexico

The applicant requests a permit to conduct presence/absence surveys of the aplomado falcon and bald eagle in southwestern New Mexico south of Socorro and west of but including the Sacramento and Guadalupe Mountains.

Permit No. 820062

Applicant: Don Blanton, Hicks & Company, Inc., Austin, Texas

The applicant requests permission to conduct surveys throughout the ranges of the following for scientific and recovery purposes when necessary:

Invertebrates

Tooth Cave pseudoscorpion (*Microcreagris texana*)
Tooth Cave spider (*Neoleptoneta myopica*)
Tooth Cave ground beetle (*Rhadine persephone*)
Kretschmarr Cave mold beetle (*Texamaurops reddelli*)
Bee Creek Cave harvestman (*Texella reddelli*)
Bone Cave harvestman (*Texella reyesi*)
Coffin Cave mold beetle (*Batrisodes texanus*)

Amphibian

Houston toad (*Bufo houstonenis*)

Birds

bald eagle (*Haliaeetus leucocephalus*)
aplomado falcon (*Falco femoralis*)
piping plover (*Charadrius melodus*)
interior least tern (*Sterna antillarum athalassos*)
black-capped vireo (*Vireo atricapillus*)
golden-cheeked warbler (*Dendroica chrysoparia*)
red-cockaded woodpecker (*Picoides borealis*)

Plants

large-fruited sand verbena (*Abronia macrocarpa*)
Navasota ladies'-tresses (*Spiranthes parksii*)
Texas trailing phlox (*Phlox nivalis ssp. texensis*)
slender rush-pea (*Hoffmannseggia tenella*)
South Texas ragweed (*Ambrosia cheiranthifolia*)
Texas Ayenia (*Ayenia limitaris*)
Walker's manioc (*Manihot walkerae*)
ashy dogweed (*Thymophylla tephroleuca*)
Johnston's frankenia (*Frankenia johnstonii*)
black lace cactus (*Echinocereus reichenbachii var. albertii*)
star cactus (*Echinocactus asterius*)
Tobusch fishhook cactus (*Ancistrocactus tobuschii*)
Texas poppy mallow (*Callirhoe scabriuscula*)
Nellie cory cactus (*Coryphanthus minima*)
bunched cory cactus (*C. ramillosa*)
Sneed pincushion cactus (*C. sneedii var. sneedii*)
Terlingua Creek cat's eye (*Cryptantha crassipes*)
Chisos Mountain hedgehog cactus (*Echinocereus chisoensis*)
Lloyd's hedgehog cactus (*E. lloydii*)
Davis' green pitaya (*E. viridiflorus var. davisii*)
McKittrick pennyroyal (*Hedeoma apiculatum*)
Lloyd's mariposa cactus (*Neolloydia mariposensis*)
Little Aguja pondweed (*Potamogeton clystocarpus*)
Hinckley's oak (*Quercus hinckleyi*)

Permit No. 822908

Applicant: Dr. Michael E. Tewes. Kingsville, Texas

The applicant requests authorization for scientific research and recovery purposes to live-capture (using live box traps), handle, sedate, collect blood, fecal, tissue, and parasite samples from, attach a 100 g radio-collar to, ear tag and tattoo, hold (for approximately 6 hours) during recovery from sedation, release unharmed following complete recovery from sedation, and monitor the species listed below at Laguna Atascosa National Wildlife Refuge, Texas, and Cameron, Starr, Willacy, Hidalgo, Kennedy, Brooks, Jim Wells, Webb, Live Oak, McMullen, Dimmit, Zavala, Maverick, Atascosa, San Patricio, Nueces, Bee, Aransas, Jim Hogg, Zapata, Kleberg, and Duval Counties, Texas:

Ocelots (*Felis pardalis*), no more than 20 total for all locations listed,
Jaguarundi (*Felis yagouaroundi*), no more than 5 total for all locations listed.

Permit No. 822942

Applicant: Gregory J. Tickle, Dallas, Texas

The applicant requests authorization to conduct population surveys for the golden-cheeked warbler (*Dendroica chrysoparia*) and black-capped vireo (*Vireo atricapillus*) at various sites in Texas, Oklahoma, and Arizona.

Permit No. 822998

Applicant: John M. McGee, Tucson, Texas

The applicant requests authorization for scientific research and recovery purposes to census, survey, and monitor the activities of the Mt. Graham red squirrel (*Tamiasciurus hudsonicus*) and lesser long-nosed bat (*Leptoncyteris curasoae*).

Permit No. 823089

Applicant: Dr. Ralph J. Gutierrez, Arcata, California

The applicant requests authorization for scientific research and recovery purposes to conduct field surveys, locate, map the distribution of, capture, and immediately release unharmed at the capture sites adult and juvenile Mexican spotted owls (*Strix occidentalis lucida*) in New Mexico and Arizona.

Permit No. 823097

Applicant: Dr. Rebecca Reiss, Socorro, New Mexico

The applicant requests authorization to collect the Socorro isopod (*Thermosphaeroma thermophilum*) to establish a colony for propagation and molecular genetic analysis at Sedillo Springs, New Mexico.

DATES: Written comments on these permit applications must be received on or before January 27, 1997.

ADDRESSES: Written data or comments should be submitted to the Legal Instruments Examiner, Division of Endangered Species/Permits, Ecological Services, P.O. Box 1306, Albuquerque, New Mexico 87103. Please refer to the respective permit number for each application when submitting comments. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: U.S. Fish and Wildlife Service, Ecological Services, Division of Endangered Species/Permits, P.O. Box 1306, Albuquerque, New Mexico 87103. Please refer to the respective permit number for each application when requesting copies of documents. Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice, to the address above.

Joseph P. Mazzoni,

Acting Regional Director, Region 2, Albuquerque, New Mexico.

BILLING CODE 4510–55–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

DEPARTMENT OF THE INTERIOR

U.S. Fish and Wildlife Service

[I.D. 121796C]

Marine Mammals; Scientific Research Permit (P624)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of application.

SUMMARY: Notice is hereby given that Dr. Michael Moore, Research Specialist (Co-investigator: Dr. John Stegeman, Senior Scientist), MS 33 Biology Department, Woods Hole Oceanographic Institution, Woods Hole, MA 02543, has applied in due form for a permit to take marine mammals for purposes of scientific research.

DATES: Written comments must be received on or before January 27, 1997.

ADDRESSES: The application and related documents are available for review upon written request or by appointment in the following office(s):

Permits Division, Office of Protected Resources, NMFS, 1315 East-West

Highway, Room 13130, Silver Spring, MD 20910 (301/713–2289);

Regional Administrator, Northeast Region, NMFS, One Blackburn Drive, Gloucester, MA 01903–2298 (508/281–9250);

Regional Administrator, Southeast Region, NMFS, 9721 Executive Center Drive North, St. Petersburg, FL 33702–2532 (813/570–5301); and

U.S. Fish and Wildlife Service, Office of Management Authority, 4401 N. Fairfax Drive, Arlington, VA 22203.

Written data or views, or requests for a public hearing on this request, should be submitted to the Director, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered fish and wildlife (50 CFR 222.23).

The applicant requests a permit to conduct the following activities annually: Collect biopsy samples from up to 40, conduct blubber thickness assay on up to 40, and inadvertently harass up to 60 Northern right whales (*Eubalaena glacialis*) off the coast of Georgia, Great South Channel, Cape Cod Bay and the Gulf of Maine; specifically import samples from Canada, Arctic, Kazakhstan (Russia), Falklands/South Georgia, Australia, New Zealand, South Africa, and opportunistically, import samples from all species of Cetacea and Pinnipedia worldwide; biopsy live stranded minke whales (*Balaenoptera acutorostrata*), finback whales (*B. physalus*), humpback whales (*Megaptera novaengliae*), long-finned pilot whales (*Globicephala melas*), and white-sided dolphins (*Lagenorhynchus acutus*) on Cape Cod.

Dated: December 17, 1996.

Ann D. Terbush,

Chief, Permits and Documentation Division, Office of Protected Resources, National Marine Fisheries Service.

Dated: December 17, 1996.

Margaret Tieger,

Chief, Branch of Permits, Office of Management Authority, U.S. Fish and Wildlife Service.

Bureau of Land Management

[WO–300–1310–00]

Green River Basin Advisory Committee, Colorado and Wyoming; Notice of Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting of the Green River Basin Advisory Committee (GRBAC).

SUMMARY: This notice announces the dates, time, schedule and initial agenda for a meeting of the Green River Basin Advisory Committee.

DATES: January 15, 1997, from 8:00 a.m. until 4:00 p.m. and January 16, 1997, from 8:00 a.m. until 3:00 p.m.

ADDRESSES: Holiday Inn, 300 South Colorado Highway 13, Craig, Colorado.

FOR FURTHER INFORMATION CONTACT: Terri Trevino, GRBAC Coordinator, Bureau of Land Management, P.O. Box 1828, Cheyenne, WY 82003; telephone (307) 775–6020.

SUPPLEMENTARY INFORMATION: The topics for the meeting will include:

(1) Finalization of GRBAC Sub-Committee Reports
(2) Discussion of Cumulative Impacts Task Force report
(3) Construction and review of draft Final Report language
(4) Discussion of future GRBAC actions
(5) Public comment

This meeting is open to the public. Persons interested in making oral comments or submitting written statements for the GRBAC's consideration should notify the GRBAC Coordinator at the above address by January 13. The GRBAC will hear oral comments beginning at 4:00 p.m. on January 15, and may establish a time limit for oral statements.

Dated: December 19, 1996.

Mat Millenbach,

Acting Director, Bureau of Land Management.

National Park Service

Draft Environmental Impact Statement (DEIS) for Lake Crescent Management Plan, Olympic National Park, WA

AGENCY: National Park Service, Interior.

ACTION: Notice of extension of public review period.

SUMMARY: The comment period as specified in the official Notice of Availability (FR, Vol. 61, No. 203, p. 54437) was to end December 17, 1996, but was extended to February 3, 1997 (FR, Vol. 61, No. 223, p. 58702). This present Notice announces that the comment period has been extended until March 19, 1997.

DATES: Comments on the DEIS must be received no later than March 19, 1997.

ADDRESSES: Written comments should be submitted to the Superintendent, Olympic National Park, 600 E. Park Ave., Port Angeles, WA 98362.

FOR FURTHER INFORMATION CONTACT: Superintendent, Olympic National Park, at the above address or at telephone number (360) 452–4501, ext. 207.

Dated: December 19, 1996.

William C. Walters,

Deputy Field Director, Pacific West Field Area.

BILLING CODE 4310–70–P

Missouri National Recreational River Advisory Group

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets the schedule for the forthcoming meeting of the Missouri National Recreational River Advisory Group. Notice of this meeting is required under the Federal Advisory Committee Act (Public Law 92–463).

DATE, TIME, AND ADDRESS: Wednesday, January 29, 1997; 1:30 p.m.; Niobrara State Park Group Lodge, Niobrara, Nebraska. In the event of cancellation of the meeting scheduled above, a snow date will be in effect as scheduled as follows:

Snow Date: Wednesday, February 5, 1997; 1:30 p.m.

ADDRESSES: Niobrara State Park Group Lodge, Niobrara, Nebraska.

AGENDA: (1) Discussion of a group advisory statement concerning the draft general management plan; (2) Public comments to the advisory group; (3) Final discussions and approval of the advisory group statement to the Secretary of the Interior concerning the draft plan; (4) Proposed agenda, date,

and time, of the next Advisory Group meeting. The meeting is open to the public. Interested persons may make oral/written presentation to the Commission or file written statements. Requests for time for making presentations may be made to the Superintendent prior to the meeting or to the Chair at the beginning of the meeting. In order to accomplish the agenda for the meeting, the Chair may want to limit or schedule public presentations.

The meeting will be recorded for documentation and a summary in the form of minutes will be transcribed for dissemination. Minutes of the meeting will be made available to the public after approval by the Commission members. Copies of the minutes may be requested by contacting the Superintendent. An audio tape of the meeting will be available at the headquarters office of the Niobrara/Missouri National Scenic Riverways in O'Neill, Nebraska.

FOR FURTHER INFORMATION CONTACT: Superintendent Warren Hill, Niobrara/Missouri National Scenic Riverways, P.O. Box 591, O'Neill, Nebraska 68763–0591, or by phone at 402–336–3970.

SUPPLEMENTARY INFORMATION: The Advisory Group was established by the law that established the Missouri National Recreational River, Public Law 102–50. The purpose of the group, according to its charter, is to advise the Secretary of the Interior on matters pertaining to the development of a management plan, and management and operation of the recreational river. The Missouri National Recreational River is the 39-mile free flowing segment of the Missouri from Fort Randall Dam to the vicinity of Springfield in South Dakota.

Dated: December 17, 1996.

William W. Schenk,

Field Director, Midwest Field Area.

BILLING CODE 4310–70–P

Bureau of Reclamation

Notice of Request for Approval of an Information Collection

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intentions of the Bureau of Reclamation (Reclamation) to seek approval of an information collection for a voluntary customer survey. The surveys will be conducted in the Great Plains Region, which includes all of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and large portions of Montana, Wyoming, Colorado, and Texas. The mission of the Bureau of Reclamation is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public. The collections will obtain information for determining the level of satisfaction with the service provided and to identify any areas where improvements in providing service can be made.

DATES: Comments on this notice must be received by February 24, 1997.

FOR FURTHER INFORMATION CONTACT: To submit comments on this information collection contact: Bureau of Reclamation, Information Collection Officer, D–7924, P.O. Box 25007, Denver, Colorado 80225–0007; telephone: (303) 236–0305 extension 459; Internet address: infocoll2do.usbr.gov.

SUPPLEMENTARY INFORMATION: Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of Reclamation, including whether the information shall have practical utility; (b) the accuracy of Reclamation's estimated burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Title: Great Plains Region Voluntary Customer Survey to Implement Executive Order 12862.

Description of respondents: Reclamation's customers include individuals from the related water and electrical service utilities, i.e., Federal, State, and local entities, Native Americans, universities, the press, environmental groups, the legal community, consultants, and the general public.

Frequency: Semi-annual questionnaires will be provided to a major sampling of customers.

Estimated completion time: An average of 30 minutes is required to fill out the form.

Annual responses: 7,000.

Annual burden hours: 3,500 hours.

Dated: December 18, 1996.

Robert M. Sims,

Manager, Property and Facilities.

[FR Doc. 96–32849 Filed 12–24–96; 8:45 am]

BILLING CODE 4310–94–M

Office of Surface Mining Reclamation and Enforcement

Notice of Proposed Information Collection

AGENCY: Office of Surface Mining Reclamation and Enforcement.

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Office of Surface Mining Reclamation and Enforcement (OSM) is announcing its intention to request approval for the collections of information for a technical training program course effectiveness evaluation.

DATES: Comments on the proposed information collection must be received by February 24, 1997, to be assured of consideration.

ADDRESSES: Comments may be mailed to John A. Trelease, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Ave., NW., Room 210–SIB, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: To request a copy of the information collection request, explanatory information and related forms, contact John A. Trelease, at (202) 208–2783.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget (OMB) regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). This notice identifies information collections that OSM will be submitting to OMB for approval.

OSM will request a 3-year term of approval for the information collection activity.

Comments are invited on: (1) the need for the collection of information for the performance of the functions of the agency; (2) the accuracy of the agency's burden estimates; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the information collection burden on respondents, such as use of automated means of collection of the information. A summary of the public comments will be included in OSM's

submissions of the information collection requests to OMB.

The following information is provided for the information collection: (1) title of the information collection; (2) OMB control number; (3) summary of the information collection activity; and (4) frequency of collection, description of the respondents, estimated total annual responses, and the total annual reporting and recordkeeping burden for the collection of information.

Title: Technical Training Program Course Effectiveness Evaluation.

OMB Control Number: None.

Summary: Executive Order 12862 requires agencies to survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services. The information supplied by this evaluation will determine customer satisfaction with OSM's training program and identify needs of respondents.

Bureau Form Number: None.

Frequency of Collection: On Occasion.

Description of Respondents: State regulatory authority and Tribal employees and their supervisors.

Total Annual Responses: 650.

Total Annual Burden Hours: 110 hours.

Dated: December 27, 1996

Sarah E. Donnelly,

Acting Chief, Division of Regulatory Support.

BILLING CODE 4310–05–M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Overseas Private Investment Corporation

Submission for OMB review; Comment Request

AGENCY: Overseas Private Investment Corporation, IDCA.

ACTION: Request for comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Agencies are required to publish a Notice in the **Federal Register** notifying the public that the Agency has prepared an information collection request for OMB review and approval and has requested public review and comment on the submission. OPIC published its first **Federal Register** Notice on this information collection request on October 17, 1996, in 61 FR 54214, at which time a 60-day comment period was announced. This comment period ended on December 16, 1996. No comments were received in response to this Notice.

This information collection submission has now been submitted to OMB for review. Comments are again being solicited on the need for the information, its practical utility, the accuracy of the Agency's burden estimate, and on ways to minimize the reporting burden, including automated collection techniques and uses of other forms of technology.

The proposed form under review is summarized below.

DATES: Comments must be received within 30 calendar days of this Notice.

ADDRESSES: Copies of the subject form and the request for review submitted to OMB may be obtained from the Agency Submitting Officer. Comments on the form should be submitted to the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

OPIC Agency Submitting Officer: Lena Paulsen, Manager, Information Center, Overseas Private Investment Corporation, 1100 New York Avenue, N.W., Washington, D.C. 20527; 202/336–8565.

OMB Reviewer: Victoria Wassmer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Docket Library, Room 10102, 725 17th Street, N.W., Washington, DC 20503, 202/395–5871.

Summary of Form Under Review

Type of Request: Revised form.

Title: Application for Political Risk Investment Insurance.

Form Number: OPIC–52.

Frequency of Use: Once per investor per project.

Type of Respondents: Business or other institutions (except farms); individuals.

Standard Industrial Classification Codes: All.

Description of Affected Public: U.S. companies or citizens investing overseas.

Reporting Hours: 6 hours per project.

Number of Response: 160 per year.

Federal Cost: $4,000 per year.

Authority for Information Collection: Sections 231, 234(a), 239(d), and 240A of the Foreign Assistance Act of 1961, as amended.

Abstract (Needs and Uses): The application is the principal document used by OPIC to determine the investor's and project's eligibility, assess the environmental impact and developmental effects of the project, measure the economic effects for the United States and the host country economy, and collect information for underwriting analysis.

Dated: December 19, 1996.

James R. Offutt,

Assistant General Counsel, Department of Legal Affairs.

[FR Doc. 96–32754 Filed 12–24–96; 8:45 am]

BILLING CODE 3210–01–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–748 (Final)]

Engineered Process Gas Turbo-Compressor Systems From Japan

AGENCY: United States International Trade Commission.

ACTION: Scheduling of the final phase of an antidumping investigation.

SUMMARY: The Commission hereby gives notice of the scheduling of the final phase of antidumping investigation No. 731–TA–748 (Final) under section 735(b) of the Tariff Act of 1930 (19 U.S.C. § 1673d(b)) (the Act) to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of less-than-fair-value imports from Japan of engineered process gas turbo-compressor systems (EPGTS), whether assembled or unassembled, and whether complete or incomplete. The systems covered by this investigation are only those used in the petrochemical and fertilizer industries, in the production of ethylene, propylene, ammonia, urea, methanol, refinery and other petrochemical products. The subject imports are provided for in subheadings 8414.80.20, 8414.90.40, 8419.60.50, 8406.81.10, 8406.82.10, 8406.90.20 through 8406.90.45, 8483.40.50, 8501.53.40, 8501.53.60, 8501.53.80, and 9032.89.60 of the Harmonized Tariff Schedule of the United States. Excluded from this investigation are spare parts, including parts or components for the revamp or repair of an existing EPGTS, that are sold separately from an original contract for an EPGTS.

For further information concerning the conduct of this phase of the investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207), as amended by 61 FR 37818, July 22, 1996.

EFFECTIVE DATE: December 9, 1996.

FOR FURTHER INFORMATION CONTACT: Diane J. Mazur (202–205–3184), Office of Investigations, U.S. International

VOL 61 ISS 249 DE 26 1996 UMI

Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (http://www.usitc.gov or ftp://ftp.usitc.gov).

SUPPLEMENTARY INFORMATION:

Background

The final phase of this investigation is being scheduled as a result of an affirmative preliminary determination by the Department of Commerce that imports of engineered process gas turbo-compressor systems from Japan are being sold in the United States at less than fair value within the meaning of section 733 of the Act (19 U.S.C. § 1673b). The investigation was requested in a petition filed on May 8, 1996, by Dresser-Rand Company, Corning, NY.

Participation in the Investigation and Public Service List

Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, no later than 21 days prior to the hearing date specified in this notice. A party that filed a notice of appearance during the preliminary phase of the investigation need not file an additional notice of appearance during this final phase. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in the final phase of this investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made no later than 21 days prior to the hearing date specified in this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. § 1677(9), who are parties to the investigation. A party granted access to BPI in the preliminary phase of the investigation need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff Report

The prehearing staff report in the final phase of this investigation will be placed in the nonpublic record on April 10, 1997, and a public version will be issued thereafter, pursuant to section 207.22 of the Commission's rules.

Hearing

The Commission will hold a hearing in connection with the final phase of this investigation beginning at 9:30 a.m. on April 24, 1997, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before April 16, 1997. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on April 18, 1997, at the U.S. International Trade Commission Building. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 days prior to the date of the hearing.

Written Submissions

Each party who is an interested party shall submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of section 207.23 of the Commission's rules; the deadline for filing is April 17, 1997. Parties may also file written testimony in connection with their presentation at the hearing, as provided in section 207.24 of the Commission's rules, and posthearing briefs, which must conform with the provisions of section 207.25 of the Commission's rules. The deadline for filing posthearing briefs is May 1, 1997; witness testimony must be filed no later than three days before the hearing. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before May 1, 1997. On May 23, 1997, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before May 28, 1997, but such final comments must not contain new factual information and must otherwise comply with section 207.30 of the Commission's rules. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.21 of the Commission's rules.

Issued: December 16, 1996.

By order of the Commission.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

[Investigation No. 332–288]

Ethyl Alcohol for Fuel Use; Determination of the Base Quantity of Imports

AGENCY: United States International Trade Commission.

ACTION: Notice of Determination.

EFFECTIVE DATE: December 17, 1996.

SUMMARY: Section 7 of the Steel Trade Liberalization Program Implementation Act, as amended (19 U.S.C. 2703 note), which concerns local feedstock requirements for fuel ethyl alcohol imported by the United States from CBI-beneficiary countries, requires the Commission to determine annually the U.S. domestic market for fuel ethyl alcohol during the 12-month period ending on the preceding September 30. The domestic market estimate made by the Commission is to be used to establish the "base quantity" of imports that can be imported with a zero percent local feedstock requirement. The base quantity to be used by the U.S. Customs Service in the administration of the law

is the greater of 60 million gallons or 7 percent of U.S. consumption as determined by the Commission. Beyond the base quantity of imports, progressively higher local feedstock requirements are placed on imports of fuel ethyl alcohol and mixtures from the CBI- beneficiary countries.

For the 12-month period ending September 30, 1996, the Commission has determined the level of U.S. consumption of fuel ethyl alcohol to be 1.1 billion gallons. Seven percent of this amount is 79.7 million gallons (these figures have been rounded). Therefore, the base quantity for 1997 should be 79.7 million gallons.

FOR FURTHER INFORMATION CONTACT: Ms. Jean Harman (202) 205–3313 in the Commission's Office of Industries. For information on legal aspects of the investigation contact Mr. William Gearhart of the Commission's Office of the General Counsel at (202) 205–3091. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 205–1810.

Background

For purposes of making determinations of the U.S. market for fuel ethyl alcohol as required by section 7 of the Act, the Commission instituted Investigation No. 332–288, Ethyl Alcohol for Fuel Use: Determination of the Base Quantity of Imports, in March 1990. The Commission uses official statistics of the U.S. Department of Energy to make these determinations as well as the PIERS database of the *Journal of Commerce*, which is based on U.S. export declarations.

Section 225 of the Customs and Trade Act of 1990 (Public Law 101–382, August 20, 1990) amended the original language set forth in the Steel Trade Liberalization Program Implementation Act of 1989. The amendment requires the Commission to make a determination of the U.S. domestic market for fuel ethyl alcohol for each year after 1989.

Issued: December 17, 1996.
By order of the Commission.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

[Investigation No. 731–TA–740 (Final)]

Sodium Azide From Japan

AGENCY: United States International Trade Commission.

ACTION: Revised schedule for the subject investigation.

EFFECTIVE DATE: December 20, 1996.

FOR FURTHER INFORMATION CONTACT: Fred Ruggles (202–205–3187), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (http://www.usitc.gov or ftp://ftp.usitc.gov).

SUPPLEMENTARY INFORMATION: On August 16, 1996, the Commission established a schedule for the conduct of the final phase of the subject investigation (61 FR 50330, September 25, 1996). Counsel for the petitioner has requested that the Commission postpone the date for the submission of prehearing briefs until after December 30, 1996, the date on which Commerce's final determination is due. Accordingly, the Commission has postponed the date for submission of prehearing briefs to December 31, 1996; all other dates remain the same.

For further information concerning this investigation see the Commission's notice cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207), as amended in 61 FR 37818, July 22, 1996.

Authority: This investigation is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to sections 207.21 and 207.23 of the Commission's rules.

By order of the Commission.
Issued: December 20, 1996

BILLING CODE 7020–02–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy, 28 C.F.R. § 50.7, notice is hereby given that a proposed Stipulated Final Order for Injunctive Relief ("Consent Decree") in *United States* v. *City of San Diego, et al.*, Civil Action No. 88–1101–B, was lodged on December 13, 1996, with the United States District Court for the Southern District of California. The United States brought a complaint under the Clean Water Act (the "Act"), as amended, 33 U.S.C. §§ 1251 *et seq.*, against the City of San Diego (the "City") and against the statutory defendant the State of California for violations of the Act in connection with the City's wastewater treatment system.

The proposed consent decree requires the City to implement a number of long-term and short-term remedial measures designed to ensure compliance with the Act on a permanent, consistent basis. These measures include, *inter alia*, programs to replace concrete sewer mains in the City's sewer collection system and to conduct a comprehensive audit of all pump stations and force mains to augment existing records to provide a basis for future planning efforts.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *City of*

San Diego, et al., DOJ Ref. #90–5–1–1–2987.

The proposed consent decree may be examined at the office of the United States Attorney, Southern District of California, 880 Front Street, San Diego, California 92101; at the Region IX Office of the Environmental Protection Agency, 75 Hawthorne Street, San Francisco, California 94105; and at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $4.75 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Joel M. Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

Immigration and Naturalization Service

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Request OMB emergency approval; affidavit of support under section 213A of the Act.

The Department of Justice, Immigration and Naturalization Service has submitted the following information collection request (ICR) utilizing emergency review procedures, to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. OMB approval has been requested by December 29, 1996. If granted, the emergency approval is only valid for 180 days. Comments should be directed to OMB, Office of Information and Regulatory Affairs, Attention: Ms. Deborah Bond, 202–395–7316, Department of Justice Desk Officer, Washington, DC 20503.

During the first 60 days of this same period a regular review of this information collection is also being undertaken. Comments are encouraged and will be accepted until February 24, 1997. Request written comments and suggestions from the public and affected agencies concerning the proposed collection of information. Your comments should address one or more of the following four points.

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* New Information Collection.

(2) *Title of the Form/Collection:* Affidavit of Support Under Section 213A of the Act.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form I–864. Adjudications Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. The form is mandated by law for a petitioning relative to submit an affidavit on their relative's behalf. The executed form creates a contract between the sponsor and any entity that provides means-tested public benefits.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 610,000 respondents at 1.15 hours per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 701,500 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact Mr. Richard A. Sloan, 202–616–7600, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, U.S. Department of Justice, Room 5307, 425 I Street, NW., Washington, DC 20536.

If additional information is required contact: Mr. Robert B. Briggs, Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 850, Washington Center, 1001 G Street, NW, Washington, DC 20530.

Dated: December 20, 1996.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

BILLING CODE 4410–18–M

Agency Information Collection Activities: Revision of Existing Collection; Comment Request

ACTION: Notice of information collection under review; application—alternative inspection services.

The Department of Justice, Immigration and Naturalization Service submitted the following information collection request utilizing emergency review procedures, to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act 1995. This proposed information collection was previously published in the **Federal Register** on October 15, 1996, at 61 FR 53766, allowing for an emergency review with a 60-day public comment period. No comments were received by the Immigration and Naturalization Service. The Office of Management and Budget approved this information collection under emergency review.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until January 23, 1997. This process is conducted in accordance with 5 CFR Part 1320.10.

Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Regulatory Affairs, Attention: Department of Justice Desk Officer, Washington, DC 20530. Additionally, comments may be submitted to OMB via facsimile to 202–395–7285. Comments may also be submitted to the Department of Justice (DOJ), Justice Management Division, Information Management and Security Staff, Attention: Department Clearance Officer, Suite 850, 1001 G Street, NW, Washington, DC, 20530. Additionally, comments may be submitted to DOJ via facsimile to 202–514–1590.

Written comments and suggestions from the public and affected agencies should address one or more of the following points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency/component, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies/components estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The proposed collection is listed below:

(1) *Type of Information Collection:* Revision of a currently approved collection.

(2) *Title of the Form/Collection.* Application—Alternative Inspection Services.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form I–823. Inspections Division, Immigration and Naturalization Service.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. The collected data will be used to determine eligibility for automated inspections programs and to secure those data elements necessary to confirm enrollment at the time of application for admission to the United States.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 500,000 respondents at 70 minutes (1.166) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 583,000 annual burden hours.

Public comment on this proposed information collection is strongly encouraged.

Dated: December 19, 1998.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

Employment and Training Administration

Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

TA–W–32,754, Bull HN Information Systems Incorporated, Billerica, Massachusetts; TA–W–32,754A, Bull HN Information Systems Incorporated, Brighton, Massachusetts; TA–W–32,754B, Bull HN Information Systems Incorporated, Phoenix, Arizona; and various field offices in the following States: TA–W–32,754C—AL, TA–W–32,754D—CA, TA–W–32,754E—CO, TA–W–32,754F—FL, TA–W–32,754G—GA, TA–W–32,754H—IA, TA–W–32,754I—IL, TA–W–32,754J—MA, TA–W–32,754K—ME, TA–W–32,754L—MI, TA–W–32,754M—MN, TA–W–32,754N—MO, TA–W–32,754O—NE, TA–

VOL 61 ISS 249 DE 26 1996 UMI

W–32,754P—NH, TA–W–32,754Q—NY, TA–W–32,754R—OH, TA–W–32,754S—OK, TA–W–32,754T—OR, TA–W–32,754U—PA, TA–W–32,754V—TX, TA–W–32,754W—VA.

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 5, 1996, applicable to all workers of Bull HN Information Systems Incorporated located in Billerica and Brighton, Massachusetts, Phoenix, Arizona, and various field offices at numerous United States locations. The notice will soon be published in the **Federal Register**.

At the request of the State agency, the Department reviewed the certification for workers at the subject firm. The Department is amending that part of the certification for TA–W–32,754 related to the September 10, 1995 impact date for workers at Bull HN Information Systems, Incorporated, in order to avoid a coverage overlap with certifications TA–W–29,522 and TA–W–32,860 for the same groups of workers at Bull HN Information Systems.

Accordingly, the Department is deleting the September 10, 1995 impact date set in TA–W–32,754 for all workers at all locations of Bull HN Information Systems and inserting a new impact date of August 19, 1996.

The amended notice applicable to TA–W–32,754 is hereby issued as follows:

"All workers of Bull HN Information Systems, Incorporated, Billerica, Massachusetts; Bull HN Information Systems Incorporated, Brighton, Massachusetts; Bull HN Information Systems Incorporated, Phoenix, Arizona; and, various field offices in Alabama, California, Colorado, Florida, Georgia, Iowa, Illinois, Massachusetts, Maine, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New York, Ohio, Oklahoma, Oregon, Pennsylvania, Texas, and Virginia engaged in employment related to the production of computer circuit boards and other computer related materials who became totally or partially separated from employment on or after August 19, 1996 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed in Washington, DC, this 10th day of December, 1996.

Russell T. Kile,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

[TA–W–32,593, TA–W–32,593A]

Connor Forest Industries, Inc., Wakefield and Baraga, Michigan; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on September 12, 1996, applicable to workers of Connor Forest Industries, Inc. located in Wakefield, Michigan. The notice was published in the Federal Register on October 1, 1996 (61 FR 51304).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. New findings show that workers separations have occurred at the subject firm's Baraga, Michigan location. The workers produce lumber.

The intent of the Department's certification is to include all workers of Connor Forest Industries, Inc., who were affected by increased imports of lumber. Accordingly, the Department is amending the worker certification to include the workers of Connor Forest Industries, Inc. located in Baraga, Michigan.

The amended notice applicable to TA–W–32,593 is hereby issued as follows:

All workers of Connor Forest Industries, Inc., Wakefield, Michigan (TA–W–32,593) and Baraga, Michigan (TA–W–32,593A), who became totally or partially separated from employment on or after July 12, 1995, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of December 1996.

Russell T. Kile,

Program Manager, Policy and Reemployemnt Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

E.I. DuPont DeNemours & Company, TA–W–32,453, Parlin, New Jersey, and TA–W–32,453A; Clifton, New Jersey.

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on June 17, 1996, applicable to all workers of E.I. DuPont DeNemours & Company, located in Parlin, New Jersey.

The notice was published in the Federal Register on August 6, 1996 (61 FR 40852).

Based on new information received from the company, the Department reviewed the certification for workers of the subject firm. New information provided by the company shows that the subject firm's Clifton, New Jersey facility is scheduled to shutdown by the end of 1996; at which time, all workers will be permanently laid off from the subject firm's Clifton, New Jersey location. These workers are engaged in employment related to the distribution and marketing of graphic arts film manufactured by its affiliate located in Parlin, New Jersey.

The intent of the Department's certification is to include all workers of E.I. DuPont DeNemours & Company who were adversely affected by imports.

Accordingly, the Department is amending the certification to cover the workers separated from E.I. DuPont DeNemours & Company, located in Clifton, New Jersey.

The amended notice applicable to TA–W–32,453 is hereby issued as follows:

"All workers of E.I. DuPont DeNemours & Company, located in Parlin, New Jersey (TA–W–32,453) and E.I. DuPont DeNemours & Company, located in Clifton, New Jersey (TA–W–32,453A) who became totally or partially separated from employment on or after June 3, 1995 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, DC, this 10th day of December 1996.

Russell T. Kile,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[TA–W–32, 813]

E.I. DuPont DeNemours & Company, Clifton, New Jersey; Notice of Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on October 15, 1996 in response to a worker petition which was filed September 26, 1996 on behalf of workers at E.I. DuPont DeNemours & Company, located in Clifton, New Jersey (TA–W–32,813).

The petitioning group of workers are covered under an existing Trade Adjustment Assistance certification (TA–W–32, 453). Consequently, further investigation in this case would service

no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 10th day of December 1996.

Russell T. Kile,

Acting Program Manager, Policy and Reemployment Services Office of Trade Adjustment Assistance.

The Olga Company Division of Warnaco, Inc., Fillmore, California; The Olga Company Division of Warnaco, Inc., Santa Paula, California; The Olga Company Division of Warnaco, Inc., City of Commerce, California; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) as amended by the Omnibus Trade and Competitiveness Act of 1988 (P.L. 100–418), the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order the make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is determined in this case that all of the requirements have been met.

The investigation was initiated in response to a petition received on September 9, 1996, and filed on behalf of workers at The Olga Company, Division of Warnaco, Inc., Fillmore, Santa Paula, and City of Commerce, California. The workers produce women's intimate apparel.

Workers at the subject plants were certified eligible for NAFTA Transitional Adjustment benefits on August 14, 1996 (NAFTA–01155A and 01155B).

Warnaco, Inc., is transferring sewing and finishing work at the subject facilities to locations abroad. Apparel formerly sewn and finished at the subject plants is being imported from the foreign plants into the United States.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's intimate apparel produced at The Olga Company, Division of Warnaco, Inc., Fillmore, Santa Paula, and City of Commerce, California, contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of The Olga Company, Division of Warnaco, Inc., Fillmore, Santa Paula, and City of Commerce, California, who became totally or partially separated from employment on or after July 16, 1995, through two years from the date of certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC, this 30th day of October, 1996.

Russell T. Kile,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

Velco Electronics, Inc., Fishers, New York; Notice of Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on November 25, 1996 in response to a worker petition which was filed on October 30, 1996 on behalf of workers at Velco Electronics, Inc., Fishers, New York.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, DC, this 6th day of December, 1996.

Russell T. Kile,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[TA–W–32,808]

Warnaco, Incorporated, Olga Division, City of Commerce, California; Notice of Termination of Certification

This notice terminates the Certification Regarding Eligibility to Apply For Worker Adjustment Assistance issued by the Department on December 6, 1996, for all workers of Warnaco, Incorporated, Olga Division, City of Commerce, California. The notice will soon be published in the **Federal Register**.

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. Findings show that the worker group is covered under an existing TAA certification (TA–W–32,718B).

Since the workers are already covered by a TAA certification, the continuation of the certification would serve no purpose and the certification has been terminated.

Signed at Washington, D.C., this 10th day of December 1996.

Russell T. Kile,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[FR Doc. 96–32785 Filed 12–24–96; 8:45 am]

BILLING CODE 4510–30–M

[NAFTA–01049]

The Goodyear Tire & Rubber Company, Air Springs Manufacturing Division, Green, Ohio; Amended Certification Regarding Eligibility to Apply for NAFTA Transitional Adjustment Assistance

In accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 USC 2273), the Department of Labor issued a Notice of Revised Determination Regarding Eligibility to Apply for NAFTA-Transitional Adjustment Assistance on August 15, 1996, applicable to all workers of the Goodyear Tire & Rubber Company producing air sleeves in Green, Ohio. The notice was published in the **Federal Register** on September 6, 1996 (61 FR 47190).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. Review of the worker certification revealed that the workers produced air sleeves. For clarification, air sleeve is also know as shock sleeve. New information provided by the Goodyear Tire & Rubber Company shows that the company will move its air spring production from Green, Ohio, to its facility in Mexico. The transition will begin in 1997, and worker separations will begin in the first quarter of 1997. Accordingly, the Department is amending the certification to include all workers of the Goodyear Tire & Rubber Company, Green, Ohio engaged in employment related to the production of air springs. This amendment is also intended to clarify that the product air sleeve is also know as shock sleeve.

The intent of the Department's certification is to include all workers of the subject firm adversely affected by the shift in production to Mexico.

The amended notice applicable to NAFTA–01049 is hereby issued as follows:

All workers of the Goodyear Tire & Rubber Company, Green, Ohio engaged in employment related to the production of air sleeves also know as shock sleeves, and air springs, who became totally or partially separated from employment on or after May 25, 1995 are eligible to apply for NAFTA–TAA assistance under Section 250 of the Trade Act of 1974.

Signed at Washington, DC, this 11th day of December 1996.

Russell T. Kile,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Employment Standards Administration

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Employment Standards Administration is soliciting comments concerning two proposed extension collections: (1) Work Experience and Career Exploration Programs—29 CFR Part 570.35A; and (2) Regulations to Implement the Remedial Education Provisions of the Fair Labor Standards Amendments of 1989—29 CFR 516.34. Copies of the proposed information collection requests can be obtained by contacting the office listed below in the addressee section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before February 26, 1997. The Department of Labor is particularly interested in comments which:

- evaluate whether the proposed collection of information is necessary for the performance of the functions of the agency, including whether the information will have practical utility;
- evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- enhance the quality, utility and clarity of the information to be collected; and
- minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

ADDRESSEE: Mr. Rich Elman, U.S. Department of Labor, 200 Constitution Ave., N.W., Room S–3201, Washington, D.C. 20210, telephone (202) 219–6375 (this is not a toll-free number), fax 202–219–6592.

SUPPLEMENTARY INFORMATION:

Work Experience and Career Exploration Programs (WECEP)—29 CFR Part 570.35A

I. Background: Section (3)(1) of the Fair Labor Standards Act (FLSA) provides the Secretary of Labor with the authority to prescribe employment standards for minors under the age of 18. It further permits the waiver of those standards for minors between 14 and 15 years of age in occupations other than manufacturing and mining, where such employment is confined to periods which will not interfere with the health and well-being of such minors. Section 570.35(b)(2) requires a State Educational Agency to file an application for approval of a State WECEP program as one not interfering with schooling or with the health and well-being of the minors involved and therefore not constituting oppressive child labor. Section 570.35a(b)(3)(vi) of the regulations requires each student participating in a WECEP to execute a written training agreement signed by the teacher-coordinator, the employer and the student and signed or otherwise consented by the student's parent or guardian. Section 570.35a(b)(4)(ii) of the regulations requires that the State Educational Agency keep a record of the names and addresses of each school enrolling WECEP students and the number of enrollees in each unit. A copy of the written training agreement for each student participating in the program is to be kept in the State Educational Agency Office or in the local educational office for a period of 3 years from the date of enrollment in the program.

II. Current Actions: The Department of Labor seeks extension approval to collect this information to carry out its responsibility to determine whether a WECEP program meets requirements specified in Section 570.35a of the Regulations, 29 CFR Part 570, as necessary to permit the employment of minors 14 and 15 years of age under conditions and in occupations which are otherwise prohibited by Child Labor Regulation 3. Without this information, the Administrator, Wage and Hour Division, would not have the means to determine whether or not the proposed program meets the regulatory criteria.

Regulations to Implement the Remedial Education Provisions of the Fair Labor Standards Amendments of 1989—29 CFR 516.34

I. Background: The Fair Labor Standards Act (FLSA) sets minimum wage, overtime (OT) pay, child labor and recordkeeping standards. The requirements apply to employees engaged in interstate commerce or in the production of goods for interstate commerce and to employees in certain enterprises (including employees of a public agency). However, the law provides exemptions for some of its standards for employees in certain types of employment. Pursuant to Sec. 7(q) of the FLSA, as amended, employees who lack a high school diploma or whose reading level or basic skills are at or below the eighth grade level may be required to attend up to ten hours per week of remedial education. The employer-provided remedial education must be designed to provide these basic skills or to fulfill the requirements for a high school diploma or General Education Development (GED) Certificate and may not include job-specific training. Employees subject to OT provisions of the FLSA ordinarily must be paid one and one-half times their regular rates of pay for all hours worked over 40 in each workweek (FLSA Sec. 7 (a)). The additional hours devoted to such remedial education, whether voluntarily attended by the employee or required as a condition of employment would not have to be compensated at the time and one-half OT rate set forth in FLSA Sec. 7(a). However, employees must receive compensation at their regular rate of pay for time spent receiving such remedial education. The basic recordkeeping requirements for employers of employees subject to the FLSA are contained in Regulations, 29 CFR Part 516, Records to be Kept by Employers.

II. Current Actions: The Department of Labor seeks extension approval to collect this information to carry out its responsibility to review and determine employers' compliance with Sec. 7(q) of FLSA. Failure to require such records to be kept would make it very difficult to determine compliance.

Current Actions: The Department of Labor seeks extension approval to collect this information to carry out its responsibility to review and determine employers' compliance with Sec. 7(q) of FLSA. Failure to require such records to be kept would make it very difficult to determine compliance.

Type of Review: Extension.

Agency: Employment Standards Administration.

BILLING CODE 4510–27–M

Mine Safety and Health Administration

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Roof Control Plans

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to Roof Control Plans. MSHA is particularly interested in comments which:

- evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- enhance the quality, utility, and clarity of the information to be collected; and
- minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed below in the Contact section of this notice.

DATES: Submit comments on or before February 24, 1997.

ADDRESSES: Written comments shall be mailed to Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, 4015 Wilson Boulevard, Room 627, Arlington, VA 22203–1984. Commenters are encouraged to send their comments on a computer disk, or via E-mail to psilvey@msha.gov, along with an original printed copy. Ms. Silvey can be reached at (703) 235–1910 (voice) or (703) 235–5551 (facsimile).

FOR FURTHER INFORMATION CONTACT: George M. Fesak, Director, Office of Program Evaluation and Information Resources, U.S. Department of Labor, Mine Safety and Health Administration, Room 715, 4015 Wilson Boulevard, Arlington, VA 22203–1984. Mr. Fesak can be reached at gfesak@msha.gov (Internet E-mail), (703) 235-8378 (voice), or (703) 235–1563 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 302(a) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. § 846, requires that a roof control plan and revisions thereof suitable to the roof conditions and mining system of each coal mine be first approved by the Secretary of Labor (Secretary) before implementation by the operator. The plan must show the type of support and spacing approved by the Secretary, and the plan must be reviewed at least every 6 months by the Secretary.

Under 30 CFR § 75.221, the information required to be submitted and approved in the roof control plan includes the following: (1) the name and address of the company; (2) the name, address, mine identification number and location of the mine; (3) the name and title of the company official responsible for the plan; (4) a description of the mine strata; (5) a description and drawings of the sequence of installation and spacing of supports for each method of mining used; (6) the maximum distance that an ATRS system is to be set beyond the last row of permanent support (if appropriate); (7) specifications and installation procedures for liners or arches (if appropriate); (8) drawings indicating the planned width of openings, size of pillars, method of pillar recovery, and the sequence of mining pillars; (9) a list of all support materials required to be used in the roof, face and rib control system; (10) the intervals at which test holes will be drilled (if appropriate); and (11) a

description of the methods to be used for the protection of persons. Roof control plans are evaluated by Mine Safety and Health Administration (MSHA) specialists on the basis of the criteria set forth in 30 CFR 75.222. The District Manager may require additional measures in plans and may approve roof control plans that do not conform to the applicable criteria in this section, provided that effective control of the roof, face, and ribs can be maintained.

Under 30 CFR 75.223, a mine operator is required to propose revisions to the roof control plan when conditions indicate that the plan is not suitable for controlling the roof, face, ribs, or coal or rock bursts, or when accident and injury experience at the mine indicates the plan is inadequate. Revisions shall also contain a mine map plot of each unplanned roof or rib fall and coal or rock burst that occurs in the active workings when certain criteria are met. The regulations also requires MSHA to review the plan every six months.

II. Current Actions

Falls of roof, face and rib continue to be a leading cause of injuries and death in underground coal mines. All underground coal mine operators are required to develop and submit roof control plans to MSHA for evaluation and approval. These plans provide the means to instruct miners, who install roof supports, in the minimum requirements and placement of roof supports. The plan also provides a reference for mine supervisors to assist them in compliance with the plan requirements. In that regard the plan is a working document for the miners.

Type of Review: Extension.

Agency: Mine Safety and Health Administration.

Title: Roof Control Plans (30 CFR 75.220, 75.221, and 75.223).

Agency Number: 1219–0004.

Recordkeeping: Indefinite.

Affected Public: Business or other for-profit.

BILLING CODE 4510–43–M

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Notification of Commencement of Operations and Closing of Mines

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed new/revision/extension/reinstatement of the information collection related to the Notification of Commencement of Operations and Closing of Mines. MSHA is particularly interested in comments which:

- evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- enhance the quality, utility, and clarity of the information to be collected; and
- minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed below in the Addressee section of this notice.

DATES: Submit comments on or before February 24, 1997.

ADDRESSES: Written comments shall be mailed to Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, 4015 Wilson Boulevard, Room 627, Arlington, VA 22203–1984. Commenters are encouraged to send their comments on a computer disk, or via E-mail to psilvey@msha.gov, along with an original printed copy. Ms. Silvey can be reached at (703) 235–1910 (voice) or (703) 235–5551 (facsimile).

FOR FURTHER INFORMATION CONTACT:

George M. Fesak, Director, Office of Program Evaluation and Information Resources, U.S. Department of Labor, Mine Safety and Health Administration, Room 715, 4015 Wilson Boulevard, Arlington, VA 22203–1984. Mr. Fesak can be reached at gfesak@msha.gov (Internet E-mail), (703) 235–8378 (voice), or (703) 235–1563 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Under 30 CFR §§ 56.1000 and 57.1000, operators of metal and nonmental mines must notify the Mine Safety and Health Administration (MSHA) when the operation of a mine will commence or when a mine is closed. Openings and closings of mines are dictated by the economic strength of the commodity mined, and by weather conditions which prevail at the mine site during various seasons.

MSHA must be aware of openings and closing so that its resources can be used efficiently in achieving the requirements of the Mine Act.

II. Current Actions

Section 103(a) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. § 813, requires that each underground mine be inspected in its entirety at lease four times a year, and each surface mine at least two times per year. Mines which operate only during warmer weather must be scheduled for inspection during the spring, summer and autumn seasons. Mines are sometimes located a great distance from MSHA field offices and the notification required by this standard precludes wasted time and trips.

Type of Review: Reinstatement (without change).

Agency: Mine Safety and Health Administration.

Title: Notification of Commencement of Operations and Closing of Mines.

OMB Number: 1219–0092.

Affected Public: Business or other for-profit.

Cite/Reference/Form/etc: 30 CFR 56.1000 and 57.1000.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts; Combined Arts Advisory Panel Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), as amended, notice is hereby given that a meeting of the Combined Arts Advisory Panel (Planning & Stabilization Section) to the National Council on the Arts will be held on January 13–16, 1997 in Room 716 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, N.W., Washington, D.C., 20506. The meeting will take place from 9:00 a.m. to 7:30 p.m. on January 13, 14 and 15 and from 9:00 a.m. to 5:00 p.m. on January 16.

This meeting will be open to the public from 2:30 p.m. to 5:00 p.m. on January 16 for a discussion of guidelines and policy related issues. The remaining portions of the meeting, from 9:00 a.m. to 7:30 p.m. on January 13, 14, and 15 and from 9:00 a.m. to 2:30 p.m. on January 16, are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the June 22, 1995 determination of the Chairman, these sessions will be closed to the public pursuant to subsection (c)(4) (6) and (9)(B) of section 552b of Title 5, United States Code.

Any person may observe meetings, or portions thereof, of advisory panels which are open to the public, and may be permitted to participate in the panel's discussions at the discretion of the panel chairman and with the approval of the full-time Federal employee in attendance.

If you need special accommodations due to a disability, please contact the Office of AccessAbility, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW, Washington, D.C. 20506, 202/682–5532, TYY/TDD 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Kathy Plowitz-Worden, Panel Coordinator, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 682–5691.

Dated: December 16, 1996.

Kathy Plowitz-Worden,

Panel Coordinator, National Endowment for the Arts.

National Endowment for the Arts; Combined Arts Advisory Panel Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), as amended, notice is hereby given that a meeting of the Combined Arts Advisory Panel (Creation & Presentation Section #2) to the National Council on the Arts will be held on January 6–10, 1997.

The meeting will be held from 9:00 a.m. to 7:30 p.m. on January 6 and January 7; from 9:00 a.m. to 8:30 p.m. on January 8 and 9; and from 9:00 a.m. to 5:00 p.m. on January 10. This meeting will be held in Room 716, at the Nancy Hanks Center, 1100 Pennsylvania Avenue, N.W., Washington, D.C., 20506.

A portion of this meeting, from 2:30 p.m. to 5:00 p.m. on January 10, will be open to the public for a discussion of guidelines and policy related issues.

The remaining portions of this meeting, from 9:00 a.m. to 7:30 p.m. on January 6 and January 7; from 9:00 a.m. to 8:30 p.m. on January 8 and 9; and from 9:00 a.m. to 2:30 p.m. on January 10, are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman of June 22, 1995, these sessions will be closed to the public pursuant to subsection (c)(4),(6) and (9)(B) of section 552b of Title 5, United States Code.

Any person may observe meetings, or portions thereof, or advisory panels which are open to the public, and may be permitted to participate in the panel's discussions at the discretion of the panel chairman and with the approval of the full-time Federal employee in attendance.

If you need special accommodations due to a disability, please contact the Office of AccessAbility, National Endowment for the Arts, 1100 Pennsylvania Avenue, N.W., Washington, D.C. 20506, 202/682–5532, TDY–TDD 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Kathy Plowitz-Worden, Panel Coordinator, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 682–5691.

Dated: December 16, 1996.

Kathy Plowitz-Worden,

Panel Coordinator, National Endowment for the Arts.

BILLING CODE 7537–01–M

Meetings of Humanities Panel

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–473, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, N.W., Washington, D.C. 20506.

VOL 61 ISS 249 DE 26 1996 UMI

FOR FURTHER INFORMATION CONTACT: Michael S. Shapiro, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506; telephone (202) 606–8322. Hearing-impaired individuals are advised that information on this matter may be obtained by contacting the Endowment's TDD terminal on (202) 606–8282.

SUPPLEMENTARY INFORMATION: The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by the grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) trade secrets and commercial or financial information obtained from a person and privileged or confidential; or (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee meetings, dated July 19, 1993, I have determined that this meeting will be closed to the public pursuant to subsections (c) (4), and (6) of section 552b of Title 5, United States Code.

1. *Date:* January 6, 1997
   Time: 8:30 a.m. to 5:00 p.m.
   Room: 430
   Program: This meeting will review applications for Education Development and Demonstration in Literature and Composition, K–16 submitted to the Division for Research and Education, for projects at the October 1, 1996 deadline.
2. *Date:* January 7, 1997
   Time: 8:30 a.m. to 5:00 p.m.
   Room: 317
   Program: This meeting will review applications for Collaborative Research in Near Eastern Studies, submitted to the Division of Research and Education for projects at the September 1, 1996 deadline.
3. *Date:* January 8, 1997
   Time: 8:30 a.m. to 5:00 p.m.
   Room: 430
   Program: This meeting will review applications for Education Development and Demonstration in Hispanic/Native American Studies, K–16 submitted to the Division of Research and Education for projects at the October 1, 1996 deadline.
4. *Date:* January 8, 1997
   Time: 8:30 a.m. to 5:00 p.m.
   Room: 317
   Program: This meeting will review applications for Collaborative Research in Cultural and Religious Studies submitted to the Division of Research and Education, for projects at the September 1, 1996 deadline.
5. *Date:* January 10, 1997
   Time: 8:30 a.m. to 5:00 p.m.
   Room: 317
   Program: This meeting will review applications for Fellowship Programs at Independent Research Institutions submitted to the Division of Research and Education, for projects at the October 1, 1996 deadline.
6. *Date:* January 10, 1997
   Time: 8:30 a.m. to 5:00 p.m.
   Room: 430
   Program: This meeting will review applications for Education Development and Demonstration in African/Asian Studies, K–16 submitted to the Division of Research and Education, for projects at the October 1, 1996 deadline.
7. *Date:* January 14, 1997
   Time: 8:30 a.m. to 5:00 p.m.
   Room: 430
   Program: This meeting will review applications for Education Development and Demonstration in Foreign Languages, K–16 submitted to the Division of Research and Education, for projects at the October 1, 1996 deadline.

Michael S. Shapiro,

Advisory Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Bioengineering and Environmental Systems; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Name: Special Emphasis Panel in Bioengineering and Environmental Systems (No. 1189).

Date and Time: January 21–22, 1997; 8:00 a.m.–5:00 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 390, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: H. Frederick Bowman, Program Director, Biomedical Engineering and Research to Aid Persons with Disabilities, Division of Bioengineering and Environmental Systems, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230, Telephone: (703) 306–1318.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

M. Rebecca Winkler,

Committee Management Officer.

Special Emphasis Panel in Chemical and Transport Systems (#1190); Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Chemical and Transport Systems (#1190).

Date and Time: January 22, 1997; 8:30 a.m. to 5:00 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 580, Arlington, VA 22230, (703) 306–1371.

Type of Meeting: Closed.

Contact Person: Dr. Robert M. Wellek and Dr. Vijay John Program Directors, Interfacial, Transport and Separation Processes, Division of Chemical and Transport Systems (CTS), Room 525, (703) 306–1371.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate nominations for the FY97 Faculty Early Career Development proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Commonwealth of Massachusetts: Staff Assessment of Proposed Agreement Between the Nuclear Regulatory Commission and the Commonwealth of Massachusetts

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of proposed agreement with the Commonwealth of Massachusetts.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has received, from the Governor of the Commonwealth of Massachusetts, a proposal to enter into an Agreement pursuant to Section 274 of the Atomic Energy Act of 1954, as amended (Act). The proposed Agreement would permit Massachusetts to assume certain portions of the Commission's regulatory authority. As required by the Act, NRC is publishing the proposed Agreement for public comment. NRC is also publishing a summary of the NRC staff assessment of the proposed Massachusetts radiation control program. Comments are requested on the proposed Agreement, especially public health and safety aspects, and the assessment.

The Agreement will effectively release (exempt) persons in Massachusetts from certain portions of the Commission's regulatory authority. The Act also requires that NRC publish those exemptions. Notice is hereby given that the pertinent exemptions have been previously published in the **Federal Register** and are codified in the Commission's regulations as 10 CFR Part 150.

DATES: The comment period expires January 23, 1997. Comments received after this date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Written comments may be submitted to Mr. David L. Meyer, Chief, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, Washington, DC 20555–0001. Copies of comments received by NRC may be examined at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC. Copies of the proposed Agreement, along with copies of the request by Governor Weld including referenced enclosures, applicable legislation, regulations for the control of radiation, and the full text of the NRC staff assessment are also available for public

inspection in the NRC's Public Document Room.

FOR FURTHER INFORMATION CONTACT: Richard L. Blanton, Office of State Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. Telephone (301) 415–2322 or e-mail RLB@NRC.GOV.

SUPPLEMENTARY INFORMATION: The Commission has received a request from Governor William Weld of Massachusetts to enter into an Agreement whereby the NRC would discontinue, and the Commonwealth would assume, certain regulatory authority as specified in the Act. Section 274 of the Act authorizes the Commission to enter into such an agreement.

Section 274e of the Act requires that the terms of the proposed Agreement be published for public comment once each week for four consecutive weeks. This notice is being published in the **Federal Register** in fulfillment of the requirement.

I. Background

(a) Section 274d of the Act provides the mechanism whereby a State may assume regulatory authority, otherwise reserved to the NRC, over certain radioactive materials [1] and uses thereof. In a letter dated March 28, 1996, Governor Weld certified that the Commonwealth of Massachusetts has a program for the control of radiation hazards that is adequate to protect health and safety of the public within the Commonwealth with respect to the materials covered by the proposed Agreement, and that the Commonwealth desires to assume regulatory responsibility for these materials. Included with the letter was the text of the proposed Agreement, which is shown in Appendix A to this notice.

The specific authorities requested by the Commonwealth of Massachusetts under this proposed Agreement are (1) the regulation of byproduct materials as defined in Section 11e.(1) of the Act, (2) the regulation of source materials, (3) the regulation of special nuclear materials in quantities not sufficient to form a critical mass, (4) the evaluation of the safety of sealed sources and devices (containing materials covered by the Agreement) for distribution in interstate commerce, and (5) the land disposal of low-level radioactive waste (as defined in the Low-Level Radioactive Waste Policy Amendments Act of 1985, 42 U.S.C. 2021b) received from other persons. The Commonwealth does not wish to assume authority over the regulation of byproduct materials as defined in Section 11e.(2) of the Act, that is over tailings from the recovery of source materials from ore, but does reserve the right to apply at a future date for an amended agreement to assume authority in this area.

(b) The proposed agreement contains nine articles that (1) list the materials and activities to be covered by the Agreement; (2) specify the activity for which the Commission will retain regulatory authority; (3) allow for future amendment of the Agreement; (4) allow for certain regulatory changes by the Commission; (5) reference the continued authority of the Commission for purposes of safeguarding nuclear materials and restricted data; (6) commit the Commonwealth and NRC to exchange information necessary to maintain coordinated and compatible programs; (7) recognize reciprocity of licenses issued by the respective agencies; (8) identify criteria for the suspension or termination of the Agreement; and (9) specify the proposed effective date. The Commission reserves the option to modify the terms of the proposed Agreement in response to comments, to correct errors, and to make editorial changes in style. Also, because of several issues posed by this request which required resolution before the Agreement could be concluded, the effective date requested by the Governor could not be realized. The final text of the Agreement, with the actual effective date, will be published after the Agreement is approved by the Commission.

(c) The Massachusetts radiation control program currently regulates users of naturally-occurring and accelerator-produced radioactive materials, and users of certain radiation-producing electronic machines. The program was enabled by Massachusetts law (Massachusetts General Law [M.G.L.] Chapter 111, § 5B) in 1958. This statute was later replaced by M.G.L. Chapter 111, Sections 5M through 5P. In 1987, M.G.L. Chapter 111H was added to provide for the regulation of low-level radioactive waste. Section 7 of the legislation contains the authority for the Governor to enter into an Agreement with the Commission.

The Massachusetts regulations contain provisions for the orderly transfer of authority over NRC licenses to the regulatory control of the Commonwealth. After the effective date of this proposed Agreement, licenses issued by NRC will continue in effect under Massachusetts regulatory authority until these licenses expire or are replaced by Commonwealth issued licenses.

(d) The NRC staff assessment finds the proposed Massachusetts program adequate to protect public health and safety, and compatible with the NRC program for materials regulation.

II. Summary of the NRC Staff Assessment of the Massachusetts Program for the Control of Agreement Materials

NRC staff has examined the proposed Massachusetts radiation control program with respect to the ability of the program to regulate agreement materials. The examination was based on the Commission's policy statement *"Criteria for Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof by States Through Agreement"* (referred to herein as the "criteria") (46 FR 7540; January 23, 1981, as amended).

(a) Organization and Personnel. The proposed program unit responsible for regulating agreement materials will consist of 13 technical/professional positions within the existing radiation control program of the Massachusetts Department of Public Health. The qualifications for staff members specified in the personnel position descriptions, and the qualifications of the current staff members, meet the criteria for education, training and experience. All current staff members hold at least bachelor's degrees in physical or life sciences, or have a combination of education and experience at least equivalent to a bachelor's degree. Most staff members hold advanced degrees, and have had additional training and experience in radiation protection. Senior staff have more than five years experience each in radiation control programs. The program director has a master's degree in public health and 15 years experience in regulatory health physics.

(b) Legislation and regulations. The Massachusetts Department of Public Health is designated by statute to be the radiation control agency. The Department is provided by statute with the authority to promulgate regulations, issue licenses, issue orders, conduct inspections, and to enforce compliance with regulations, license conditions, and orders. Licensees are required by law to provide access to inspectors.

The Department has adopted regulations (Massachusetts Regulations for the Control of Radiation or MRCR) providing radiation protection standards

[1] The materials, sometimes referred to as "agreement materials," are: (a) Byproduct materials as defined in Section 11e.(1) of the Act; (b) Byproduct materials as defined in Section 11e.(2) of the Act; (c) Source materials as defined in Section 11z. of the Act; and (d) Special nuclear materials as defined in Section 11aa. of the Act, restricted to quantities not sufficient to form a critical mass.

essentially identical to the standards in 10 CFR Part 20. Technical definitions in the MRCR are also essentially identical. The MRCR require consideration of the total radiation doses to individuals from all sources of radiation (except background radiation and radiation from medical treatment or examinations, as is the case in the NRC rules), whether the sources are in the possession of the licensee or not. The MRCR also require appropriate surveys and personnel monitoring under the close supervision of technically competent people, and the use of radiation labels, signs and symbols essentially identical to those contained in 10 CFR Part 20. Posting requirements and instruction of workers requirements adopted in the MRCR are compatible with the equivalent current requirements of the NRC.

Nothing in the Massachusetts statutes or regulations seeks to regulate areas not permitted by the Atomic Energy Act. The MRCR contains a provision to avoid interference with those regulatory requirements imposed by NRC pursuant to the Act, and for which Commonwealth licensees have not been exempted under the agreement.

(c) *Storage and Disposal.* The MRCR also contains compatible requirements for the storage of radioactive material, and for the disposal of radioactive material as waste. The waste disposal requirements cover both waste disposal by material users and the land disposal of waste received from other persons. The NRC staff noted some differences in the MRCR waste regulations as compared to the NRC regulations in 10 CFR Part 61, but determined that the differences are related either to the prohibition of shallow land burial as a disposal technology or to the ownership of the disposal site by the Massachusetts Low-Level Radioactive Waste Management Board. Because of these special provisions, NRC staff determined that the differences in the regulations do not reduce the ability of the Massachusetts radiation control program to protect health and safety, nor reduce the compatibility of the program or the regulations themselves.

(d) *Transportation of Radioactive Material.* The MRCR contains rules equivalent to 10 CFR Part 71 as in effect prior to April 1, 1996. Effective on that date, the NRC amended Part 71. Under current policy, an existing Agreement State is allowed up to three years after NRC adopts a final rule to adopt a compatible rule, or to impose each regulatory provision of the rule using an alternate legally binding requirement (LBR), such as an order or license condition. A State seeking an agreement is expected to have effective rules or LBRs compatible with those of NRC in effect at the time the agreement becomes effective. The intent of this expectation is to spare licensees in the new Agreement State from the "whipsaw" effect of being subjected first to the new NRC requirements, then the old requirements when the agreement takes effect, then again to the new requirements when later adopted by the State. Massachusetts is in the process of adopting rules compatible with the revised 10 CFR Part 71. However, these rules may not become effective before the Agreement is signed. Massachusetts intends to impose the requirements of the new Part 71 rules in the interim by issuing appropriate orders to the affected licensees.

(e) *Recordkeeping and Incident Reporting.* The MRCR incident reporting requirements are similar to the requirements in the NRC rules. The NRC staff noted that for some NRC rules that specify a records retention period of less than five years, the retention period specified in the MRCR is shorter. The NRC staff concluded, however, that the retention periods specified in the MRCR rules are adequate since the retention periods are long enough to permit examination of the records during routine inspections. The MRCR imposes retention requirements similar to the NRC rules for records which must be retained indefinitely or until the license is terminated.

(f) *Evaluation of License Applications.* The MRCR contains requirements equivalent to the current NRC regulations specifying the required content of applications for licenses, renewals, and amendments. The MRCR also provides requirements equivalent to the NRC requirements for issuing licenses and specifying the terms and conditions of licenses. The agreement materials program unit has adopted a procedure for processing applications that assures the regulatory requirements will be met, or, if appropriate, exceptions granted. The program unit has the authority by Statute to impose requirements in addition to the requirements specified in the regulations. The program unit also retains by regulation the authority to grant specific exemptions from the requirements of the regulations. The MRCR specifies qualifications for the use of radioactive materials in or on humans that are similar to the NRC requirements in 10 CFR Part 35.

The Massachusetts licensing procedures manual, along with the accompanying regulatory guides, are adapted from similar NRC documents and contain adequate guidance for the agreement materials program unit staff to use when evaluating license applications.

(g) *Inspections and Enforcement.* The Massachusetts radiation control program has adopted a schedule providing for the inspection of licensees as frequently as, or more frequently than, the inspection schedule used by NRC. The agreement materials program unit has adopted procedures for the conduct of inspections, the reporting of inspection findings, and the report of inspection results to the licensees. The program has also adopted procedures for enforcement in the MRCR.

(h) *Regulatory Administration.* The Massachusetts Department of Public Health is bound by procedures specified in Commonwealth statute for rulemaking. The program has adopted procedures to assure fair and impartial treatment of license applicants.

(i) *Cooperation with Other Agencies.* The MRCR deems the holder of an NRC license on the effective date of the Agreement to possess a like license issued by Massachusetts. The MRCR provides that these former NRC licenses will expire either 90 days after receipt from the radiation control program of a notice of expiration of such license or on the date of expiration specified in the NRC license, whichever is earlier. The MRCR also provides for "timely renewal." This provision affords the continuance of licenses for which an application for renewal has been filed more than 30 days prior to the date of expiration of the license. Licenses in timely renewal are not excluded from the transfer continuation provision. The MRCR provides exemptions from the Commonwealth's requirements for licensing of sources of radiation for NRC and U.S. Department of Energy contractors or subcontractors.

The Department of Public Health and the Department of Labor and Industries have entered into a Memorandum of Understanding, as authorized elsewhere in Massachusetts law, which provides for the Department of Public Health to exercise the responsibility and authority of the Department of Labor and Industries with respect to radiation and radioactive materials. The Department of Environmental Protection is designated as the agency to adopt the suitability standards for any proposed disposal site under the Massachusetts Low-Level Radioactive Waste Management Act. The Department of Public Health will license and regulate the site only after the Executive Secretary for Environmental Affairs has determined that the report on the site characterization study is in conformance with the suitability

standards, and the Low-Level Radioactive Waste Management Board has selected the operator.

The proposed Agreement commits the Commonwealth to use its best efforts to cooperate with the NRC and the other Agreement States in the formulation of standards and regulatory programs for the protection against hazards of radiation and to assure that the Commonwealth's program will continue to be compatible with the Commission's program for the regulation of like materials. The proposed Agreement stipulates the desirability of reciprocal recognition of licenses, and commits the Commission and the Commonwealth to use their best efforts to accord such reciprocity.

III. Staff Conclusion

Subsection 274d of the Act provides that the Commission shall enter into an agreement under subsection 274b with any State if:

(a) The Governor of the State certifies that the State has a program for the control of radiation hazards adequate to protect public health and safety with respect to the materials within the State covered by the proposed Agreement, and that the State desires to assume regulatory responsibility for such materials; and

(b) The Commission finds that the State program is in accordance with the requirements of Subsection 274o, and in all other respects compatible with the Commission's program for the regulation of such materials, and that the State program is adequate to protect public health and safety with respect to the materials covered by the proposed Agreement.

On the basis of its assessment, the NRC staff has concluded that the Commonwealth of Massachusetts meets the requirements of Section 274 of the Act. The Commonwealth's statutes, regulations, personnel, licensing, inspection, and administrative procedures are compatible with those of the Commission and adequate to protect public health and safety with respect to the materials covered by the proposed Agreement. Since the Commonwealth is not seeking authority over byproduct material as defined in Section 11e.(2) of the Act, Subsection 274o is not applicable to the proposed Agreement. The language of the Agreement requested by Governor Weld has been revised to reflect that the effective date of the proposed Agreement and the location at which it will be signed remain to be determined. Certain conventions have been used to highlight the proposed revisions. New language is shown inside boldfaced arrows, while language that would be deleted is set off with brackets.

IV. Small Business Regulatory Enforcement Fairness Act

In accordance with the Small Business Regulatory Enforcement Fairness Act of 1996, the NRC has determined that this action is not a major rule and has verified this determination with the Office of Information and Regulatory Affairs of the Office of Management and Budget (OMB).

Dated at Rockville, Maryland, this 19th day of December, 1996.

For the U. S. Nuclear Regulatory Commission.

Paul H. Lohaus,

Acting Director, Office of State Programs.

Appendix A—Proposed Agreement

Agreement Between the United States Nuclear Regulatory Commission and the Commonwealth of Massachusetts for the Discontinuance of Certain Commission Regulatory Authority and Responsibility Within the Commonwealth Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended

Whereas, The United States Nuclear Regulatory Commission (hereinafter referred to as the Commission) is authorized under Section 274 of the Atomic Energy Act of 1954, as amended (hereinafter referred to as the Act), to enter into agreements with the Governor of any State providing for discontinuance of the regulatory authority of the Commission within the State under Chapters 6, 7, and 8, and Section 161 of the Act with respect to by-product materials as defined in Sections 11e.(1) and (2) of the Act, source materials, and special nuclear materials in quantities not sufficient to form a critical mass; and,

Whereas, The Governor of the Commonwealth of Massachusetts is authorized under Massachusetts General Laws, Chapter 111H, to enter into this Agreement with the Commission; and,

Whereas, The Governor of the Commonwealth of Massachusetts certified on [June 1, 1995,] >March 28, 1996,< that the Commonwealth of Massachusetts (hereinafter referred to as the Commonwealth) has a program for the control of radiation hazards adequate to protect [the] public health and safety with respect to the materials within the Commonwealth covered by this Agreement, and that the Commonwealth desires to assume regulatory responsibility for such materials; and,

Whereas, The Commission found on [November 1, 1995,] >(date to be determined)< that the program of the Commonwealth for the regulation of the materials covered by this Agreement is compatible with the Commission's program for the regulation of such materials and is adequate to protect public health and safety; and,

Whereas, The Commonwealth and the Commission recognize the desirability and importance of cooperation[s] between the Commission and the Commonwealth in the formulation of standards for protection against hazards of radiation and in assuring that Commonwealth and Commission programs for protection against hazards of radiation will be coordinated and compatible; and,

Whereas, The Commission and the Commonwealth recognize the desirability of reciprocal recognition of licenses and exemptions from licensing of those materials subject to this Agreement; and,

Whereas, This Agreement is entered into pursuant to the provisions of the Atomic Energy Act of 1954, as amended;

Now, therefore, It is hereby agreed between the Commission and the Governor of the Commonwealth, acting in behalf of the Commonwealth, as follows:

Article I

Subject to the exceptions provided in Articles II, IV, and V, the Commission shall discontinue, as of the effective date of this Agreement, the regulatory authority of the Commission in the Commonwealth under Chapters 6, 7, and 8, and Section 161 of the Act with respect to the following materials:

A. By-product materials as defined in Section 11e.(1) of the Act;

B. Source materials;

C. Special nuclear materials in quantities not sufficient to form a critical mass; and,

D. Licensing of Low-Level Radioactive Waste Facilities.

Article II

This Agreement does not provide for discontinuance of any authority and the Commission shall retain authority and responsibility with respect to regulation of:

A. The construction and operation of any production or utilization facility;

B. The export from or import into the United States of by-product, source, or special nuclear material, or of any production or utilization facility;

C. The disposal into the ocean or sea of by-product, source, or special nuclear waste materials as defined in regulations or orders of the Commission;

D. The disposal of such other by-product, source, or special nuclear

VOL 61 ISS 249 DE 26 1996 UMI

material as the Commission from time to time determines by regulation or order should, because of the hazards or potential hazards thereof, not be so disposed of without a license from the Commission; and,

E. The extraction or concentration of source material from source material ore and the management and disposal of the resulting by-product material.

Article III

This Agreement may be amended, upon application by the Commonwealth and approval by the Commission, to include the additional area(s) specified in Article II, paragraph E, whereby the Commonwealth can exert regulatory control over the materials stated therein.

Article IV

Notwithstanding this Agreement, the Commission may from time to time by rule, regulation, or order, require that the manufacturer, processor, or producer of any equipment, device, commodity, or other product containing source, by-product, or special nuclear material shall not transfer possession or control of such product except pursuant to a license or an exemption from licensing issued by the Commission.

Article V

This Agreement shall not affect the authority of the Commission under Subsection 161b or 161i of the Act to issue rules, regulations, or orders to protect the common defense and security, to protect restricted data or to guard against the loss or diversion of special nuclear material.

Article VI

The Commission will use its best efforts to cooperate with the Commonwealth and other Agreement States in the formulation of standards and regulatory programs of the Commonwealth and the Commission for protection against hazards of radiation and to assure that Commonwealth and Commission programs for protection against hazards of radiation will be coordinated and compatible. The Commonwealth will use its best efforts to cooperate with the Commission and other Agreement States in the formulation of standards and regulatory programs of the Commonwealth and the Commission for protection against hazards of radiation and to assure that the Commonwealth's program will continue to be compatible with the program of the Commission for the regulation of like materials. The Commonwealth and the Commission will use their best efforts to keep each other informed of proposed changes in their respective rules and regulations and licensing, inspection and enforcement policies and criteria, and to obtain the comments and assistance of the other party thereon.

Article VII

The Commission and the Commonwealth agree that it is desirable to provide reciprocal recognition of licenses for the materials listed in Article I licensed by the other party or by any other Agreement State. Accordingly, the Commission and the State agree to use their best efforts to develop appropriate rules, regulations, and procedures by which such reciprocity will be accorded.

Article VIII

Commission, upon its own initiative after reasonable notice and opportunity for hearing to the Commonwealth, or upon request of the Governor of the Commonwealth, may terminate or suspend all or part of this Agreement and reassert the licensing and regulatory authority vested in it under the Act if the Commission finds that (1) such termination or suspension is required to protect public health and safety, or (2) the Commonwealth has not complied with one or more of the requirements of Section 274 of the Act. The Commission may also, pursuant to Section 274j of the Act, temporarily suspend all or part of this Agreement if, in the judgement of the Commission, an emergency situation exists requiring immediate action to protect public health and safety and the Commonwealth has failed to take necessary steps. The Commission shall periodically review this Agreement and actions taken by the Commonwealth under this Agreement to ensure compliance with Section 274 of the Act.

Article IX

This Agreement shall become effective on [April 24, 1996,] >(date to be determined)< and shall remain in effect unless and until such time as it is terminated pursuant to Article VIII.

Done at [Boston, Massachusetts] >(location to be determined)<, in triplicate, this [24]th Day of [April, 1996] >(date to be determined)<.

For the United States Nuclear Regulatory Commission

Shirley Ann Jackson,

Chairman.

For the Commonwealth of Massachusetts

William F. Weld,

Governor.

BILLING CODE 7590–01–P

Policy and Procedure for Enforcement Actions; Policy Statement

AGENCY: Nuclear Regulatory Commission.

ACTION: Policy statement: corrections.

SUMMARY: This document presents corrections to the revision of the policy statement that was published December 10, 1996 (61 FR 65088). This action is necessary to correct the inadvertent failure to change two paragraphs of the Enforcement Policy concerning matters on which the NRC staff must notify the Commission. These additional changes are consistent with the other changes that were made in the revision as published.

EFFECTIVE DATE: The revision became effective on December 10, 1996.

FOR FURTHER INFORMATION CONTACT: James Lieberman, Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555 (301) 415–2741.

SUPPLEMENTARY INFORMATION: On December 10, 1996 (61 FR 65088), the NRC publised a revision to its "General Statement of Policy and Procedure for NRC Enforcement Actions" (Enforcement Policy or Policy) to address issues regarding consultation with the Commission and other subjects. Sections III of the Policy was revised to reflect the new list of circumstances in which the Commission would be consulted or notified. However, two paragraphs in Section VII, Exercise of Discretion, were not amended to reflect the changes adopted by the Commission. This document modifies those two paragraphs to reflect the appropriate policy as to notification to the Commission when the staff exercises discretion in enforcement matters. These two paragraphs were inadvertently omitted in the revision prepared for publication in the **Federal Register**.

Accordingly, the NRC Enforcement Policy is corrected by revising the first paragraphs in Sections VII.A.1. and VII.B. to read as follows:

General Statement of Policy and Procedure for NRC Enforcement Actions

* * * * *

VII. EXERCISE OF DISCRETION

* * * * *

A. Escalation of Enforcement Sanctions

* * * * *

1. Civil penalties. Notwithstanding the outcome of the normal civil penalty assessment process addressed in Section VI.B, the NRC may exercise discretion

by either proposing a civil penalty where application of the factors would otherwise result in zero penalty or by escalating the amount of the resulting civil penalty (i.e., base or twice the base civil penalty) to ensure that the proposed civil penalty reflects the significance of the circumstances and conveys the appropriate regulatory message to the licensee. The Commission will be notified if the deviation in the amount of the civil penalty proposed under this discretion from the amount of the civil penalty assessed under the normal process is more than two times the base civil penalty shown in Tables 1A and 1B. Examples when this discretion should be considered include, but are not limited to the following:

* * * * *

B. Mitigation of Enforcement Sanctions

The NRC may exercise discretion and refrain from issuing a civil penalty and/or a Notice of Violation, if the outcome of the normal process described in Section VI.B does not result in a sanction consistent with an appropriate regulatory message. In addition, even if the NRC exercises this discretion, when the licensee failed to make a required report to the NRC, a separate enforcement action will normally be issued for the licensee's failure to make a required report. The approval of the Director, Office of Enforcement, with consultation with the appropriate Deputy Executive Director as warranted, is required for exercising discretion of the type described in Section VII.B.1.b where a willful violation is involved, and of the types described in Sections VII.B.2 through VII.B.6. Commission notification is required for exercising discretion of the type described in: (1) Section VII.B.2 the first time discretion is exercised during that plant shutdown, and (2) Section VII.B.6 where appropriate based on the uniqueness or significance of the issue. Examples when discretion should be considered for departing from the normal approach in Section VI.B include but are not limited to the following:

* * * * *

Dated at Rockville, MD, this 18th day of December, 1996.

For the Nuclear Regulatory Commission.

John C. Hoyle.

Secretary of the Commission.

BILLING CODE 7590–01–P

UNITED STATES POSTAL SERVICE

Board of Governors; Notice of a Sunshine Act Meeting

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR Section 7.5) and the Government in the Sunshine Act (5 U.S.C. Section 552b), hereby gives notice that it intends to hold a meeting at 1:00 p.m. on Monday, January 6, 1997, and at 8:30 a.m. on Tuesday, January 7, 1997, Washington, DC.

The January 6 meeting is closed to the public (see 61 FR 65092, December 10, 1996). The January 7 meeting is open to the public and will be held at U.S. Postal Service Headquarters, 475 L'Enfant Plaza, SW., in the Benjamin Franklin Room. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, Thomas J. Koerber, at (202) 268–4800.

Agenda

Monday Session

January 6–1:00 p.m. (Closed)

1. Consideration of a Proposed Filing with the Postal Rate Commission for Parcels. (John H. Ward, Vice President, Marketing Systems)
2. Consideration of Classroom Publication Rates. (John H. Ward, Vice President, Market Systems)
3. Consideration of Funding Approval for International Service Centers. (James F. Grubiak, Vice President, International Business; and John F. Kelly, Vice President, New York Metro Area Operations)

Tuesday Session

January 7–8:30 a.m. (Open)

1. Minutes of the Previous Meetings, December 2–3, 1996.
2. Remarks of the Postmaster General/Chief Executive Office. (Marvin Runyon)
3. Consideration of Board Resolution on Capital Funding. (Tirso del Junco, M.D., Chairman of the Board)
4. Consideration of Amendments to BOG Bylaws. (Chairman del Junco)
5. Annual Report on Government in the Sunshine Act Compliance. (Thomas J. Koerber, Secretary of the Board.
6. Postmaster General's FY 1996 Annual Report. (Larry M. Speakes, Senior Vice President, Corporate & Legislative Affairs)
7. Capital Investments.

a. Golden, Colorado, Main Post Office/Delivery Distribution Center. (Rudolph K. Umscheid, Vice President, Facilities)

b. Las Vegas, Nevada, Processing and Distribution Center. (Vice President Umscheid)

c. Remote Computer Reader Enhanced Handwriting Recognition. (William J. Dowling, Vice President, Engineering)

8. Election of Chairman and Vice Chairman of the Board of Governors.
9. Tentative Agenda for the February 3–4, 1997, meeting in Albuquerque, New Mexico.

Thomas J. Koerber,

Secretary.

[FR Doc. 96–33015 Filed 12–23–96; 2:36 pm]

BILLING CODE 7710–12–M

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

SUMMARY: In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Title and purpose of information collection: Customer Satisfaction Surveys. In accordance with Executive Order 12862, the Railroad Retirement Board (RRB) conducts a number of customer surveys designed to determine the kinds and quality of services our beneficiaries, claimants, employers and members of the public want and expect, as well as their satisfaction with existing RRB services. The information collected is used by RRB management to determine where and to what extent services are satisfactory and where and to what extent services can be improved. The surveys are limited to data collections that solicit strictly voluntary opinions, and do not collect information which is required or regulated.

The RRB currently utilizes OMB public information collection 3220–0188 (RRB Customer Satisfaction Survey), to gather information used in monitoring customer satisfaction. The RRB proposes to replace this information collection by securing approval of a generic clearance for customer survey activities. The generic clearance will enhance the RRB's capability to submit new or revised customer survey instruments needed to timely implement customer monitoring

activities to OMB for review and approval.

The average burden per response for current customer satisfaction activities is estimated to range from 2 minutes for a web-site questionnaire to 2 hours for participation in a focus group. The RRB estimates 11,550 annual respondents totaling 1,043 hours of annual burden for the proposed generic customer survey clearance.

ADDITIONAL INFORMATION OR COMMENTS: To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material, please call the RRB Clearance Officer at (312) 751–3363. Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 N. Rush Street, Chicago, Illinois 60611–2092. Written Comments should be received within 60 days of this notice.

Chuck Mierzwa,

Clearance officer.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Proposed Amendments

Rule 2a–7, SEC File No. 270–258, OMB Control No. 3235–0268
Rule 34b–1, SEC File No. 270–305, OMB Control No. 3235–0346
Regulation C, SEC File No. 270–68, OMB Control No. 3235–0074
Form N–1A, SEC File No. 270–21, OMB Control No. 3235–0307
Form N–3, SEC File No. 270–281, OMB Control No. 3235–0316
Form N–4, SEC File No. 270–282, OMB Control No. 3235–0318
Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Filings and Information Services, Washington, D.C. 20549

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget requests for approval of proposed amendments on previously approved collections of information:

Proposed Technical Amendments to Rule 2a–7

Rule 2a–7 [17 CFR 270.2a–7] under the Investment Company Act of 1940 (15 U.S.C. 80a–1, *et seq.*) ("1940 Act"), governs money market funds. The rule exempts money market funds from the valuation requirements of the 1940 Act, and, subject to certain risk-limiting conditions, permits money market funds to use the "amortized cost method" of asset valuation or the "penny rounding method" of share pricing. On March 21, 1996, the Commission adopted amendments to rule 2a–7 (Investment Company Act Rel. No. 21837 (Mar. 21, 1996)) ("March Amendments"). The proposed technical amendments to rule 2a–7 would clarify the application of the March Amendments, revise terminology used in the rule to reflect common market usage and codify a number of interpretive positions taken by the staff of the Division of Investment Management.

Rule 2a–7 imposes certain recordkeeping and reporting obligations upon money market funds.[1] Because the proposed technical amendments to rule 2a–7 would clarify existing recordkeeping obligations, it is estimated that the amendments would have no effect on the annual reporting burden of money market funds. It is estimated that approximately 1,345 money market funds are subject to the rule each year. It is further estimated that compliance with the rule's recordkeeping and reporting requirements imposes an average annual burden per money market fund of approximately 146 hours, so that the total annual burden for all money market funds would be 196,371 hours. These estimates of burden hours are made solely for purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even a representative survey or study.

Proposed Amendments to the Sales Literature and Advertising Rules Applicable to Money Market Funds

Proposed amendments to the sales literature and advertising rules applicable to money market funds (1) would clarify that income included in a money market fund's yield calculated in accordance with a uniform formula is limited to investment income, and (2) would require that total return used by money market funds in sales literature and advertisements must be accompanied by a quotation of current yield, computed in accordance with Commission rules, and set forth with equal prominence. It is estimated that the proposed amendments would not result in an increase in the total annual burden for all money market funds because the majority of money market funds include only investment income in calculating yield, and do not use total return based on short periods of time in sales literature and advertisements. The estimated burden hours appearing below are made solely for the purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even representative survey or study of the cost of Commission rules and forms.

Rule 34b–1 under the 1940 Act governs sales material that accompanies or follows the delivery of a statutory prospectus ("sales literature"). It is estimated that there are approximately 287 respondents (including money market funds) that file approximately five responses annually pursuant to rule 34b–1. The burden from rule 34b–1 requires approximately 2.4 hours per response resulting from the collection of information.

Regulation C provides standard instructions to guide registrants filing registration statements under the Securities Act of 1933 (15 U.S.C. 77a, et seq.) ("1933 Act"). Regulation C is assigned one burden hour for administrative convenience because the rule simply prescribes the disclosure that must appear in other filings under the 1933 Act.

The 1940 Act requires investment companies to register with the Commission before they conduct any business in interstate commerce. The registration statement required under Section 8(b) of the 1940 Act must contain such information as the Commission has determined to be necessary or appropriate in the public interest or for the protection of investors. The various investment company registration forms state that if a money market fund wishes to

[1] Rule 2a–7 requires the board of directors of a money market fund, in supervising the fund's operations and delegating certain responsibilities to the fund's investment adviser, to establish written procedures designed to stabilize the fund's net asset value. These procedures typically address various aspects of the fund's operations. The fund must maintain and preserve for six years a written record of the board's considerations and actions taken in connection with the discharge of its responsibilities, to be included in the board's minutes. The fund must also maintain and preserve for three years written records of certain credit risk analyses, evaluations with respect to securities subject to certain types of liquidity enhancements and conditional and unconditional credit enhancements, and determinations with respect to adjustable rate securities and asset backed securities. If the board takes action with respect to defaulted securities, events of insolvency, or deviations in share price, the fund must file with the Commission an exhibit to Form N-SAR describing the nature and circumstances of such action. In the event of certain default or insolvency events, the fund must notify the Commission of the events and the actions the fund intends to take in response to the situation. As a matter of sound business practice, the board must develop and maintain certain additional procedures and records to ensure compliance with the risk-limiting conditions of rule 2a–7.

advertise its yield, it must calculate yield according to a standardized Commission formula set forth in the forms, and provide a quotation of yield in its registration statement.[2] The proposed amendments to Forms N–1A, N–3 and N–4 would conform the applicable items on each form to the proposed amendments to rule 34b–1 under the 1940 Act and rule 482 under the 1933 Act. The proposed amendments would not result in an increase in burden hours.

General comments regarding the estimated burden hours should be directed to the Desk Officer for the Securities and Exchange Commission at the address below. Any comments concerning the accuracy of the estimated average burden hours for compliance with Commission rules and forms should be directed to Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549 and Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Dated: December 18, 1996.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

Submission for OMB Review; Comment Request

New

Form DF; SEC File No. 270–430, OMB Control No. 3235-mew

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget requests for approval of the addition of the following form:

Form DF—Notice of Delayed Filing Pursuant to Rule 13(d) of Regulation S–T. This form is to be filed in connection with a delayed electronic filing to preserve the timeliness of filing of reports or schedules filed pursuant to Sections 13(a), 13(d), 13(g), 15(d) and 16(a) of the Exchange Act, which, notwithstanding good faith efforts, are not filed in a timely manner because of technical difficulties beyond the electronic filer's control. The form will be available for public inspection. Issuers, corporate insiders and significant beneficial owners are the likely respondents.

The Commission's proposal to add Form DF would result in an estimated addition of 12 minutes of burden hour per submission, for a total burden of 100 hours, given an estimate of 500 responses per year.

General comments regarding the estimated burden hours should be directed to the Desk Officer for the Securities and Exchange Commission at the address below. Any comments concerning the accuracy of the estimated average burden hours for compliance with Commission rules and forms should be directed to Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549 and Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Dated: December 21, 1996.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

Issuer Delisting; Notice of Application To Withdraw From Listing and Registration; (Centennial Technologies, Inc., Common Stock, $.01 Par Value) File No. 1–12912

December 19, 1996.

Centennial Technologies, Inc. ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the above specified security ("Security") from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing the Security from listing and registration include the following:

According to the Company, it has listed the Security with the New York Stock Exchange, Inc. ("NYSE"). In making the decision to withdraw the Security from listing on the Amex, the Company considered its anticipated listing on the NYSE, its continuing need to reduce its costs of doing business in the current competitive environment in which it operates, and the prohibitive cost of listing of the Security on both the Amex and the NYSE.

Any interested person may, on or before January 13, 1997, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–22406; International Series Release No. 1038; 812–9582]

The Industrial Credit and Investment Corporation of India Limited

December 18, 1996.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "Act").

APPLICANT: The Industrial Credit and Investment Corporation of India Limited ("ICICI").

RELEVANT ACT SECTIONS: Order requested under section 6(c) of the Act that would exempt applicant from all provisions of the Act.

SUMMARY OF APPLICATION: Applicant, an industrial finance company, requests an order exempting it from all provisions of the Act in connection with the offer and sale of its securities in the United States.

FILING DATE: The application was filed on May 2, 1995, and amended on January 30, 1996, July 22, 1996, and on December 17, 1996.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a

[2] See Item 22(a) of Form N–1A [17 CFR 239.15A and 274.11A]; Item 25(a) of Form N–3 [17 CFR 239.17a and 274.11b]; and Item 21(a) of Form N–4 [17 CFR 239.17b and 274.11c].

hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 13, 1997 and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writers's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street N.W., Washington, D.C. 20549. Applicant, c/o Pierre de Saint Phalle, Davis Polk & Wardwell, 450 Lexington Avenue, New York, New York 10017.

FOR FURTHER INFORMATION CONTACT: Sarah A. Buescher, Staff Attorney, at (202) 942–0573, or Elizabeth G. Osterman, Assistant Director, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant, a limited liability company under the Indian Companies Act, 1913, was established in 1955 as a result of an initiative of the Government of India (the "Government"), the International Bank for Reconstruction and Development, and representatives of Indian industry. Applicant states that it is one of India's largest publicly traded industrial finance companies and, together with two other finance institutions owned or controlled by the Government, is a key source of long-term financing of private sector industry in India.

2. Historically, ICICI has been owned by Government owned or controlled institutions. As of March 31, 1996, 50.04% of applicant's outstanding equity shares were owned by financial institutions owned partly or wholly by the Government. An additional 6.4% of applicant's outstanding equity shares were owned by Government companies, nationalized banks, and their mutual funds. One of applicant's 16 directors is nominated by the Government and another director is a representative of India's Ministry of Industry.

3. Applicant has been designated a Development Financial Institution (a "DFI") by the Securities and Exchange Board of India (the "SEBI"). In its role as a DFI, applicant's financing objectives are largely influenced by Government policies. Applicant is also one of the largest of the All-India Financial Institutions in India, which are Public Financial Institutions that provide medium-term and long-term financial assistance to all sectors of the Indian economy for setting up new projects and for expansion and modernization of existing facilities. As a Public Financial Institution under the Indian Companies Act of 1956, applicant has the same status as other Government owned financial institutions and is entitled to various exemptions, including exemptions from certain provisions of the tax code and other laws.

4. Applicant typically provides assistance of medium-term duration to industrial companies to finance the cost of the establishment, modernization, or expansion of manufacturing and processing facilities. Applicant represents that the greatest use of the proceeds of its term loans is for the purchase of specified equipment and related services. As of March 31, 1996, approximately 80.1% of applicant's total loan portfolio (including leased assets) represented loans to finance the purchase price of specified machinery and equipment. Substantially all project loans are secured either by all assets of the borrower and/or by guarantees of commercial banks, state governments or the Government, and provide full recourse to the borrower. As security, applicant normally requires a borrower to create a mortgage over all its assets. Applicant does not normally make working capital loans. For the year ending March 31, 1996, 72.9% of applicant's total income from operations was from project loans (including debentures).

5. Applicant also offers financing assistance through underwriting or direct subscription of equity shares. This assistance is usually offered in conjunction with project finance loans. ICICI does not purchase any equity or preference shares in the secondary market. Applicant also provides financing assistance through deferred credits, leasing, installment sale, and asset credits. In addition, due to deregulation of the Indian economy, applicant recently has expanded into related financial activities such as custodian and debenture trusteeship activities, transfer agent services and investment advisory services (to be provided by separate subsidiaries), a merchant banking joint venture, a commercial bank subsidiary, and a trust company for sponsoring mutual funds.

6. Applicant provides project and equipment loans and other services to the Indian private sector, principally to industries such as textiles, chemicals, fertilizers, cement, metal, machinery, and transport equipment. ICICI restricts its credit exposure to specific industries by imposing a per-industry lending limitation of 15% of applicant's total asset portfolio. In addition, applicant's credit exposure to individual companies or business groups is kept below ceilings mandated by the Reserve Bank of India (the "RBI") for Public Financial Institutions (such as ICICI) and for commercial banks.

7. Generally, applicant does not bear any exchange rate risk with respect to its foreign currency loans because it typically shifts foreign exchange risk to its borrowers. All of applicant's loans and, with a few exceptions, all debentures, are held by applicant to maturity. Applicant does not purchase or sell loans or debentures in the secondary market.

8. The administration of ICICI is governed by the general provisions of the Indian Companies Act and other statutes applicable to public limited companies in India. Applicant is subject to extensive regulation by both the RBI and the SEBI. ICICI is regulated by the RBI as a non-bank financial institution and not as a banking institution or trust company. The RBI regulates ICICI's commercial lending, issuing certificates of deposit, issuing finance letters of credit, and engaging in foreign currency trading. In 1994, the RBI adopted capital adequacy guidelines for other types of financial institutions, which are adhered to by applicant. Capital adequacy guidelines are designed to protect the solvency of financial institutions by establishing limits on the amount of leverage they may incur. ICICI's accounting policies comply with guidelines established by the RBI. ICICI is also subject to specific practice guidelines established by the RBI relating to eligible clients, periodic reports, income recognition and asset allocation, and rates payable on certificates of deposit (generally discount instruments) and "fixed" deposits (generally interest bearing instruments).

9. The SEBI regulates applicant's underwriting, merchant banking, asset management, custodial, and debenture trusteeship activities. The SEBI prescribes conditions for the registration of these activities and establishes standards of obligations and responsibilities. SEBI regulations also establish requirements for underwriters and underwriting agreements, require the adoption of codes of ethics, and prohibit conflicts of interest and insider trading.

10. Applicant proposes to offer and sell equity and debt securities in the United States. Applicant will not offer or sell any such securities unless (a) they are registered under the Securities Act of 1933 (the "Securities Act"), or (b) in the opinion of United States counsel for applicant there is an exemption from registration under the Securities Act available with respect to such offer and sale, or (c) the staff of the SEC states that they would not recommend that the SEC take any action under the Securities Act if the securities are not registered. In February 1996, applicant sold bonds in a Euro-offering in reliance on Regulation S under the Securities Act, including a private placement in reliance on rule 144A under the Securities Act.

11. Although applicant does not expect that the Government will guarantee payments on the notes that applicant proposes to sell in the United States, applicant states that investors would have the protection afforded by both the Indian regulation of ICICI's operations and the requirements of the Securities Act and the anti-fraud provisions of the Securities Exchange Act of 1934.

Applicant's Legal Analysis

1. Section 3(a)(3) of the Act defines an investment company to include any issuer engaged in the business of investing, reinvesting, owning, holding, or trading in securities, and that owns or proposes to acquire investment securities, having a value exceeding 40% of the issuer's total assets. As of March 31, 1996, 63.4% of applicant's assets consisted of obligations of industrial concerns pursuant to loans made to them by applicant. Such obligations could be deemed to be "investment securities" within the meaning of section 3(a)(3). As a result, applicant may be deemed to be an "investment company" under the Act. Applicant states that its financing activities currently fit within the literal language of sections (3(c)(5)(A) and (B) of the Act.[1] However, because ICICI's activities are expanding, it may not meet the requirements of section 3(c)(5) in the future. To prevent uncertainty as to its status under the Act, applicant requests an order pursuant to section 6(c) of the Act for an exemption from all provisions of the Act.

2. Section 6(c) of the Act provides that the SEC may exempt any person or transaction from any provision of the Act or any rule thereunder to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant requests an order under section 6(c) exempting it from all provisions of the Act.

3. Rule 3a-6 under the Act excludes foreign banks from the definition of investment company for all purposes under the Act. A "foreign bank" is defined to include a banking institution "engaged substantially in commercial banking activity" which, in turn, is defined to include "extending commercial and other types of credit, and accepting demand and other types of deposits." Applicant believes that it is functionally equivalent to a foreign bank because it offers financial services and issues financial products similar to those offered and issued by traditional foreign banks, and it is subject to oversight, supervision, and regulation. Because applicant presently does not accept demand deposits, it may not be eligible for the exemption provided by rule 3a-6.

4. Applicant represents that RBI regulations governing its activities are similar to those governing commercial banks. The principal differences between RBI's regulation of non-bank financial institutions and banks are the non-banks' exemption from RBI regulations to minimum cash reserve ratios and statutory liquidity ratios and in the RBIs authority over the appointment of directors of bank boards only.

5. Applicant argues that, as a development financial institution designed to promote and provide a source of finance for industry in India, it is not within the intent of the Act and its characteristics different from the types of investment companies at which the Act was generally directed.

Applicant's Conditions

Applicant agrees that the order granting the requested relief will be subject to the following conditions:

1. In connection with any offering by the applicant of its securities in the United States, the applicant will appoint an agent to accept service of process in any suit, action or proceeding brought on the securities and instituted in any state or federal court in the City or State of New York by the holder of any such securities. The applicant will expressly submit to the jurisdiction of the New York State and United States Federal courts sitting in the City of New York with respect to any such suit, action or proceeding. Applicant will also waive the defense of an inconvenient forum to the maintenance of any such action or proceeding. Such appointment of an agent to accept service of process and such consent to jurisdiction shall be irrevocable until all amounts due and to become due in respect of debt securities have been paid and until any equity securities offered in the United States are no longer outstanding. No such submission to jurisdiction or appointment of agent for service of process will affect the right of a holder of any such security to bring suit in any court which shall have jurisdiction over the applicant by virture of the offer and sale of such securities or otherwise.

2. Applicant will rely on this order only so long as (a) its activities conform to the activities described in the application and (b) applicant continues to be regulated by the Government as a financial institution, as described in the application.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 96-32719 Filed 12-24-96; 8:45 am]

BILLING CODE 8010-01-M

[1] Sections 3(c)(5)(A) and (B) except from the definition of "investment company" any person who is not engaged in the business of issuing certain specified securities and who is primarily engaged in (A) "purchasing or otherwise acquiring notes, drafts, acceptances, open accounts receivable, and other obligations representing part of all of the sales price of merchandise, insurance, and services" and (B) "making loans to manufacturers, wholesalers, and retailers of, and to prospective purchasers of, specified merchandise, insurance, and services."

Issuer Delisting; Notice of Application To Withdraw From Listing and Registration; (Providence Energy Corporation, Common Stock, $1.00 Par Value) File No. 1-10032

December 19, 1996.

Providence Energy Corporation ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security ("Security") from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing the Security from listing and registration include the following:

According to the Company, the Board of Directors of the Company adopted resolutions on October 17, 1996, to withdraw the Common Stock from listing on the Amex and, instead, to list such Common Stock on the New York Stock Exchange, Inc. ("NYSE").

Any interested person may, on or before January 13, 1997, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549, facts hearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–22407; 812–10258]

Van Kampen American Capital Equity Opportunity Trust, et al.

December 18, 1996.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Van Kampen American Capital Equity Opportunity Trust (the "Trust"), on behalf of itself and its series, Stepstone Growth Equity and Treasury Securities Trust, Series 1, Stepstone Funds on behalf of itself and its portfolio, Stepstone Growth Equity Fund (the "Equity Fund"), Van Kampen American Capital Distributions, Inc. (the "Sponsor"), Pacific Alliance Capital Management (the "Adviser"), and SEI Financial Services Company (the "Distributor").

RELEVANT ACT SECTIONS: Order requested under section 11(a) for an exemption from section 11(c).

SUMMARY OF APPLICATION: Applicants request an order to permit certain offers of exchange involving the Trust.

FILING DATE: The application was filed on July 22, 1996 and amended on November 22, 1996.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persona may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 13, 1997 and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing request should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, N.W., Washington, D.C. 20549. Applicants: The Sponsor and the Trust, One Parkview Plaza, Oak Brook Terrace, Illinois 60181; the Adviser, 475 Sansome Street, San Francisco, CA 94111; the Funds, 2 Oliver Street, Boston, MA 02109; and the Distributor, 680 East Swedesford Road, Wayne, PA 19087–1658.

FOR FURTHER INFORMATION CONTACT: Sarah A. Buescher, Staff Attorney, at (202) 942–0573, or Mercer E. Bullard, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. The Trust is a unit investment trust registered under the Act that will consist of a series of unit investment trusts, each of which will be similar but separate and designated by a different series number ("Trust Series"). Each Trust Series will be created under the laws of one of the United States pursuant to a trust agreement which will contain information specific to that Trust Series and which will incorporate by reference the master trust indenture between the Sponsor and a financial institution that is a bank within the meaning of section 2(a)(5) of the Act and that satisfies the criteria in section 26(a) of the Act (the "Trustee"), and an evaluator. The trust agreement and the master trust indenture are referred to collectively as the "Trust Agreement."

2. The Sponsor is a Delaware corporation and a wholly-owned subsidiary of Van Kampen American Capital, Inc. The Sponsor is a registered broker-dealer and a member of the National Association of Securities Dealers, Inc. The Sponsor currently acts as principal underwriter for the Van Kampen American Capital of Mutual Funds.

3. Stepstone Funds is an open-end management investment company registered under the Act. Stepstone Funds is not affiliated with the Sponsor or the Trust. The Equity Fund is one of fourteen portfolios offered by Stepstone Funds (collectively, the "Funds"). Stepstone Funds has entered into an investment advisory agreement with the Adviser pursuant to which the Adviser acts an investment adviser for the Equity Fund and the other portfolios of Stepstone Funds.

4. Several of the Funds, including the Equity Fund, offer two classes of shares, the Institutional Class and the Investment Class. The Institutional Class is offered without a sales charge. The Investment Class is offered at net asset value plus a front-end sales load. Purchases of the Investment Class shares in the amount of $1 million or more are not subject to a front-end sales load, but redemptions of such amounts, purchased in reliance upon the waiver accorded to purchases of $1 million or more, within one year of purchase are subject to a contingent deferred sales load ("CDSL").

5. Certain Funds, including the Equity Fund, have adopted a distribution plan with respect to their Investment Class shares pursuant to rule 12b–1 under the Act ("12b–1 Plan"). With respect to each portfolio's 12b–1 Plan, Stepstone Funds is authorize to pay the Distributor a fee at the annual rate of up to 0.40% of the respective portfolio's Investment Class shares average daily net assets, of which a maximum of .25% may be used to compensate broker-dealers and service providers that provide administrative and/or distribution services to Investment Class shareholders of their customers who beneficially own Investment Class shares. For the current year, the Distributor has agreed to waive any fees payable pursuant to the 12b–1 Plan for several of the Funds. The Distributor reserves the right, however, to terminate its waiver at any time at its sole discretion. The Distributor is a registered broker-dealer and acts as underwriter for the shares of the Funds.

6. Each Trust Series will have a portfolio consisting initially of shares of one of the Funds and zero coupon obligations. The Sponsor's obligation to purchase any such obligations from third parties in order to fulfill contracts to purchase such obligations held by a Trust Series will be backed by an irrevocable letter of credit. All zero coupon obligations in any one Trust Series will have essentially identical maturities.

7. The Trust Series are intended to be offered to the public initially at prices based on the net asset value of the shares of the Fund selected for deposit in that Trust Series, plus the offering side value of the zero coupon

obligations contained therein, plus a sales charge. Each Trust Series will redeem units representing undivided interests in that Trust Series (the "Units") at prices based on the aggregate bid side evaluation of the zero coupon obligations plus the net asset value of the Fund shares.

8. The Sponsor will deposit the zero coupon obligations in a Trust Series at a price determined by an evaluator.[1] The Trust Agreement will govern and the prospectus will fully disclose this procedure. The shares of the Funds will be deposited at their net asset value. Simultaneously with such deposit, the Trustee will deliver to the Sponsor registered certificates for Units which will represent the entire ownership of the Trust Series. These Units, in turn, will be offered for sale to the public by the Sponsor through the final prospectus following the declaration of effectiveness of the registration statement.

9. With the deposit of the securities in the Trust Series on the initial date of deposit, the Sponsor will have established a proportionate relationship between the principal amounts of zero coupon obligations and Fund shares in the Trust Series. The Sponsor will be permitted under the Trust Agreement to deposit additional securities, which may result in a potential corresponding increase in the number of Units outstanding. Such Units may be continuously offered for sale to the public by means of the prospectus. The Sponsor anticipates that any additional securities deposited in the Trust Series subsequent to the initial date of deposit in connection with the sale of these additional Units will maintain the proportionate relationship between the principal amounts of zero coupon obligations and Fund shares in the Trust Series.

10. Each Trust Series will be structured so that it will contain a sufficient amount of zero coupon obligations to assure that, at the specified maturity date for such Trust Series, the initial investors purchasing Units of the Trust Series on the first date they are offered for sale will receive back at least the total amount of their original investment in the Trust Series, including the sales charge. To the extent that the Fund pays dividends or makes capital gains distributions during the life of the Trust Series and to the extent that Fund shares have any value at the maturity of the Trust Series, the value of the purchaser's investment will have increased.

11. Each Trust Series will be able to acquire no more than 10% of the outstanding shares of any Fund.[2] Shares of only one of the Funds will be sold for deposit in any one Trust Series and the sales charge or CDSL, if any, on such shares will be waived so that such sales will be at net asset value.

12. Since the shares of the Funds have their net asset values calculated daily and this value will be readily available to the Sponsor, no evaluation fee will be charged with respect to determining the value of the Fund shares which comprise part of the value of the Units. The evaluator will charge an evaluation fee only with respect to that portion of the portfolio of a Trust Series which consists of zero coupon obligations.

13. The Sponsor and the Distributor will rebate to the Trustee any rule 12b–1 fees they receive on shares of the Funds held by the Trust Services. Any rule 12b–1 fees so rebated will be distributed along with other Fund income earned by the Trust. Any Fund related distributions, including amounts attributable to rebated rule 12b–1 fees, will reflect the deduction by the Trust of bona fide Trust expenses. If such Trust expenses exceed the amount of distributions from the Fund, excluding rebated 12b–1 fees, the deduction of Trust expenses will effectively reduce the amount of such rebate that is returned to unitholders.

14. The Sponsor does not intend to maintain a secondary market for the Units of the Initial Trust Series. Although not obligated to do so, the Sponsor may maintain a secondary market for Units of subsequent Trust Series. In the event the Sponsor does not maintain a secondary market, the Trust Agreement will provide that the Sponsor will not instruct the Trustee to sell zero coupon obligations from any Trust Series until shares of the Fund have been liquidated in order not to impair the protection provided by the zero coupon obligations, unless the Trustee is able to sell such zero coupon obligations and still maintain at least the original proportional relationship to Unit value and will further provide that zero coupon obligations may not be sold to meet Trust expenses. In addition, the Trustee may not redeem Fund shares except to the extent necessary to meet redemption of Units by unitholders, or to pay Trust expenses should distributions received on Fund shares and rebated 12b–1 fees prove insufficient to cover such expenses.

15. Unitholders may redeem their Units at prices based upon the net asset value of the Fund shares in the Trust Series plus the aggregate bid price of the zero coupon obligations. Unitholders tendering a minimum number of shares as disclosed in the prospectus will be able to request an in-kind distribution of portfolio securities in lieu of a cash distribution. The tendering unitholder will receive the *pro rata* number of Fund shares and the Fund proposes to offer these unitholders the option of reinvesting the *pro rata* portion of zero coupon obligations into Fund shares without a sales charge. Unitholders not electing to have their portion of the zero coupon obligations reinvested in Fund shares will receive cash equal to the *pro rata* portion of the zero coupon obligations to which the tendering unitholder is entitled.

16. Similarly, each Trust Series will provide unitholders still holding at termination the minimum number of Units set forth in the prospectus the option to receive an in-kind distribution of their *pro rata* number of Fund shares. The Fund also will offer all such unitholders the option of reinvesting their *pro rata* portion of zero coupon obligations in Fund shares at net asset value. Proceeds from the zero coupon obligations will be paid in cash unless the unitholder elects reinvestment. The reinvestment options upon redemption of Units and at termination of the Trust Series are collectively referred to herein as the "Reinvestment Options." Shares acquired under the Reinvestment Options will be subject to any applicable rule 12b–1 fees as are all other shares held directly by investors.

Applicants' Legal Analysis

1. Section 11(a) of the Act makes it unlawful for any registered open-end investment company or principal underwriter for such company to make or cause to be made certain offers of exchange on any basis other than the relative net asset values of the securities to be exchanged, unless the terms of the exchange offer have first been approved by the SEC. Section 11(c) provides that section 11(a) will be applicable to any type of exchange offer involving securities of a registered unit investment trust, irrespective of the basis for the exchange. Applicants state that the intent of section 11 is to protect

[1] The Sponsor expects to be deposit substantially more than $100,000 aggregate value of zero coupon obligations and Fund shares in each Trust Series.

[2] Applicants state that they are not requesting relief from section 12(d)(1) of the Act because section 12(d)(1)(E) of the Act provides that section 12(d)(1) shall not apply to securities purchased by a registered unit investment trust if the securities are the only "investment securities" held by the trust. Applicants believe that U.S. Treasury zero coupon obligations are not "investment securities" for purposes of section 12(d)(1)(E) and that the Fund shares are the only "investment securities" which a Trust Series will hold. *See* Equity Securities Trust (pub. avail. Jan. 19, 1994).

investors from switching their investment in securities of one investment company to another investment company and the consequent erosion of their equity.[3]

2. Applicants request relief on behalf of (a) certain existing and subsequent Trust Series, (b) existing and future portfolios of the Stepstone Funds other than money market or no-load funds (*i.e.* funds that do not impose a sales load, a deferred sales load, or bear distribution expenses pursuant to a rule 12b–1 plan), and (c) open-end management investment companies, including portfolios and series thereof, that may in the future be advised by the Adviser, other than money market or no-load funds.[4]

3. Applicants note that the Reinvestment Options provide unitholders the option of either (a) in-kind distribution of their proportionate number of Fund shares or (b) receiving a cash distribution. Such unitholders also will have the option of (a) reinvesting the proceeds of the zero coupon obligations in Fund shares at net asset value (without the imposition of a CDSL or a sales load) or (b) receiving a cash distribution.

4. Applicants believe that the Reinvestment Options give the unitholders flexibility of choice. Applicants further believe that the Reinvestment Options do not raise the concerns that section 11 was designed to address because, although Fund shares have a front-end sales load or a CDSL, none will be charged to the unitholders in the proposed Reinvestment Options. Applicants note that there will be no additional cost, other than the rule 12b–1 fee, to unitholders who choose to invest in Fund shares upon redemption of Units or upon termination of the Trust.[5]

Applicants' Conditions

Applicants agree to the following as conditions to granting the requested order:

1. No sales charge, CDSL, if any, or redemption fee will be imposed on any shares of the Fund deposited in any Series of the Trust or on any Fund shares acquired by unitholders through the Reinvestment Options.

2. The prospectus of each Trust Series and any sales literature or advertising that mentions the existence of the Reinvestment Options will disclose that shareholders who elect to invest in Fund shares will incur a rule 12b–1 fee.

3. The Sponsor and the Distributor will immediately rebate to the Trustee any rule 12b–1 fees it receives on shares of the Funds acquired by the Trust Series.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–38053; File No. SR–MSRB–96–06]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Order Granting Approval to Proposed Rule Change and Notice of Filing of, and Order Granting Accelerated Approval to, Amendment No. 1 to the Proposed Rule Change Relating to MSRB Telemarketing Rules

December 16, 1996.

I. Introduction

On July 30, 1996, the Municipal Securities Rulemaking Board ("Board" or "MSRB") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend MSRB telemarketing rules[3] the proposed rule change was published for comment in the **Federal Register** on September 7, 1996.[4] No comments were received on the proposal.[5]

II. Background

Under the Telemarketing and Consumer Fraud and Abuse Prevention Act ("Telemarketing Act"), which became law in August 1994,[6] the Federal Trade Commission adopted detailed regulations ("FTC Rules")[7] to prohibit deceptive and abusive telemarketing acts and practices that became effective on December 31, 1995.[8] The FTC Rules, among other things, (i) require the maintenance of "do-not-call" lists and procedures, (ii) prohibit certain abusive, annoying, or harassing telemarketing calls, (iii) prohibit telemarketing calls before 8 a.m. or after 9 p.m., (iv) require a telemarketer to identify himself or herself, the company he or she works for, and the purpose of the call, and (v) require express written authorization or other verifiable authorization from the customer before the firm may use instruments called "demand drafts."[9]

Under the Telemarketing Act, the SEC is required either to promugage or to require the SROs to promulgate rules substantially similar to the FTC Rules, unless the SEC determines either that the rules are not necessary or appropriate for the protection of investors or the maintenance of fair and orderly markets, or that existing federal securities laws or SEC rules already provide for such protection.

The MSRB believes it has implemented the prohibition against certain abusive, annoying, or harassing telemarketing calls contained in the FTC Rules by issuing an interpretation that such conduct is violative of existing rules.[10] The MSRB believes that the proposed rule change addresses all

---

[3] Applicants state that they are not requesting relief from sections 14(a) and 19(b) of the Act and rule 19b–1 thereunder because the Trust has received an exemption from such provisions in a prior application. *See* Van Kampen Merritt Equity Opportunity Trust, Investment Company Act Release Nos. 20597 (Oct. 4, 1994) (notice) and 20672 (Nov. 1, 1994) (order).

[4] Applicants state in a letter that all existing Trust Series or portfolios of the Stepstone Funds that currently intend to rely on the requested order are named in the application.

[5] Applicants note that, if Unitholders choose instead to take a cash distribution upon termination of the Trust or upon redemption of Units and later decide to invest in Fund shares, they would have to pay a front-end sales load or would be subject to the imposition of any applicable CDSL.

[1] 15 U.S.C. § 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] On Nov. 4, 1996, the MSRB filed Amendment No. 1 to its proposal. Letter from Ronald W. Smith, Legal Associate, Municipal Securities Rulemaking Board ("MSRB"), to George A. Villasana, Attorney, Division of Market Regulation, SEC, dated Nov. 1, 1996.

[4] *See* Securities Exchange Act Release No. 37626 (Aug. 30, 1996), 61 FR 47224 (Sept. 6, 1996) (notice of File No. SR–MSRB–96–06).

[5] The Commission, however, received two comment letters on an NASD proposal, which is substantially similar. *See* Letter from Brad N. Bernstein, Assistant Vice President & Senior Attorney, Merrill Lynch, to Jonathan G. Katz, Secretary, SEC, dated Aug. 19, 1996 ("Merrill Lynch Letter"), and Letter from Frances M. Stadler, Associate Counsel, Investment Company Institute ("ICI"), to Jonathan G. Katx, Secretary, SEC, dated Aug. 21, 1996 ("ICI better").

For a discussion of the letters and responses thereto, see Securities Exchange Act Release No. 38009 (Dec. 2, 1996) (approving File No. SR–NASD–96–28). In response to these letters, the MSRB filed Amendment No. 1 to its proposal. *See* Amendment No. 1, *supra* note 3.

[6] 15 U.S.C. §§ 6101–08.

[8] §§ 310.3–4 of FTC Rules.

[9] *Id.* Pursuant to the Telemarketing Act, the FTC Rules do not apply to brokers, dealers, and other securities industry professionals. Section 3(d)(2)(A) of the Telemarketing Act.

A "demand draft" is used to obtain funds from a customer's bank account without that person's signature on a negotiable instrument. The customer provides a potential payee with bank account identification information that permits the payee to create a piece of paper that will be processed like a check, including the words "signature on file" or "signature pre-approved" in the location where the customer's signature normally appears.

[10] The Board implemented the requirement in (ii) referenced above by issuing an interpretation that abusive telemarketing calls are inconsistent with past and equitable principles of trade. *See* MSRB Reports, Vol. 16, No. 3 (Sept. 1996).

other relevant elements of the FTC Rules not covered by existing federal securities laws and regulations.

III. Description of the Proposals

Time Limitations and Disclosure

The proposed rule change adds rule G–39 to prohibit, under proposed paragraph (a) to rule G–39, a broker, dealer or municipal securities dealer or a person associated with a broker, dealer or municipal securities dealer from making outbound telephone calls to the residence of any person for the purpose of soliciting the purchase of municipal securities or retailed services at any time other than between 8 a.m. and 9 p.m. local time at the called person's location, without the prior consent of the person, and to require, under proposed paragraph (b) to rule G–39, such broker, dealer or municipal securities dealer or a person associated with a broker, dealer or municipal securities dealer to promptly disclose to the called person in a clear and conspicuous manner the caller's identity and firm, the telephone number or address at which the caller may be contacted, and that the purpose of the call is to solicit the purchase of municipal securities or related services.

Paragraph (c) to proposed rule G–39 creates exemptions from the time-of-day and disclosure requirements of paragraphs (a) and (b) for telephone calls by associated persons responsible for maintaining and servicing accounts of certain "existing customers" assigned to or under the control of the associated persons. Paragraph (c) defines "existing customer" as a customer for whom the broker, dealer or municipal securities dealer, or a clearing broker or dealer on behalf of such broker, dealer or municipal securities dealers, carries an account. Proposed subparagraph (c)(i) exempts such calls, by an associated person, to an existing customer who, within the preceding twelve months, has effected a securities transaction in, or made a deposit of funds or securities into, an account under the control of or assigned to such associated person at the time of the transaction or deposit. Proposed subparagraph (c)(ii) exempts such calls, by an associated person, to an existing customer who, at any time, has effected a securities transaction in, or made a deposit of funds or securities into an account under the control of or assigned to the associated person at the time of the transaction or deposit, as long as the customer's account has earned interest or divided income during the preceding twelve months. Each of these exemptions also permits calls by other associated persons acting at the direction of an associated person who is assigned to or controlling the account. Proposed subparagraph (c)(iii) exempts telephone calls to a broker, dealer or municipal securities dealer. The proposed rule change also expressly clarifies that the scope of this rule is limited to the telemarketing calls described herein; the terms of the rule do not otherwise expressly or by implication impose on brokers, dealers or municipal securities dealers any additional requirements with respect to the relationship between a dealer and a customer or between a person associated with a dealer and a customer.[11]

Do Not Call List

The proposed rule change amends rule G–8, on books and records, so that each broker, dealer and municipal securities dealer that engages in telephone solicitation to market its products and services is required to make and maintain a centralized do-not-call list of persons who do not wish to receive telephone solicitations from a broker, dealer or municipal securities dealer or a person associated with a broker, dealer or municipal securities dealer.[12]

Demand Draft Authorization and Recordkeeping

The proposed rule change also amends rule G–8, on books and records, to prohibit a broker, dealer or municipal securities dealer or municipal securities dealer or person associated with a broker, dealer or municipal securities dealer from obtaining from a customer or submitting for payment a check, draft, or other form of negotiable paper drawn on a customer's checking, savings, share, or similar account ("demand draft") without that person's express written authorization, which may include the customer's signature on the instrument. The proposed change to rule G–9, on preservation of records, requires the retention of such authorization for a period of three years. The proposal also states that this provision shall not, however, require maintenance of copies of negotiable instruments signed by customers.[13]

Telemarketing Scripts

The proposed rule change amends rule G–21 to include "electronic" messages sent via computer and "telemarketing scripts" within the definition of "advertisement." The inclusion of the term "electronic" within the definition of "advertisement" is intended to apply to communication available to all network subscribers including items displayed over network bulletin boards, and it is intended to apply to messages sent directly to individuals or targeted groups. Therefore, the associated record retention requirement for "advertisements" contained in the proposed change to rule G–9(b)(xiii), on record retention, will require dealers to retain telemarketing scripts for three years.

IV Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the Board, and, in particular, with Section 15B(b)(c)(C) of the Act[14] which requires, among other things, that the rules of the Board be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.[15] The proposed rule change is consistent with these objectives in that it imposes time restriction and disclosure requirements, with certain exceptions, on members' telemarketing calls, requires verifiable authorization from a customer for demand drafts, requires the maintenance of a do-not-call list, requires the retention for three years of all substantially different telemarketing scripts, and prevents members from engaging in certain deceptive and abusive telemarketing acts and practices while allowing for legitimate telemarketing practices. The Commission believes that the addition of rule G–39, prohibiting a broker, dealer or person associated with a broker, dealer or municipal securities dealer from making outbound telephone calls to the residence of any person for the purpose of soliciting the purchase of municipal securities or related services at any time other than between 8 a.m. and 9 p.m. local time at the called person's location, without the prior consent of the person, is appropriate.

---

[11] *See* Amendment No. 1, *Supra* note 3.

[12] The NYSE, the NASD, the CBOE, the Amex, and the PSE also adopted similar rules. *See* Securities Exchange Act Release Nos. 35821 (June 7, 1995), 60 FR 31337 (approving File No. SR–NYSE–95–11); 35831 (June 9, 1995) 60 FR 56624 (approving File No. SR–CBOE–95–63); 36748 (Jan. 19, 1996), 61 FR 2556 (approving File No. SR–AMEX–96–01); and 37897 (Oct. 30, 1996), 61 FR 57937 (approving File No. SR–PSE–96–32).

[13] *See* Amendment No. 1, *supra* note 3.

[14] 15 U.S.C. § 78o–4.

[15] In approving these rules, the Commission has considered the proposed rules' impact on efficiency, competition, and capital formation. 15 U.S.C. § 78c(f).

The Commission notes that, by restricting the times during which a broker, dealer or municipal securities dealer or person associated with a broker, dealer or municipal securities dealer may call a residence, the Rules furthers the interest of the public and provides for the protection of investors by preventing brokers, dealers and municipal securities dealers from engaging in unacceptable practices, such as persistently calling members of the public at unreasonable hours of the day and night.

The Commission also believes that the addition of rule G–39, requiring a broker, dealer or municipal securities dealer or person associated with a broker, dealer or municipal securities dealer to promptly disclose to the called person in a clear and conspicuous manner the caller's identity and firm, telephone number or address at which the caller may be contacted, and that the purpose of the call is to solicit the purchase of municipal securities or related services, is appropriate. By requiring the caller to identify himself or herself and the purpose of the call, the rule assists in the prevention of fraudulent and manipulative acts and practices by providing investors with information necessary to make an informed decision when purchasing municipal securities. Moreover, by requiring the associated person to identify the firm for which he or she works and the telephone number or address at which the caller may be contacted, the rule encourages responsible use of the telephone to market municipal securities.

The Commission also believes that rule G–39, creating exemptions from the time-of-day and disclosure requirements for telephone calls by associated persons, or other associated persons acting at the direction of such persons, to certain categories of "existing customers" is appropriate. The Commission believes it is appropriate to create an exemption for calls to customers with whom there are existing relationships in order to accommodate personal and timely contact with a broker, dealer or municipal securities dealer who can be presumed to know when it is convenient for a customer to respond to telephone calls. Moreover, such an exemption also may be necessary to accommodate trading with customers in multiple time zones across the United States. The Commission, however, believes that the exemption from the time-of-day and disclosure requirements should be limited to calls to persons with whom the broker, dealer or municipal securities dealer has a minimally active relationship. In this regard, the Commission believes that rule G–39 achieves an appropriate balance between providing protection for the public and the municipal brokers' and dealers' interest in competing for customers.

The Commission also believes that the amendment to rule G–8, requiring that a broker, dealer or municipal securities dealer or person associated with a broker, dealer or municipal securities dealer obtain from a customer, and maintain for three years, express written authorization when submitting for payment a check, draft, or other form of negotiable paper drawn on a customer's checking, savings, share or similar account, is appropriate. The Commission notes that by requiring a broker, dealer and municipal securities dealer or person associated with a broker, dealer or municipal securities dealer to obtain express written authorization from a customer in the above-mentioned circumstances assists in the prevention of fraudulent and manipulative acts in that it reduces the opportunity for a broker, dealer or municipal securities dealer or person associated with a broker, dealer or municipal securities dealer to misappropriate customers' funds. Moreover, the Commission believes that by requiring brokers, dealers and municipal securities dealers or persons associated with a broker, dealer or municipal securities dealer to retain the authorization for three years, rule G–8 protects investors and the public interest in that it provides interested parties with the ability to acquire information necessary to ensure that valid authorization was obtained for the transfer of a customer's funds for the purchase of a municipal security.

The Commission also believes that the amendment to rule G–8, requiring that each broker, dealer and municipal securities dealer maintain a centralized do-not-call list of persons who do not wish to receive telephone solicitations from the broker, dealer or municipal securities dealer or its associated persons, is appropriate. By requiring brokers, dealers and municipal securities dealers to maintain a do-not-call list, rule G–8 assists in the prevention of fraudulent and manipulative acts and practices, such as persistently calling investors who have expressed a desire not to receive telephone solicitations.

The Commission also believes that the amendments to rules G–9 and G–21, requiring every broker, dealer and municipal securities dealer to retain for three years from the date of each use each advertisement published or designed for distribution to the public, including, among other things, electronic media and telemarketing scripts, is appropriate. By requiring brokers, dealers and municipal securities dealers to retain advertisements for three years, rules G–9 and G–21 assist in the prevention of fraudulent and manipulative acts and practices and provide for the protection of the public in that they provide interested parties with the ability to acquire copies of the advertisements used to solicit the purchase of municipal securities to ensure that brokers, dealers and municipal securities dealers and associated persons are not engaged in unacceptable telemarketing practices.

Finally, the Commission believes that the proposed rule achieves a reasonable balance between the Commission's interest in preventing members from engaging in deceptive and abusive telemarketing acts and the members' interest in conducting legitimate telemarketing practices.

The Commission finds good cause for approving Amendment No. 1 prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register**. Amendment No. 1 simply clarifies portions of the proposed Rule and does not raise any significant regulatory concerns. Therefore, the Commission believes that granting accelerated approval to Amendment No. 1 is appropriate and consistent with Section 15B and Section 19(b)(2) of the Act.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 1. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth, N.W., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the MSRB. all submissions should refer to File No. SR–MSRB–96–06 and should be submitted by January 15, 1997.

V. Conclusion

It is Therefore ordered, pursuant to Section 19(b)(2) of the Act,[16] that the proposed rule change (SR–MSRB–96–06), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[17]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–38060; File NO. SR–NASD–96–47]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by NASD Regulation, Inc. Relating to the Policy and Practice Concerning the Application of the Eligibility Provision in Rule 10304 of the NASD Code of Arbitration Procedure

December 18, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 17, 1996, NASD Regulation, Inc. ("NASD Regulation") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NASD Regulation. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.[1]

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASD Regulation amended its policy and practice concerning the application of the eligibility provision in Rule 10304 of the Code of Arbitration Procedure ("Code") of the National Association of Securities Dealers, Inc. ("NASD" or "Association") to the effect that arbitrators, not the NASD Regulation staff, shall determine whether a dispute is eligible for arbitration. Below is the test of the policy and practice change.

Pursuant to Rule 10304 of the Code, "[n]o dispute, claim or controversy shall be eligible for submission to arbitration under this code where six (6) year as have elapsed from the occurrence or event giving rise to the act or dispute, claim or controversy." Effective August 1, 1996,[2] the NASD Regulation staff will no longer make preliminary determinations concerning the eligibility of a claim for arbitration. The NASD Regulation staff instead will address questions concerning the eligibility of a claim according to the following procedures:

1. Upon the filing or receipt of a claim, the staff reviews the claim to determine if the claimant has identified when the transaction at issue occurred or when the claim arose. If not identified, the Statement of Claim is retained but the claimant is asked for additional information about the age of the claim.

2. If a claim identifies when the transaction at issue occurred or when the claim arose, it is served on the respondents. It is then the respondent's determination whether to challenge the eligibility of the claim.

3. Any motions to dismiss the claim on eligibility grounds and any responses thereto are forwarded to the arbitrators for a decision.

4. For those cases filed prior to August 1, 1996 where the staff has made a preliminary eligibility ruling in response to a respondent's motion, the moving papers will be forwarded to the arbitrators with a remainder that the arbitrators must review the issue *de novo* and must not accord the staff's preliminary ruling any weight.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASD Regulation included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NASD Regulation has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NASD Regulation is soliciting comment on its amended policy and practice concerning the application of the eligibility provision in Rule 10304 of the Code to the effect that arbitrators, not the NASD Regulation staff, shall determine whether a dispute is eligible for arbitration under Rule 10304.[3]

Until recently, the NASD Regulation staff made preliminary eligibility determinations, both before and after a claim had been served, in cases where a bright line test could be applied. Before a claim was served the staff would, upon examination of the allegations in the Statement of Claim, determine if the occurrence or event giving rise to the act or dispute, claim or controversy took place more than six (6) years prior to the filing of the Statement of Claim. If the staff determined that this was the case, it would advise the claimant that the claim was ineligible for arbitration. Once a claim had been served and the staff had previously made a preliminary eligibility determination upon the motion of a party, upon the request of a party the arbitrators could review the preliminary staff determination and accept or reject it. The other self-regulatory organization ("SRO") arbitration forums have also followed this practice.

NASD Regulation has determined that because the practice of having the staff make preliminary eligibility determinations is not expressly provided for in the Code, questions may arise concerning the legal effect of these determinations. Accordingly, NASD Regulation amended the existing policy and practice to eliminate staff eligibility determinations.

The amended policy, which is consistent with the Code and plain language of Rule 10304, will require the staff, upon the filing or receipt of a claim, to review the claim to determine if the claimant has identified when the transaction at issue occurred or when the claim arose. If not identified, the Statement of Claim is retained but the claimant is asked for additional information about the age of the claim. By requiring that claims identify when the transaction at issue occurred or arose, NASD Regulation is facilitating the ability of the arbitrators to determine if the claim is eligible.

---

[16] 15 U.S.C. § 78s(b)(2).

[17] 17 CFR 200.30–3(a)(12)(1994).

[1] NASD Regulation originally submitted this proposed rule change in SR–NASD–96–37 on October 15, 1996. That rule filing was submitted for immediate effectiveness under Section 19(b)(3)(A) of the Act. SR–NASD–96–37 was withdrawn simultaneously with the filing of this rule change.

[2] NASD Regulation has been enforcing the amended policy and practice described in SR–NASD–96–37, and in this filing, since August 1, 1996, up to and during the filing of notice in SR–NASD–96–37, and is continuing to enforce the policy at this time.

[3] This policy is intended to be temporary. NASD Regulation intends the policy to remain in effect until an amendment to Rule 10304 can be developed and approved. The NASD's Arbitration Policy Task Force Report on Securities Arbitration Reform recommended suspending the eligibility rule. NASD Regulation, in consultation with the Securities Industry Conference on Arbitration (SICA) and others, is considering other alternatives to suspending the eligibility rule. The policy will not be included in the NASD Manual because NASD Regulation intends to propose a new arbitration eligibility rule within a few months.

VOL 61 ISS 249 DE 26 1996 UMI

If a claim identifies when the transaction at issue occurred or when the claim arose, or is amended to provide such information, it is served on the respondents. Once the claim is served, the respondents can decide whether or not the challenge the eligibility of the claim. If a respondent submits a motion to dismiss on eligibility grounds, the claimants will have an opportunity to respond, and the motion and the responses will be forwarded to the arbitrators for a decision.

NASD Regulation has also determined that where a case was filed prior to August 1, 1996, and the staff has made a preliminary eligibility ruling in response to a respondent's motion, the moving papers will be forwarded to the arbitrators with a reminder that the arbitrators must review the issue de novo and must not accord the staff's preliminary ruling any weight.

NASD Regulation notes, as described above, that eligibility determinations have always involved an element of staff discretion. Thus, adoption of the policy set forth above is not a substantive change in Rule 10304 or its interpretation; it is a change in the manner in which the staff exercises its discretion to administer the arbitration process under the Rule.

2. Statutory Basis

NASD Regulation believes that the proposed rule change is consistent with the provisions of Section 15A(b) (6) of the Act[4] in that amending the policy for applying the eligibility provision of the Code serves the public interest by enhancing the perception of fairness of such proceedings by the parties to such proceedings. Unless otherwise expressly provided for in the Code, dispositive motions should be decided by the arbitrators because the arbitrators are the designated adjudicators of all issues of fact, law and procedure in an arbitration. To the extent the parties to such proceedings express increased satisfaction with the resolution of eligibility issues, the goal of providing the investing public with a fair, efficient and cost-effective forum for the resolution of disputes will have been advanced.

B. Self-Regulatory Organization's Statement on Burden on Competition

Regulation does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

[4] 15 U.S.C. 780–3(b)(6).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

NASD Regulation proposed rule change SR–NASD–96–37 was filed for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act on October 15, 1996. The Commission published notice of the filing of SR–NASD–96–37 in the **Federal Register**[5] and received thirteen comment letters in response.[6] Filing SR–NASD–96–37 is being withdrawn simultaneously with the submission of this rule filing, which is substantively the same as SR–NASD–96–37.

Because there is insufficient time to adequately address the comment letters received in response to SR–NASD–96–37 at this time, NASD Regulation will respond to them when addressing the comment letters received in response to this filing.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to File No. SR–NASD–96–47 and should be submitted by January 16, 1997.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–38058; File No. SR–NYSE–96–36]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the New York Stock Exchange, Inc. Relating to Transmission of Proxy and Other Shareholder Communication Material.

December 18, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. § 78s(b)(1), notice is hereby given that on December 6, 1996, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items, I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing changes to Rules 451 and 465 (the "Rules") on a three-year pilot basis. The Rules establish guidelines for the reimbursement of expenses by issuers to NYSE member organizations for the processing of proxy materials and other issuer communications with respect to security holders whose securities are held in street name. The text of the proposed rule change is available at the Exchange or the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Items IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Background to the Proposed Rule Change

Exchange member organization holding securities in street name solicit proxies and deliver communications to and from beneficial owners of securities on behalf of issuers.[1] For this service, issuers reimburse the member organizations for all out-of-pocket expenses, reasonable clerical expenses, postage and other expenses incurred in a particular circulation. The Rules set guidelines for the amount of the reimbursement.

While member organizations initially handled proxy processing internally, beginning in the late 1960's and continuing to the present, firms have increasingly used outside contractors for these types of services. In particular, a firm will contract with a service bureau, such as Automatic Data Processing ("ADP"), for the solicitation of proxy voting instructions, and the distribution of reports to shareholders.[2] However, the identity of the soliciting broker remains on all communications.

Since the level of reimbursement was last reviewed in 1986, the Exchange has found that proxy solicitation and report distribution costs have increased, due in large part to general cost increases in the economy. Postage itself has doubled since 1979. Brokers pass these costs to the issuers. Aggregate costs also have increased due to a substantial increase in the number of beneficial owners, which results from increased participation of individual investors in the rising securities market.

While the number of individual investors has increased, the percentage of holdings of securities through institutional investors, mutual funds, pension and savings plans also has increased. Such institutions have an obligation, or, in some cases, a statutory duty, to vote the shares being held. Institutions have developed a variety of mechanisms to vote their shares in conformity with their own internal policies and governing regulations. While these procedures require time, many institutional investors have difficulty voting on a timely basis during the spring proxy season. Over 40 percent of all annual meetings occur within a few weeks. Some large institutions tend to vote very close to the meeting date, particularly during the proxy season, due to the immense increase in paperwork.

The Exchange has determined that, in addition to the changing stock ownership patterns, stock holdings continue to migrate from registered to street or nominee ownership. Street name holdings are concentrated with approximately 1,000 nominees, and the Exchange believes that an efficient infrastructure is necessary to coordinate these nominees and their customers. Service bureaus, as contract agents of the nominees, build and maintain such systems. Nominees and their agents also have developed communications systems for obtaining shareholder votes electronically rather than through a physical proxy. To accommodate this, the Exchange recently amended its rules to permit telephone voting. However, the Exchange has found that the current fee structure does not recognize the value that these systems provide to issuers in reducing the costs of coordination and solicitation.

Despite the progress that has been made in the distribution and proxy solicitation process, issuers often express their belief that mailing fees are unnecessarily high and that the procedures are not responsive to the needs of the issuers. In this regard, unit fees for large issuers are the same as those for small issuers, ignoring economies of scale. Two matters are of particular concern to issuers: whether they will have a quorum at their meeting and whether large blocks of votes will be received relatively close to the meeting date. In many cases, addressing these concerns has led to significantly increased solicitation costs for issuers. At the same time, the interests of institutions in having their voted counted in the tabulation must also be recognized, and any changes must preserve the rights of all shareholders in the corporate suffrage process.

Limitations of the Current Fee Structure

While there have been changes in the nature of securities holdings and enhancements in technology, the proxy fee structure generally has been unchanged since the Rules were first adopted in 1938. In the Exchange's view, the current structure does not provide incentives for nominees and other intermediaries to use the most current and efficient technology. The Exchange believes that this structure needs to be reconsidered and that there should be incentives for market-driven innovations, such a electronic proxy services, touch-tone voting, and electronic vote reporting.

Funding to operate these communication and voting systems presently comes from the unit mailing fees that issuers pay under the NYSE reimbursement guidelines. A decrease in fees could reduce the use of these systems, which are increasingly being relied upon in the voting process. Without financial incentives, it is unlikely that new cost-reducing technology will be implemented. In addition, there is no incentive for brokers and intermediaries to reduce the mailing of printed material. Paper, printing and postage generally represent between 80 and 90 percent of the cost of the average proxy mailing. By the development and use of new technologies and electronic distribution, these costs can be reduced.

Finally, the Rules also do not recognize the cost of coordinating multiple nominees and the value that consolidating material distribution and vote collection provides to issuers. These services, which are not expressly required by any regulation, include: (i) sending a single search card for multiple nominees; (ii) coordinating multiple nominees to generate a single material request for each issuer; (iii) delivering material to a single place for multiple nominees; (iv) sorting bulk mail across multiple nominees for maximum discounts; (v) daily reporting of votes for multiple broker and bank nominees; and (vi) consolidating multiple nominees into a single invoice.

The Exchange's Proposal

The proposed rule change would amend the Rules to reduce the suggested rate of reimbursement from 60¢ or 70¢ to 55¢ for each set of proxy material, *i.e.*, proxy statement, form of proxy and

[1] Street ownership encompasses shares purchased through a broker or bank (referred to as a nominee). The shares are then registered in the name of that nominee, or in the nominee name of a depository such as The Depository Trust Company ("DTC"). Recent analysis indicates that, on average, approximately 70 to 80 percent of all outstanding shares are held in street name.

[2] The Commission notes that ADP is currently the only intermediary offering these services to broker-dealers.

annual report, when mailed as a unit. The present distinction between proposals that require beneficial instructions and those that do not would be eliminated. According to the Exchange, this will produce substantial savings for all issuers. Further, the rate for mailing other reports, primarily quarterly reports, would be reduced from 20¢ to 15¢. The rate of reminder notices would remain at 40¢ unless a proxy fight is involved. The special fee of 60¢ for mailing only to shareholders who have not voted would be eliminated. These are the first reduction in the basic rates since the Rules were adopted in 1938.

The proposal treats reimbursement for mailings during proxy fights differently. These contests require significant efforts by all participants in the proxy process and can occur under difficult circumstances. The time for distribution is short and requires maximum effort. Thus, the proposal includes a new fee of $1 for each set of proxy materials mailed.

A significant aspect of the proposed rule change is a new $20 fee per nominee. To earn this fee, the intermediary will need to provide coordination for a series of functions across a multitude of nominees (brokers, banks).[3] In effect, this fee compensates an intermediary for all the services it provides and upon which issuers and institutions have come to rely, such as:[4]

- Searches: Rule 14a-13 under the Act requires an issuer to inquire of each record holder to determine the number of beneficial owners holding shares through nominees. If an intermediary coordinates multiple nominees, the issuer incurs only the expense of performing one "search" for all the nominees, saving the issuer significant expenses.
- Search responses: Nominees must respond to an issuer's search request within seven business days of receipt. This process often is complicated since there are multiple levels of entities. In that case, an intermediary can consolidate responses (in some cases, responses of over 1,000 entities), this saving administrative expenses for issuers and increasing the accuracy of ordering material.
- Delivering materials: Providing material to hundreds of nominees requires an issuer to sort and ship a parcel to each nominee. If this task is not done by the issuer, it must be done by a proxy solicitor or some other vendor. Since an issuer pays a fee and a freight bill for each of these shipments, and intermediary can save issuers a significant expense if it can make one material delivery for hundreds of nominees.
- Use of bulk mail: For issuers who use bulk mail, a significant amount of the savings realized today would not occur unless intermediaries continue to combine nominees. Issuers reimburse nominees for postage, and bulk postage rates are available only for large shipments. Unless consolidated, the majority of nominees would not be able to qualify individual small shipments for bulk discounts.
- Preliminary voting information: To help issuers judge whether they have a quorum, many brokers currently report a discretionary vote ten or fifteen days before a meeting in accordance with NYSE Rule 451(b)(1), and again at the time of the meeting. As the proxy process has evolved, large intermediaries voluntarily have provided daily voting updates for issuers. ADP now sends daily consolidated vote reports 15 or 10 days before a meeting, and then every business day until the night before the meeting. Without this service, many issuers would need to hire a proxy solicitor to obtain voting estimates. Obtaining the vote from a single source for hundreds of nominees can save the issuer substantial expense, and daily voting updates provide comfort to the issuer as the meeting date approaches.

The Exchange has determined that this coordination fee is consistent with current Exchange rules that authorize the payment of a coordination fee for agents that coordinate providing information regarding non-objecting beneficial owners ("NOBOs").[5] The impact of the nominee fee will vary with the issuer and the nature of its shareholders. However, the Exchange has observed that smaller issuers tend to have fewer nominee holders. The Exchange estimates that the smallest 4,000 U.S. issuers would pay, on average, an intermediary nominee coordination fee of only $800. This will be partially offset by the lower basic rate and lower expense.

To clarify the policy with respect to out-of-pocket expenses, the proposed rule provides for reimbursement only of actual costs, such as: outgoing postage (plus third class sorting fee); envelopes and business reply envelopes; and custom printing of envelopes and ballots. The business reply postage would be billed at the Business Reply Mailing Accounting System (BRMAS) rate. Additional savings are possible by sorting mail to obtain postal discounts, as well as through other efforts undertaken by nominees or their agents to reduce issuers' postage expenses. These savings could be shared between the issuer and the processor.

The Exchange also is prosing a new incentive fee to compensate member organizations for eliminating the need to send materials in paper form. This will encourage member organizations to apply technology to sort materials in a way that multiple proxy instruction forms are included in a single envelope, with a single set of materials to be mailed to the same household. The Rules address this area through the concept of "householding." A member firm or intermediary could earn this paper elimination fee by distributing multiple proxy instruction forms electronically or be distributing all material to a household electronically. An additional fee of 50¢ (10¢ for a quarter report) is proposed for each set of material that is not mailed.

The Exchange provides the following examples of the cost savings that are possible by eliminating mailings:

1. A person having three accounts—such as an individual account, an "IRA" retirement account, and a trust account—could receive one set of materials through "householding." The cost comparison is:

	Unit cost	Without householding	Householding (3 accounts)
Proxy Fee	$.55	$1.65	$1.65
Householding Fee	.50	0	1.00
Annual Report & Proxy Statement (Estimated, cost will vary):	2.00	6.00	2.00
Bulk Rate	.65	1.95	.65

[3] "Nominees" are those names that appear on either the list of record shareholders or on an omnibus proxy sent to the issuer on the record date by a depository, but who are, in fact, acting for someone else. In practice, they are self-clearing brokers, banks, or other financial institutions participating in DTC or some other depository.

[4] As noted above, ADP is the only intermediary that currently offers these services to broker-dealers.

[5] *See* Exchange Rule 451.92

	Unit cost	Without householding	Householding (3 accounts)
Outgoing Postage			
Envelopes	.08	.24	.08
Return Postage	.34	1.02	.34
Total		$10.[illegible]	$5.72

As this example makes clear, the potential savings are greatest in the areas of postage and printing, and these savings will occur even in the first year. Also note that this example assumes the use of bulk rate mailings. The savings would be greater for issuers using first class postage.

2. Savings from elimination of mailings also are possible through use of the Internet. Even for an individual with only one account, the savings can be shown as follows:

	Unit cost	Mail return	Electronic return
Proxy Fee	$.55	[illegible].55	$.55
Householding Fee	.50	0	.50
Annual Report & Proxy Statement	2.00	2.00	0
(Estimated, cost will vary):			
Outgoing Postage	.65	.65	0
Envelopes	.08	.08	0
Return Postage	.34	.34	0
Total		$3.62	$1.05

In this example, the Internet cost is paid by the user. Investors who request to receive information electronically simply would receive an "e-mail" message indicating that the annual report and proxy are available. The Exchange believes that such use of the Internet would be consistent with Commission policies in this area.[6]

Finally, as to the manner in which the fees are collected, the Exchange notes that ADP is the data processor for many of the brokerage firms that are Exchange members. These firms subcontract the data processing functions of the proxy solicitation process to ADP, but retain all the obligations to comply with the relevant Exchange rules. As a general matter, the firms subcontract for these services at less than the full fee that the issuer pays. The firms also maintain some staff in a proxy department to handle such tasks as balancing depository positions on record date, changing investor records, answering inquiries and performing other work not covered by the subcontract.

The firm's systems department also needs to maintain proxy-related programs—including programs for separating wrap accounts—and the communications equipment to interface electronically with an intermediary on both search date and record date. In addition, the compliance department of the firm is required to ensure that the firm fully complies with Exchange and Commission rules since subcontracting does not relieve a firm of its legal responsibilities.

To simplify the administrative difficulties that would result if each issuer had to pay many brokers, ADP has developed a "single invoice" procedure for all of the brokers with whom they have subcontracted. Under this procedure, ADP bills issuers on behalf of literally hundreds of brokers and banks. ADP remits to their clients the amounts specified in their contracts, which the firms will retain to cover their own costs.

The Exchange believes that this billing procedure does not affect issuer costs. In this regard, if the brokers billed issuers directly, the issuers would pay the same amount, but to several brokers, rather than to a central data processor. In the Exchange's view, there is no economic difference in the brokerage firms retaining part of the costs paid by the issuers or such firms receiving the same amount paid by ADP through the single invoice system. This billing process also is consistent with other types of outsourcing transactions. Indeed, issuers benefit from this procedure since they are able to pay a single processor, rather than multiple brokerage firms.

2. Statutory Basis

The basis under the Act for the proposed rule change is the requirement under Section 6(b)(5) that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, tc foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Summary of the Comment Letters

The Exchange solicited comments on the proposed rule change from listed companies, member firms and other industry organizations involved in the proxy solicitation process pursuant to a Request for Comment dated September 18, 1996. The Exchange received 261 comments letters.[7] While it is difficult to categorize some of the letters, the

[6] *See* Securities Act Release No. 7233 (Oct. 6, 1995).

[7] The Exchange informally circulated a draft of the Request for Comment on July 19, 1996. That draft was substantially similar to the final proposal, and a number of commentators responded only to the July 19th request for comments. Thus, the 261 letters include those letters received in response to the July draft.

VOL 61 ISS 249 DE 26 1996 UMI

Exchange has concluded that 181 letters generally supported the proposal and 80 letters opposed the proposal. Of the 181 letters supporting the proposal, 52 letters also expressed reservations about certain aspects of the proposal.

Those letters supporting the proposal believed that it would lead to cost reductions, increased technological efficiencies and consolidation of services. These commentators saw the savings from the fee reductions more than compensating for the cost of the new nominee fee. Even some companies facing increased fees in the short term supported the proposal, believing that they would reap long-term gains through decreases in internal printing costs and increased efficiencies in the years ahead. Some commentators also thought that the proposal could result in an increased voting response in the proxy process.

In addition, supporters believed that the new fee structure would more equitably distribute the costs of the proxy process among market participants. To the extent that these commentators had reservations regarding the proposal, they noted that any difficulties could be addressed following the end of the three-year pilot period.

Commentators objecting to the proposal focused primarily on the new nominee fee. The main objection to that fee was that it would result in increased costs, especially to smaller issuers. There are suggestions that the Exchange (i) abandon the nominee fee, (i) adopt tiered nominee fees, with small issuers not being subject to the full $20 fee, and (iii) restructure the nominee fee so that it would be progressive, based on how many shareholder accounts an issuer has.

Some commentators asked for a more precise definition of "nominee." Others expressed the general view that brokers should be responsible for the costs of communicating with street name holders (and some recommended that the Exchange not establish guidelines at all in this area). Some commentators also objected to the proposed incentive fees. These commentators argued that the proposed fee was unrelated to any additional service provided by an intermediary, and that the intermediaries should be expected to provide for additional efficiencies without the need for further reimbursement.

As to the letters with mixed opinions, some commentators said they needed more time to review the proposal. Others found it difficult to estimate the proposed savings or thought that any possible savings would be minimal. A number of commentators supported the overall thrust of the proposals, but questioned certain aspects of it, such as suggesting that it was counterproductive to authorize the nominee fee while lowering fees generally. Some commentators supported the proposal, but urged that the Exchange lower fees even further. Finally, a number of commentators made specific suggestions on how to structure the review of the pilot program.

The Exchange's Response to the Comment Letters

Well over half the comment letters expressed support for the proposals. The Exchange believes that this indicates that the proposal accurately balances the interests of the issuers, broker-dealers, intermediaries and investors. In particular, many commentors noted that the proposal would provide a more rational fee structure and would encourage the use of enhanced technology to facilitate the shareholder communication and voting process. As discussed, even a number of issuers whose proxy solicitation costs would increase supported the proposal, noting that the new fee structure likely would yield long-term savings.

Those commentators who voiced opposition to the proposed rule change focused almost entirely on the possibility of increased costs, especially through the nominee fee. Many of these commentators argued that the fee was unfair and that it covered services that already were being provided. Some of these commentators believed that the proposed nominee fee would benefit large issuers at the expense of smaller issuers.

In response, the Exchange first notes that this fee is cost-related and is intended to compensate intermediaries for the services they provide. As discussed above, intermediaries conduct searches for determining how many sets of material to mail, coordinate mailings (often through the use of bulk mail) and help provide preliminary voting information. The proposed rule change attempts to establish a more accurate fee schedule by isolating these services and establishing a separate fee for recovering the costs of providing these services. By charging separately for these discreet services, the Exchange is able to lower the general fees for mailing materials.

The Exchange also believes that the commentators who objected to the nominee fee do not fully recognize the cost savings that will result under the new fee schedule. These commentators simply added the total fees that they would have to reimburse intermediaries under the fee schedule, but failed to consider the other cost savings, particularly "out of pocket savings," that the Exchange believes they are likely to achieve. In addition, for example, the new incentive fees are likely to result in fewer mailings, thus decreasing printing and mailing costs. Similarly, the fee structure encourages the use of new technology, especially with respect to voting, and thus should result in a more efficient proxy system.

As to the other objections that commentators raised, the Exchange notes:

- Definition of nominee: The Exchange believes that the term "nominee" is well-known in the securities industry and will not give rise to interpretive issues. The Exchange's request for comment made clear that a "nominee" is a name appearing on a list of record holders who, in fact, is acting for someone else. They are "participants" of the Depository Trust Company, such as self-clearing banks, brokers and other financial institutions.
- Need for reimbursement guidelines: The Exchange has provided fee reimbursement guidelines since 1938 to provide a service to its constituents and to help ensure that investors receive proxy and other information from issuers on a timely basis. The system has worked well over the years, and the current process of reviewing the fees indicates that the Exchange continues to play a critical role in facilitating (i) the flow of information from issuers to shareholders and (ii) the flow of votes from shareholders to issuers.
- Incentive fees: A number of commentators questioned the adoption of incentive fees as a means to reduce mailings. These commentators believed that intermediaries already should be taking steps to reduce costs. However, the Exchange states that the current fee structure provides little incentive for intermediaries to limit the number of mailings to shareholders. This results in increases in both mailing costs and, more significantly, printing costs, for issuers. The incentive fee could have a dramatic effect in encouraging intermediaries to eliminate multiple mailings.
- Non-U.S. issuers: Non-U.S. issuers are exempt from most of the Commission's proxy rules pursuant to Rule 3a12–3 under the Act. Nevertheless, non-U.S. issuers generally do provide U.S. shareholders with proxy and related information and seek the vote of their U.S. holders. Thus, broker-dealers and other intermediaries face the same reimbursement issues with non-U.S. companies as they do with U.S. companies. The Exchange has not been presented with any compelling

reasons to treat these classes of issuers differently.

Finally, the Exchange recognizes that it is impossible to establish a final fee structure without actual market experience. Thus, the Exchange is proposing the new fee structure for a three-year pilot term. An industry Committee consisting of representatives of the Exchange and all the major constituency groups affected by the new fee structure will monitor the effect of the new fees throughout the pilot. The Committee will be able to propose changes as needed and will make final recommendations to the Exchange at the conclusion of the pilot period.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons as invited to submit written data, views, and arguments concerning the foregoing. Commenters are invited specifically to provide information that will assist the Commission in assessing whether each of the various elements of the proposed fee structure—the mailing reimbursement fees for non-contested and contested solicitations, respectively, the nominee fee, and the "householding" incentive fee—considered separately and/or as a whole, are consistent with: (1) issuers' obligation under Rule 14a–13(a)(5) of the Act to reimburse broker-dealers, banks, and other nominees for the "reasonable expenses" they incur in mailing proxy soliciting materials and annual reports to beneficial holders of such issuers' voting securities and/or (2) broker-dealers' ability under Rule 14b–1(c)(2) of the Act not to deliver proxy soliciting materials and annual reports pursuant to Rule 14b–1(b)(2) of the Act, or provide NOBO information under Rule 14b–1(b)(3) of the Act absent a particular issuer's "assurance of reimbursement of * * * reasonable expenses, both direct and indirect." Should such "reasonable expenses" within the meaning of any or all of these Commission rules be construed to encompass an intermediary's costs of: (1) coordinating an issuer's proxy mailings to multiple nominees and/or (2) operating an electronic proxy voting system whereby street-name customers of broker-dealer clients may instruct the intermediary on how to vote the securities in which they hold a beneficial ownership interest? Should the determination of "reasonableness" with respect to any of the foregoing fees vary with the size of the issuer, whether measured in terms of its total market capitalization or public float, or any other criterion?

Should this reasonableness determination take into account any fee-sharing arrangements between a intermediary and its broker dealer clients? In this connection, to what extent should such arrangements reflect actual allocation of costs between an intermediary and such clients? In addressing this question, commenters should attempt to quantify to the extent possible the costs that continue to be borne by those broker-dealers that outsource proxy processing and/or voting obligations to an intermediary, and the relationship of such costs to fulfillment of obligations under Rule 14b–1 of the Act and/or Exchange Rules.

Moreover, the Commission solicits comment on whether an independent audit during the three-year pilot period would be helpful in assessing the reasonableness of the costs passed through to issuers. Finally, the Commission also solicits comment on whether the proposed NYSE nominee fee and incentive fee should be deemed to apply to reimbursement by non-NYSE issuers to NYSE member firms.

In view of the extensive comments requested, the Commission is providing a 45-day comment period. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–NYSE–96–36 and should be submitted by [insert date 45 days from date of publication].

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–38059; File No. SR–PTC–96–07]

Self-Regulatory Organizations; Participants Trust Company; Notice of Filing of Proposed Rule Change Relating to the Right of Set-off Upon the Default of a Participant

December 19, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on December 2, 1996, the Participants Trust Company ("PTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR–PTC–96–07) as described in Items I, II, and III below, which items have been prepared primarily by PTC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change relates to PTC's right to set-off credit balances in an account of a defaulting participant against an unpaid debit balance of the defaulting participant.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, PTC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. PTC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[2]

---

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified the text of the summaries prepared by PTC.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to (1) make explicit PTC's right to set-off credit balances in any proprietary account, agency account, or pledge account of a defaulting participant, against an unpaid debit balance in any other account of the defaulting participant and to establish a priority for application thereof; (2) grant PTC a right of set-off against the agency seg credit balances of a defaulting participant and to include the agency seg credit balance in a participant's Net Debit Monitoring Level ("NDML") calculation; (3) clarify that in addition to the present representation that securities are deposited in conformity with the terms of any applicable customer agreement, each participant represents and warrants to PTC that securities and other property (including credit balances) held by PTC in an account maintained by such participant are, by reason of these applicable customer agreements, subject to clearing agency rules; and (4) make miscellaneous conforming and technical changes to certain provisions of PTC's rules.

Background

Account Structure

Participants maintain their securities positions at PTC in one or more master account, each of which is comprised of one or more accounts of the following types: proprietary accounts for securities that are held by the participant as principal; agency accounts for securities that are held by the participant as agent; pledgee accounts for securities that are held by the participant as pledgee or pursuant to financing arrangements; and various seg and hold-in-custody accounts associated with the proprietary and agency accounts for purposes of segregation.

Cash Balance Structure

Each Proprietary account, agency account, and pledgee account has a cash balance associated with it against which credits and debits are posted, including amounts owing with respect to securities delivered versus payment intraday to the transfer account associated with the account. Each cash balance is either a credit balance or debit balance depending on whether the participant is in a net funds credit position or debit position with respect to the applicable account to which the cash balance relates at the time the determination is made.

NDML

PTC restricts the net debit amount each participant may owe PTC by imposing a net debit cap by means of the NDML.[3] A participant's NDML is compared to the total of the net cash balances in its proprietary account, agency account, and pledgee account. PTC will not process a transaction that will result in a net debit balance that exceeds a participant's NDML. If a participant is at its NDML limit, it must take steps to reduce the net debit balance. Such a participant may prefund the payment of its debit balance by means of making optional deposits of cash to the participants fund by wiring funds to PTC intraday. A participant may also deliver securities versus payment through PTC's system which will generate a credit to the cash balance of the account from which the securities are transferred and will result in a reduction of the debit balance of that account.

Set-off in the NDML Structure

The ability to apply a defaulting participant's proprietary, agency, and pledgee credit balances against its unpaid settlement obligations is implicit in the NDML structure to assure that the failure of a single participant is covered by PTC's committed line of credit for settlement. It is also implicit in other provisions of PTC's.[4] Participant responsibility for the total amount of its PTC obligations, as monitored by its NDML, also is consistent with PTC's applicant review process in which PTC verifies that a participant has sufficient financial resources to satisfy its total obligations to PTC by assessing the capital and financial resources of the prospective participant without regard to the resources or capital of the customers of the participant.

However, PTC's rules are silent on the aplication of pledgee and agency credit balances in the event a participant does not make complete payment of all account obligations at settlement. In addition, PTC's "default rule" states that PTC will set-off any credit balance in a proprietary account of a defaulting participant against an unpaid debit balance in another account. This rule does not make reference to PTC's right to set-off against agency and pledgee credit balance of a defaulting participant.

Proposed amendments

Set-off upon Participant Default

The proposed rule change will clarify that upon a particpant's default in payment of a debit balance PTC will apply any credit balances in the participant's proprietary accounts, pledgee accounts, and agency accounts to reduce the unpaid obligation of the participant consistent with the other provisions of PTC's rules mentioned above. The proposed rule change also will extend PTC'S right of set-off in the event of a participant's default to include any agency seg credit balances of the defaulting participant.

Set-off Priority

The set-off priority will be applied in the same order as governs in the event of a participant default. Specifically, the proposed set-off priority will enable PTC to apply credit balances of a defaulting participant to reduce the participant's unpaid debit balances in the following priority: first, by application of any credit balance in its proprietary account(s); second, in its pledge account(s); third, in its agency account(s); and lastly, in its agency seg account. These credit balance(s) are applied toward payment of unpaid debit balances in the following priority: first, to any agency debit balance(s);[5] second, toward payment of any pledgee debit balance(s); and lastly, toward payment of any proprietary debit balance(s).

Inclusion of Agency Seg Credit Balance

The proposed rule change will modify the NDML calculation to include agency seg credit balances and will give PTC a lien in the agency seg credit balance and a right to set-off against agency seg credit balances in the event a participant defaults in the payment of its other debit balances. The inclusion of agency seg credit balances in the NDML calculation will allow a participant to have the benefit of these credits in calculating its net obligation to PTC.

Agency seg accounts are not permitted to incur a debit balance and may not receive securities subject to a transfer versus payment. Therefore, PTC does not have a lien on securities in an agency seg account. The securities in

[3] The maximum NDML for any participant is the amount of PTC's committed line of credit for settlement, which is currently $2 billion. This maximum is imposed in compliance with the Federal Reserve Policy Statement on Payments System Risk, as amended effective April 13, 1995, which requires private delivery-against-payment securities systems to "have sufficient safeguards so that it will be able to settle on time if any one of its major participants defaults."

[4] For example, provisions of PTC's rules that require payment of all debit balances by a participant and prohibit a participant from asserting set-offs or defenses against payment of its debit balances and that grant PTC a lien in cash and property of a participant.

[5] Under PTC's rules, the agency seg account may not have a debit balance.

the agency seg account will remain free of PTC's lien consistence with current rules and the regulatory obligations of the participants with respect to such customer securities that are held in agency seg accounts.

Clarification of Participant Representations and Warranties

The proposed rule change also will clarify that all securities, funds, and other property maintained or transferred to an account at PTC are issued, deposited, transferred, or otherwise applied in conformity with the terms of any applicable customer, pledge, or financing agreement and are by reason of the applicable customer agreements subject to clearing agency rules.

Technical Amendments to PTC's Rules

PTC also is proposing to make certain technical changes to several sections of its rules to conform them to the present rule change. In particular, the definition of NDML will be amended to delete the provision that PTC will require a participant to confirm its ability to pay its debit balance when the NDML is reached. As changed, the definition will conform to the actual NDML procedure applied by PTC and to the substantive provisions of PTC's rules which govern and describe PTC's Net Debit Monitoring procedure.

PTC's rules also will be amended to state that PTC will not process a transaction that causes a debit balance in any single account of a participant to exceed that participant's NDML. This conforms to PTC's current actual procedural control which imposes this additional credit check (in addition to capping a participant's net obligation at the master account level at its NDML) that is not reflected in the current NDML rule.

PTC believes the proposed rule change is consistent with the requirements of Section 17(b)(3)(F) of the Act[6] and the rules and regulations promulgated thereunder because it will facilitate the prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds in PTC's custody and control or for which it is responsible.

B. Self-Regulatory Organization's Statement on Burden on Competition

PTC does not believe that the proposed rule change imposes any burden on competition.

[6] 15 U.S.C. 78q–1(b)(3)(F).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

PTC has neither solicited nor received comments on this proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which PTC consents, the Commission will:

(A) by order approve such proposed rule change or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of PTC. All submissions should refer to the file number SR–PTC–96–07 and should be submitted by January 16, 1997.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

STATE DEPARTMENT

[Public Notice No. 2495]

Advisory Committee on International Economic Policy of Working Group on Economic Sanctions; Closed Meeting

The Department of State announces a meeting of the U.S. State Department Advisory Committee on International Economic Policy Working Group on Economic Sanctions on Wednesday, January 8, 1997 at the U.S. Department of State, Washington, D.C. Pursuant to Section 10(d) of the Federal Advisory Committee Act (FACA) and 5 U.S.C. 5526(c)(1), 5 U.S.C 552b(c)(4), and 5 U.S.C. 552b(c)(9)(B), the Department has determined that the meeting will be closed to the public. Matters relative to classified national security information as well as privileged commercial information will be discussed.

For more information contact Joanne Balzano, Working Group on Economic Sanctions, Department of State, Washington, DC 20522–1003, phone: 202–647–1498.

Dated: December 19, 1996.

Vonya B. McCann,

Acting Assistant Secretary for Economic and Business Affairs.

[FR Doc. 96–32825 Filed 12–20–96; 2:47 pm]

BILLING CODE 4710–07–M

DEPARTMENT OF STATE

[Docket Notice 2493]

Advisory Committee on International Economic Policy Notice of Closed Meeting

The Advisory Committee on International Economic Policy will meet at 8:30–12:00 am on Wednesday, January 15, 1997 in Room 1107, U.S. Department of State, 2201 C Street, NW., Washington, DC 20520. The meeting will be hosted by Assistant Secretary of State for Economic and Business Affairs, Alan Larson.

Pursuant to Section 10(d) of the Federal Advisory Committee Act (FACA) and 5 U.S.C. 552b(c)(1), 5. U.S.C. 552b(c)(4), and 5 U.S.C. 552b(c)(9)(B), it has been determined the meeting will be closed to the public. Matters relative to classified national security information as well as privileged commercial information will be discussed. The agenda calls for the discussion of classified and corporate proprietary/security information.

As access to the Department of State is controlled, persons wishing to attend the meeting must notify the ACIEP Executive Secretariat by Friday, January

10, 1997. Each person should provide his or her name, company or organizational affiliation, date of birth, and social security number to the ACIEP Secretariat at telephone number (202) 647–7727 or fax number (202) 647–5713 (Attention: Ann Alexandrowicz). A list will be made up for Diplomatic Security and the Reception Desk at the C Street diplomatic entrance (21st and C Streets, NW), where Department personnel will direct them to Room 1107.

For further information, contact Ann Alexandrowicz, ACIEP Secretariat, U.S. Department of State, Bureau of Economic and Business Affairs, Room 6828, Main State, Washington, DC 20520. She may be reached at telephone number (202) 647–7727 or fax number (202) 647–5713.

Dated: December 20, 1996.

Alan Larson,

Assistant Secretary for Economic and Business Affairs.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD08–96–055]

Manning Requirements—Pilotage

AGENCY: Coast Guard, DOT.

ACTION: Notice of designated areas.

SUMMARY: This notice lists the designated areas in the Eighth Coast Guard District for which new first class pilot licenses and endorsements will be issued by the Eighth Coast Guard District Regional Examination Centers. These areas have been designated consistent with the revised manning requirements introduced in 1994.

FOR FURTHER INFORMATION CONTACT: CDR Guy A. Tetreau, Marine Safety Division, Eighth Coast Guard District, (504) 589–3624, between 8 a.m. and 4 p.m. Monday through Friday, except federal holidays.

SUPPLEMENTARY INFORMATION:

Introduction

New first class pilot licenses and endorsements will only be issued for those areas within the Eighth Coast Guard District that have been designated by the cognizant Officer in Charge, Marine Inspection (OCMI). Eighth District Regional Examination Centers shall continue to renew existing first class pilot licenses with all previously earned endorsements.

Background

"Designated areas" are "* * * those areas within pilotage waters for which first class pilot's licenses or endorsements are issued * * *" (46 CFR 15.301). These areas are designated by the OCMI based upon the particular hazards of the waterway involved. They are the only areas for which first class pilots licenses and endorsements are required, and for which new first class pilotage licenses and endorsements will be issued.

Eighth Coast Guard District Designated Areas

The following is a list of the Eighth District designated areas for which first class pilots licenses or endorsements are required. Future changes to designated areas will be published in the **Federal Register.**

MSO Mobile

—The Port St. Joseph Bay Channel from St. Joseph Bay entrance lighted buoy "SJ" to the turning basin in Port St. Joe for St. Joseph, FL.

—The St. Andrews Bay Channel from St. Andrews Bay entrance lighted buoy "SA" to the port of Panama City, including the area between the Hathaway Bridge and the Dupont Bridge, or St. Andrews Bay, Panama City, FL.

—The Pensacola Bay Channel, Inner Harbor, and its approaches, to three miles from Pensacola Bay, Pensacola, FL.

—The Mobile Alabama Main Ship Channel from Mobile entrance lighted buoy "m" to the Cochran Bridge, including Hollinger's Island, Theodore, and Arlington Channels.

—The Horn Island Pass Ship Channel from Horn Island Pass entrance lighted buoy "HI" to the Bayou Cassotte turning basin via the Bayou Cassotte Channel, and to the Pascagoula River turning basin via the Pascagoula Channel, Pascagoula, MS.

—The Ship Island Bar Channel from Ship Island Bar lighted buoy "GP" to the state dock facility including the Gulfport Ship Channel, Gulfport, MS.

—The coastal approach from St. George Sound, Dog Island Reef light #1 to St. Marks, FL., including the St. Marks River channel.

—The Bayou Labatre entrance channel from the intersection of the Gulf Intracoastal Waterway to the Bayou Labatre Lift Bridge, Bayou Labatre, AL.

MSO New Orleans

—The Lower Mississippi River including:

(1) Southwest Pass from sea buoy to Head of Passes;

(2) from Head of Passes to mile 234 Above Head of Passes (AHOP).

—The Mississippi River Gulf Outlet.

—The Inner Harbor Navigational Canal.

MSO Morgan City

—The Lower Atchafalaya River from Point Au Fer Reef Light (LLN 18030) to Stout's Pass at Atchafalaya River mile 115.5.

—The Gulf Intracoastal Waterway from its intersection with the Lower Atchafalaya River at 20 Grand Point (MM 95.5 WHL) east to the Bayou Boeuf Locks.

MSO Port Arthur

—The Sabine River from the Offshore Sea buoys "29" and "30" to the north end of the Old Navy piers in Orange, TX.

—The Neches River from the Sabine/Neches intersection to the I–10 Bridge, north of Beaumont, TX.

—The Calcasieu River from the Offshore "CC" buoy, in Pilot Boarding Area 4, north to the I–10 Bridge spanning the Calcasieu, including the Industrial Canal at Devil's Elbow, and the deep water channels for Clooney and Coon Islands.

MSO Houston-Galveston

—The Galveston Entrance Channel from the red and white "GB" buoy to red buoy "18."

—The Galveston Ship Channel from the green "1" buoy to Pelican Island Bridge.

—The Boliver Roads Ferry Route from the Bolivar Ferry Landing to the Galveston Ferry Landing, crossing the Bolivar Roads Channel.

—The Texas City Channel from Green "1" buoy to the turning basin.

—The Houston Ship Channel from red buoy "18" to Buffalo Bayou turning basin.

—The Bayport Ship Channel from the intersection of the Houston Ship Channel to the Bayport turning basin.

—The Freeport Channel from the red and white "FP" buoy to the turning basin.

MSO Corpus Christi

—The Matagorda Ship Channel from the sea buoy to Port of Point Comfort.

—The Corpus Christi Ship Channel from the sea buoy to Viola turning basin including La Quinta Channel.

—The Brownsville Ship Channel to Port Isabel.

Dated: November 27, 1996.

T.W. Josiah,

Commander, Eighth Coast Guard District.

Natural Gas as Fuel in Marine Applications

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting; requests for comments.

SUMMARY: On November 26, 1996, (61 FR 60138), the Coast Guard published a notice of meeting and request for comments regarding the use of compressed natural gas (CNG) and liquefied natural gas (LNG) as fuel aboard commercial ships. This notice provides additional information about the location and time of the public meeting, and building security procedures recently established.

DATES: A public meeting will be held on Tuesday, January 14, 1997, from 9 a.m. to 3 p.m.

ADDRESSES: The meeting will be held in room 6200 at the Department of Transportation (DOT) headquarters, Nassif Building, 400 Seventh Street SW., Washington, DC 20590–0001. Room 6200 is located on the 6th floor of the south wing. Interested members of the public wishing to attend the meeting should enter the building at the southwest entrance, located inside the DOT courtyard near the intersection of E Street and Seventh Street. The L'Enfant plaza metro stop also exits into the DOT courtyard.

Due to increased security, it is important for all attendees to have proper identification. In addition, all bags may be checked when entering the building.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander R. K. Butturini, Mr. Wayne Lundy or Ensign Felicia K. Rydzewski, Systems Engineering Division, Commandant (G–MSE–3), telephone (202) 267–2206 between 7 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

Dated: December 13, 1996.

Joseph J. Angelo,

Director of Standards, Marine Safety and Environmental Protection.

Houston/Galveston Navigation Safety Advisory Committee Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of subcommittee meetings.

SUMMARY: The two Subcommittees (Waterways and Navigation) of the Houston/Galveston Navigation Safety Advisory Committee (HOGANSAC) will meet to discuss waterway improvements, aids to navigation, current meters, and various other navigation safety matters affecting the Houston/Galveston area. Both meetings will be open to the public.

DATES: The meeting of the Waterways Subcommittee will be held on Thursday, January 16, 1997 at 9:30 a.m. and immediately following, the Navigation Subcommittee will meet. Members of the public may present written or oral statements at the meetings.

ADDRESSES: The subcommittee meetings will be held at the Port of Houston Authority, 111 East Loop North, Houston, Texas.

FOR FURTHER INFORMATION CONTACT: Captain Kevin Eldridge, Executive Director of HOGANSAC, telephone (713) 671–5101, or Commander Paula Carroll, Executive Secretary of HOGANSAC, telephone (713) 671–5164.

SUPPLEMENTARY INFORMATION: Notice of this meeting is given pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. 2.

Agendas of the Meetings

Subcommittee on Waterways. The tentative agenda includes the following:

(1) Presentation by each work group of its accomplishments and plans for the future.

(2) Review and discuss the work completed by each work group.

Subcommittee on Navigation. The tentative agenda includes the following:

(1) Presentation by each work group of its accomplishments and plans for the future.

(2) Review and discuss the work completed by each work group.

Procedural

All meetings are open to the public. Members of the public may make oral presentations during the meetings.

Information on Services for the Handicapped

For information on facilities or services for the handicapped or to request special assistance at the meetings, contact the Executive Director as soon as possible.

Dated: December 10, 1996.

T.W. Josiah,

Rear Admiral, U.S. Coast Guard Commander, Eighth Coast Guard District.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket S–941]

Sargeant Marine, Inc.; Notice of Application for Permission Under Section 506 of the Merchant Marine Act, 1936, as Amended, To Operate in the Domestic Trade

Notice is hereby given that Sargeant Marine, Inc. (Sargeant), by application dated December 17, 1996, has applied for written permission under section 506 of the Merchant Marine Act, 1936, as amended (Act), for the temporary transfer of the construction-differential subsidy (CDS) built asphalt-tanker ASPHALT COMMANDER (ex-FALCON CHAMPION) in the domestic trade, commencing on or about January 15, 1997. Sargeant states that it is scheduled to load 200,000 barrels (bbls.) of asphalt at Garryville, Louisiana for discharge in New York, New York. The cargo will be delivered at a temperature of 300 degrees fahrenheit, five days after completion of loading and must be discharged at 6000 bbls. per hour.

Section 506 permits the temporary transfer for up to six months of CDS-built vessels "whenever the Secretary determines that such transfer is necessary or appropriate to carry out the purposes of the Act." Consent by MARAD is to be conditioned upon payment to MARAD, upon such terms as MARAD may prescribe, of "an amount which bears the same proportion to the CDS paid by the Secretary as such temporary period bears to the entire economic life of the vessel."

Although publication of a Notice with respect to Sargeant's request for permission under section 506 is not required, the Maritime Administration believes that it is appropriate to provide an opportunity for interested parties to comment on Sargeant's application.

Any person, firm, or corporation having any interest in the application

for section 506 permission and desiring to submit comments concerning the application must file written comments in triplicate, to the Secretary, Maritime Administration, Room 7210, Nassif Building, 400 Seventh Street, SW., Washington, DC, 20590, by the close of business on December 31, 1996. The Maritime Administration, as a matter of discretion, will consider any comments submitted and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program N. 20.800 Construction-Differential Subsidies (CDS))

By order of the Maritime Administrator.

Edmond T. Sommer,

Acting Secretary.

Research and Special Programs Administration

[Docket No. PS–142; Notice 4]

Guidance on Performance Measures for Use in the Pipeline Risk Management Demonstration Program

AGENCY: Office of Pipeline Safety, DOT.

ACTION: Notice.

SUMMARY: The Research and Special Programs Administration's (RSPA), Office of Pipeline Safety (OPS) is currently involved in the development of the Pipeline Risk Management Demonstration Program required by the Accountable Pipeline Safety and Partnership Act of 1996. The demonstration program will invite risk management proposals from pipeline operators that are interested in demonstrating plans to reallocate their resources in ways to achieve superior safety on their pipeline systems by more effective methods than currently required by the pipeline safety regulations. On November 15, 1996, RSPA published Program Framework for Risk Management Demonstrations" (61 FR 58605) that included a statement that a guidance document for assessing risk management would soon be available for public comment. This document, "Guidance on Performance Measures For Use in the Pipeline Risk Management Demonstration Program," prepared by the Joint Risk Assessment Quality Team, is now available for public review and comment. This document provides guidance for monitoring individual demonstration projects and to enable OPS to determine the effectiveness of risk management as a regulatory alternative to 49 CFR Parts 190–199. OPS invites the public to review and comment on this draft.

ADDRESSES: Comments should be sent to the RSPA dockets unit, U.S. Department of Transportation, 400 7th St., SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Eben M. Wyman, (202) 366–0918, or by E-mail (eben.wyman@rspa.dot.gov), for copies of this document; or John Hess, (202) 366–4576, or by E-mail (john.hess@rspa.dot.gov) or via the World Wide Web at (http://opspm.volpe60.dot.gov.) regarding the subject matter of this Notice. Contact the Dockets Unit, (202) 366–5046, for other material in the docket.

Issued in Washington, DC, on December 18, 1996.

Richard B. Felder,

Associate Administrator for Pipeline Safety

[FR Doc. 96–32704 Filed 12–24–96; 8:45 am]

BILLING CODE 4910–60–P

Surface Transportation Board

[STB Ex Parte No. 290 (Sub No. 5) (97–1)]

Quarterly Rail Cost Adjustment Factor

AGENCY: Surface Transportation Board.

ACTION: Approval of rail cost adjustment factor.

SUMMARY: The Board has approved a first quarter 1997 rail cost adjustment factor (RCAF) and cost index filed by the Association of American Railroads. The first quarter 1997 RCAF (Unadjusted) is 1.116 an increase of 2.2% from the fourth quarter 1996 RCAF of 1.092. The first quarter 1997 RCAF (Adjusted) is 0.774. The first quarter 1997 RCAF–5 is 0.757.

EFFECTIVE DATE: January 1, 1997.

FOR FURTHER INFORMATION CONTACT: H. Jeff Warren, (202) 927–6243. TDD for the hearing impaired: (202) 927–5721.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Board's decision. To purchase a copy of the full decision write to, call, or pick up in person from: DC NEWS & DATA, INC., Room 2229, 1201 Constitution Avenue, N.W., Washington, DC 20423, or telephone (202) 289–4357. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

This action will not significantly affect either the quality of the human environment or energy conservation.

Pursuant to 5 U.S.C. 605(b), we conclude that our action will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Decided: December 19, 1996.

By the Board, Chairman Morgan, Vice Chairman Simmons, and Commissioner Owen.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

[STB Finance Docket No. 33317]

Union Pacific Railroad Company—Trackage Rights Exemption—Duluth, Missabe and Iron Range Railway Company

Duluth, Missabe and Iron Range Railway (DMIR) has agreed to grant overhead trackage rights to Union Pacific Railroad Company (UP) over a total of approximately 0.83 miles of rail line located in Douglas County, WI, between milepost 17.79 near Saunders (at the BN connection), and milepost 16.96 near Pokegama (at the yard of Duluth, Winnipeg and Pacific Railway).[1] The transaction was expected to be consummated on December 17, 1996.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 33317, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Branch, 1201 Constitution Avenue, N.W., Washington, DC 20423 and served on: Joseph D. Anthofer, General Attorney, 1416 Dodge Street, #830, Omaha, NE 68179.

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Decided: December 17, 1996.

[1] The trackage rights transaction is an extension of overhead trackage rights granted to Chicago and North Western Railway Company (CNW) between South Itasca and Saunders, WI. *See* 47 FR 42658 (September 21, 1982). On April 25, 1995, CNW was merged into UP pursuant to authority granted in Finance Docket No. 32133, and UP continued the trackage rights operation.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF THE TREASURY

[Treasury Order Number 100–01]

The Department of the Treasury Seal

December 17, 1996.

1. Pursuant to 31 U.S.C. § 301(g) and 31 U.S.C. § 321(b) and by the authority vested in the Secretary of the Treasury, I hereby approve the design of the Treasury seal which accompanies this Order (and which is described below) as the official seal of the Department for single color reproductions. This seal shall be used on letterhead stationery and other official Treasury documents.

2. The central device of the seal is essentially the same as that used by the Department throughout its entire history. It is a shield containing scales, a chevron with 13 stars, and a key. An outer ring surrounding the shield carries the inscription THE DEPARTMENT OF THE TREASURY 1789 in the Cheltenham Bold type font.

3. Single color reproduction guidelines are as follows: scales, chevron, and key are reproduced on an open shield; the inscription is reproduced on an open ring. When printing the seal in blue ink only on credentials, PMS 290 should be used. PMS stands for Pantone Matching System, which is the printing industry standard for describing and matching ink colors.

4. The standard for reproduction of the seal in three colors remains unchanged from the seal adopted by the Department in 1968 (1968 seal). Multi-color reproduction guidelines are as follows: shield in gold (options are: PMS 110, PMS 873 or bright gold foil); scales, chevron (stars in white, i.e., reversed) and key in light blue (PMS 292). Inscription is reversed out of dark blue (PMS 540).

5. The official seal in use since 1968 is identical except that the type in the outer ring was reversed out of a dark background. The 1968 seal shall continue to be an authorized optional seal. Use of the new seal should be phased in as requirements for printing letterhead stationery and other documents carrying the seal arise. Existing dies and plates of the 1968 seal are considered equally effective as the official seal and shall continue to be used until there is a need to replace them.

6. The Assistant Secretary (Management) and Chief Financial Officer is hereby delegated the authority to approve future changes to the seal or some elements of it to the extent such changes may be necessary for efficiency in printing and reproduction. This delegation is made with the understanding that any future changes to the seal shall be set forth in a Treasury Directive and published in the **Federal Register**.

7. *CANCELLATION.* This Order supersedes Treasury Order 100–01, "Treasury Seal," dated January 29, 1968.

Robert E. Rubin,

Secretary of the Treasury.

UNITED STATES INFORMATION AGENCY

Media Management Training Program for Albania

ACTION: Notice; request for proposals.

SUMMARY: The Office of Citizen Exchanges of the United States Information Agency's Bureau of Educational and Cultural Affairs announces an open competition for an assistance award. Public and private non-profit organizations meeting the provisions described in IRS regulation 26 CFR 1.501(c)(3)–1 may apply to develop training programs in media management for Albania.

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries . . . ; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations . . . and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." The funding authority for the program cited above is provided through the Support for Eastern European Democracies Act.

Programs and projects must conform with Agency requirements and guidelines outlined in the Solicitation Package. USIA projects and programs are subject to the availability of funds.

ANNOUNCEMENT TITLE AND NUMBER: All communications with USIA concerning this announcement should refer to the above title and reference number E/P–97–19.

DEADLINE PROPOSALS: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, D.C. time on Friday, February 7, 1997. Faxed documents will not be accepted, nor will documents postmarked February 7, 1997 but received at a later date. It is the responsibility of each applicant to ensure that proposals are received by the above deadline.

Program activities should begin after May 1, 1997.

FOR FURTHER INFORMATION, CONTACT: The Office of Citizen Exchanges, E/PE, Room 216, U.S. Information, U.S. Information Agency, 301 4th Street, S.W., Washington, D.C. 20547, telephone: 202–619–5319, fax: 202–619–4350, e-mail address: (cminer@usia.gov) to request a Solicitation Package containing more detailed award criteria, required application forms, and standard guidelines for preparing proposals, including specific criteria for preparation of the proposal budget.

TO DOWNLOAD A SOLICITATION PACKAGE VIA INTERNET: The entire Solicitation Package may be downloaded from USIA's websit at http://www.usia.gov/ or from the Internet Gopher at gopher:/ /gopher.usia.gov. Under the heading "International Exchanges/Training," select "Request for Proposals (RFPs)." Please read "About the Following RFPs" before downloading.

Please specify USIA Program Officer Christina Miner on all inquiries and correspondences. Interested applicants should read the complete **Federal Register** announcement before sending inquiries or submitting proposals. Once the RFP deadline has passed, Agency staff may not discuss this competition in any way with applicants until the Bureau proposals review process has been completed.

SUBMISSIONS: Applicants must follow all instruction given in the Solicitation Package. The original and eight copies of the application should be sent to: U.S. Information Agency, Ref.: e/P–97–19, Office of Grants Management, E/XE, Room 326, 301 4th Street, S.W., Washington, D.C. 20547.

Applicants must also submit the "Executive Summary" and "Proposal

Narrative" sections of the proposal on a 3.5" diskette, formatted for DOS. This material must be provided in ASCII text (DOS) format with a maximum line length of 65 characters. USIA will transmit these files electronically to USIS posts overseas for their review, with the goal of reducing the time it takes to get posts' comments for the Agency's grants review process.

DIVERSITY GUIDELINES: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including, but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the 'Support for Diversity' section for specific suggestions on incorporating diversity into the total proposal.

SUPPLEMENTARY INFORMATION:

Overview

USIA requests proposals that will provide media management training for Albanian media professionals in radio and television. Training should focus on the management of media as a business: station management, newsroom management, advertising, marketing, personnel, and public relations. A secondary focus should be professional journalistic ethics, including topics such as checkbook journalism; observation of attribution and interview ground rules; and balance in political coverage. Project activities may include: internships; study tours; short-term training; consultations; and intensive workshops taking place in the United States or in Albania. Proposals should reflect the authors' understanding of the political, economic, and social environment in which the program activity will take place. Proposals which take into account the need for ongoing sharing of information and training beyond the period of the USIA grant will be viewed more favorably than those that do not.

Exchange and training programs supported by institutional grants should operate at two levels: they should enhance institutional relationships; and they should offer practical and comparative information to individuals to assist them with their professional responsibilities. Strong proposals usually have the following characteristics: an existing partner relationship between an American organization and a host-country institution; proven tract record of conducting program activity; cost sharing from American or in-country sources, including donations of air fares, hotel and housing costs; experienced staff with language facility; and a clear, convincing plan showing how permanent results will be accomplished as a result of the activity funded by the grant. USIA wants to see tangible forms of time and money contributed to the project by the prospective grantee institution, as well as funding from third party sources.

Note: Research projects or projects limited to technical issues are not eligible for support nor are film festivals or exhibits. Exchange programs for students or faculty or proposals that request support for the development of university curricula or for degree-based programs are also ineligible under this RFP. Proposals to link university departments or to exchange faculty and/or students are funded by USIA's Office of Academic Programs (E/A) under the University Affiliation Program and should not be submitted in response to this RFP.

Guidelines

1. All grant proposals must clearly describe the type of persons who will participate in the program as well as the process by which participants will be selected. Note that participants should be professionals working in the field of media management and not members of university faculties. In the selection of all foreign participants, USIA an USIS posts retain the right to nominate participants and to approve or reject participants recommended by the program institution. Programs must also comply with J–1 visa regulations.

2. Programs that include internships in the U.S should provide letters tentatively committing host institutions to support the internships. Letters of commitment from the hosts of study tour site visits should also be included, if applicable.

3. Applicants are encouraged to consult with USIS offices regarding program content and partner institutions before submitting proposals. Award-receiving will be expected to maintain contact with the USIS post throughout the grant period.

Proposal Budget

Please refer to the Solicitation Package for complete budget guidelines instructions.

Applicants must submit a detailed line item budget based on specific instructions in the Program and Budget Guidelines of the Proposal Submission Instructions. Proposals for less than $150,000 will receive preference. Proposals with strong cost-sharing will be given priority.

Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000.

The following project costs are eligible for consideration for funding:

1. International and domestic air fares; visas; transit costs; ground transportation costs.

2. Per Diem. For the U.S. program, organizations have the option of using a flat $140/day for program participants or the published U.S. Federal per diem rates for individual American cities. For activities outside the U.S., the published Federal per diem rates must be used. **Note:** U.S. escorting staff must use the published Federal per diem rates, not the flat rate.

3. Interpreters. If needed, interpreters for the U.S. program are provided by the U.S. State Department Language Services Division. Typically, a pair of simultaneous interpreters is provided for every four visitors. USIA grants do not pay for foreign interpreters to accompany delegations from their home country. Grant proposal budgets should contain a flat $140/day per diem for each Department of State interpreter, as well as home-program-home air transportation of $400 per interpreter plus any U.S. travel expenses during the program. Salary expenses are covered centrally and should not be part of an applicant's proposed budget.

4. Book and cultural allowance. Participants are entitled to and escorts are reimbursed a one-time cultural allowance of $150 per person, plus a participant book allowance of $50. U.S. staff do not get these benefits.

5. Consultants. May be used to provide specialized expertise or to make presentations. Daily honoraria generally do not exceed $250 per day. Subcontracting organizations may also be used, in which case the written agreement between the prospective grantee and subcontractor should be included in the proposal.

6. Room rental, which generally should not exceed $250 per day.

7. Materials development. Proposals may contain costs to purchase, develop, and translate materials for participants.

8. One working meal per project. Per capita costs may not exceed $5–$8 for a lunch and $14–$20 for a dinner, excluding room rental. The number of invited guests may not exceed participants by more than a factor of two-to-one.

DE
26
1996
UMI

9. A return travel allowance of $70 for each participant which is to be used for incidental expenditures incurred during international travel.

10. All USIA-funded delegates will be covered under the terms of a USIA-sponsored health insurance policy. The premium is paid by USIA directly to the insurance company.

11. Other costs necessary for the effective administration of the program, including salaries for grant organization employees, benefits, and other direct and indirect costs per detailed instructions in the application package.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will be reviewed by the program office, as well as the USIA Office of Eastern Europe and NIS Affairs and the USIA post overseas, where appropriate. Proposals may be reviewed by the Office of the General Counsel or by other Agency elements. Funding decisions are at the discretion of the USIA Associate Director for Educational and Cultural Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the USIA grants officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. Quality of the Program Idea: Proposals should respect to the program requirements of the RFP.

2. Program Planning and Ability to Achieve Objectives: Program objectives should be stated clearly and precisely and should reflect the applicant's expertise in the subject area and the region. Goals should be reasonable and attainable. A detailed agenda and relevant work plan should demonstrate how objectives will be achieved, including a timetable for completion of major tasks. The substance of seminars, presentations, consulting, internships, and itineraries should be spelled out in detail. Responsibilities of in-country partners should be clearly described.

3. Support of Diversity: Proposals should demonstrate substantive support of the Bureau's policy on diversity. Achievable and relevant features should be cited in both program administration (selection of participants, program venue and program evaluation) and program content (orientation and wrap-up sessions, program meetings, resource materials, and follow-up meetings).

4. Institutional Capability: Proposed personnel and institutional resources should be adequate and appropriate to achieve the project's goals. The narrative should demonstrate proven ability to handle logistics. Proposal should reflect the institution's expertise in the subject area and knowledge of the conditions in Albania.

5. Follow-on Activities: Proposals should provide a plan for continued follow-on activity (without USIA support) which ensures that USIA supported programs are not isolated events.

6. Project Evaluation: Proposals must include a plan and methodology to evaluate the project's success, both as the activities unfold and at the end of the program. USIA recommends that the proposal include a draft survey questionnaire and/or plan for use of another measurement technique (such as a focus group) to link outcomes to original project objectives. Award-receiving organizations/institutions will be expected to submit intermediate reports after each project component is concluded or quarterly, whichever is less frequent.

7. Cost Effectiveness/Cost Sharing: Overhead and administrative costs for the proposal, including salaries, honoraria, and subcontracts for services, should be kept low. All other items should be necessary and appropriate. Proposals should show cost-sharing, both contributions from the applicant and from other sources.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. The Agency reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal USIA procedures.

Dated: December 18, 1996.

Dell Pendergrast,

Deputy Associate Director for Educational and Cultural Affairs.

RIN 3235–AH09

Private Investment Companies

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Commission is publishing for comment new rules under the Investment Company Act of 1940 to implement provisions of the National Securities Markets Improvement Act of 1996 that apply to private investment companies. The proposed rules would define certain terms for purposes of the new exception from regulation under the Investment Company Act for private investment companies whose investors are all highly sophisticated investors, termed "qualified purchasers." The proposed rules also would address certain transition issues related to existing private investment companies that have no more than 100 investors and certain other matters related to private investment companies.

DATES: Comments must be received on or before February 10, 1997.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Stop 6–9, Washington, D.C. 20549. Comments also may be submitted electronically at the following E-mail address: rule-comments@sec.gov. All comment letters should refer to File No. S7–30–96; this file number should be included on the subject line if E-mail is used. Comment letters will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. 20549. Electronically submitted comment letters also will be posted on the Commission's Internet web site (http://www.sec.gov).

FOR FURTHER INFORMATION CONTACT: David P. Mathews, Senior Counsel, Nadya B. Roytblat, Assistant Office Chief, or Kenneth J. Berman, Assistant Director, at (202) 942–0690, Office of Regulatory Policy, Division of Investment Management, Stop 10–2, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission today is requesting public comment on proposed new rules 2a51–1, 2a51–2, 2a51–3, 3c–1, 3c–5, 3c–6 and 3c–7 under the Investment Company Act of 1940 [15 USC 80a] (the "Investment Company Act" or "Act").

Text of Proposed Rules

Executive Summary

The Commission is proposing rules to implement certain provisions of the National Securities Markets Improvement Act of 1996 (the "1996 Act"), which was signed into law by President Clinton on October 11, 1996. The 1996 Act, among other things, added section 3(c)(7) to the Investment Company Act to create a new exclusion from regulation under the Act for private investment companies that consist solely of highly sophisticated "qualified purchasers" owning or investing on a discretionary basis a specified amount of "investments" ("section 3(c)(7) funds"). The 1996 Act also amended section 3(c)(1) of the Investment Company Act, which excludes from regulation under the Act private investment companies with 100 or fewer "beneficial owners" ("section 3(c)(1) funds"). Reflecting a relationship between section 3(c)(1) and new section 3(c)(7), the 1996 Act contains provisions that permit an existing section 3(c)(1) fund to convert into a section 3(c)(7) fund or invest in a section 3(c)(7) fund as a qualified purchaser, subject to certain requirements designed to protect the section 3(c)(1) fund's existing beneficial owners.

The 1996 Act requires the Commission to prescribe rules defining the terms "investments" and "beneficial owner" relevant to the new provisions by April 9, 1997. Other changes to the provisions of the Investment Company Act relating to private investment companies require Commission rulemaking as well. The Commission is proposing for public comment new rules under the Investment Company Act that would:

- Define the term "investments" for purposes of the qualified purchaser definition;
- Define the term "beneficial owner" for purposes of the provisions that permit an existing section 3(c)(1) fund to convert into a section 3(c)(7) fund or to be treated as a qualified purchaser;
- Address certain interpretative issues under section 3(c)(7);
- Permit certain section 3(c)(1) funds to rely on the pre—1996 Act provisions of section 3(c)(1) rather than restructure their existing relationships with investors;
- Permit knowledgeable employees of a section 3(c)(1) or a section 3(c)(7) fund (referred to collectively in this Release as "private funds"), and knowledgeable employees of affiliates of these funds, to invest in the fund; and
- Address transfers of securities in a private fund when the transfer was caused by legal separation, divorce, death, and certain other involuntary events.

I. Background

Section 3(c)(1) of the Investment Company Act excludes from regulation under the Act certain private investment companies "whose outstanding securities (other than short-term paper) are beneficially owned by not more than one hundred persons." [1] A wide variety of investment vehicles rely on section 3(c)(1), ranging from small groups of individual investors, such as investment clubs, to venture capital and other investment pools designed primarily for sophisticated investors.[2]

[1] 15 U.S.C. 80a–3(c)(1). In addition, the section 3(c)(1) fund must be an issuer that "is not making and does not presently propose to make a public offering of its securities."

[2] *See* Division of Investment Management, SEC, Protecting Investors: A Half Century of Investment

A. Qualified Purchaser Funds

In 1992, the Commission concluded that the 100-investor limit, while reasonably reflecting the point beyond which federal regulatory concerns incorporated in the Investment Company Act are raised, may place unnecessary constraints on investment pools that sell their securities exclusively to sophisticated purchasers.[3] The Commission recommended that Congress amend the Investment Company Act to create an alternative exclusion for investment companies whose securities are owned exclusively by sophisticated investors.

Congress implemented this recommendation in the 1996 Act. New section 3(c)(7) of the Investment Company Act creates an exclusion for investment companies whose investors consist solely of "qualified purchasers."[4] New section 2(a)(51)(A) of the Investment Company Act defines the term qualified purchaser as (i) any natural person who owns not less than $5 million in investments,[5] (ii) a family-owned company ("Family Company") that owns not less than $5 million in investments,[6] (iii) certain trusts,[7] and (iv) any other person (*e.g.*, an institutional investor) that owns and invests on a discretionary basis not less than $25 million in investments.[8] The 1996 Act directs the Commission to prescribe rules defining the term "investments" for purposes of determining whether a prospective investor in a section 3(c)(7) fund ("prospective qualified purchaser") meets the $5 million/$25 million thresholds.[9]

Section 3(c)(7) includes a "grandfather" provision that allows an existing section 3(c)(1) fund to convert into a section 3(c)(7) fund ("Grandfathered Fund"). The outstanding securities of a Grandfathered Fund may be beneficially owned by as many as 100 persons who are not qualified purchasers, provided that these persons acquired their investment in the Grandfathered Fund on or before September 1, 1996.[10] The grandfather provision is designed to allow an existing section 3(c)(1) fund wishing to avail itself of the new section 3(c)(7) exclusion to continue its existing relationships with investors who are not qualified purchasers.[11]

The grandfather provision requires the Grandfathered Fund, prior to the conversion, to provide each beneficial owner of its securities (i) notice of the fund's intention to become a section 3(c)(7) fund and (ii) an opportunity to redeem such owner's interest in the fund.[12] This provision is designed to enable an investor in an existing section 3(c)(1) fund to dispose of an investment, without penalty, if the investor does not choose to continue its investment in a private investment company that no longer will be limited to 100 investors.[13] The 1996 Act directs the Commission to define the term "beneficial owner" for this purpose.[14] The 1996 Act also requires an existing section 3(c)(1) fund that wishes to become a qualified purchaser to obtain the consent of the beneficial owners of its securities and certain other persons (the "consent provision").[15]

The Commission is proposing a rule under the Investment Company Act to define the term "investments" for purposes of the qualified purchaser definition. The Commission also is proposing rules to define the term "beneficial owner" for purposes of the grandfather and the consent provisions, and to address other transitional and interpretative issues related to section 3(c)(7).

B. Amendments to Section 3(c)(1)

To prevent circumvention of the 100-investor limit, section 3(c)(1)(A) (the "look-through provision") requires, in some instances, that a fund seeking to rely on the provision "look through" certain companies (*e.g.*, corporations, partnerships and other investors that are not natural persons) that hold its voting securities and count the company's security holders as beneficial owners of its securities.[16] The look-through provision currently applies (i) if a company owns 10% or more of a section 3(c)(1) fund's voting securities ("first 10% test") and (ii) more than 10% of the company's total assets are invested in section 3(c)(1) funds generally ("second 10% test").[17]

The 1996 Act's amendments to section 3(c)(1) are designed, in part, to

---

Company Regulation at 104 (1992) (hereinafter Protecting Investors Report).

[3] 138 Cong. Rec. at S4822 (daily ed. Apr. 2, 1992) (Memorandum of the Securities and Exchange Commission in Support of the Small Business Incentive Act of 1992) (hereinafter Commission Memorandum). Some commenters also suggested that section 3(c)(1)'s 100-investor limit may have had the effect of providing an incentive for Americans to invest in unregulated off-shore markets. *See* S. Rep. No. 293, 104th Cong., 2d Sess. at 10 (1996) (hereinafter Senate Report); H.R. Rep. No. 622, 104th Cong., 2d Sess. at 18 (1996) (hereinafter House Report). These Reports relate to bills that were eventually enacted as the National Securities Markets Improvement Act of 1996, Pub. L. No. 104–290 (1996) (the "1996 Act") (to be codified in scattered sections of the United States Code ("U.S.C."); U.S.C. references are to the sections in which the relevant provisions of the 1996 Act will be codified).

[4] 1996 Act section 209; 15 U.S.C. 80a–3(c)(7). As is the case for a section 3(c)(1) fund, a section 3(c)(7) fund cannot make, or propose to make, a public offering of its securities.

[5] 15 U.S.C. 80a–2(a)(51)(A)(i).

[6] A Family Company is a company "that is owned directly or indirectly by or for two or more natural persons who are related as siblings or spouse (including former spouses), or direct lineal descendants by birth or adoption, spouses of such persons, the estates of such persons, or foundations, charitable organizations, or trusts established for the benefit of such persons . . . ." 15 U.S.C. 80a–2(a)(51)(A)(ii).

[7] A trust may be a qualified purchaser if (i) it was not formed for the specific purpose of acquiring the securities offered, and (ii) the trustee or other person authorized to make decisions with respect to the trust, and each settlor or other person who has contributed assets to the trust, are qualified purchasers. 15 U.S.C. 80a–2(a)(51)(A)(iii).

[8] A qualified purchaser that meets the $25 million threshold may act for its own account or for the accounts of other qualified purchasers. 15 U.S.C. 80a–2(a)(51)(A)(iv).

[9] 1996 Act section 209(d)(2). Such rules are required to be prescribed by April 9, 1997 (180 days after the enactment of the 1996 Act). The provisions of the 1996 Act enacting section 3(c)(7) take effect on the earlier of April 9, 1997 or the date on which the rulemaking defining the term investments is completed.

[10] 15 U.S.C. 80a–3(c)(7)(B).

[11] *See* 142 Cong. Rec. at E1938 (Oct. 21, 1996) (Remarks of Hon. John D. Dingell); The Investment Company Act Amendments of 1995: Hearing on H.R. 1495 Before the Subcomm. on Telecommunications and Finance of the Comm. on Commerce, House of Representatives, 104th Cong. 1st Sess. (1995) (prepared statement of Marianne Smythe); *see also* American Bar Association, Section of Business Law, Committee on Federal Regulation of Securities, Task Force on Hedge Funds, Report on Section 3(c)(1) of the Investment Company Act of 1940 and Proposals to Create an Exception for Qualified Purchasers, 51 Bus. Law. 773, 779 (Dec. 5, 1995) (hereinafter Hedge Funds Task Force Report). The grandfather provision is not intended, however, to allow a sponsor of a section 3(c)(1) fund to nominally give the fund section 3(c)(7) status in order to be able to operate another section 3(c)(1) fund and thereby circumvent the 100-investor limit. Remarks of Hon. John D. Dingell, *supra; see also* section II.D of this Release.

[12] 15 USC 80a–3(c)(7)(B)(ii).

[13] *See* 142 Cong. Rec. at E1929 (Oct. 4, 1996) (Remarks of Hon. Thomas J. Bliley, Jr.).

[14] 1996 Act section 209(d)(4). Such rules are required to be prescribed by April 9, 1997. *See supra* note 9.

[15] 15 USC 80a–2(a)(51)(C).

[16] Section 2(a)(42) of the Investment Company Act [15 USC 80a-2(a)(42)] defines a voting security as any security "presently entitling the holder thereof to vote for election of directors [of the issuer] thereof." *See* Thomas P. Lemke and Gerald T. Lins, *Private Investment Companies Under Section 3(c)(1)*, 44 Bus. Law. 401, 416–18 (Feb. 1989) (discussing the types of non-voting interests that have been treated as voting securities).

[17] To illustrate the operation of the current look-through provision, assume Company A is seeking to rely on the provisions of section (3)(c)(1). If one of Company A's security holders, Company B, beneficially owns 10% or more of Company A's voting securities, then the security holders of Company B would be counted as security holders of Company A (under the first 10% test), unless no more than 10% of Company B's assets consist of securities of section 3(c)(1) funds (the second 10% test).

The operation of the look-through provision also is relevant to determining who is a beneficial owner of a section 3(c)(1) fund's securities for purposes of the grandfather and the consent provisions. *See* section II.B. of this Release.

VOL 61 ISS 249 DEC 26 1996 UMI

simplify the way in which the number of investors in a fund is calculated for purposes of the 100-investor limit.[18] When the relevant provisions of the 1996 Act become effective,[19] the amended look-through provision will no longer apply to a security holder that is an operating company (*i.e.*, a company that is not an investment company or a private fund).[20] This approach recognizes that an investment in a section 3(c)(1) fund by a company that is not itself an investment company generally does not implicate the concerns that the look-through provision was intended to address—that the investor may be a conduit that was created to enable a section 3(c)(1) fund to have indirectly more than 100 investors.[21]

The 1996 Act not only limits the scope of the look-through provision, but also seeks to simplify it by eliminating the second 10% test. The look-through provision will apply whenever an investment company, including a private fund, owns 10% or more of a section 3(c)(1) fund, regardless of whether or not the investment company has more than 10% of its assets invested in section 3(c)(1) funds generally. This change reflects the view that the private nature of a section 3(c)(1) fund may be brought into question when an investment company has a substantial investment in the section 3(c)(1) fund.[22]

These amendments, while attempting to simplify the look-through provision and make it more consistent with its regulatory purpose, may create interpretative issues for existing section 3(c)(1) funds that have investors to which the first, but not the second, 10% test applies. The Commission is proposing a rule to address these issues.

C. Other Directed Rulemaking

The 1996 Act directs the Commission to prescribe two sets of rules relating to private funds.[23] The 1996 Act directs the Commission to prescribe rules permitting "knowledgeable employees" of a private fund (or knowledgeable employees of the fund's affiliates) to invest in the fund without causing the fund to lose its exclusion from regulation under the Investment Company Act.[24] The purpose of this provision appears to be to allow private funds to offer persons who participate in the funds' management the opportunity to invest in the fund as a benefit of employment.[25]

The Commission is proposing a rule to allow directors, executive officers, general partners, and other knowledgeable employees of a section 3(c)(1) fund to invest in the fund without being counted for purposes of the fund's 100-investor limit. The proposed rule similarly would allow knowledgeable employees of a section 3(c)(7) fund to invest in the fund even though they may not meet the definition of qualified purchaser. The rule also would permit investments by knowledgeable employees of affiliates that manage the investment activities of these funds.

In addition to directing the Commission to adopt rules relating to investments by knowledgeable employees, the 1996 Act directs the Commission to prescribe rules implementing section 3(c)(1)(B) of the Act.[26] Section 3(c)(1)(B) provides that beneficial ownership of securities of a section 3(c)(1) fund by any person who acquires the securities as a result of "a legal separation, divorce, death, or other involuntary event" will be deemed to be beneficial ownership by the person from whom the transfer was made, pursuant to such rules and regulations as the Commission prescribes.[27] The Commission is proposing a rule to permit securities acquired by a person as a result of certain transfers to be treated as being beneficially owned by the original beneficial owner. The proposed rule would address similar transfers of securities issued by section 3(c)(7) funds.[28]

II. Rules Relating to Qualified Purchaser Funds

A. Investments

The 1996 Act provides that the term investments is to be defined by Commission rule. Section 2(a)(51)(B) of the Act also gives the Commission authority to prescribe such rules and regulations governing qualified purchasers as the Commission determines are necessary or appropriate in the public interest or for the protection of investors.

In explaining why Congress deferred to the Commission's defining what constitutes an investment for purposes of the $5 million/$25 million thresholds, the legislative history of the 1996 Act indicates that section 3(c)(7) funds are to be limited to investors with a high degree of financial sophistication who are in a position to appreciate the risks associated with investment pools that do not have the protections afforded by the Investment Company Act.[29] These investors are likely to be able to evaluate on their own behalf matters such as the level of a fund's management fees, governance provisions, transactions with affiliates, investment risk, leverage and redemption or withdrawal rights.[30] Congress appears to have expected that the definition of investments be broader than securities, but not that every asset be treated as an investment. Rather, the legislative history suggests that the asset should be held for investment purposes and that the nature of the asset should indicate a significant degree of investment experience and sophistication such that the investor can be expected to have the knowledge to evaluate the risks of investing in unregulated investment pools.[31]

Proposed rule 2a51–1 under the Investment Company Act seeks to define the term investments consistent with the principles set forth in the legislative history. The proposed rule would define investments broadly to include securities (other than controlling interests in all but certain issuers), and real estate, futures contracts, physical commodities, and cash and cash equivalents held for investment purposes. Proposed rule 2a51–1 also contains certain provisions designed to clarify how the amount of a person's investments would be determined (including investments held jointly with a spouse and investments held by certain affiliated entities). The proposed rule would permit a section 3(c)(7) fund to rely, in good faith, on certain documentation in determining a person's eligibility as a qualified purchaser.

1. Definition of Investments

a. Securities

Proposed rule 2a51–1(b)(1) would include securities within the definition of investments. Defining investments in this way should result in a broad range of investments being treated as such for purposes of section 3(c)(7). Many investment opportunities are offered through entities that issue securities, such as limited partnerships and limited liability companies.[32]

Under the proposed rule, securities of an issuer with which the prospective qualified purchaser has a control relationship generally would not come within the definition of investments for purposes of section 3(c)(7).[33] Limiting the definition in this manner is designed to exclude, among other things, controlling ownership interests in family-owned and other closely held businesses, and controlled subsidiaries of operating companies. These holdings would appear not to demonstrate the degree of financial sophistication necessary to invest in unregulated investment vehicles or securities generally.

The proposed rule would not exclude from the definition of investments controlling ownership interests in investment companies and other issuers excepted from the definition of investment company by sections 3(c)(1) through 3(c)(9) of the Act.[34] Ownership of a controlling interest in these types of companies generally suggests a significant degree of investment experience. The proposed rule also would not exclude a controlling ownership interest in a "listed" company (*e.g.*, a company whose equity securities are listed on a national securities exchange, traded on the National Association of Securities Dealers Automated Quotation System ("NASDAQ") or listed on an offshore securities exchange) that is not a majority-owned subsidiary of the prospective qualified purchaser.[35] A controlling ownership interest in a company listed on a national securities exchange or traded on NASDAQ is likely to evidence knowledge of and experience in dealing with investment risk, securities-related disclosure, corporate governance, transactions with affiliates, leverage, and other issues relevant to a person's ability to evaluate investment in a pooled investment vehicle. The proposed inclusion of securities traded on a "designated offshore securities market" is intended to include securities of foreign issuers that trade in an organized market that is not regulated by the Commission.

Comment is requested on the proposed exclusions from the definition of investments for certain securities. Should other controlling interests (such as controlling interests in large, but privately held, companies) be treated as investments for purposes of section 3(c)(7)?[36] In the alternative, should the listed company exception be applicable if any securities of the issuer have been offered to the public, even if periodic reports with respect to the issuer's securities are no longer required to be filed under the Securities Exchange Act of 1934 ("Exchange Act")?[37] Should foreign securities be considered listed securities based on criteria other than, or in addition to, whether they trade on a designated offshore securities market (such as a public float requirement or a requirement that American Depositary Receipts with respect to these securities be traded in the U.S.)?

Comment also is requested whether other types of business holdings (whether or not characterized as securities) should be treated as investments. For example, should any passive ownership interest in a trade or business be considered to be an investment?[38] Finally, comment is requested whether other types of securities should be excluded from the definition of investments because they do not serve as an appropriate measure of investment experience.

b. Real Estate

Proposed rule 2a51–1(b)(2) would include real estate held for investment purposes within the definition of investments. Consistent with the examples provided by the legislative history of the 1996 Act, real estate would not be considered to be held for investment purposes if the real estate is used by the prospective qualified purchaser or a member of the prospective qualified purchaser's family ("related person") for personal purposes (*e.g.*, as a personal residence).[39] The term "personal purposes" is derived from the Internal Revenue Code provision that addresses circumstances under which a taxpayer is allowed deductions with respect to certain "dwelling units."[40] Thus, residential property could be treated as an investment if it is not treated as a residence for tax purposes. The Commission believes that reference to the Internal Revenue Code provisions is appropriate because it would allow prospective qualified purchasers to determine whether the residential real estate is an investment based on the same provisions they would apply in

[32] For example, the term security includes any "fractional undivided interest in oil, gas or other mineral rights." *See* section 2(1) of the Securities Act of 1933 ("Securities Act") [15 USC 70a(1)].

[33] The proposed rule would exclude from the definition of investments securities of an issuer that "controls, is controlled by, or is under common control with, the person that owns the securities." The term "control" is defined in section 2(a)(9) of the Act as "the power to exercise a controlling influence over the management or policies of a company, unless such power is solely the result of an official position with such company." 15 USC 80a-2(a)(9). Section 2(a)(9) also provides that a person who owns beneficially, "either directly or through one or more controlled companies, more than 25 per centum of the voting securities of a company shall be presumed to control such company." *Id.*

[34] 15 USC 80a–3(c) (1) through (9). In addition to private investment companies, sections 3(c)(1) through (9) except from the definition of investment company certain types of issuers that engage in significant investment-related activities (*i.e.*, brokers and other financial intermediaries, banks, insurance companies, and finance companies). A controlling interest in a foreign bank, foreign insurance company or structured finance vehicle also would be included as an investment, even if the issuer is not considered to be an investment company under rules 3a–6 or 3a–7 under the Act [17 CFR 270.3a–6 and 3a–7].

[35] A company would be considered to be a "listed company" if it has outstanding a class of equity securities that are (i) "reporting securities" under rule 11Aa3–1 of the Securities Exchange Act of 1934 ("Exchange Act") [17 CFR 240.11Aa3–1] (*i.e.*, securities listed and registered, or admitted to unlisted trading privileges, on a national securities exchange or for which quotation information is disseminated in the NASDAQ and for which transaction reports are required to be made on a real-time basis pursuant to an effective transaction reporting plan) or (ii) listed on a "designated offshore securities market" (as such term is defined in Regulation S under the Securities Act [17 CFR 230.901 *et seq.*]).

[36] For example, a controlling interest in a company that has shareholders equity in excess of a specified amount (*e.g.*, $50 million or $100 million) could be treated as an investment on the theory that the size of the company suggests a certain level of financial sophistication on the part of the control person.

[37] *See* sections 12(b), 12(g) and 15(d) of the Exchange Act [15 USC 78*l*(b), 78*l*(g) and 78*o*(d)].

[38] A passive ownership interest could be defined for these purposes as an interest in a trade or business in which such person does not materially participate. *See* Internal Revenue Code ("IRC") section 469(c)(1) [26 USC 469(c)(1)].

[39] Proposed rule 2a51–1(c). Proposed rule 2a51–1(a)(5) would define "related person" as a sibling, spouse or former spouse of the prospective qualified purchaser, or a direct lineal descendant or ancestor by birth or adoption of the prospective qualified purchaser, or a spouse of such descendant. *See also* section 2(a)(51)(A)(ii) of the Act [15 USC 80a–2(a)(51)(A)(ii)] (specifying who is considered a family member for purposes of the Family Company definition).

[40] IRC section 280A(d) [26 USC 280A(d)]. The proposed rule would treat residential real estate as an investment if it is not treated as a dwelling unit used as a residence in determining whether deductions for depreciation and other items are allowable under the IRC. Section 280A provides, among other things, that a taxpayer uses a dwelling unit during the taxable year as a residence if he or she uses such unit for personal purposes for a number of days that exceeds the greater of 14 days or 10 percent of the number days during which the unit is rented at a fair market value.

determining whether certain expenses related to the property are deductible for purposes of completing their tax returns. Comment is requested on the proposed approach. Would alternative approaches (such as not treating the property as held for investment purposes if it is used *at any time* for personal purposes) be easier to apply?

Property owned by the prospective qualified purchaser that has been used by the prospective qualified purchaser or a related person as a place of business or in connection with the conduct of a trade or business ("business-related property") would not be considered to be held for investment purposes.[41] While business-related property may have been acquired with an investment goal in mind, these holdings may not be indicative of extensive experience in the financial or real estate markets and may have been acquired for reasons other than the potential investment merits of the property.

Comment is requested on including real estate as an investment for purposes of the proposed rule. Does real estate investing sufficiently reflect the kind of financial sophistication required to understand the risks of investing in an unregulated investment pool? Should real estate be included as an investment for purposes of the proposed rule only if the investment is in the form of a security?

c. Commodity Interests

Proposed rule 2a51–1(b)(3) would include contracts for the purchase or sale of a commodity for future delivery ("commodity interests") held for investment purposes within the definition of investments.[42] Commodity interests are often used by investors to hedge their portfolios from declines in securities prices, changes in interest rates, or foreign currency fluctuations. Commodity interests also may provide a means to invest in the commodities markets.

Commodity interests would be included as investments to the extent of the initial margin and option premium deposited with a futures commission merchant.[43] This approach is similar to that taken by rule 4.7 under the Commodity Exchange Act, which makes available a simplified regulatory framework for private commodity pools offered to certain sophisticated investors.[44] Gains and losses on commodity interests generally would be reflected in changes in the prospective qualified purchaser's cash position (which also could be treated as an investment).[45] Comment is requested on the proposed approach to treating commodity interests. Since the value of the commodity interest generally would be reflected in the investor's cash position (including initial margin), is it necessary for the rule to include commodity interests? Would the rule be easier to apply if it explicitly provided that "variation margin" posted to the commodity account of the prospective qualified purchaser to reflect gains could be treated as an investment for purposes of the rule? Would another formulation for determining how to value commodity interests be more appropriate?

The proposed rule also would include in the definition of investments commodities that are held in physical form and for investment purposes.[46] This provision would recognize that many investors hold gold, silver or other commodities as part of their investment portfolios. Commodities that are used as part of a trade or business (such as grain held by a food processor as part of its inventory or raw materials) would not be considered to be investments.

Comment is requested on the proposed inclusion of commodity interests and commodities within the definition of investments. Should any other types of financial instruments, to the extent they are not addressed by the proposed rule, be included within the definition of investments?[47]

d. Cash and Cash Equivalents

Proposed rule 2a51–1(b)(5) would include cash and cash equivalents held for investment purposes ("cash") in the definition of investments.[48] The Commission is proposing to include cash as an investment to reflect its views that many investors are likely at any given time to have a component of their investment portfolio in cash.[49] The rule would specify that the cash would have to be held by the prospective qualified purchaser for investment purposes. Thus, cash used by the prospective qualified purchaser to meet its day-to-day expenses (or, in the case of a prospective qualified purchaser that is a business, its working capital) would

---

[41] Proposed rule 2a51–1(c).

[42] Paragraph (a)(1) of proposed rule 2a51–1 would define commodity interests to mean commodity futures contracts, options on a commodity futures contracts, and options on physical commodities traded on or subject to the rules of (a) any contract market designated for trading such transactions under the Commodity Exchange Act (the "CEA") [7 USC 1 *et seq.*] and the rules thereunder; or (b) any board of trade or exchange outside the United States, as contemplated in Part 30 of the rules under the CEA. 17 CFR 30.1 through 30.11.

A futures contract generally is a bilateral agreement providing for the purchase or sale of a specified commodity at a stated time in the future for a fixed price. Robert E. Fink & Robert B. Feduniak, Futures Trading at 10 (1988). A commodity option gives its holder the right, for a specified period of time, to either buy (in the case of a call option) or sell (in the case of a put option) the subject of the option at a predetermined price. The writer (seller) of an option is obligated to sell or buy the specified commodity at the election of the option holder. 1 Philip M. Johnson & Thomas L. Hazen, Commodities Regulation at section 1.07 (2d ed. Supp. 1994) (hereinafter Johnson & Hazen).

[43] Proposed rule 2a51–1(d)(1). To enter into a futures contract or write a commodity option, a customer typically deposits with a futures commission merchant ("FCM"), as security for performance of its obligations, a specified amount of assets or cash as "initial margin." Initial margin is not considered part of the contract or option price, and is returned upon termination of the position, unless used to cover a loss. Johnson & Hazen, *supra* note 42, at section 1.10.

[44] 17 CFR 4.7. In taking this approach, the Commodity Futures Trading Commission noted that "account equity in excess of the minimum necessary for margin or option premiums is not includable because it has no necessary correlation with actual commodity interest transactions." *See* Exemption for Commodity Pool Operators With Respect to Offerings to Qualified Eligible Participants; Exemption for Commodity Trading Advisors With Respect to Qualified Eligible Clients, 57 FR 34853, 34855 n.17 (Aug. 7, 1992). Rule 4.7 under the CEA establishes a different threshold for securities investments ($2,000,000 market value) and commodity interests ($200,000 initial margin). Since the proposed rule would permit cash to be treated as an investment (*see* section II.A.2.d. of this Release), it would not be appropriate to incorporate this dual threshold into the proposed rule.

[45] See section II.A.1.d of this Release. An FCM must, on a daily basis, reconcile its customers' positions by crediting gains and debiting losses on a customer-by-customer basis. *See* CEA rule 1.32 [17 CFR 1.32] (requiring daily computation of customer accounts); *see also* Custody of Investment Company Assets with Futures Commission Merchants and Commodity Clearing Organizations, Investment Company Act Rel. No. 22389 (Dec. 11, 1996) [61 FR 66207 (Dec. 17, 1996)].

[46] Proposed rule 2a51–1(b)(4). Physical commodities, for purposes of the proposed rule, would be defined as any commodity with respect to which a commodity interest is traded on a domestic or foreign commodities exchange. Proposed rule 2a51–1(a)(4). This approach is designed to provide certainty on the types of commodities that would be considered investments.

[47] *See, e.g.*, section 3(c)(2) of the Act, as amended by the 1996 Act [15 USC 80a–3(c)(2)] (defining the term "financial contract").

[48] Cash and cash equivalents would generally be considered to include cash, bank deposits, certificates of deposit, bankers acceptances and other bank instruments. *See, e.g.*, Investment Company Act Rel. No. 10937 (Nov. 13, 1979) [44 FR 66608 (Nov. 20, 1979)]; Statement of Cash Flows, Statement of Financial Accounting Standards No. 95, at section 95.08 (Fin. Accounting Standards Bd. 1987); Treas. Reg. section 220.2 (as amended in 1996) [Fed. Sec. L. Rep. (CCH) ¶ 22,252]. The cash surrender value of an insurance policy (net of any loans) would also be considered to be a cash equivalent. Certain of the instruments that are considered to be cash equivalents (*e.g.*, shares of money market mutual funds, certain Government securities) for purposes of these sources are securities and would be treated as investments for purposes of the proposed rule.

[49] For example, an investor may have a significant amount of cash as a result of a recent sale of an investment or because market conditions resulted in the investor taking a "defensive" position. Cash or cash equivalents may also be integral to certain sophisticated investment strategies (such as hedging).

not be included for purposes of determining whether the prospective qualified purchaser has the requisite amount of investments.

Comment is requested on the proposed inclusion of cash as an investment. Should cash only be included if it is in excess of a certain amount (*e.g.*, $25,000)? Should the rule provide examples of when cash would be considered to be held for investment purposes (*i.e.*, if it represents proceeds from the sale of investments occurring during the preceding six months)? Should cash be included only if "investment securities" and other types of investments (*e.g.*, real estate) constitute more than a specified average amount or percentage of the prospective qualified purchaser's investment portfolio (*e.g.*, 25%, 50% or 75%) over the prior 12-month period?[50]

e. Request For Comment

Comment is generally requested on the proposed definition of investments. Certain assets (such as jewelry, art work, antiques, and other collectibles) that may be held by some individuals as investments are not included because they do not necessarily suggest any experience in the financial markets or investing in unregulated investment pools.[51] Should such assets be included if held for investment purposes? Should any property that produces income from interest, dividends, annuities or royalties not derived in the ordinary course of a trade or business be treated as an investment?[52] Commenters should explain how these types of investments can serve as indicia of sophistication in investment matters. Finally, should any assets that are proposed to be included within the definition of investments not be included?

2. Determining the Amount of Investments

Proposed rule 2a51–1 would allow the amount of a prospective qualified purchaser's investments to be based on either the market value of the investments or their cost. In either case, certain deductions from the amount of investments owned would have to be made as discussed below.

a. Value of Investments

Proposed rule 2a51–1(d) would specify that the value of an investment would be determined based either on its market value on a recent date or its cost.[53] A section 3(c)(7) fund could determine which methodology to use, or could allow prospective qualified purchasers to provide the amount of their investments based on either methodology. The Commission believes that this approach is appropriate because either the cost or market value of the prospective qualified purchaser's investments may provide an appropriate starting point for assessing the person's investment experience.

Comment is requested on the proposed approach to valuing investments. Should the proposed rule instead take an approach similar to that taken in rule 144A under the Securities Act, which generally requires that securities be valued at cost even if a market value is available?[54] Would that approach make it easier for a section 3(c)(7) fund to determine the continuing status of an investor as a qualified purchaser when the investor adds to its investment in the fund?[55]

b. Deductions From Amount of Investments

(i) Certain Indebtedness

The Commission believes that, in establishing the $5 million/$25 million investment thresholds, Congress intended that qualified purchasers generally be limited to persons who own a specified amount of investments. This intention would appear to be inconsistent with permitting a prospective qualified purchaser to accumulate the requisite amount of investments through leverage or similar means. As a result, the proposed rule would require that the amount of any outstanding indebtedness incurred to acquire investments owned by a prospective qualified purchaser be deducted from that person's amount of investments. This requirement would apply to all types of prospective qualified purchasers.[56]

The Commission is concerned that section 3(c)(7) funds may have difficulty in determining whether certain indebtedness was incurred to acquire investments. To address this issue, the proposed rule would require that certain indebtedness, if incurred during the preceding 12 months, be deducted from the amount of the person's investments, regardless of whether the proceeds of the indebtedness can be directly traced to the acquisition of investments. These provisions are generally applicable to natural persons and Family Companies.

The amount of any loan to a natural person secured by a mortgage on the person's personal residence or other non-investment real estate would be deducted unless the proceeds of the loan were used solely to finance the acquisition or improvement of the property or to refinance an outstanding mortgage ("real estate loans").[57] The intent of this provision is to preclude a personal residence or a vacation home from, in effect, being converted into cash or another type of investment for purposes of meeting the $5 million threshold.[58]

Under the proposed rule, a Family Company would be required to deduct the amount of any outstanding indebtedness incurred by any of the Company's owners to acquire the investments held by the Company.[59] In addition, a Family Company would have to deduct the amount of any real estate loans that any owner of the Family Company would have had to deduct if the owner were the

---

[50] Section 3(a)(3) of the Act [15 USC 80a–3(a)(3)] defines the term "investment securities" as all securities except (A) Government securities, (B) securities issued by employees' securities companies, and (C) securities issued by majority-owned subsidiaries of the owner which are not investment companies. Upon effectiveness of the 1996 Act's amendments related to section 3(c)(7) funds, the term investment securities also will exclude majority-owned subsidiaries that are section 3(c)(1) or section 3(c)(7) funds. *See* section 209(c)(6) of the 1996 Act.

[51] *See* Hedge Funds Task Force Report, *supra* note 11, at 788 (suggesting that automobiles, jewelry and art be excluded from investments for purposes of measuring financial sophistication).

[52] *See* IRC section 163(d)(5) [26 USC 163(d)(5)] (definition of "property held for investment" under tax code provisions allowing a limited deduction for investment interest).

[53] In the case of a security, market value could be determined in the manner described in rule 17a–7(b) under the Investment Company Act [17 CFR 270.17a–7(b)]. In the case of other investments, other reasonable methods to ascertain market value (such as real estate appraisals by independent third parties) could be used. A prospective qualified purchaser could not use a "fair value" method of valuation such as that contemplated by rule 2a–4 under the Act [17 CFR 270.2a–4]. In the absence of a readily ascertainable market value, the value of an investment always would be based on its cost.

[54] *See* 17 CFR 230.144A(a)(3) (requiring securities to be valued at cost, unless a person reports its securities holdings in its financial statements on the basis of their fair market value, or no current information with respect to the cost of those securities has been published).

[55] *See* section 3(c)(7)(A) of the Investment Company Act (providing that the outstanding securities of a section 3(c)(7) fund must be owned "exclusively by persons who, at the time of acquisition of such securities, are qualified purchasers").

[56] Proposed rule 2a51–1(e). The proposed rule would not require the deduction to be made with respect to investments that the person manages on a discretionary basis for others.

[57] Proposed rule 2a51–1(f) (4) and (5). The proceeds of a refinancing loan would be deducted to the extent that the amount of the new loan exceeds the lowest principal amount of the refinanced loan outstanding during the preceding 12 months.

[58] This deduction would generally apply to real estate that is not held for investment purposes. Outstanding indebtedness incurred to acquire investment real estate would already have been deducted as required by proposed rule 2a51–1(e).

[59] Proposed rule 2a51–1(g)(1).

prospective qualified purchaser.[60] Finally, the proposed rule would require a Family Company to deduct (i) the amount of any indebtedness incurred by the Family Company during the preceding 12 months to the extent that the principal amount of the indebtedness exceeds the fair market value of any assets of the Family Company other than investments and (ii) the amount of any indebtedness incurred during the preceding 12 months by an owner of the Family Company or by a related person of an owner of the Family Company and guaranteed by the Family Company.[61] These provisions would provide further assurance that indebtedness incurred by the Family Company or its owners to acquire investments was appropriately deducted.

Comment is requested whether the rule should contain other provisions to clarify the extent to which indebtedness should be treated as incurred to acquire the investment. For example, should any indebtedness collateralized by the investment (whether directly or indirectly) be deemed to have been incurred to acquire the investment?

(ii) Other Payments

Prospective qualified purchasers who are natural persons would be required to deduct from the amount of their investments certain other amounts received during the preceding 12 months that could inflate the amount of their investments (particularly cash) without reflecting any investment experience. These amounts include payments received pursuant to an insurance policy; the value of any investments received by the person as a gift or bequest or pursuant to an agreement related to a legal separation or divorce; and any amount received by the person in connection with a lawsuit.[62]

(iii) Request for Comment

Comment is requested concerning the proposed approach for deducting indebtedness and other payments. Should the rule establish guidelines or presumptions concerning whether indebtedness was incurred to acquire an investment? Should other specified types of indebtedness or payments be deducted from the amount of investments?

Comment also is requested whether the 12-month period is sufficient to establish, for example, that a person who has received a $5 million bequest is sufficiently sophisticated to be treated as a qualified purchaser based on investments that may have been made with that bequest? Would a longer (*e.g.*, 24 months) or shorter (*e.g.*, six months) period be more appropriate? In lieu of, or in addition to, the 12-month period, should the rule reduce the amount of the deductions to the extent that the prospective qualified purchaser can trace the use of the proceeds of the loans or other payments to non-investment activities?

3. Jointly Held Investments

The proposed rule would clarify that, in determining whether a natural person is a qualified purchaser, there may be included in the value of such person's investments any investments held jointly with such person's spouse ("joint investments").[63] Thus, a person who owns $3 million of investments individually and $2 million of joint investments would be a qualified purchaser. The spouse also would be a qualified purchaser if he or she owned, individually, an additional $3 million of investments. On the other hand, if each spouse owned, individually, $3 million of investments, but the spouses did not own any joint investments, neither spouse would be a qualified purchaser.[64] Comment is requested on the proposed approach to joint investments. Should spouses that hold not less than $5 million in investments in the aggregate (regardless of whether the investments are held jointly) be treated as qualified purchasers if they make a joint investment in a section 3(c)(7) fund?

4. Investments Held by Certain Corporate Affiliates

The proposed rule generally would permit a parent company in a corporate structure that is a prospective qualified purchaser to aggregate investments it owns with those owned by its wholly-owned and majority-owned subsidiaries. The investments of these affiliated entities would have to be managed under the direction of the parent company.[65] This approach appears to be an appropriate way to address, for example, holding company structures necessitated by legal, tax or other factors that may require or make advantageous the holding of investments in separate corporate entities.[66] Comment is requested whether there are other structures for holding ownership interests in investments that should be addressed by the proposed rule. Should the rule also require the subsidiary to be consolidated with the parent company under Generally Accepted Accounting Principles?[67]

5. Good Faith Reliance on Certain Documentation

The proposed rule would permit a section 3(c)(7) fund or a person acting on its behalf, when determining whether a prospective investor is a qualified purchaser, to rely upon audited financial statements, brokerage account statements and other appropriate information and certifications provided by the prospective purchaser or its representatives, as well as upon publicly available information as of a recent date.[68] Reliance on this information must be reasonable and the section 3(c)(7) fund or its representatives, after reasonable inquiry, must have no basis for believing that the information is incorrect in any material respect. Comment is requested whether rule 2a51–1 should include a list of documentation similar to that included in rule 144A under the Securities Act.[69]

B. Definitions of Beneficial Ownership

Proposed rule 2a51–2 would define the term "beneficial owner" for

[60] Proposed rule 2a51–1(g)(2).

[61] Proposed rule 2a51–1(g)(3) and (4).

[62] Proposed rule 2a51–1(f)(1) through (3). A Family Company would have to deduct any such payments received by the Company or by any owner of the Company. Proposed rule 2a51–1(g)(2).

[63] Proposed rule 2a51–1(h). Joint investments also would include investments in which the person shares with his or her spouse a community property or similar shared ownership interest. *Id.* In determining the amount of joint investments, the prospective qualified purchaser would have to deduct from the amount of any joint investments any amounts that the spouse would have had to deduct (*e.g.*, indebtedness incurred to acquire the investments or bequests received by the spouse). *Id.*

[64] This rule would not affect whether a spouse that is not a qualified purchaser can hold a joint interest in a section 3(c)(7) fund with his or her qualified purchaser spouse. Section 2(a)(51)(A)(i) of the Act provides that such a joint interest can be held.

[65] Proposed rule 2a51–1(i).

[66] *See, e.g.*, Resale of Restricted Securities; Changes To Method of Determining Holding Period of Restricted Securities Under Rules 144 and 145, Securities Act Rel. No. 6862 (Apr. 23, 1990) [55 FR 17933 (Apr. 30, 1990)] (describing bank holding company structures).

[67] *See* rule 144A(a)(4) under the Securities Act [17 CFR 230.144A(a)(4)].

[68] Proposed rule 2a51–1(j). The legislative history of the 1996 Act indicates that the Commission can use its rulemaking authority provided in section 2(a)(51) of the Act to "develop reasonable care defenses when an issuer relying on the qualified purchaser exception in good faith sells securities to a purchaser that does not meet the qualified purchaser definition." House Report, *supra* note 3, at 53.

[69] 17 CFR 230.144A(d)(1). Rule 144A includes several non-exclusive methods for purposes of determining whether a person is a "qualified institutional buyer." These methods include most recent publicly available financial statements, information filed with Federal and State regulatory authorities, and information appearing in recognized securities manuals, as well as certifications by a company's executive officers. *Id.*

purposes of the grandfather provision governing section 3(c)(1) funds that wish to convert into section 3(c)(7) funds and the consent provision governing section 3(c)(1) funds that wish to become qualified purchasers. The proposed rule also would address what types of ownership constitute "indirect" beneficial ownership for purposes of the consent provision.

1. The Grandfather Provision

Under the grandfather provision, a Grandfathered Fund may convert into a section 3(c)(7) fund without requiring investors that are not qualified purchasers to dispose of their interests in the fund.[70] The grandfather provision requires the Grandfathered Fund, prior to the conversion, (i) to disclose to each "beneficial owner" that future investors will be limited to qualified purchasers, and that ownership in the Grandfathered Fund will no longer be limited to 100 persons, and (ii) concurrently with or after the disclosure, to provide each beneficial owner with a reasonable opportunity to redeem any part or all of its interests in the fund for that beneficial owner's proportionate share of the fund's net assets.[71]

The 1996 Act directs the Commission to define the term "beneficial owner" for purposes of the grandfather provision. The legislative history of the 1996 Act suggests that the Commission was to use this authority to address any unnecessary burdens that might arise as a result of the application of section 3(c)(1)'s look-through provision.[72] Specifically, Congress appears not to have intended to require a Grandfathered Fund to provide the notice and redemption opportunity to security holders of its institutional investors, even when those security holders would be deemed beneficial owners of the Grandfathered Fund's voting securities under section 3(c)(1)(A).[73] Rather, the notice and redemption opportunity are generally intended to be provided only to the institutional investor, unless the institutional investor is controlled by or under common control with the Grandfathered Fund.[74]

Consistent with the purposes indicated in the legislative history of the 1996 Act, the Commission believes that the grandfather notice and redemption opportunity provisions were intended not only for the purposes described above, but for the benefit of certain persons who were deemed to be beneficial owners *prior* to the 1996 Act's amendments to the look-through provision.[75] These persons may have relied on the then-existing look-through provision as a way to limit the Grandfathered Fund's ability to sell its securities to additional investors.[76] Allowing the Grandfathered Fund to raise substantial new capital from an unlimited number of qualified purchasers could significantly alter the nature of an investment in the Grandfathered Fund.

Paragraph (a) of proposed rule 2a51–2 would provide generally that beneficial ownership is to be determined in accordance with section 3(c)(1) of the Act. Paragraph (b) of the proposed rule would provide a special rule for determining beneficial ownership of securities held by a company. Paragraph (b) would provide that securities of a Grandfathered Fund beneficially owned by a company (without giving effect to the look-through provision) are deemed to be beneficially owned by one person (the "owning company") unless (i) on October 11, 1996, under section 3(c)(1)(A) of the Act as then in effect, the voting securities of the Grandfathered Fund were deemed to be beneficially owned by the holders of the owning company's outstanding securities,[77] (ii) the owning company has a control relationship with the Grandfathered Fund,[78] and (iii) the owning company is itself an investment company or a private fund.[79] If these conditions do not apply, the grandfather notice and redemption opportunity would be provided to the owning company. If the conditions do apply, the grandfather notice and redemption opportunity would be provided to the owning company's security holders as the beneficial owners of the Grandfathered Fund's securities.

The intended application of the proposed rule can best be illustrated by the following example. Assume Company A is a Grandfathered Fund and that Company B, a section 3(c)(1) fund, owned more than 10% of the voting securities of Company A on October 11, 1996. If Company B does not have a control relationship with Company A, the grandfather notice and redemption opportunity can be provided directly to Company B. If a control relationship does exist, and on October 11, 1996, the security holders of Company B were deemed to be the beneficial owners of Company A's voting securities (because of the second

---

[70] These non-qualified purchasers must have acquired all or a portion of their investment in the Grandfathered Fund prior to September 1, 1996. Any person acquiring an interest in the Grandfathered Fund after that date must, either on the date of the acquisition or on the date that the fund avails itself of the section 3(c)(7) exception, be a qualified purchaser. These persons are required to be given the notice and redemption opportunity described below.

[71] The opportunity must be provided "notwithstanding any agreement to the contrary between the [Grandfathered Fund] and such beneficial owner." 15 USC 80a–3(c)(7)(B)(ii)(II). Each person electing to redeem must receive its proportionate share of the Grandfathered Fund's net assets in cash, unless the person agrees to accept such amount in kind (*i.e.*, in assets of the Grandfathered Fund). If the Grandfathered Fund elects to provide investors with an opportunity to receive an in-kind distribution, this election must be disclosed in the grandfather disclosure.

[72] *See supra* note 17 and accompanying text (describing section 3(c)(1)(A) of the Investment Company Act).

[73] *See* Remarks of Hon. Thomas J. Bliley, *supra* note 13.

[74] *Id.*

[75] *See supra* notes 18–22 and accompanying text (discussing the elimination of the second 10% test). Consistent with this legislative intent, the Commission believes that the conditions in the grandfather provision must be complied with by any section 3(c)(1) fund organized before the enactment of the 1996 Act that wishes to avail itself of section 3(c)(7). Thus, the notice and redemption opportunity must be provided to the beneficial owners of a Grandfathered Fund's securities, even if each beneficial owner meets the definition of qualified purchaser. If the notice and redemption opportunity provision had been intended only for the benefit of beneficial owners who are not qualified purchasers, Congress could have limited the provision accordingly. *Compare* House Report, *supra* note 3, at 51 (describing original provision in H.R. 3005, as reported by the Committee on Commerce, which limited the notice and redemption opportunity to investors that were not qualified purchasers) and Senate Report, *supra* note 3, at 23 ("The issuer must allow section 3(c)(1) fund owners 'of record' to redeem their interests in the fund in either cash or a proportionate share of the fund's assets."); *see also supra* note 70 .

[76] This reliance can be illustrated by the following example. An investor invested in a section 3(c)(1) fund ("Fund A") through another section 3(c)(1) fund ("Fund B") that was subject to the look-through provision as then in effect. The investor may have made its investment in Fund B (or Fund B may have made its investment in Fund A) recognizing that under section 3(c)(1)(A) as then in effect, each security holder of Fund B was deemed to be a beneficial owner of Fund A's voting securities. In this way, the look-through provision would have limited the number of additional persons that could invest in Fund A.

[77] The applicability of the look-though provision would be determined as of October 11, 1996 to assure that the Grandfathered Fund does not engage in transactions subsequent to the enactment of the 1996 Act (which was signed by the President on that date) designed to limit the applicability of the look-through provision (such as the issuance of additional voting securities so that the percentage of voting securities owned by an owning company falls below 10%).

[78] *See supra* note (describing the Act's definition of control).

[79] Limiting the application of the look-through provision in this context to owning companies that are investment companies or private funds is consistent with amended section 3(c)(1)(A). If the owning company is not an investment company or a private fund, its security holders are unlikely to have a sufficient interest in its investment in the Grandfathered Fund to justify providing them with the grandfather notice and redemption opportunity. *See supra* note 21 and accompanying text.

10% test),[80] Company A must provide the grandfather notice and redemption opportunity to each of Company B's security holders.

Comment is requested on the proposed approach for determining beneficial ownership in the absence of a control relationship. Should Company B's security holders receive the grandfather notice and redemption opportunity if Company B owns more than 10% of Company A's voting securities? That is, should Company B's security holders receive the grandfather notice and redemption opportunity regardless of (i) Company B's status as an investment company or a private fund; (ii) the existence of a control relationship, or (iii) the applicability of the second 10% test?

Comment also is requested whether any other rules may be necessary to clarify the operation of the grandfather provision. For example, a redeeming shareholder of a Grandfathered Fund is entitled to receive its proportionate share of the Fund's "net assets." The term "current net assets" is used in the Investment Company Act and defined by Commission rule.[81] Should the same definition apply to Grandfathered Funds, or should net assets, for purposes of the grandfather provision, be determined based upon the methods that would have been used to determine the amount that the investor would have received in accordance with existing withdrawal provisions in the Grandfathered Fund's governing documents? Are these withdrawal provisions typically subject to conditions (*e.g.*, a "hold-back") that would undercut the purpose of the redemption requirements of section 3(c)(7) and, if so, how could the existence of such provisions be addressed?[82]

2. The Consent Provision

The consent provision requires that a private fund that wishes to become a qualified purchaser ("purchasing fund") obtain the consent of all of its beneficial owners that had invested in the purchasing fund prior to April 30, 1996.[83] The beneficial owners of the securities of any private fund that is a direct or indirect beneficial owner of the securities of the purchasing fund must also consent to the treatment of the purchasing fund as a qualified purchaser.[84]

The consent provision appears to be designed to give investors in an existing private fund with the opportunity to review what could be a significant change in the manner in which the fund makes investments as a result of the regulatory changes effected by the 1996 Act.[85] The consent provision also may serve to prohibit an existing section 3(c)(1) fund from avoiding the notice and redemption opportunity requirements of the grandfather provision by investing its assets in a section 3(c)(7) fund, either directly or indirectly through another private fund.[86]

Paragraph (c) of proposed rule 2a51–2 would clarify the meaning of the term "beneficial owner" for purposes of the consent provision. The proposed rule would provide that securities of a purchasing fund beneficially owned by a company (without giving effect to the look-through provision) are deemed to be beneficially owned by one person unless the company has a control relationship with *either* the purchasing fund or the section 3(c)(7) fund with respect to which the purchasing fund will be a qualified purchaser ("target fund"). If a control relationship exists, and the company is a private fund whose security holders were deemed to be beneficial owners of the purchasing fund on October 11, 1996, then these security holders would be deemed to be beneficial owners under the proposed rule.

As in the case of the proposed definition of beneficial owner for purposes of the grandfather provision, the proposed rule relating to the consent provision is intended to allow an institutional investor to provide the required consent even if, under the look-through provision, the security holders of the institutional investor are deemed to be beneficial owners of the purchasing fund's securities. If there is a control relationship between the purchasing fund and either the institutional investor or the target fund, and the institutional investor is a private fund whose security holders were deemed beneficial owners of the purchasing fund prior to the enactment of the 1996 Act, then the consent must be obtained from those security holders.

The proposed rule also would clarify what constitutes "indirect" ownership with regard to the requirement that the consent be obtained from the security holders of a private fund that is an *indirect* beneficial owner of the purchasing fund. Paragraph (d) of the proposed rule would provide that the private fund would not be considered to own the securities of the purchasing fund indirectly unless the private fund has a control relationship with either the purchasing fund or the target fund.[87]

Under the proposed rule, the purchasing fund could obtain a general consent with respect to most transactions in which it will be a qualified purchaser. Consent for specific transactions would be required only when there is a control relationship between the purchasing fund or certain of its beneficial owners and the target fund.

Comment is requested on proposed rule 2a51–2. Comment specifically is requested on the proposed approach of

---

[80] *See* section I.B. of this Release.

[81] *See, e.g.*, section 2(a)(32) of the Investment Company Act [15 USC 80a–2(a)(32)] (defining the term redeemable security as a "security * * * under the terms of which the holder * * * is entitled (whether absolutely or only out of surplus) to receive approximately his proportionate share of the issuer's current net assets, or the cash equivalent thereof") and rule 2a–4 [17 CFR 270.2a–4] (definition of current net asset value for certain purposes).

[82] For example, if a section 3(c)(1) fund's withdrawal provision provides for a hold-back to assure that sufficient assets are available to satisfy contingent liabilities, the rule could provide that the Grandfathered Fund could not avail itself of section 3(c)(7) until the hold-backs are released or the liabilities extinguished.

[83] 15 USC 2(a)(51)(C). Section 2(a)(51)(C) and the proposed rule use the term "excepted company" to refer to section 3(c)(1) and section 3(c)(7) funds. The inclusion of section 3(c)(7) funds in this provision was presumably designed to require the consent to be obtained by any Grandfathered Fund that wished to be a qualified purchaser.

[84] *Id.*

[85] The legislative history of the 1996 Act does not address the purpose of the consent provision.

[86] Such conduct may also raise issues under section 48(a) of the Investment Company Act [15 U.S.C. 80a–47(a)] (precluding indirect circumvention of the Act's provisions).

[87] The following example illustrates the intended operation of the proposed rule. Assume Company A is a purchasing fund and that Companies B and C are beneficial owners of Company A's voting securities. Company B is an operating company that does not have a control relationship with Company A, but whose security holders were deemed to be beneficial owners of Company A's voting securities on October 11, 1996. Company C is a private fund that was deemed to own beneficially Company A's voting securities on October 11, 1996 (in other words, the look-through provision did not apply). Each of Company C's investors (Companies D through F) are themselves private funds, but none has a control relationship with Company C or Company A.

Company B would have to consent to Company A being a qualified purchaser. Because Company B is not a private fund, Company B's shareholders would not be treated as beneficial owners of Company A's voting securities, and their consent would not be required. (The consent of Company B's shareholders would not be required even if Company B had a control relationship with Company A.)

Company C would have to consent to Company A being a qualified purchaser. Additionally, because Company C is a private fund, all beneficial owners of its outstanding securities also would have to consent to Company A being a qualified purchaser. Because there is no control relationship, however, security holders of Companies D through F would not be required to consent even if they are considered to be beneficial owners of Company C's securities under the look-through provision. Similarly, Companies D through F would not be deemed to indirectly own voting securities of Company A.

defining indirect beneficial ownership in the purchasing fund on the basis of whether the investor has a control relationship with the purchasing fund or the target fund.

C. Conforming Rule

The Commission is proposing a rule to clarify an interpretative issue concerning companies that are qualified purchasers.[88] The statutory definition of qualified purchaser specifies that a trust that is a qualified purchaser must not have been formed "for the specific purpose of acquiring the securities offered."[89] The proposed rule would make the same condition applicable to any other company that is a prospective qualified purchaser (whether a Family Company or another type of company) unless each beneficial owner of the company's securities or other interest in the company is a qualified purchaser. The proposed rule would limit the possibility that a company will be able to do indirectly what it is prohibited from doing directly (*i.e.*, organize a "qualified purchaser" entity for the purpose of making an investment in a particular section 3(c)(7) fund available to investors that themselves did not meet the definition of qualified purchaser).[90]

D. Non-Exclusive Safe Harbor for Certain Section 3(c)(7) Funds

The legislative history of the 1996 Act indicates that the grandfather provision is not intended to allow a sponsor of an existing section 3(c)(1) fund nominally to convert that fund into a section 3(c)(7) fund in order to create another section 3(c)(1) fund and thereby avoid the 100-investor limit.[91] While the 1996 Act includes a provision allowing a sponsor to operate both a section 3(c)(1) and a section 3(c)(7) fund (the "non-integration provision"),[92] this provision was not designed to address whether a nominally converted section 3(c)(1) fund should be treated as a section 3(c)(7) fund for purposes of the integration and other applicable provisions.[93]

Since the passage of the 1996 Act, representatives of hedge funds and other investment pools have raised concerns regarding the ability of a sponsor of a section 3(c)(1) fund that undergoes a bona fide conversion into a section 3(c)(7) fund (*i.e.*, sells its securities to new investors that are qualified purchasers) to then create a new section 3(c)(1) fund. These representatives have requested that the Commission clarify the application of the non-integration provision to sponsors of Grandfathered Funds who form new section 3(c)(1) funds. To respond to these concerns, the Commission is proposing rule 3c–7 under the Investment Company Act to provide that a Grandfathered Fund will be treated as an issuer excepted under section 3(c)(7) of the Act if, at the time the new section 3(c)(1) fund offers its securities, 25% or more of the value of all securities of the Grandfathered Fund is held by qualified purchasers that acquired these securities after October 11, 1996. The proposed rule is designed to provide a non-exclusive safe harbor for Grandfathered Funds. Comment is requested whether the percentage threshold should be higher (*e.g.*, 50%). Comment also is requested whether existing investors that are qualified purchasers on the date that the Grandfathered Fund avails itself of section 3(c)(7) should also be counted for purposes of the proposed threshold.

III. Other Rules for Private Investment Companies

A. Transition Rule for Section 3(c)(1) Funds

As noted above, the 1996 Act amended section 3(c)(1)(A) of the Investment Company Act, which governs the way a section 3(c)(1) fund calculates the number of its beneficial owners for purposes of complying with the 100-investor limit. Under amended section 3(c)(1)(A), a section 3(c)(1) fund must include among its beneficial owners the underlying security holders of any investment company and any private fund that owns 10% or more of the section 3(c)(1) fund (collectively, "10%+ investors"). Until the amendment becomes effective, the look-through provision does not apply unless the 10%+ investor also has more than 10% of its assets invested in section 3(c)(1) funds generally. The amendment, in effect, will limit the ability of certain types of investors to own more than 10% of a section 3(c)(1) fund.[94]

The Commission is aware that some existing section 3(c)(1) funds may have 10%+ investors in reliance on the pre-amendment application of the look-through provision. The Commission believes that the amendment to the look-through provision was primarily designed to simplify the application of the provision and was not intended to disrupt existing investment relationships. The Commission, therefore, is proposing a rule under the Investment Company Act to provide that the amended look-through provision will not apply in the case of an investor that held more than 10% of the outstanding voting securities of a section 3(c)(1) fund on October 11, 1996, provided that the investor continues to satisfy the second 10% test.[95]

The Commission requests comment on the approach of the proposed rule. For example, the proposed rule would not limit additional investments by the 10%+ investors in the section 3(c)(1) fund as long as the second 10% test continues to be inapplicable. Should the rule prohibit additional investments? Should the rule only permit additional investments that do not increase the percentage of the section 3(c)(1) fund's voting securities that the 10%+ investor owns? Are there other circumstances when similar relief would be appropriate?

Comment also is requested on rule 3c–2 under the Investment Company Act, which was adopted in 1958 to facilitate capital investments by operating companies in small business investment companies ("SBICs") that were section 3(c)(1) funds.[96] Rule 3c–2

---

[88] Proposed rule 2a51–3.

[89] 15 U.S.C. 80a–2(a)(51)(A)(iii).

[90] *See supra* note 86 and accompanying text.

[91] *See* Remarks of Hon. John D. Dingell, *supra* note 11.

[92] Section 3(c)(7)(E) of the Investment Company Act [15 U.S.C. 80a–3(c)(7)(E)]. The non-integration provision states, in part, that an issuer that is otherwise excepted under section 3(c)(7) and an issuer that is otherwise excepted under section 3(c)(1) is not to be treated by the Commission as being a single issuer for purposes of determining the number of beneficial owners of the section 3(c)(1) fund or whether the outstanding securities of the section 3(c)(7) fund are owned by anyone who is not a qualified purchaser.

[93] *See* Remarks of Hon. John D. Dingell, *supra* note 11. The bona fides of a conversion to a section 3(c)(7) fund also would affect the ability of the fund to use the new exemption from the prohibition in the Investment Advisers Act of 1940 ("Advisers Act") on performance fees available to section 3(c)(7) funds. *See* new section 205(b)(4) of the Advisers Act [15 U.S.C. 80b–5(b)(4)].

[94] The limitation will exist only when an investment company or a private fund invests in a section 3(c)(1) fund. The 1996 Act expands the ability of corporate, non-investment company investors to participate in section 3(c)(1) funds by no longer requiring section 3(c)(1) funds to count the underlying shareholders of these investors under any circumstances.

[95] Proposed rule 3c–1. For the purpose of the proposed rule, investment in section 3(c)(7) funds would be included in applying the second 10% test, since a section 3(c)(7) fund probably would have been a section 3(c)(1) fund but for the new exception created by the 1996 Act. The proposed rule also would address 10%+ ownership interests that result from voting securities acquired as a result of the conversion of convertible non-voting securities acquired prior to October 11, 1996.

[96] Rule 3c–2 [17 CFR 270.3c–2]. At that time, the look-through provision did not include the second 10% test and, therefore, inhibited SBICs' capital raising efforts because SBICs frequently depended upon corporate investors to make investments that resulted in their owning more than 10% of the SBICs voting securities.

VOL 61 ISS 249 DE 26 1996 UMI

provides that beneficial ownership of 10% or more of an SBIC's voting securities by a company is deemed to be ownership by one person if and so long as that company's total investment interest in all SBICs does not exceed 5% of the value of the company's assets. The amendments to the look-through provision made by the 1996 Act will make it unnecessary for an investor in an SBIC that is itself not an investment company or a private fund to rely on rule 3c–2.[97] Comment is requested whether rule 3c–2 is still necessary.[98] To what extent do SBICs rely on registered or private investment companies as a source of capital? To assure that the flow of capital to small businesses is not inhibited, should the rule be amended to incorporate the second 10% test? Should the rule be rescinded to reflect Congress' decision to eliminate the second 10% test?

B. Investments by Fund Employees

The Commission is proposing rule 3c–5 under the Investment Company Act to permit directors, executive officers, general partners and certain knowledgeable employees of a section 3(c)(1) fund or of an affiliated person of the fund (collectively, "fund personnel") to acquire securities issued by the fund without being counted for purposes of section 3(c)(1)'s 100-investor limit. The rule also would permit fund personnel to invest in a section 3(c)(7) fund even though they did not meet the definition of qualified purchaser.

The provision in the 1996 Act directing Commission rulemaking with regard to investments in private funds by knowledgeable employees appears to be intended to encompass all natural persons who actively participate in the management of a fund's investments. The proposed rule, therefore, would extend to directors, executive officers, and general partners of a fund or of an affiliate of the fund that oversees the fund's investments. The proposed rule also would extend to other employees who, in connection with their regular functions or duties, participated in, or obtained information regarding, the investment activities of the fund or other investment companies managed by the affiliate for a period of at least 12 months.[99] Comment is requested whether the proposed rule should contain any other criteria for identifying knowledgeable employees (*i.e.*, the employee's salary level or the amount of investments owned).

The proposed rule would allow transfers of fund securities held by fund personnel to family members as a gift, bequest or pursuant to an agreement relating to legal separation or divorce, as well as to family trusts and similar family vehicles established by fund personnel for the exclusive benefit of family members and charitable organizations, provided fund securities had been acquired by fund personnel pursuant to, or are otherwise subject to, an arrangement prohibiting any other transfers of such shares.[100] The Commission believes that this approach would afford adequate flexibility for employees' estate planning and other financial goals, while assuring that the securities of the issuer were not transferred in a manner inconsistent with the rationale underlying sections 3(c)(1) and 3(c)(7).

The Commission recognizes that the proposed rule would not extend to employees performing certain other functions with respect to a fund, such as clerical, secretarial and other administrative personnel. Should the rule be extended to these employees (or employees of firms that provide such services) if, for example, the employees are assisted by an independent purchaser representative?[101] The Commission also requests comment whether the proposed rule should contain any other requirements, particularly with respect to investments that are made by fund personnel through plans that are subject to the Employee Retirement Income Security Act of 1974, as amended.

C. Certain Transfers

Section 3(c)(1)(B) of the Act provides that beneficial ownership of securities of a section 3(c)(1) fund by any person who acquires the securities as a result of a "legal separation, divorce, death, or other involuntary event" will be deemed to be beneficial ownership by the person from whom the transfer was made, pursuant to such rules and regulations as the Commission prescribes. This provision was designed to address situations in which section 3(c)(1)'s 100-investor limit is exceeded "because of transfers which are neither within the issuer's control nor are voluntary on the part of the present beneficial owner."[102]

The 1996 Act directed the Commission to prescribe rules to implement section 3(c)(1)(B). The Commission is proposing rule 3c–6 under the Investment Company Act to provide that beneficial ownership by a person ("transferee") who acquired securities of a section 3(c)(1) fund pursuant to a gift, bequest, or an agreement relating to a legal separation or divorce or other involuntary event will be deemed to be beneficial ownership by the person from whom the transfer was made ("transferor"). The proposed rule would limit transferees to family members of the transferor, trusts or similar vehicles established by the transferor for the exclusive benefit of family members, and charitable organizations. The proposed rule also would provide that the securities of the section 3(c)(1) fund must have been acquired by the transferor pursuant to, or are otherwise subject to, an arrangement prohibiting any other transfers, except transfers back to the fund. The Commission believes that the proposed rule would afford sufficient flexibility to section 3(c)(1) funds and their investors consistent with the intent behind section 3(c)(1)(B).

Proposed rule 3c–6 also would address transfers of securities by qualified purchasers under section 3(c)(7)(A) of the Act. That section provides that securities of a section 3(c)(7) fund that are owned by persons who received them from a qualified purchaser as a gift or bequest, or when the transfer was caused by legal separation, divorce, death or other involuntary event, will be deemed to be owned by a qualified purchaser, subject to such rules as the Commission may prescribe. Proposed rule 3c–6 would permit transfers of securities of a section 3(c)(7) fund under essentially the same conditions as those proposed for transfers under section 3(c)(1)(B).

Comment is requested on the proposed rule governing transfers of private funds' securities. Should transfers of a section 3(c)(7) fund's securities be governed by different conditions than transfers of a section 3(c)(1) fund's securities, or be permitted in other types of situations as well?

---

[97] The need for SBICs to rely on rule 3c–2 may have diminished when the second 10% test was added to the look-through provision in 1980.

[98] Rule 3c–2 also provides that the look-through provision does not apply to 10%+ investors that are "state development corporations," subject to certain conditions.

[99] The term "employee" as used in the proposed rule is intended also to encompass individuals who may be deemed independent contractors for tax purposes. *See, e.g.*, Cornish & Carey Commercial, Inc. (pub. avail. June 21, 1996).

[100] The securities could be sold back to the issuing fund or, in the case of securities issued by a section 3(c)(7) fund, other qualified purchasers.

[101] A similar concept of "purchaser representative" is found in Regulation D under the Securities Act that governs securities transactions exempted from registration under section 5 of that Act. *See* rule 501(h) under the Securities Act [17 CFR 230.501(h)].

[102] H.R. Rep. No. 1341, 96th Cong., 2d Sess. at 36 (1980).

Should the rule provide other examples of "involuntary events"?

IV. General Request for Comment

Any interested persons wishing to submit written comments on the rules that are the subject of this Release, to suggest additional rules to address interpretative and other issues relating to private funds resulting from the 1996 Act, or to submit comments on other matters that might have an effect on the proposals contained in this Release, are requested to do so. In accordance with section 2(c) of the Investment Company Act, comment is requested regarding the effects of the proposed rules on efficiency, competition and capital formation.

V. Cost/Benefit Analysis

Consistent with legislative intent and the protection of investors, the proposed rules would benefit private funds and their investors in a number of ways. The proposed rules would: define certain terms necessary to effectuate the new exclusion from regulation under the Investment Company Act for section 3(c)(7) funds; enable section 3(c)(1) funds that wish to convert into section 3(c)(7) funds or become qualified purchasers to do so without being subject to unduly burdensome notice and consent requirements; enable knowledgeable employees of a private fund to invest in the fund without causing the fund to relinquish its exclusion from regulation under the Act; permit certain transfers of private fund securities; and address certain interpretative issues for private funds.

The Commission believes that the proposed rules would not impose any additional costs on private funds. Rather, the proposed rules would clarify the statutory requirements for private funds in order to reduce any unnecessary burdens without jeopardizing investor protection. Comment is requested on this cost/benefit analysis. Commenters are requested to provide views and empirical data relating to any costs and benefits associated with the proposed rules.

For purposes of making determinations required by the Small Business Regulatory Enforcement Fairness Act of 1996, the Commission is requesting information regarding the potential impact of the proposed rules on the economy on an annual basis. Commenters should provide empirical data to support their views.

VI. Summary of Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Analysis ("IRFA") in accordance with 5 USC 603 regarding proposed rules 2a51–1, 2a51–2, 2a51–3, 3c–1, 3c–5, 3c–6 and 3c–7 under the Investment Company Act. The IRFA indicates that the proposed rules would comply with the provisions of the 1996 Act directing the Commission to prescribe certain rules concerning private funds, and would address certain interpretive issues raised by the 1996 Act's amendments relating to private funds. The IRFA states that the proposed rules, among other things, are designed to assure that investors in section 3(c)(7) funds are the types of investors that Congress determined do not need the protections of the Investment Company Act. The IRFA further states that the proposed rules would give private funds greater flexibility as well as minimize certain compliance burdens imposed by the applicable provisions of the Investment Company Act.

The IRFA sets forth the statutory authority for the proposed rules. The IRFA also discusses the effect of the proposed rules on small entities that are section 3(c)(7) or section 3(c)(1) funds. For purposes of the proposed rules, small entities are those with assets of $50 million or less at the end of their most recent fiscal year. The IRFA states that the proposed rules would make possible the creation of small entities that are section 3(c)(7) funds, and would provide greater flexibility and minimize certain compliance burdens imposed by the provisions of the Investment Company Act on small entities that are section 3(c)(1) funds. It is estimated that there are approximately 600 U.S. venture capital pools that are section 3(c)(1) funds, of which about 50% may be considered small entities. The number of U.S. hedge funds has been estimated as being between 800 and 3,000. Based on a sample of 250 hedge funds, it is estimated that approximately 75% may be small entities.

The IRFA states that the proposed rules would not impose any new reporting, recordkeeping or compliance requirements, and that the Commission believes that there are no rules that duplicate, overlap or conflict with the proposed rules.

The IRFA discusses the various alternatives considered by the Commission in connection with the proposed rules that might minimize the effect on small entities, including: (a) the establishment of differing compliance or reporting requirements or timetables that take into account the resources of small entities; (b) the clarification, consolidation or simplification of compliance and reporting requirements under the rule for small entities; (c) the use of performance rather than design standards; and (d) an exemption from coverage of the rule or any part thereof, for small entities. The Commission believes that it would be inconsistent with the purposes of the Act to exempt small entities from the proposed rules or to use performance standards to specify different requirements for small entities. Different compliance or reporting requirements for small entities are not necessary because the proposed rules do not establish any new reporting, recordkeeping or compliance requirements. The Commission has determined that it is not feasible to further clarify, consolidate or simplify the proposed rules for small entities.

The IRFA includes information concerning the solicitation of comments with respect to the IRFA generally, and in particular, the number of small entities that would be affected by the proposed rules. Cost-benefit information reflected in the "Cost/Benefit Analysis" section of this Release also is reflected in the IRFA. A copy of the IRFA may be obtained by contacting David P. Mathews, Securities and Exchange Commission, 450 5th Street, N.W., Mail Stop 10–2, Washington, D.C. 20549.

VII. Statutory Authority

The Commission is proposing rules 2a51–1, 2a51–2, 2a51–3 and 3c–7 pursuant to the authority set forth in sections 2(a)(51)(B), 6(c) and 38(a) of the Investment Company Act [15 USC 80a–2(a)(51)(B), –6(c) and –37(a)] and sections 209(d)(2) and (4) of the 1996 Act. The Commission is proposing rule 3c–1 pursuant to the authority set forth in sections 6(c) and 38(a) of the Investment Company Act [15 USC 80a–6(c) and –37(a)]. The Commission is proposing rule 3c–5 pursuant to the authority set forth in sections 6(c) and 38(a) of the Investment Company Act [15 USC 80a–6(c) and –37(a)] and section 209(d)(3) of the 1996 Act. The Commission is proposing rule 3c–6 pursuant to the authority set forth in sections 3(c)(1), 3(c)(7), 6(c) and 38(a) of the Investment Company Act [15 USC 80a–3(c)(1), 3(c)(7), 6(c) and –37(a)] and section 209(d)(1) of the 1996 Act.

Text of Proposed Rules

List of Subjects in 17 CFR Part 270

Investment companies, Securities.

For the reasons set out in the preamble, Title 17, Chapter II of the

Code of Federal Regulations is proposed to be amended as follows:

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

1. The authority citation for Part 270 is amended by adding the following citations to read as follows:

Authority: 15 U.S.C. 80a–1 *et seq.*, 80a–37, 80a–39 unless otherwise noted;

* * * * *

Section 270.2a51–1 is also issued under 15 U.S.C. 80a–2(a)(51)(B) and 80a–6(c), and secs. 209(d) (2) and (4), National Securities Markets Improvement Act of 1996;

Section 270.2a51–2 is also issued under 15 U.S.C. 80a–2(a)(51)(B) and 80a–6(c), and secs. 209(d) (2) and (4), National Securities Markets Improvement Act of 1996;

Section 270.2a51–3 is also issued under 15 U.S.C. 80a–2(a)(51)(B) and 80a–6(c), and secs. 209(d) (2) and (4), National Securities Markets Improvement Act of 1996;

Section 270.3c–1 is also issued under 15 U.S.C. 80a–6(c);

Section 270.3c–5 is also issued under 15 U.S.C. 80a–6(c), and sec. 209(d)(3), National Securities Markets Improvement Act of 1996;

Section 270.3c–6 is also issued under 15 U.S.C. 80a–3(c)(1), 80a–3(c)(7), 80a–6(c) and 80a–37(a) and sec. 209(d)(1), National Securities Markets Improvement Act of 1996;

Section 270.3c–7 is also issued under 15 U.S.C. 80a–2(a)(51)(B) and 80a–6(c);

* * * * *

2. Section 270.2a51–1 is added to read as follows:

§ 270.2a51–1 Definition of investments for purposes of section 2(a)(51) (definition of "qualified purchaser"); certain calculations.

(a) *Definitions.* As used in this section:

(1) The term *Commodity Interests* shall mean commodity futures contracts, options on commodity futures contracts, and options on physical commodities traded on or subject to the rules of:

(i) Any contract market designated for trading such transactions under the Commodity Exchange Act and the rules thereunder; or

(ii) Any board of trade or exchange outside the United States, as contemplated in Part 30 of the rules under the Commodity Exchange Act [17 CFR 30];

(2) The term *Family Company* shall mean a company described in paragraph (A)(ii) of section 2(a)(51) of the Act [15 U.S.C. 80a–2(a)(51)];

(3) The term *Listed Company* shall mean a company that has outstanding a class of equity securities that are:

(i) Reported securities as such term is defined by § 240.11Aa3–1 of this Chapter; or

(ii) Listed on a "designated offshore securities market" as such term is defined by Regulation S under the Securities Act of 1933 [17 CFR 230.901 through 230.904];

(4) The term *Physical Commodities* shall mean any physical commodity with respect to which a Commodity Interest is traded on a market specified in paragraphs (a)(1) of this section; and

(5) The term *Related Person* shall mean a person who is related to another person as a sibling, spouse or former spouse, or is a direct lineal descendant or ancestor by birth or adoption of such person, or is a spouse of such descendant, *provided that*, in the case of a Family Company, a Related Person includes any owner of the Family Company and any person who is a Related Person of such owner.

(b) *Types of Investments.* For purposes of section 2(a)(51) of the Act [15 U.S.C. 80a–2(a)(51)], the term *investments* shall mean:

(1) Securities (as defined by section 2(1) of the Securities Act of 1933 [15 U.S.C. 70a(1)]), other than securities of an issuer that controls, is controlled by, or is under common control with, the person that owns such securities, unless the issuer is:

(i) An investment company or a company that would be an investment company but for the exclusions provided by sections 3(c)(1) through 3(c)(9) of the Act [15 U.S.C. 80a–3(c)(1) through 3(c)(9)] or the exemptions provided by §§ 270.3a–6 or 270.3a–7; or

(ii) A Listed Company that is not a majority-owned subsidiary of such person or a person that controls, is controlled by, or is under common control with such person;

(2) Real estate held for investment purposes;

(3) Commodity Interests held for investment purposes;

(4) Physical Commodities held for investment purposes; and

(5) Cash and cash equivalents held for investment purposes.

(c) *Real Estate Not Held for Investment Purposes.* For purposes of this section, real estate shall not be considered to be held for investment purposes by its owner if it is used by the owner or a Related Person of the owner for personal purposes or as a place of business, or in connection with the conduct of the trade or business of such owner or a Related Person of the owner. Residential real estate shall not be deemed to be used for personal purposes if deductions with respect to such real estate are not disallowed by section 280A of the Internal Revenue Code [26 USC 280A].

(d) *Valuation.* For purposes of determining whether a person is a qualified purchaser, the aggregate amount of investments owned and invested on a discretionary basis by such person shall be their readily ascertainable market value on the most recent practicable date or their cost, *provided that*:

(1) In the case of Commodity Interests, the amount of investments shall be the value of the initial margin or option premium deposited in connection with such Commodity Interests; and

(2) In each case, there shall be deducted from the amount of investments owned by such person the amounts specified in paragraphs (e), (f) and (g) of this section, as applicable.

(e) *Deductions: General.* In determining whether any person is a qualified purchaser there shall be deducted from the value of such person's investments the amount of any outstanding indebtedness incurred to acquire the investments owned by such person.

(f) *Deductions: Natural Persons.* In determining whether any natural person is a qualified purchaser, in addition to the amounts specified in paragraph (e) of this section there shall also be deducted from the value of such person's investments the following amounts:

(1) Any payments received by such person pursuant to an insurance policy during the preceding 12 months;

(2) The value of any investments received by such person during the preceding 12 months as a gift or bequest or pursuant to an agreement related to a legal separation or divorce;

(3) Any amount received by such person during the preceding 12 months in connection with a lawsuit (whether pursuant to a judgment or settlement agreement);

(4) The proceeds of any loan incurred during the preceding 12 months secured by a mortgage or deed of trust on such person's personal residence or other property that is not held for investment ("mortgage loan") unless the proceeds of such loan were used solely to finance the acquisition or improvement of such residence or property; and

(5) The proceeds of any loan ("refinancing loan") incurred during the preceding 12 months secured by a mortgage or deed of trust on such person's personal residence or other property that is not held for investment used to refinance a mortgage loan ("refinanced loan") to the extent that the proceeds of the refinancing loan exceed the lowest principal amount of the refinanced loan outstanding during the prior 12 months.

(g) *Deductions: Family Companies.* In determining whether a Family Company is a qualified purchaser, in addition to

the amounts specified in paragraph (e) of this section, there shall also be deducted from the value of such Family Company's investments the following amounts for purposes of this section:

(1) Any outstanding indebtedness incurred by an owner of the Family Company to acquire such investments;

(2) The amounts described in paragraph (f) of this section received by the Family Company or any owner of the Family Company;

(3) The amount of any indebtedness incurred by the Family Company to the extent that the principal amount of such indebtedness exceeds the fair market value of any assets of the Family Company other than investments; and

(4) The amount of any indebtedness incurred by an owner of the Family Company or by a Related Person of an owner of the Family Company and guaranteed by the Family Company.

(h) *Joint Investments.* In determining whether a natural person is a qualified purchaser, there may be included in the value of such person's investments any investments held jointly with such person's spouse, or investments in which such person shares with such person's spouse a community property or similar shared ownership interest. There shall be deducted from the amount of any such investments any amounts specified by paragraphs (e) and (f) of this section incurred or received by such spouse.

(i) *Corporate Investments.* For purposes of determining the amount of investments owned by a corporation ("Corporation") under section 2(a)(51)(A)(iv) of the Act [15 U.S.C. 80a–2(a)(51)(A)(iv)], there may be included investments owned by majority-owned subsidiaries of the Corporation ("Subsidiaries"), provided that the investments of the Subsidiary are managed under the direction of the Corporation.

(j) *Good Faith Reliance.* In determining whether a prospective purchaser is a qualified purchaser, an issuer or a person acting on the issuer's behalf (collectively, "relying person") shall be entitled to rely upon audited financial statements, brokerage account statements and other appropriate information and certifications provided by the prospective purchaser or its representatives and dated as of a recent date, or publicly available information as of a recent date, provided that such reliance is reasonable and the relying person, after reasonable inquiry, does not have any basis for believing that such information is incorrect in any material respect.

3. Section 270.2a51–2 is added to read as follows:

§ 270.2a51–2 Definitions of beneficial owner for certain purposes under sections 2(a)(51) and 3(c)(7) and determining indirect ownership interests.

(a) Except as set forth below, for purposes of sections 2(a)(51)(C) and 3(c)(7)(B)(ii) of the Act [15 U.S.C. 80a–2(a)(51)(C) and 3(c)(7)(B)(ii)], the beneficial owners of securities of an excepted investment company (as defined in section 2(a)(51)(C) of the Act [15 U.S.C. 80a–2(a)(51)(C)]) shall be determined in accordance with section 3(c)(1) of the Act [15 U.S.C. 80a–3(c)(1)].

(b) For purposes of section 3(c)(7)(B)(ii) of the Act [15 U.S.C. 80a–3(c)(7)(B)(ii)], securities of an issuer beneficially owned by a company (without giving effect to section 3(c)(1)(A) of the Act [15 U.S.C. 80a–3(c)(1)(A)]) ("owning company") shall be deemed to be beneficially owned by one person unless:

(1) The owning company is an investment company or an excepted investment company;

(2) The owning company, directly or indirectly, controls, is controlled by, or is under common control with, the issuer; and

(3) On October 11, 1996, under section 3(c)(1)(A) of the Act as then in effect, the voting securities of the issuer were deemed to be beneficially owned by the holders of the owning company's outstanding securities (other than short-term paper), in which case, such holders shall be deemed to be beneficial owners of the issuer's outstanding voting securities.

(c) For purposes of section 2(a)(51)(C) of the Act [15 U.S.C. 80a–2(a)(51)(C)], securities of an excepted investment company beneficially owned by a company (without giving effect to section 3(c)(1)(A) of the Act [15 U.S.C. 80a–3(c)(1)(A)]) ("owning company") shall be deemed to be beneficially owned by one person unless:

(1) The owning company is an excepted investment company;

(2) The owning company directly or indirectly controls, is controlled by, or is under common control with, the excepted investment company or the company with respect to which the excepted investment company is, or will be, a qualified purchaser; and

(3) On April 30, 1996, under section 3(c)(1)(A) of the Act as then in effect, the voting securities of the excepted investment company were deemed to be beneficially owned by the holders of the owning company's outstanding securities (other than short-term paper), in which case the holders of such excepted company's securities shall be deemed to be beneficial owners of the excepted investment company's outstanding voting securities.

(d) For purposes of section 2(a)(51)(C) of the Act [15 U.S.C. 80a–2(a)(51)(C)], an excepted investment company shall not be deemed to indirectly own the securities of an excepted investment company seeking a consent to be treated as a qualified purchaser ("qualified purchaser company") unless such excepted investment company, directly or indirectly, controls, is controlled by, or is under common control with, the qualified purchaser company or a company with respect to which the qualified purchaser company is or will be a qualified purchaser.

Note to § 270.2a51–2. On October 11, 1996, the National Securities Markets Improvement Act of 1996 [P.L. 104–290] was signed into law. Prior to that date, section 3(c)(1)(A) of the Act provided that: (A) Beneficial ownership by a company shall be deemed to be beneficial ownership by one person, except that, if the company owns 10 per centum or more of the outstanding voting securities of the issuer, the beneficial ownership shall be deemed to be that of the holders of such company's outstanding securities (other than short-term paper) unless, as of the date of the most recent acquisition by such company of securities of that issuer, the value of all securities owned by such company of all issuers which are or would, but for the exception set forth in this subparagraph, be excluded from the definition of investment company solely by this paragraph, does not exceed 10 per centum of the value of the company's total assets. Such issuer nonetheless is deemed to be an investment company for purposes of section 12(d)(1).

4. Section 270.2a51–3 is added to read as follows:

§ 270.2a51–3 Certain companies not qualified purchasers.

For purposes of section 2(a)(51)(A) (ii) and (iv) of the Act [15 U.S.C. 80a–2(a)(51)(A)] a company shall not be deemed to be a qualified purchaser if it was formed for the specific purpose of acquiring the securities offered by a company excluded from the definition of investment company by section 3(c)(7) of the Act [15 U.S.C. 80a–3(c)(7)] unless each beneficial owner of the company's securities or other interest in the company is a qualified purchaser.

5. Section 270.3c–1 is added to read as follows:

§ 270.3c–1 Definition of beneficial ownership for certain private investment companies.

(a) As used in this section:

(1) The term *Covered Company* shall mean a company that is an investment company, a Section 3(c)(1) Company or a Section 3(c)(7) Company.

(2) The term *Section 3(c)(1) Company* shall mean a company that would be an

investment company but for the exclusion provided by section 3(c)(1) of the Act [15 U.S.C. 80a–3(c)(1)].

(3) The term *Section 3(c)(7) Company* shall mean a company that would be an investment company but for the exclusion provided by section 3(c)(7) of the Act [15 U.S.C. 80a–3(c)(7)].

(b) For purposes of section 3(c)(1)(A) of the Act [15 U.S.C. 80a–3(c)(1)(A)], beneficial ownership by a Covered Company owning 10 percent or more of the outstanding voting securities of a Section 3(c)(1) Company shall be deemed to be beneficial ownership by one person, *provided that:*

(1) On October 11, 1996, the Covered Company owned 10 percent or more of the outstanding voting securities of the Section 3(c)(1) Company or non-voting securities that, on such date and in accordance with the terms of such securities, were convertible into or exchangeable for voting securities that, if converted or exchanged on or after such date, would have constituted 10 percent or more of the outstanding voting securities of the Section 3(c)(1) Company; and

(2) On the date of any acquisition of securities of the Section 3(c)(1) Company by the Covered Company, the value of all securities owned by the Covered Company of all issuers that are Section 3(c)(1) or Section 3(c)(7) Companies does not exceed 10 percent of the value of the Covered Company's total assets.

6. Section 270.3c–5 is added to read as follows:

§ 270.3c–5 Beneficial ownership by knowledgeable employees and certain other persons.

(a) As used in this section:

(1) The term *Covered Company* shall mean a company that is an investment company, a Section 3(c)(1) Company or a Section 3(c)(7) Company.

(2) The term *Executive Officer* shall mean the president, any vice president in charge of a principal business unit, division or function (such as sales, administration or finance), any other officer who performs a policy-making function, or any other person who performs similar policy-making functions for a Covered Company.

(3) The term *Knowledgeable Employee* with respect to any Covered Company shall mean any natural person who is:

(i) An Executive Officer, director, or general partner of the Covered Company or of an affiliated person of such Covered Company that manages the investment activities of such Covered Company; or

(ii) An employee of the Covered Company or of an affiliated person of such Covered Company that manages the investment activities of such Covered Company (other than an employee performing solely clerical, secretarial or administrative functions with regard to such company or its investments) who, in connection with his or her regular functions or duties, participates in, or obtains information regarding, the investment activities of such Covered Company or other investment companies the investment activities of which are managed by such affiliated person, *provided that* such employee has been performing such functions and duties for or on behalf of the Covered Company or the affiliated person of the Covered Company for at least 12 months.

(4) The term *Related Person* shall mean a person who:

(i) Is related to another person as a sibling, spouse or former spouse; or

(ii) Is a direct lineal descendant or ancestor by birth or adoption of such person, or is a spouse of such descendant.

(5) The term *Section 3(c)(7) Company* shall mean a company that would be an investment company but for the exclusion provided by section 3(c)(7) of the Act [15 U.S.C. 80a–3(c)(7)].

(6) The term *Section 3(c)(1) Company* shall mean a company that would be an investment company but for the exclusion provided by section 3(c)(1) of the Act [15 U.S.C. 80a–3(c)(1)].

(b) For purposes of determining the number of beneficial owners of a Section 3(c)(1) Company, and whether the outstanding securities of a Section 3(c)(7) Company are owned exclusively by qualified purchasers, there shall be excluded securities beneficially owned by a Knowledgeable Employee of such Company; an estate of such Knowledgeable Employee; a Related Person of such Knowledgeable Employee who acquired such securities as a gift, bequest or pursuant to an agreement relating to a legal separation or divorce; or a company established by the Knowledgeable Employee exclusively for the benefit of (or owned exclusively by) the Knowledgeable Employee, his or her estate, and his or her Related Persons or charitable organizations, *provided, however,* that in each case such securities shall have been acquired by the Knowledgeable Employee pursuant to, or shall otherwise be subject to, an arrangement that prohibits the transfer, pledge or hypothecation of such securities, or any interest in such securities, to any person other than the Covered Company, such estate, such Related Persons, such companies or, if the Covered Company is a Section 3(c)(7) Company, qualified purchasers.

7. Section 270.3c–6 is added to read as follows:

§ 270.3c–6 Certain transfers of interests in section 3(c)(1) and section 3(c)(7) funds.

(a) As used in this section:

(1) The term *Related Person* shall mean a person who is:

(i) Related to another person as a sibling, spouse or former spouse; or

(ii) A direct lineal descendant or ancestor by birth or adoption of such person, or is a spouse of such descendant.

(2) The term *Section 3(c)(7) Company* shall mean a company that would be an investment company but for the exclusion provided by section 3(c)(7) of the Act [15 U.S.C. 80a–3(c)(7)].

(3) The term *Section 3(c)(1) Company* shall mean a company that would be an investment company but for the exclusion provided by section 3(c)(1) of the Act [15 U.S.C. 80a–3(c)(1)].

(4) The term *Transferee* shall mean a Section 3(c)(1) Transferee or a Qualified Purchaser Transferee in each case as defined in paragraph (b) of this section.

(5) The term *Transferor* shall mean a Section 3(c)(1) Transferor or a Qualified Purchaser Transferor in each case as defined in paragraph (b) of this section.

(b) Beneficial ownership by any person ("Section 3(c)(1) Transferee") who acquires securities or interests in securities of a Section 3(c)(1) Company shall be deemed to be beneficial ownership by the person from whom such transfer was made ("Section 3(c)(1) Transferor"), and securities of a Section 3(c)(7) Company that are owned by persons who received the securities from a qualified purchaser ("Qualified Purchaser Transferor") shall be deemed to be owned by a qualified purchaser ("Qualified Purchaser Transferee"), *provided that:*

(1) The transfer was made as a gift or bequest, or pursuant to an agreement relating to a legal separation or divorce or as a result of another involuntary event;

(2) The Transferee is:

(i) The estate of the Transferor;

(ii) A Related Person of the Transferor; or

(iii) A company established by the Transferor exclusively for the benefit of (or owned exclusively by) his or her estate, Related Persons or charitable organizations; and

(3) The securities shall have been acquired by the Transferor pursuant to, or shall otherwise be subject to, an arrangement that prohibits the transfer, pledge or hypothecation of such securities, or any interest in such

securities, to any person other than the Company that issued the securities, the Transferor's estate, such Related Persons or such companies or, in the case of a Qualified Purchaser Transferor, qualified purchasers.

8. Section 270.3c–7 is added to read as follows:

§ 270.3c–7 Non-exclusive safe harbor for certain section 3(c)(7) funds.

An issuer relying on section 3(c)(7)(B) of the Act [15 U.S.C. 80a–3(c)(7)(B)] shall be deemed to be excluded under section 3(c)(7) of the Act [15 U.S.C. 80a–3(c)(7)] if 25% or more of the value of the issuer's securities is held by qualified purchasers that acquired these securities after October 11, 1996.

Dated: December 18, 1996.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

Federal Register

Vol. 61, No. 249

Thursday, December 26, 1996

CUSTOMER SERVICE AND INFORMATION

Federal Register/Code of Federal Regulations

General Information, indexes and other finding aids — **202–523–5227**

Laws

For additional information — **523–5227**

Presidential Documents

Executive orders and proclamations — **523–5227**

The United States Government Manual — **523–5227**

Other Services

Electronic and on-line services (voice) — **523–4534**

Privacy Act Compilation — **523–3187**

TDD for the hearing impaired — **523–5229**

ELECTRONIC BULLETIN BOARD

Free **Electronic Bulletin Board** service for Public Law numbers, Federal Register finding aids, and list of documents on public inspection. **202–275–0920**

FAX-ON-DEMAND

You may access our Fax-On-Demand service. You only need a fax machine and there is no charge for the service except for long distance telephone charges the user may incur. The list of documents on public inspection and the daily Federal Register's table of contents are available using this service. The document numbers are 7050-Public Inspection list and 7051-Table of Contents list. The public inspection list will be updated immediately for documents filed on an emergency basis.

NOTE: YOU WILL ONLY GET A LISTING OF DOCUMENTS ON FILE AND NOT THE ACTUAL DOCUMENT. Documents on public inspection may be viewed and copied in our office located at 800 North Capitol Street, N.W., Suite 700. The Fax-On-Demand telephone number is: **301–713–6905**

The United States Government Manual 1996/1997

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to contact about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix B, which lists the agencies and functions of the Federal Government abolished, transferred, or renamed subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

For information on briefings in Washington, DC, see announcement on the inside cover of this issue

Now Available Online

Code of Federal Regulations

via

GPO Access

(Selected Volumes)

Free, easy, online access to selected *Code of Federal Regulations (CFR)* volumes is now available via *GPO Access*, a service of the United States Government Printing Office (GPO). *CFR* titles will be added to *GPO Access* incrementally throughout calendar years 1996 and 1997 until a complete set is available. GPO is taking steps so that the online and printed versions of the *CFR* will be released concurrently.

The *CFR* and *Federal Register* on *GPO Access*, are the official online editions authorized by the Administrative Committee of the Federal Register.

New titles and/or volumes will be added to this online service as they become available.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online edition of the **Federal Register** on *GPO Access* is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to gpoaccess@gpo.gov; by faxing to (202) 512–1262; or by calling toll free 1–888–293–6498 or (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 61, No. 250
Friday, December 27, 1996

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

ADMINISTRATIVE COMMITTEE OF THE FEDERAL REGISTER

1 CFR Parts 5, 11 and 18

Prices and Availability of Federal Register Publications; Acceptance of Digital Signatures

AGENCY: Administrative Committee of the Federal Register.

ACTION: Final rule with request for comments.

SUMMARY: The Administrative Committee of the Federal Register (ACFR) announces changes to the prices charged for **Federal Register** publications. The price changes apply to the daily **Federal Register**, the Federal Register Index and LSA (List of CFR Sections Affected), the Code of Federal Regulations (CFR) and the Weekly Compilation of Presidential Documents. These price changes are necessary to accurately reflect certain increases and decreases in the Government Printing Office's (GPO) current cost of production and distribution of these publications.

These regulations also make certain technical amendments to acknowledge the official status and availability of the Administrative Committee's online editions of the **Federal Register** and The United States Government Manual on the GPO Access service. In addition, the regulations are amended to permit original **Federal Register** documents to be authenticated by digital signatures. This action will enable the Office of the Federal Register (OFR) to participate in selected pilot projects.

DATES: These regulations are effective January 27, 1997. Comments will be accepted through February 25, 1997.

ADDRESSES: Comments may be submitted by U.S. Mail: Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408; by private delivery services: Office of the Federal Register, 800 North Capitol Street, NW., Suite 700, Washington, DC 20002; by fax: 202–523–6866; by electronic mail: info@fedreg.nara.gov.

FOR FURTHER INFORMATION CONTACT: Michael White at 202–523–4534.

SUPPLEMENTARY INFORMATION: The Administrative Committee of the Federal Register, which establishes prices for **Federal Register** publications, has determined that it must make price adjustments to certain **Federal Register** publications to accurately reflect the current costs of production and distribution. These regulations will increase the subscription rates for the paper editions of the daily **Federal Register**, the Federal Register Index and LSA (List of CFR Sections Affected), the Code of Federal Regulations (CFR) and the Weekly Compilation of Presidential Documents. The subscription rate and the single copy price charged for the microfiche edition of the daily **Federal Register** will decrease and the subscription rate for the microfiche edition of the CFR will decrease.

On September 1, 1992, the Administrative Committee announced that it had adopted a policy for requiring full cost recovery to ensure that revenues from subscriptions and single issue sales would keep pace with increased costs attributable to printing and labor expenses at the GPO plant and postal rate increases (57 FR 40024). The Administrative Committee resolved to adjust prices over a period of several years and to conduct an annual review to determine the rate of increase necessary to gradually bring prices into alignment with costs. Since 1992, the Administrative Committee has periodically adjusted the prices of **Federal Register** publications pursuant to its annual pricing review. In 1995, the Administrative Committee found it unnecessary to make any price adjustments, based on GPO's cost estimates.

After reviewing GPO's current analysis of its production and distribution costs over the past two years and estimates for calendar year 1997, the Administrative Committee has determined that increases in the prices to be charged for the paper editions of **Federal Register** publications ranging from 4 to 12 per cent are necessary to achieve full cost recovery. The increased prices reflected in amendments to 1 CFR part 11 in this final rule are primarily attributable to labor charges, paper prices, equipment costs and postal rate increases.

Production of the microfiche editions of the **Federal Register** and CFR are subject to a competitive bidding process that determines the prices to be charged. As a result of that process, subscription rates for the microfiche edition of the **Federal Register** will decrease by nearly 50 per cent and single copy prices will decrease by 33 per cent, and CFR subscription rates will decrease by 6.5 per cent.

The following rates are effective as of January 1, 1997. The annual subscription rates for the **Federal Register** paper edition are increased to $555, or $607 for a combined **Federal Register**, Federal Register Index and LSA (List of CFR Sections Affected) subscription. The annual subscription price of the microfiche edition of the **Federal Register**, including the Federal Register Index and LSA, is decreased to $220. The price for single copies of the daily **Federal Register** microfiche edition is decreased to $1. The annual subscription price for the Federal Register Index is increased to $25. The annual subscription price for the monthly LSA is increased to $27. The annual subscription rates for a full set of the Code of Federal Regulations are increased to $951 for the paper edition and decreased to $247 for the microfiche edition. The annual subscription rates for the Weekly Compilation of Presidential Documents are increased to $80 for delivery by non-priority mail, and $137 for delivery by first-class mail.

In addition to the price changes contained in this document, the Administrative Committee is updating its regulations to acknowledge the official status and availability of the Administrative Committee's online editions of the **Federal Register** and The United States Government Manual. The Administrative Committee has resolved that the American public should have greater access to essential information on the structure, functions and actions of its Government through the Federal Register system. The Administrative Committee has general authority under 44 U.S.C. section 1506 to determine the manner and form for publishing the **Federal Register** and its special editions. The Government Printing

VOL 61 ISS 250 DEC 27 1996 UMI

Office Electronic Information Access Enhancement Act of 1993 (GPO Access), 44 U.S.C. 4101, provided additional authority for the Administrative Committee to expand public access to Federal Register publications, beginning with the inauguration of online **Federal Register** service on June 8, 1994.

Accordingly, 1 CFR part 5 is amended by adding a section to state that the Administrative Committee publishes the daily **Federal Register** in three official formats, including the online edition on GPO Access. In part 11, a reference to subscription prices for the online edition of the **Federal Register**, which is now available to the public at no charge, is eliminated. It is replaced by a paragraph citing the availability of the online service. Part 11 is further revised to cite the availability of the online edition of The United States Government Manual on GPO Access to reflect the Administrative Committee's commitment to provide access to the Manual in electronic form.

In addition, the regulations in 1 CFR part 18 are amended to permit original **Federal Register** documents to be submitted in electronic form and to be authenticated by digital signatures. The Federal Register Act, at 44 U.S.C. 1503, requires agencies to submit original documents to the OFR for publication in the **Federal Register** but does not define the term "original" document. Original documents are currently defined in ACFR regulations by provisions that require originals to be submitted in manuscript form and to be authenticated by ink signatures. The amendments to part 18 expand the definition of an original document to include electronic documents submitted by telecommunication that are authenticated by digital signatures.

This action establishes the legal basis for OFR to accept documents in electronic form so that the OFR and GPO may participate in selected pilot programs currently under development. If the pilot programs are successful in establishing a government-wide Public Key Infrastructure for Federal agencies and a consensus on technical standards and specifications, the OFR and GPO will adapt their production processes to permit certain electronic documents to be published on a regular basis. However, during the pilot phase, the OFR will only accept electronic documents for publication in the **Federal Register** from agencies participating in selected pilot programs.

The Administrative Committee's last price change regulation, published at 59 FR 48989 on September 26, 1994, invited public comment on the pricing structure of Federal Register publications. No pricing related comments were received. Customers who called to inquire about the online **Federal Register**, published daily on the GPO Access service since June 8, 1994, as referenced in the September 26, 1994 final rule, were referred to the GPO Access User Support Team. Complete information on free public access to the online editions of the **Federal Register**, The United States Government Manual and other Federal Register publications on the GPO Access service Wide Area Information Server (WAIS) may be obtained by consulting introductory page II of the paper edition of the daily **Federal Register**; by Internet e-mail at gpoaccess@gpo.gov; by telephone at 202–512–1530; or by fax at 202–512–1262. Internet users can access the database by using the World Wide Web. The GPO's home page address for Federal Register publications is: http://www.access.gpo.gov/su_docs/aces/aces140.html. The OFR home page address is: http://www.nara.gov/nara/fedreg/fedreg.html. The Administrative Committee continues to welcome comments on **Federal Register** publications and prices.

The Administrative Committee has not published a notice of proposed rulemaking on the revised price schedule, as permitted by 5 U.S.C. 553(b)(B) when there is good cause not to publish a proposed rule and obtain comments from interested persons. The Administrative Committee has determined that publication of a proposed rule is unnecessary. The Administrative Committee has authority under 44 U.S.C. 1506 to set the prices to be charged for **Federal Register** subscriptions and individual copies. To the extent possible, the Administrative Committee sets prices to recover only the actual cost of producing and distributing Federal Register publications. The revised prices are based on an in-depth cost study conducted by GPO for the Administrative Committee.

Because only actual prior costs and conservative estimates of future costs were considered in setting the revised price schedule, and because of the requirement that GPO must recover its production and distribution costs, the Administrative Committee has determined that there is good cause for promulgating this final rule without a prior notice of proposed rulemaking. The changes to ACFR regulations relating to submission of electronic documents are procedural rules which are not subject to notice and comment under 5 U.S.C. 553(b)(A).

This regulatory action has been reviewed by the Office of Management and Budget's Office of Information and Regulatory Affairs under Executive Order 12866. The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) does not apply to rate increases necessary to recover the costs of the Government of printing and distributing these publications.

List of Subjects

1 CFR Part 5

Administrative practice and procedure, **Federal Register**, Government publications.

1 CFR Part 11

Code of Federal Regulations, **Federal Register**, Government publications, Organizations and functions (Government agencies)

1 CFR Part 18

Administrative practice and procedure, **Federal Register**.

For the reasons discussed in the preamble, the Administrative Committee of the Federal Register amends parts 5, 11 and 18 of chapter I of title 1 of the Code of Federal Regulations as set forth below:

PART 5—GENERAL

1. The authority citation for part 5 continues to read as follows:

Authority: 44 U.S.C. 1506; sec. 6, E.O. 10530, 19 FR 2709, 3 CFR, 1954–1958 Comp., p. 189.

2. Amend part 5 by adding § 5.10 to read as follows:

§ 5.10 Forms of publication.

Pursuant to section 1506 of title 44, United States Code, the Administrative Committee publishes the **Federal Register** in the following formats: paper; microfiche; and online on GPO Access (44 U.S.C. 4101).

PART 11—SUBSCRIPTIONS

1. The authority citation for part 11 continues to read as follows:

Authority: 44 U.S.C. 1506; sec. 6, E.O. 10530, 19 FR 2709, 3 CFR, 1954–1958 Comp., p. 189.

2. Amend § 11.1 by revising the first sentence to read as follows:

§ 11.1 Subscription by the public.

The Government Printing Office produces the paper and microfiche editions of the publications described in § 2.5 of this chapter, and the Superintendent of Documents, Government Printing Office, Washington, DC 20402, makes them available for sale to the public. * * *

3. Revise § 11.2 to read as follows:

§ 11.2 Federal Register.

(a) Daily issues are provided to subscribers by mail for $555 per year in paper form. A combined subscription consisting of the daily issues, the monthly Federal Register Index, and the monthly LSA (List of CFR Sections Affected) is provided to subscribers by mail for $607 per year in paper form or $220 per year in microfiche form. Six month subscriptions to the paper and microfiche editions are also available at one-half the annual rate. Limited quantities of current or recent issues may be obtained for $8 per copy in paper form or $1 per copy in microfiche form.

(b) The online edition of the **Federal Register**, issued under the authority of the Administrative Committee, is available on GPO Access, a service of the Government Printing Office (44 U.S.C. 4101).

4. Revise § 11.3 to read as follows:

§ 11.3 Code of Federal Regulations (CFR)

A complete set is provided to subscribers by mail for $951 per year for the bound, paper edition or $247 per year for the microfiche edition. Individual volumes of the bound, paper edition of the Code are sold at prices determined by the Superintendent of Documents under the general direction of the Administrative Committee. The price of an individual volume in microfiche form is $1 per copy.

5. In § 11.4, add a second sentence to read as follows:

§ 11.4 The United States Government Manual.

* * * * *

The online edition of the Manual, issued under the authority of the Administrative Committee, is available on GPO Access, a service of the Government Printing Office (44 U.S.C. 4101).

6. Revise § 11.6 to read as follows:

§ 11.6 Weekly Compilation of Presidential Documents.

Copies in paper form are provided to subscribers for $80 per year by non-priority mail or $137 per year by first-class mail. The price of an individual copy in paper form is $3.

7. Revise § 11.7 to read as follows:

§ 11.7 Federal Register Index.

The annual subscription price for the monthly Federal Register Index, purchased separately, in paper form, is $25.

8. Revise § 11.8 to read as follows:

§ 11.8 LSA (List of CFR Sections Affected).

The annual subscription price for the monthly LSA (List of CFR Sections Affected), purchased separately, in paper form, is $27.

PART 18—PREPARATION AND TRANSMITTAL OF DOCUMENTS GENERALLY

1. The authority citation for part 18 continues to read as follows:

Authority: 44 U.S.C. 1506; sec. 6, E.O. 10530, 19 FR 2709, 3 CFR, 1954–1958 Comp., p. 189.

2. in § 18.4, add paragraph (c) to read as follows:

§ 18.4 Form of document.

* * * * *

(c) Original documents submitted by telecommunication and authenticated by digital signatures consistent with applicable Federal standards and Office of the Federal Register technical specifications may be accepted for publication.[3]

3. In § 18.7, add a third sentence to read as follows:

§ 18.7 Signature.

* * * * *

Documents submitted under § 18.4(c) may be authenticated as original documents by digital signatures.

DEPARTMENT OF AGRICULTURE

Food and Consumer Service

7 CFR Part 278

RIN 0584–AC00

Food Stamp Program: Revisions in Use and Disclosure Rules Involving the Sharing of Information Provided by Retail and Wholesale Food Concerns with Other Federal and State Agencies

AGENCY: Food and Consumer Service, USDA

ACTION: Final rule.

SUMMARY: This rulemaking implements certain provisions in two different laws which expand the authority of the United States Department of Agriculture's Food and Consumer Service (FCS) to share information provided by applicants and firms participating as authorized retail food stores or wholesale food concerns in the Food Stamp Program (FSP) with other Federal and State government agencies.

The intent of this final rule is to enable better administration and enforcement of the Food Stamp Act of 1977, as amended (the Act), or any other Federal or State law and regulations issued under the Act or any other Federal or State law. This rule provides new criteria to govern the sharing of such information and new criminal penalties for unauthorized use. It also implements the Secretary of Agriculture's new authority to share employer identification numbers (EINs) and Social Security numbers (SSNs) of applicants and firms participating in the FSP with other Federal agencies.

Finally, this rule makes technical changes to correct an error in regulatory reference and also to reflect changes made by the Department of the Treasury

[3] At present, submission of documents by telecommunication is limited to selected pilot projects.

VOL 61 ISS 250 DE 27 1996 UMI

in a parallel rule that does not change the substance of the affected provisions.

EFFECTIVE DATE: Provisions in this rule are effective and will be implemented beginning February 25, 1997.

FOR FURTHER INFORMATION CONTACT: Questions regarding this final rule should be addressed to Suzanne Fecteau, Food and Consumer Service, Chief, Redemption Management Branch, 3101 Park Center Drive, Alexandria, Virginia 22302–1594, or by telephone at (703) 305–2418.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule has been determined to be not significant for purposes of Executive Order 12866 and therefore has not been reviewed by the Office of Management and Budget.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule and related Notice to 7 CFR part 3015 subpart V (48 FR 29115, June 24, 1983), this Program is excluded from the scope of Executive Order 12372, which requires inter-governmental consultation with State and local officials.

Regulatory Flexibility Act

This final rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. § 601–612). William E. Ludwig, the Administrator of the Food and Consumer Service, has certified that this rule will not have a significant economic impact on a substantial number of small entities; however, it may have a significant effect on a limited number of small entities that violate State or Federal laws.

Paperwork Reduction Act

This final rule does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule has preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full implementation. This rule also has retroactive effect. Prior to any judicial challenge to the provisions of this rule or the application of its provisions, all applicable administrative procedures must be exhausted. In the Food Stamp Program the administrative procedures are as follows: (1) For Program benefit recipients—State administrative procedures issued pursuant to 7 U.S.C. 2020(e)(10) and 7 CFR 273.15; (2) for State agencies—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 276.7 (for rules related to non-quality control (QC) liabilities) or Part 283 (for rules related to QC liabilities); (3) for Program retailers and wholesalers— administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 278.8.

Background

On May 12, 1995, the Department published a proposed rule at 60 FR 25625, to implement section 203 of the Food Stamp Program Improvements Act of 1994, Public Law 103–225. Section 203 revises section 9(c) of the Food Stamp Act of 1977, as amended, to expand FCS' authority to share information provided by applicants and participating retail food concerns—including information about food stamp redemptions, retail food sales, and store ownership—with other Federal and State law enforcement and investigative agencies. It covers certain information provided on authorization applications, as well as additional supporting information submitted to document store eligibility to participate in the FSP. This information can be shared for the purpose of administering and enforcing the Food Stamp Act, as well as the enforcement of any other Federal or State laws, and the regulations issued under this Act or such other laws.

The sharing of EINs and SSNs is not covered by Public Law 103–225 or by Section 9(c) of the Food Stamp Act of 1977, as amended. The sharing of EINs and SSNs is covered in section 316 of the Social Security Independence and Program Improvements Act of 1994, Public Law 103–296, and is also implemented by this rule. Section 316 revises section 6109(f) of the Internal Revenue Code of 1986, and section 205(c)(2)(C) of the Social Security Act, to expand FCS' authority to verify and match SSNs and EINs with other Federal agencies or instrumentalities of the United States to more effectively administer and enforce the FSP, as well as other Federal laws and regulations.

For currently authorized firms, the provisions of this rule are effective February 25, 1997 and will be implemented beginning February 25, 1997. Because of the legal notice requirements related to the use of EINs and SSNs, currently authorized firms will receive notices of the expanded information sharing provisions of this rule, and will be given the opportunity to withdraw from FSP participation if they do not want to be subject to these new provisions. Firms that remain authorized 60-days after the date of the notice, will be subject to the information sharing provisions. However, firms that withdraw or were disqualified from FSP participation prior to the implementation date on the notice will not be subject to the expanded information sharing provisions of this rule, unless such firms participate in the FSP at a future date subsequent to implementation of this rule.

Comments were solicited on the provisions of the proposed rulemaking through June 12, 1995. This final action addresses the commentors' concerns. Readers should refer to the proposed rule for a more complete understanding of this final action.

The Department received three comment letters on the proposed rule, two representing Federal agencies and one representing a State agency. All three commentors were supportive of the proposed provisions, and two offered constructive suggestions to clarify certain provisions of the proposed rule.

A State agency commented that the proposed rule will assist law enforcement and investigative agencies in their efforts to investigate food stamp trafficking, as well as other crimes associated with trafficking.

A Federal agency commented on the need to clarify certain requirements in the proposed rule regarding how information is requested. The proposed rule required that requests be submitted in writing and include the specific provisions of laws and regulations being enforced. The recommendation was that written requests include electronic communications. This commentor also recommended that the final rule allow standing agreements between FCS and other agencies to document that such information is being accessed for *bona fide* law enforcement purposes, without citing specific provisions of law.

It is the view of the Department that written requests include electronic communications. The Department also believes that formal agreements between government agencies may be a better way to document the *bona fide* need for the information. In such situations, individual written requests for access to FCS information may not be necessary. The Department has made this clear in the final rule by adding the appropriate language.

The Department of Agriculture's Office of Inspector General (OIG) expressed concern that the proposed rule restricted its authority to share information for enforcement of the Food Stamp Act, while other government entities could access information to enforce all laws and regulations under their respective jurisdictions. OIG also requested that the final rule include language to give it special authority to release information in certain circumstances.

The Department agrees that OIG and other USDA agencies may be allowed access to information needed to enforce Departmental laws and regulations. Appropriate clarifying language is included in the final rule. Authority for OIG or other agencies to release FCS information will be addressed in written agreements with individual agencies.

OIG was also concerned about the effective date of this rule. The proposed rule provides that stores authorized to participate in the FSP on August 15, 1994, and stores authorized after that date will be subject to the rule. OIG was concerned that a possible interpretation might be that stores initially authorized before August 15, 1994, that continue participating after implementation, would not be subject to this rule. This was not the Department's intent; thus, the final rule states that all stores participating in the FSP after implementation shall be subject to the provisions in this rule. This rule also affects unauthorized entities and individuals accepting and redeeming food stamps illegally, except that the sharing of EINs and SSNs for such firms will be limited to those firms which were previously sanctioned or convicted under section 12 or 15 of the Food Stamp Act of 1977, as amended (7 U.S.C. 2021 or 2024).

The Department has made minor revisions to clarify the meaning of a few provisions in the proposed rule in order to avoid any confusion. A reference to "applicant" under paragraph (q) that was inappropriate has been replaced with the appropriate term, "retail food store." The Department also clarified a reference in the proposed rule involving the Special Supplemental Food Program for Women, Infants and Children (WIC). Current regulations afford WIC special information sharing status. This rule's expanded information sharing negates the need to treat WIC as a special situation; therefore, the sentence involving the treatment of WIC in the proposed rule has been removed.

The Department has also added clarifying language to clearly distinguish between the two different laws implemented by this rule. One law (amending the Food Stamp Act) addresses information, excluding SSNs and EINs, provided by applicants and participating firms that can be shared with both Federal and State law enforcement or investigative agencies. The other law (amending the Social Security Act and the Internal Revenue Code) addresses information involving SSNs and EINs that can only be shared with certain Federal agencies and instrumentalities of the United States. Clarifying language has also been added to the final rule to define "a law enforcement or investigative agency" and "an FCS initiated match." Editorial changes in the final rule were also made to provide a more orderly presentation.

Finally, because a regulation published on October 15, 1996 redesignated paragraph (q) to (r) in § 278.1, this rule makes the conforming changes.

List of Subjects in 7 CFR Part 278

Administrative practice and procedure, Banks, Banking, Claims, Food stamps, Groceries—retail, Groceries, General line—wholesaler, Penalties.

Accordingly, 7 CFR part 278 is amended as follows:

PART 278—[AMENDED]

1. The authority citation for 7 CFR part 278 continues to read as follows:

Authority: 7 U.S.C. 2011–2032

PART 278—PARTICIPATION OF RETAIL FOOD STORES, WHOLESALE FOOD CONCERNS AND INSURED FINANCIAL INSTITUTIONS

2. In § 278.1:

a. The heading and the introductory text of paragraph (r) is revised;

b. Paragraphs (r)(1) and (r)(2) are redesignated as paragraphs (r)(2) and (r)(3), respectively, and a new paragraph (r)(1) is added;

c. Newly redesignated paragraphs (r)(2)(i), (r)(2)(ii), (r)(3)(i), and (r)(3)(ii) are revised;

d. Newly redesignated paragraph (r)(2)(iii) is amended by adding after the word "Department" in the first sentence the words "or any agency or instrumentality of the United States" and by removing the designation "(c)(2)" following the references to "§ 301.6109–2" and "(26 CFR 301.6109–2)" and adding in its place the designation (d)(2);

e. Newly redesignated paragraph (r)(2)(iv) is amended by adding after the word "Department" the words "or maintained by any agency or instrumentality of the United States", by removing the references to "§ 278.1(s)(1)(ii)" and "§ 278.1 (r)(1)(iv)" and adding in their place references to "paragraph (r)(2)(ii) of this section" and "paragraph (r)(2)(iv) of this section", and by removing the designation "(d)" following the references to "§ 301.6109–2" and "(26 CFR 301.6109)" and adding in its place the designation (e);

f. Newly redesignated paragraph (r)(2)(v) is amended by removing the designation "(e)" after the references to "§ 301.6109–2" and "(26 CFR 301.6109–2)" and adding in its place the designation (f);

g. Newly redesignated paragraph (r)(3)(iv) is amended by removing the reference "§ 278.1(q)(2)(iv)" and adding in its place the reference "paragraph (r)(3)(iv) of this section"; and

h. A new paragraph (r)(4) is added.

The revisions and additions read as follows:

§ 278.1 Approval of retail food stores and wholesale food concerns.

* * * * *

(r) *Use and disclosure of information provided by firms.* With the exception of EINs and SSNs, the contents of an initial application, or other information required to be submitted by retail food stores and wholesale food concerns to determine continued eligibility, such as ownership information and sales and redemption data, may be disclosed to and used by Federal and State law enforcement and investigative agencies for the purpose of administering or enforcing the Food Stamp Act or any other Federal or State law, and the regulations issued under the Food Stamp Act or such other law. Such disclosure and use shall also include companies or individuals under contract for the operation by, or on behalf of FCS to accomplish an FCS function. Such purposes include the audit and examination of such information by the Comptroller General of the United States authorized by any other provision of law. Any person who publishes, divulges, discloses, or makes known in any manner or to any extent not authorized by Federal law or regulations any information obtained under this paragraph shall be fined not more than $1,000 or imprisoned not more than 1 year, or both. Safeguards with respect to employee identification numbers (EINs) are contained in paragraph (r)(2) of this section. Safeguards with respect to Social Security numbers (SSNs) are contained in paragraph (r)(3) of this section.

(1) *Criteria for requesting information.* FCS shall determine what information can be disclosed and which government

VOL 61 ISS 250 DE 27 1996 UMI

agencies have access to that information based on the following criteria:

(i) Federal and State law enforcement or investigative agencies or instrumentalities administering or enforcing specified Federal and State laws, or regulations issued under those laws, have access to certain information maintained by FCS. Such agencies or instrumentalities must have among their responsibilities the enforcement of law or the investigation of suspected violations of law. However, only certain Federal entities have access to information involving SSNs and EINs in accordance with paragraph (r)(1)(ii) of this section;

(ii) Except for SSNs and EINs, information provided to FCS by applicants and authorized firms participating in the FSP may be disclosed and used by qualifying Federal and State entities in accordance with paragraph (r)(1)(i) of this section. The disclosure of SSNs and EINs is limited only to qualifying Federal agencies or instrumentalities which otherwise have access to SSNs and EINs based on law and routine use. Release of information under this paragraph shall be limited to information relevant to the administration or enforcement of the specified laws and regulations, as determined by FCS;

(iii) Requests for information must be submitted in writing, including electronic communication, and must clearly indicate the specific provision of law or regulations which would be administered or enforced by access to requested information, and the relevance of the information to those purposes. If a formal agreement exists between FCS and another agency or instrumentality, individual written requests may be unnecessary. FCS may request additional information if needed to clarify a request;

(iv) Disclosure by FCS is limited to: Information about applicant stores and concerns with applications on file; information about authorized stores participating in the FSP; and information about unauthorized entities or individuals illegally accepting or redeeming food stamps;

(v) Requests for information disclosure by FCS may involve a specific store or concern, or some or all stores and concerns covered by paragraph (r)(1)(iv) of this section. In addition, FCS may sign agreements allowing certain government entities direct access to appropriate FCS data, with access to EINs and SSNs limited only to other Federal agencies and instrumentalities that otherwise have access to such numbers.

(2) *Employer identification numbers.* (i) The Department may have access to the EINs obtained pursuant to paragraph (b)(5) of this section for the purpose of establishing and maintaining a list of the names and EINs of the stores and concerns for use in determining those applicants who previously have been sanctioned or convicted under sections 12 and 15 of the Food Stamp Act of 1977, as amended, (7 U.S.C. 2021 or 2024). The Department also may share EINs with other Federal agencies and instrumentalities that otherwise have access to EINs if the Department determines that such sharing would assist in verifying and matching such information against information maintained by such other agency or instrumentality. Any such information shared pursuant to this paragraph may be used by the Department or such other agency or instrumentality for the purpose of effective administration and enforcement of the Food Stamp Act of 1977, as amended, or for the purpose of investigating violations of other Federal laws or enforcing such laws. See Treas. Reg. § 301.6109–2 (b) and (c) (26 CFR 301.6109–2 (b) and (c)).

(ii) The only persons permitted access to EINs obtained pursuant to paragraph (b) of this section are officers and employees of the United States, who otherwise have access and whose duties or responsibilities require access to the EINs for the administration or enforcement of the Food Stamp Act of 1977, as amended, or for the purpose of investigating violations of other Federal laws or enforcing such laws. See Treas. Reg. § 301.6109–2(d)(1) (26 CFR 301.6109–2(d)(1)).

* * * * *

(3) *Social Security numbers.* (i) The Department may have access to SSNs obtained pursuant to paragraph (b)(5) of this section for the purpose of establishing and maintaining a list of names and SSNs of stores and concerns for use in determining those applicants who previously have been sanctioned or convicted under section 12 or 15 of the Food Stamp Act of 1977, as amended, (7 U.S.C. 2021 or 2024). The Department may use this determination of sanctions and convictions in administering sections 12 and 15 of the Food Stamp Act of 1977, as amended, (7 U.S.C. 2018, 2021). The Department also may share SSNs with other Federal agencies and instrumentalities if the Department determines that such sharing would assist in verifying and matching such information against information maintained by the Department or such other agency or instrumentality. Any such information shared pursuant to this paragraph shall be used for the purpose of effective administration and enforcement of the Food Stamp Act of 1977, as amended, or for the purpose of investigating violations of other Federal laws or enforcing such laws.

(ii) The only persons permitted access to SSNs obtained pursuant to paragraph (b) of this section are officers and employees of the United States, who otherwise have access, and whose duties or responsibilities require access to the SSNs for the administration or enforcement of the Food Stamp Act of 1977, as amended, or for the purpose of investigating violations of other Federal laws or enforcing such laws. Such access shall also include companies or individuals under contract for the operation by, or on behalf of FCS to accomplish an FCS function.

* * * * *

(4) *FCS initiated matches.* Under the restrictions noted in paragraph (r) of this section, FCS will periodically initiate cross matches of retailer data with other Federal and State agencies' files for the purpose of verifying information provided by applicant and participating firms, and for the purposes of administering and enforcing other Federal or State laws. Such matches could involve all firms participating after implementation for the purpose of verifying information such as, but not limited to, SSNs and retail sales data.

* * * * *

3. In § 278.9, a new paragraph (l) is added to read as follows:

§ 278.9 Implementation of amendments relating to the participation of retail food stores, wholesale food concerns and insured financial institutions.

* * * * *

(l) *Amendment No. 335.* Expanded authority to use and disclose information about firms participating in the FSP under CFR 278.1(r) for currently authorized firms is effective and will be implemented beginning February 25, 1997 but not before 60-days after the date of notices to such firms, notifying them of the changes. The only exception to the above is that such disclosure of information shall not apply to firms that are withdrawn or are disqualified from FSP participation prior to implementation, unless such firms participate in the FSP at a future date subsequent to the implementation date.

Dated: December 18, 1996.

William E. Ludwig,

Administrator, Food and Consumer Service.

BILLING CODE 3410–30–U

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 95–044–2]

The Importation of Ratites and Hatching Eggs of Ratites

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the animal import regulations to relieve certain restrictions on the importation of ratites and hatching eggs of ratites into the United States from Canada. We believe that these actions can be taken without increasing the risk of introducing poultry or livestock diseases into the United States. Additionally, we are allowing adult ostriches from any country to be imported, in accordance with the regulations, through the New York Animal Import Center, based on space availability. Currently, with certain exceptions, ostriches may not be imported into the United States if they exceed either 36 inches in height or 30 pounds in weight. We are making this change after determining that the New York Animal Import Center has the facilities and trained personnel to handle adult ostriches. We believe that these amendments will facilitate the importation into the United States of ratites and hatching eggs of ratites while ensuring the continued protection of the health of livestock and poultry in the United States.

EFFECTIVE DATE: January 27, 1997.

FOR FURTHER INFORMATION CONTACT: Dr. Keith Hand, Senior Staff Veterinarian, Import/Export Animals, National Center for Import and Export, VS, APHIS, 4700 River Road Unit 39, Riverdale, MD 20737–1231, (301) 734–5097.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 92 (referred to below as "the regulations") govern the importation into the United States of certain animals and birds, including ostriches and other flightless birds known as ratites, and their hatching eggs, to prevent the introduction of communicable diseases of livestock and poultry.

Section 92.101 of the regulations, among other things, imposes general restrictions on the importation of ratites and hatching eggs of ratites. Paragraph (b)(3)(i) of § 92.101 requires that all ratites, except ratites imported as zoological birds, and all hatching eggs of ratites entering the United States must originate from certified pen-raised flocks and must be identified. Ratites must be identified by means of a microchip implant, hatching eggs of ratites by marking on the shell. Paragraph (b)(3)(i) also requires certain recordkeeping, reporting, and inspections related to the flock and premises of origin. Paragraph (b)(3)(ii) of § 92.101 prohibits, with certain exceptions, the importation of ostriches more than 36 inches in height or 30 pounds in weight at the time of arrival in the United States.

Section 92.103 of the regulations, among other things, requires that an importer submit a completed import permit application to import ratites or hatching eggs of ratites into the United States. The import permit application provides, among other things, information on the name and location of the quarantine facility in the United States that will maintain the ratites or hatching eggs of ratites during the mandatory quarantine period.

Section 92.104 of the regulations, among other things, requires that ratites and their hatching eggs offered for importation from any part of the world be accompanied by a certificate issued by a full-time salaried veterinary officer of the national government of the exporting country or issued by a veterinarian authorized or accredited by the national government of the exporting country and endorsed by a full-time salaried veterinary officer of the national government of that country. The certificate must state, among other things, that ratites and their hatching eggs offered for importation have been inspected and found free of evidence of communicable diseases and are identified in accordance with the provisions in § 92.101.

Section 92.105 of the regulations, among other things, specifies requirements for the inspection of ratites and hatching eggs of ratites at the port of entry in the United States. Paragraph (a) of § 92.105, among other things, allows hatching eggs of ratites to be offered for importation into the United States at any international airport, or any land-border port within 20 miles of an international airport, serviced by Customs. In addition, hatching eggs of ratites may be shipped, in bond, from the port of first arrival to the Customs port of entry where the eggs will be inspected and quarantined. Paragraph (c) of § 92.105 provides that ratites, other than hatching eggs of ratites, imported from any part of the world must be inspected by a veterinary inspector of the Animal and Plant Health Inspection Service (APHIS) at a listed port of entry. The ports of entry listed for ostriches are New York, NY; Stewart Airport, Newburgh, NY; and Miami, FL. The ports of entry listed for ratites other than ostriches are New York, NY; Stewart Airport, Newburgh, NY; Miami, FL; and Honolulu, HI.

Section 92.106 of the regulations, among other things, imposes quarantine requirements on ratites and hatching eggs of ratites. Paragraph (b)(1) of § 92.106, among other things, requires ratites imported from any part of the world to be quarantined upon arrival for a minimum of 30 days to determine the ratites' freedom from ectoparasites and communicable diseases. Paragraph (b)(3) of § 92.106 requires that ratites be treated for ectoparasites during the quarantine by an inspector until the inspector determines that the ratites are free of ectoparasites. Paragraph (b)(2) of § 92.106, among other things, requires hatching eggs of ratites imported from any part of the world to be quarantined upon arrival, incubated for approximately 42 days, and held in quarantine for a minimum of 30 days following the hatch of the last chick in the lot, to determine the ratites' freedom from communicable diseases. Additionally, the ratites and hatching eggs of ratites must be tested for and found free of viral diseases of poultry, including exotic Newcastle disease.

On June 3, 1996, we published in the **Federal Register** (61 FR 27797–27802, Docket No. 95–044–1) a proposal to amend the regulations by exempting certain ratites and hatching eggs of ratites from Canada from quarantine requirements upon arrival in the United States; exempting ratites imported from Canada for consignment directly to slaughter in the United States from the requirement in § 92.104(c)(8) that the ratites be treated for ectoparasites within 3 to 14 days before they are exported from Canada; exempting Canadian ratite flocks from the pen-raised requirement and the identification and recordkeeping requirements in § 92.101(b)(3); allowing ratites from Canada that are exempt from quarantine upon arrival to be offered for importation at a number of ports, in addition to the ports listed in § 92.105(c); exempting ratites and hatching eggs of ratites from Canada from the import permit requirements found in § 92.103 if the ratites and hatching eggs qualify for exemption from quarantine upon arrival in the United States and enter the United States at a Canadian land border port, as listed in § 92.203(b); and allowing ostriches greater than 36 inches in height or 30 pounds in weight to be imported into the United States from any country through the port of New

VOL 61 ISS 250 DE 27 1996 UMI

York, NY, or through Stewart Airport, Newburgh, NY, and be quarantined at the New York Animal Import Center (NYAIC), based on space availability.

We solicited comments concerning our proposal for 60 days ending August 2, 1996. We received two comments, one from a government agency and the other from a representative of industry, by that date. The concerns of these commenters are discussed below by topic.

Ports of Entry

One commenter explained that under the regulations of the U.S. Fish and Wildlife Service, Department of the Interior, wildlife may only be imported into the United States through certain ports. Because the U.S. Fish and Wildlife Service includes ratites in their definition of wildlife, ratites may therefore only be imported into the United States through these specific ports. The commenter explained that certain ports that we proposed as additional ports for the entry of Canadian ratites and hatching eggs of ratites conflict with the ports listed as eligible ports for wildlife in the U.S. Fish and Wildlife Service regulations. Specifically, conflicts arise because the U.S. Fish and Wildlife Service limits the importation of species protected under the Convention on International Trade in Endangered Species, the Endangered Species Act, or other Federal wildlife laws requiring permits to certain ports and because the U.S. Fish and Wildlife Service does not allow the importation of wildlife through several of the ports that we had proposed as additional ports for the importation of Canadian ratites and hatching eggs of ratites.

In response to this comment, we are removing the ports of Jacksonville, FL; Port Canaveral, FL; St. Petersburg-Clearwater, FL; Portland, ME; Great Falls, MT; Opheim, MT; Alexandria Bay, NY; Galveston, TX; Lyndon, WA; Oroville, WA; Spokane, WA; and Tacoma, WA, from the list of ports through which Canadian ratites and their hatching eggs may enter the United States. We are also adding to the regulations a statement, which currently appears on the import permit issued by APHIS for ratites and their hatching eggs, that Canadian ratites and their hatching eggs intended for importation into the United States must meet all applicable requirements of the United States Fish and Wildlife Service contained in Title 50, subchapter B, of the Code of Federal Regulations.

Ratite References

One commenter suggested that throughout the proposal, we consistently use the general term "ratites," rather than specify members of the ratite family such as "ostriches." Alternatively, the commenter requested that where specific members of the ratite family are named, then each member, such as "emus," "rheas," and "kiwis," should also be listed.

Where appropriate, we used the general reference "ratite" in the proposal. The term "ratites" is defined in the regulations as "cassowaries, emus, kiwis, ostriches, and rheas." When we used the specific term "ostrich," as in the proposal to allow ostriches greater than 36 inches in height or 30 pounds in weight to be imported into the United States from any country through the port of New York, NY, or through Stewart Airport, Newburgh, NY, and be quarantined at the New York Animal Import Center, based on space availability, we intended to specify ostriches only. Therefore, we are making no changes to the rule based on this comment.

Ratite Meat and Byproducts

One commenter asked that we also relieve restrictions on ratite meat and ratite byproducts, such as ratite hides and all ratite eggs, from Canada.

Currently, the regulations in 9 CFR 94.6 restrict the entry of carcasses, or parts or products of carcasses, and eggs (other than hatching eggs) of poultry, game birds, or other birds from countries where exotic Newcastle disease (END) or *S. enteritidis*, phage type 4, is considered to exist. Canada is considered free of both END and *S. enteritidis*, phage type 4; therefore, the importation of ratite carcasses, or parts or products of ratite carcasses, and ratite eggs (other than hatching eggs) from Canada are not restricted under APHIS regulations.

Therefore, based on the rationale set forth in the proposed rule and in this document, we are adopting the provisions of the proposal as a final rule with the changes discussed in this document.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. This rule has been determined to be not significant for purposes of Executive Order 12866, and, therefore, has not been reviewed by the Office of Management and Budget.

This rule relieves some restrictions on the importation into the United States of ratites and hatching eggs of ratites from Canada and on the importation into the United States of adult ostriches. We anticipate that this rule will affect only the ostrich industry because very few ratites other than ostriches have been imported into the United States since first being allowed in 1986.

Ostrich production in the United States has been growing rapidly over the last few years. According to a recent estimate, there are approximately 6,000 to 7,000 ostrich owners and more than 70,000 breeding ostriches in the United States. Each farm owns an average of 8 to 10 adult ostriches, but each farm's holdings can range anywhere from 2 to 200 adult ostriches. All of these farms are considered small entities by Small Business Administration standards (annual gross receipts of less than $500,000). The American Ostrich Association reports its membership at 3,650 as of September 1995.

Over the last 2 to 3 years, the supply of ostriches in the United States has steadily increased, which has greatly reduced domestic prices. For example, in 1992, market prices for ostriches of different ages ranged as follows: 3-month-old chicks sold for approximately $6,000 a pair; 6-month-old chicks sold for $8,000 to $15,000 a pair; yearlings sold for $12,000 to $25,000 a pair; 2-year-olds sold for $25,000 to $40,000 a pair; and adults (breeding pairs) sold for $40,000 up to $100,000 a pair, depending upon proven breeding capabilities. Recent market prices for ostriches of different ages show a dramatic decrease from the market prices of 1992; estimates of 1995 market prices for ostriches of different ages are as follows: 3-month-old chicks sell for approximately $1,300 a pair; 6-month-old chicks sell for approximately $2,150 a pair; yearlings sell for approximately $4,300 a pair; 2-year-olds sell for approximately $8,600 a pair; and adults (breeding pairs) sell for approximately $14,700 a pair, depending upon proven breeding capabilities. Further, when compared to the market prices listed above for 1995, the estimated market prices for the first quarter of 1996 show approximately a fifty percent decrease in the market prices for ostriches in all age categories.

No live ratites have been imported into the United States from any country since April of 1994. Removing the quarantine and other requirements for Canadian ratites and their hatching eggs could encourage imports by decreasing the cost of importing these ratites and hatching eggs. However, because of the decrease in market prices described above, we do not expect a heavy volume of ostriches or other ratites from Canada to be imported into the United States as a result of this rule.

In addition, though the hatching eggs of ratites are more readily available, are cheaper to transport, and can be

quarantined at private facilities, historically only about 26 percent of the imported eggs (this includes fertile and infertile eggs) have hatched chicks that survived beyond 30 days. Despite being a financially dangerous option, importers continue to import hatching eggs and are trying to improve their rate of hatch and chick survival. However, because of the relatively low hatch and survival rate and the reduced market prices of ostriches of different ages, we do not expect a heavy volume of the hatching eggs of ratites from Canada to be imported into the United States as a result of this rule.

Any imports from Canada that might result from this rule could cause a further decline in the domestic prices of ratites in the United States. However, we expect that domestic ratite importers will benefit by having fewer restrictions on Canadian imports. Over the short term, the proposed changes in the regulations might have a minor adverse economic impact on domestic ostrich producers. Over the long term, we expect the domestic ratite industry to benefit from any imports that may occur because reduced ostrich prices could lead to larger domestic populations of ostriches, benefiting consumers of ostriches and ostrich products. A larger domestic ratite population could further enhance the economic viability of commercial ratite breeding, slaughter, feather, and leather markets.

We expect that the economic effect of allowing the importation of adult ostriches from all countries into the United States through the New York Animal Import Center will be insignificant because of the drastic decrease in the market prices of ostriches.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Regulatory Reform

This action is part of the President's Regulatory Reform Initiative, which, among other things, directs agencies to remove obsolete and unnecessary regulations and to find less burdensome ways to achieve regulatory goals.

List of Subjects in 9 CFR Part 92

Animal diseases, Imports, Livestock, Poultry and poultry products, Quarantine, Reporting and recordkeeping.

Accordingly, 9 CFR part 92 is amended as follows:

PART 92—IMPORTATION OF CERTAIN ANIMALS, BIRDS, AND POULTRY AND CERTAIN ANIMAL, BIRD, AND POULTRY PRODUCTS; REQUIREMENTS FOR MEANS OF CONVEYANCE AND SHIPPING CONTAINERS

1. The authority citation for part 92 continues to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 114a, 134a, 134b, 134c, 134d, 134f, 135, 136, and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.2(d).

§ 92.101 [Amended]

2. Section 92.101 is amended as follows:

a. By removing paragraph (b)(3)(ii).

b. By redesignating paragraphs as follows:

Old designation	New designation
(b)(3)(i) introductory text.	(b)(3) introductory text.
(b)(3)(i)(A)	(b)(3)(i)
(b)(3)(i)(B)	(b)(3)(ii)
(b)(3)(i)(C)	(b)(3)(iii)
(b)(3)(i)(D)	(b)(3)(iv)
(b)(3)(i)(D)(*1*)	(b)(3)(iv)(A)
(b)(3)(i)(D)(*2*)	(b)(3)(iv)(B)
(b)(3)(i)(D)(*3*)	(b)(3)(iv)(C)
(b)(3)(i)(E)	(b)(3)(v)
(b)(3)(i)(F)	(b)(3)(vi)
(b)(3)(i)(G)	(b)(3)(vii)
(b)(3)(i)(H)	(b)(3)(viii)
(b)(3)(i)(I)	(b)(3)(ix)
(b)(3)(i)(J)	(b)(3)(x)
(b)(3)(i)(K)	(b)(3)(xi)
(b)(3)(i)(L)	(b)(3)(xii)

c. By revising the introductory text of newly redesignated paragraph (b)(3) to read as set forth below.

d. In newly designated paragraph (b)(3)(vi), by removing the reference "(b)(3)(i)(D)" and adding "(b)(3)(iv)" in its place.

e. In newly designated paragraph (b)(3)(vii), by removing the reference "(b)(3)(i)(B)" and adding "(b)(3)(ii)" in its place, and by removing the reference "(b)(3)(i)(C)" and adding "(b)(3)(iii)" in its place.

f. In newly designated paragraph (b)(3)(x), the first sentence, by removing the reference "(b)(3)(i)(B)" and adding "(b)(3)(ii)" in its place, and by removing the reference "(b)(3)(i)(C)" and adding "(b)(3)(iii)" in its place.

g. In newly designated paragraph (b)(3)(x), the fourth sentence, by removing the reference "(b)(3)(i)(E)" and adding "(b)(3)(v)" in its place.

§ 92.101 General prohibitions; exceptions.

* * * * *

(b) * * *

(3) Except for ratites imported as zoological birds, and ratites and ratite hatching eggs imported from Canada in accordance with § 92.107, ratites and hatching eggs of ratites may not be imported into the United States unless the following conditions are met:

* * * * *

§ 92.102 [Amended]

3. Section 92.102(c) is amended by removing the reference "§ 92.105(a)" and adding "§ 92.105" in its place.

4. Section 92.103 is amended as follows:

a. In paragraph (a)(1), the first sentence, by removing the reference "92.214" and adding "92.107(b)" in its place.

b. By revising paragraphs (a)(1)(xiii), (a)(2)(iii), and (a)(2)(iv) to read as set forth below.

c. In paragraph (a)(2)(v), by removing "§ 92.101 (b)(3)(i)(G) and (b)(3)(i)(J)" and adding "§ 92.101(b)(3)" in its place; and by removing "§ 92.101 (b)(3)(i)(B) and (b)(3)(i)(C)" and adding "§ 92.101(b)(3)" in its place.

d. At the end of the section, by adding an OMB control number to read as set forth below.

§ 92.103 Import permits for birds; and reservation fees for space at quarantine facilities maintained by APHIS.

(a) * * *

(1) * * *

(xiii) In addition, the application for a permit to import ratites or hatching eggs of ratites, except for ratites and hatching eggs of ratites imported from Canada in accordance with § 92.107, shall specify the number of ratites or hatching eggs intended for importation, the size of the flock of origin, and the location of the premises where the flock of origin is kept; and shall state that, from the date of application through the date of export, APHIS representatives shall be granted access to the premises where the flock of origin is kept. (For ratites intended for importation as zoological birds, the flock of origin shall be the ratites intended for importation.)

(2) * * *

(iii) In addition, a permit to import ratites or hatching eggs of ratites, except for ratites or hatching eggs of ratites imported from Canada in accordance with § 92.107, will be denied or withdrawn unless APHIS representatives are granted access to the premises where the flock of origin is kept (or, in the case of zoological birds, to the premises where the birds are kept), from the date of the application for the permit through the date of export.

(iv) Except for ratites intended for importation as zoological birds and ratites and hatching eggs of ratites imported from Canada in accordance with § 92.107, a permit to import ratites or hatching eggs of ratites will be denied or withdrawn unless an APHIS representative has visited the premises where the flock of origin is kept within the 12-month period before the intended importation and has determined that the flock is pen-raised and contains sufficient breeding pairs to produce the number of ratites or hatching eggs intended for importation.

* * * * *

(Approved by the Office of Management and Budget under control number 0579–0040)

5. Section 92.104 is amended as follows:

a. By revising paragraphs (c)(2), (c)(8), (c)(13), (c)(14), (c)(15), (c)(16), (d)(2), (d)(9), (d)(10), and (d)(11) to read as set forth below.

b. At the end of the section, by adding an OMB control number to read as set forth below.

§ 92.104 Certificates for pet birds, commercial birds, zoological birds, and research birds.

* * * * *

(c) * * *

(2) That, except when the certificate is for zoological birds or ratites imported from Canada in accordance with § 92.107, the flock of origin is pen-raised and the ratites covered by the certificate were produced and maintained in that flock;

* * * * *

(8) That, except as provided in § 92.107 for ratites imported from Canada for immediate slaughter, the ratites were treated at least 3 days but not more than 14 days before being loaded for shipment to the United States with a pesticide of a type and concentration sufficient to kill ectoparasites on the ratites;

* * * * *

(13) That the number of ratites and hatching eggs of ratites exported from the flock of origin has not exceeded the ceiling required to be established under § 92.101(b)(3)(ix);

(14) That all the ratites and hatching eggs of ratites in the flock from which the ratites come were identified in accordance with § 92.101(b)(3);

(15) Except for ratites imported from Canada in accordance with § 92.107, the number of ratite laying hens in the flock from which the ratites come;

(16) For ratites required to be treated prior to shipment with a pesticide for ectoparasites, the certificate must also state the name, concentration, and date of administration of the pesticide used to treat the ratites;

* * * * *

(d) * * *

(2) That, except when the certificate is for hatching eggs of ratites imported from Canada in accordance with § 92.107, the flock of origin is pen-raised, and the hatching eggs covered by the certificate were produced by that flock;

* * * * *

(9) That the number of ratites and hatching eggs of ratites exported from the flock of origin has not exceeded the ceiling required to be established under § 92.101(b)(3)(ix);

(10) That all the ratites and hatching eggs of ratites in the flock from which the hatching eggs come were identified in accordance with § 92.101(b)(3);

(11) Except for hatching eggs of ratites imported from Canada in accordance with § 92.107, the number of ratite laying hens in the flock from which the hatching eggs come.

(Approved by the Office of Management and Budget under control number 0579–0040)

6. Section 92.105 is amended as follows:

a. By revising paragraph (a) to read as set forth below.

b. In paragraph (c), by revising the introductory text and paragraph (c)(1) to read as set forth below.

§ 92.105 Inspection at the port of entry.

(a) All commercial birds, zoological birds, and research birds, including hatching eggs of ratites, but excluding other ratites, imported into the United States, must be inspected by the port veterinarian at the Customs port of entry, which may be any international airport, or any land-border port within 20 miles of an international airport, serviced by Customs, as well as, for Canadian-origin hatching eggs of ratites, ports listed in § 92.107 (c). However, hatching eggs of ratites may be shipped, in bond, from the port of first arrival to the Customs port of entry at which they will be quarantined, for inspection, at that port.

* * * * *

(c) Ratites, other than hatching eggs of ratites, imported from any part of the world must be inspected at the Customs port of entry by a veterinary inspector of APHIS and, except as provided in § 92.107(b) for ratites imported from Canada, shall be permitted entry only at one of the following ports of entry:

(1) Ostriches:

(i) Up to 36 inches in height (as measured from the top of the head to the base of the feet) or 30 pounds in weight: New York, NY; Stewart Airport, Newburgh, NY; and Miami, FL.

(ii) Exceeding 36 inches in height or 30 pounds in weight: New York, NY, and Stewart Airport, Newburgh, NY.

* * * * *

§ 92.106 [Amended]

7. Section 92.106 is amended as follows:

a. In paragraph (b)(1), the first sentence, by adding the words, "except as provided in § 92.107," immediately following the words "any part of the world".

b. In paragraph (b)(2), the first sentence, by adding the words, "except as provided in § 92.107," immediately following the words "any part of the world".

8. Section 92.107 is amended as follows:

a. By adding the paragraph designation "(a)" immediately preceding the words "*In-bond shipments from Canada.*"

b. By adding new paragraphs (b) and (c) to read as follows:

§ 92.107 Special provisions.

* * * * *

(b) *Ratites from Canada.* Ratites that were hatched and raised in Canada or ratites that were legally imported into Canada and, upon arrival in Canada, were quarantined for a minimum of 28 days at a Canadian quarantine facility and remained in Canada for an additional 60 days following completion of quarantine may be imported into the United States:

(1) Without being quarantined upon arrival in the United States; and

(2) At any of the following ports of entry: Anchorage, AK; Fairbanks, AK; Los Angeles, CA; San Diego, CA; Denver, CO; Miami, FL; Tampa, FL; Atlanta, GA; Honolulu, HI; Eastport, ID; Chicago, IL; New Orleans, LA; Boston, MA; Baltimore, MD; Houlton, ME; Jackman, ME; Detroit, MI; Port Huron, MI; Sault Ste. Marie, MI; Minneapolis, MN; Raymond, MT; Sweetgrass, MT; Buffalo, NY; Champlain, NY; New York, NY; Stewart Airport, Newburgh, NY; Dunseith, ND; Pembina, ND; Portal, ND; Portland, OR; San Juan, PR; Houston,

TX; Highgate Springs, VT; Blaine, WA; Seattle, WA; and Sumas, WA; and

(3) If offered for entry at a Canadian land border port listed in § 92.203(b), without an import permit; and

(4) If consigned directly to slaughter from the port of entry, without being treated for ectoparasites within 3 to 14 days before shipment to the United States, as otherwise required by § 92.104(c)(8); and

(5) If in compliance with all of the applicable regulations of the U.S. Fish and Wildlife Service contained in Title 50, subchapter B, of the Code of Federal Regulations.

(c) *Ratite eggs from Canada.* Hatching eggs of ratites that were laid in Canada may be imported into the United States:

(1) Without being quarantined upon arrival in the United States; and

(2) At any of the ports of entry listed in paragraph (b)(2) of this section or authorized by § 92.105(a); and

(3) If offered for entry at a Canadian land border port listed in § 92.203(b), without an import permit; and

(4) If in compliance with all of the applicable regulations of the U.S. Fish and Wildlife Service contained in Title 50, subchapter B, of the Code of Federal Regulations.

Done in Washington, DC, this 19th day of December 1996.

A. Strating,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 701 and 707

Organization and Operations of Federal Credit Unions; Truth in Savings

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: The NCUA Board is implementing two provisions of the Economic Growth and Regulatory Paperwork Reduction Act of 1996. First, the Board is raising the threshold of credit union board of directors' approval of loans to officials from $10,000 to $20,000. Second, the Board is permanently exempting small, nonautomated credit unions from Truth in Savings compliance.

DATES: This final rule is effective December 27, 1996.

ADDRESSES: National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.

FOR FURTHER INFORMATION CONTACT: Sparky Conrey, Staff Attorney, Office of General Counsel, telephone (703) 518–6540, and Jodee Wuerker, Compliance Officer, Office of Examination and Insurance, telephone (703) 518–6360.

SUPPLEMENTARY INFORMATION:

(1) Loans to Officials

On September 30, 1996, the Economic Growth and Regulatory Paperwork Reduction Act of 1996 (the "Act") was enacted. Section 2306 of the Act amended sections 107(5)(A) (iv) and (v) of the Federal Credit Union Act, by raising the threshold of loans to officials that require credit union board of director approval from $10,000 to $20,000. 12 U.S.C. 1757(5)(A) (iv) and (v). These statutory provisions are currently implemented in section 701.21(d) (1) and (4) of NCUA's Rules and Regulations. 12 CFR 701.21(d) (1) and (4). The $10,000 amount is changed to $20,000 in these two sections. All other portions of the rules regarding loans to officials remain the same.

(2) Truth in Savings

Background

NCUA has previously extended the compliance date three times of part 707, which implements the Truth in Savings Act (TISA), for certain small, nonautomated credit unions. Each time, the NCUA Board took into consideration the limited resources of the exempted credit unions. The last extension was due to expire on January 1, 1997. 60 FR 57173 (November 14, 1995).

Section 2604(c) of the Act exempts from TISA requirements "any nonautomated credit union that was not required to comply with the [TISA] as of the date of enactment of the [Act], pursuant to the determination of the [NCUA] Board." The NCUA Board has previously exempted nonautomated and insufficiently automated credit unions with an asset size of $2 million or less as reported to, or determined by, NCUA. An exemption had been supported by NCUA, the Department of the Treasury, and credit union trade associations in Congressional hearings and other legislative action, citing the hardships that would befall the small, nonautomated credit unions if TISA compliance became mandatory. These hardships potentially include: increased mergers of the affected credit unions into larger credit unions; increased voluntary liquidations; loss of volunteer support; allocation of credit union resources from member services to compliance; the expense, complications, and logistics of automating in order to comply; and loss of credit union services to members. Subsequently, Congress provided a TISA exemption for small, nonautomated credit unions.

The NCUA Board is concerned with the continued viability of small credit unions and the provision of continued financial services to their members. Ten years ago, credit unions under $2 million in size made up about two-thirds (10,564) of all federally insured credit unions. Today, such credit unions number only 3,401, about thirty percent of federally insured credit unions. In addition, the assets of today's 3,401 smallest credit unions are .9 percent of total assets in all credit unions, while credit unions of $2 million or less accounted for 7.7 percent of total assets ten years ago. The average credit union today has $28 million in assets, compared to $5 million ten years ago.

Because the Act recognizes the difficulty that small credit unions face in complying with the many requirements of the TISA, especially the calculation requirements, statutory relief is provided. It is important to note that this relief is available to a very small segment of credit unions. Almost four-fifths of credit unions with $2 million or less in assets are automated or have in-house data processing. NCUA has determined that there are about 704 credit unions under $2 million in assets that report having manual recordkeeping systems. Analogously, NCUA has also determined that there are about 607 credit unions under $2 million in assets that have no compensated employees. (These numbers do not include the approximately 645 non-federally insured credit unions that do not submit 5300 reports.) The actual number of credit unions exempt from TISA and part 707 is estimated by NCUA staff to be fewer than 1,000. Although the statutory exemption is permanent in nature, NCUA encourages exempted credit unions to continue to comply with the spirit and intent of TISA by providing full and fair account disclosures to members. Even with the extension, many small, nonautomated credit union activities comply with the purposes of TISA: to enable credit union members and potential members to make informed decisions about credit union accounts and to make meaningful comparisons with accounts at other financial institutions.

Definition of Nonautomated

The NCUA Board has decided to implement the Act's exemption for nonautomated credit unions by

amending the coverage provisions of paragraph 707.1(c) and by adding a new Comment 707.1(c)–3 to Appendix C, Official Staff Interpretations. No application is necessary in order to obtain the exemption. However, as required by the Act, NCUA does determine a credit union's legibility for the exemption. Credit unions may contact the appropriate Regional Office to verify their use of the exemption.

By the term "nonautomated status" NCUA means those credit unions without adequate and sufficient in-house or vendor-provided computer or data processing capacity and capability to establish, operate and maintain a share and loan software program able to timely and accurately process all member transactions on all member accounts at the credit union. Thus, some exempted credit unions do have some computer capacity, such as a word processor or a computer with insufficient memory and power capabilities to operate a complete, up-to-date share and loan software program. Since these credit unions are not sufficiently automated for Truth in Savings purposes, it is the determination of the NCUA Board that such credit unions are entitled to the Act's exemption. NCUA generally has used the year-end NCUA Form 5300 report to determine the requisite nonautomation status and asset size for those credit unions filing Form 5300 reports that have been eligible for the previous TISA compliance date extensions. Credit unions which do not file Form 5300 reports are currently permitted to prove nonautomation status and asset size by other means, such as verified self-certifications, certifications by appropriate state supervisory authorities, and other equivalent forms of proof. In the future, NCUA will use a combination of these methods to determine eligibility for the TISA exemption.

Operation of Exemption

The Act authorizes the NCUA Board to determine the extent and operation of the TISA exemption. All credit unions that were exempt from TISA regulation as a result of the prior NCUA compliance date extensions as of September 30, 1996, are exempt. These are credit unions with $2 million or less in assets, after subtracting any nonmember deposits, that are nonautomated as determined by the NCUA Board. If any of these credit unions grow to have more than $2 million in assets as of December 31 of any year, the NCUA Board will require such credit unions to comply with TISA and part 707 on January 1 one year after the December 31st (in other words, the credit union will have at least one year to prepare for compliance). Similarly, if a credit union becomes sufficiently automated to operate a complete share and loan system, such credit union will be entitled to the same compliance phase-in period. For example, if a credit union grows to over $2 million in assets on December 31, 1997 (or if it becomes sufficiently automated on December 31, 1997), it must begin compliance with TISA and part 707 on January 1, 1999. The NCUA Board believes that a previously exempt small credit union will need time to draft account disclosures, install TISA compliance software into its share and loan system, test its share and loan system, and make other decisions regarding its automation. By granting at least one full year before the previously exempt credit union must comply with TISA, the Board believes that it is allowing sufficient time for such a credit union to ease into TISA compliance. Also, if a new credit union is chartered with less than $2 million in assets, it will be eligible for the exemption until it no longer meets exemption eligibility criteria.

(3) Regulatory Procedures

Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact a regulation may have on a substantial number of small credit unions (primarily those under $1 million in assets). This rule will not have a significant economic impact on a substantial number of small credit unions and therefore a regulatory flexibility analysis is not required.

Paperwork Reduction Act

NCUA has determined that the amendments do not increase paperwork requirements under the Paperwork Reduction Act of 1995 and regulations of the Office of Management and Budget (OMB). 60 FR 44978 (August 29, 1995).

Executive Order 12612

Executive Order 12612 requires NCUA to consider the effect of its actions on state interests. This regulation makes no significant changes with respect to state credit unions since a temporary exemption is being made permanent. Therefore the rule will not materially affect state interests.

Administrative Procedure Act

The amendments and interpretation made to this part are not subject to the notice and comment provisions of the Administrative Procedure Act (APA), 5 U.S.C. 551 et seq. The amendments and interpretation implement new effective statutory requirements. In addition, no major changes are contemplated, or made, by this action since a temporary exemption is merely being made permanent. Therefore, the NCUA Board has determined that, in this case, the APA notice and comment procedures for these amendments and interpretation are impracticable, unnecessary, and contrary to the public interest. 5 U.S.C. 553(b)(3)(B).

List of Subjects

12 CFR Part 701

Credit, Credit unions, Reporting and recordkeeping requirements.

12 CFR Part 707

Advertising, Credit unions, Consumer protection, Interest, Interest rates, Truth in savings.

By the National Credit Union Administration Board on December 19, 1996.

Becky Baker,

Secretary of the Board.

Accordingly, NCUA amends 12 CFR parts 701 and 707 as follows:

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

1. The authority citation for part 701 continues to read:

Authority: 12 U.S.C. 1752(5), 1755, 1756, 1757, 1759, 1761a, 1761b, 1766, 1767, 1782, 1784, 1787, 1789 and Public Law 101–73. Section 701.6 is also authorized by 31 U.S.C. 3717. Section 701.31 is also authorized by 15 U.S.C. 1601, et seq., 42 U.S.C. 1981 and 42 U.S.C. 3601–3610. Section 701.35 is also authorized by 12 U.S.C. 4311–4312.

2. Section 701.21 is amended by revising the first sentence in paragraph (d)(1) and paragraph (d)(4) is amended by revising the introductory text to read as follows:

§ 701.21 Loans to members and lines of credit to members.

* * * * *

(d) Loans and lines of credit to officials

(1) *Purpose.* Sections 107(5)(A) (iv) and (v) of the Act require the approval of the board of directors of the Federal credit union in any case where the aggregate of loans to an official and loans on which the official serves as endorser or guarantor exceeds $20,000 plus pledged shares. * * *

* * * * *

(4) *Board of Directors' review.* The board of directors shall, in any case, review and approve or deny an application on which an official is a

direct obligor, or endorser, cosigner or guarantor if the following computation produces a total in excess of $20,000:

* * * * *

PART 707—TRUTH IN SAVINGS

3. The authority citation for part 707 continues to read as follows:

Authority: 12 U.S.C. 4311.

4. Section 707.1 is amended by revising the first sentence of paragraph (c) to read as follows:

§ 707.1 Authority, purpose, coverage, and effect on state laws.

* * * * *

(c) Coverage. This part applies to all credit unions whose accounts are either insured by, or eligible to be insured by, the National Credit Union Share Insurance Fund, except for any credit union that has been designated as a corporate credit union by the National Credit Union Administration and any credit union that has $2 million or less in assets, after subtracting any nonmember deposits, and is determined to be nonautomated by the National Credit Union Administration. * * *

* * * * *

5. Appendix C to part 707 is amended under paragraph 707.1(c), by adding a new paragraph 3 to read as follows:

Appendix C to Part 707—Official Staff Interpretations

* * * * *

§ 707.1 Authority, Purpose, Coverage and Effect on State Laws.

* * * * *

(c) *Coverage*

* * * * *

3. *Nonautomated credit unions.* Nonautomated credit unions with an asset size of $2 million or less, after subtracting any nonmember deposits, are exempt from TISA and part 707. NCUA defines a "nonautomated credit union" as a credit union without sufficient data processing capability and capacity to establish, operate and maintain a share and loan software system to timely and accurately process all account transactions of all members. The nonautomated credit union exemption is available to all credit unions meeting the asset size and automation standards of this comment, including newly chartered credit unions. If any of the credit unions eligible for this exemption grow to have more than $2 million in assets as of December 31 of any year, the NCUA Board will require such credit unions to comply with TISA and part 707 on January 1 of one year after such credit union loses its exemption eligibility. Similarly, if a credit union becomes sufficiently automated to operate a complete share and loan system, such credit union will be entitled to the same compliance phase-in period.

BILLING CODE 7535–01–P

FEDERAL HOUSING FINANCE BOARD

12 CFR Part 900

[No. 96–92]

Description of Organization and Functions

AGENCY: Federal Housing Finance Board.

ACTION: Final rule.

SUMMARY: The Federal Housing Finance Board (Finance Board) is amending the description of the agency's organization and functions contained in its regulations, as required by the Freedom of Information Act (FOIA). The changes have been made to further the efficiency and productivity of the agency.

DATES: This final rule shall be effective on December 27, 1996.

FOR FURTHER INFORMATION CONTACT: David A. Guy, Associate General Counsel, Office of General Counsel, (202) 408–2536, Federal Housing Finance Board, 1777 F Street, NW. Washington DC 20006.

SUPPLEMENTARY INFORMATION: Pursuant to section 552(a) of the FOIA, the Finance Board is required to publish in the **Federal Register** a description of the agency's organization and functions. *See* 5 U.S.C. 552(a)(1)(A)–(B). A description of the Finance Board's organizations and functions appears in part 900 of the Code of Federal Regulations. *See* 12 CFR Part 900. This final rule is intended to give public notice of changes to the Finance Board's organization and allocation of functions. The changes have been made to further the efficiency and productivity of the agency.

The public notice-and-comment requirements of the Administrative Procedure Act (APA) do not apply to the regulatory amendments contained in this final rule because the amendments relate exclusively to the organization of the agency. *See* 5 U.S.C. 553(b)(1)(A). Therefore, these amendments are being adopted as a final rule, effective on the date of publication.

Because this rule will be not be issued in the form of a notice of proposed rulemaking, the provisions of the Regulatory Flexibility Act do not apply. *See* 5 U.S.C. 601.

List of Subjects in 12 CFR Part 900

Organization and functions (Government agencies).

Accordingly, title 12, chapter IX, part 900, Code of Federal Regulations, is hereby amended as follows:

PART 900—DESCRIPTION OF ORGANIZATION AND FUNCTIONS

1. The authority citation for part 900 continues to read as follows:

Authority: 5 U.S.C. 552; 12 U.S.C. 1422b(a).

2. Sections 900.12 through 900.15 are revised to read as follows:

§ 900.12 Office of the Managing Director.

(a) The Managing Director is the Finance Board's chief operating officer. By order of the Chairperson, the Managing Director has been delegated the authority and power necessary and convenient to effect the day-to-day management, functioning, and organization of the Finance Board, including the authority to appoint, remove, promote, direct, set compensation for, and pay Finance Board personnel. The Managing Director is authorized to execute documents on behalf of the Board of Directors, including regulations, resolutions, or orders duly passed by the Board of Directors. The Managing Director is also the Finance Board's Chief Information Officer.

(b) The Executive Secretariat is a division within the Office of the Managing Director. The Executive Secretary is the recording officer for the Board of Directors and is responsible for maintaining the Finance Board's records, including copies of all resolutions and rules adopted by the Board of Directors and orders issued by the Chairperson. The Executive Secretary also is responsible for the preparation and maintenance of the minutes or other records of all official actions and proceedings of the Board of Directors, and is responsible for the official seals of the Finance Board. This division also is responsible for the agency's Freedom of Information Act, Privacy Act, and Records Management Programs. The Executive Secretary is the primary liaison with the Office of the Federal Register.

(c) The District Banks Secretariat is a division within the Office of the Managing Director responsible for administering the election of directors of the Banks and for maintaining records on each of the Banks' policies and marketing activities.

VOL 61 ISS 250 DE 27 1996 UMI

§ 900.13 Office of Policy.

(a) The Office of Policy coordinates the Finance Board's policy development activities and provides advice to the Chairperson and the Board of Directors on the economic, financial, housing and community and economic development, and competitive environments in which the Bank System and its members operate. The responsibilities of the Office of Policy include:

(1) Analysis and modeling of the financial performance of the Banks;

(2) Collection and analysis of financial data in order to prepare the Bank System's annual combined financial reports and other periodic reports on Bank System operations;

(3) Collection and analysis of data on the housing and community and economic development activities of the Banks;

(4) Analysis of the Banks' performance under the Affordable Housing Program and the Community Investment Program;

(5)Analysis of policy issues arising under the Affordable Housing Program and the Community Investment Program;

(6) Preparation of the Monthly Survey of Rates and Terms of Conventional One-Family Nonfarm Mortgage Loans and determination of the conforming loan limit for Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac) purchases and guarantees; and

(7) Review of the Banks' quarterly dividend recommendations.

(b) The Office of Policy is the Finance Board's primary liaison with the Banks' Chief Financial Officers concerning financial management issues, the Banks' Community Investment Officers concerning community and economic development, the Banks' Advisory Councils concerning Bank System support of affordable housing, and the Bank System's fiscal agent, the Office of Finance. It prepares the annual reports to Congress and to the Banks' Advisory Councils concerning Bank System support for low-income housing and community development.

§ 900.14 Office of Supervision.

The Office of Supervision oversees the Banks, the Office of Finance and the Financing Corporation to ensure that they operate in a financially safe and sound manner, that the Banks are carrying out their housing and community and economic development finance mission and are in compliance with applicable statutes and regulations, as well as Finance Board policies and orders. The responsibilities of the Office of Supervision include:

(a) The conduct of examinations, at least annually, of the Banks, the Office of Finance and the Financing Corporation and the furnishing of reports thereon to the Chairpersons of their Boards of Directors;

(b) The follow-up and resolution of outstanding examination issues;

(c) Liaison with each Bank's audit committee and the review and evaluation of the work of each Bank's internal audit staff;

(d) The monitoring of Bank and System interest rate risk, financial trends and mission-related activities; and

(e) The review of Community Support Statements of Bank System members.

§ 900.15 Office of General Counsel.

The General Counsel is the chief legal officer of the Finance Board. The Office of General Counsel provides advice to the Board of Directors, the Chairperson, and other Finance Board officials, on interpretations of statutes and regulations. The Office of General Counsel prepares all legal documents on behalf of the Finance Board and prepares opinions, regulations, and memoranda of law. It represents the Finance Board in all administrative adjudicatory proceedings before the Board of Directors. The Chairman appoints the Finance Board's Designated Agency Ethics Official from the staff of the Office of General Counsel.

§ 900.16 Office of Inspector General.

The Inspector General is subject to, and operates under, the provisions of the Inspector General Act of 1978, as amended (5 U.S.C. app. 3). The Inspector General reports to and is under the general supervision of the Chairperson. The Inspector General's responsibilities under the Inspector General Act include providing policy direction for, and conducting, supervising, and coordinating audits and investigations relating to the programs and operations of the Finance Board, and recommending policies for promoting economy and efficiency in the administration of, or preventing and detecting fraud and abuse in, the Finance Board's programs and operations. The Inspector General prepares and furnishes to the Chairman for transmittal to the Congress semiannual reports on the activities of the Office of Inspector General.

§ 900.17 Office of Congressional Affairs.

The Office of Congressional Affairs is responsible for ensuring the effective coordination and communication with the Congress and interest groups, and for briefing the Chairperson, the other Directors, and the Managing Director, on legislative issues before Congress pertaining to the Finance Board, the Bank System, and the Financing Corporation.

§ 900.18 Office of Public Affairs.

The Office of Public Affairs is responsible for the dissemination of information about the Finance Board to the public and the news media. The Office of Public Affairs is the Finance Board's primary liaison with news reporters. It also responds to general inquiries about the activities of the Finance Board.

§ 900.19 Office of Resource Management.

The Office of Resource Management advises the Chairperson and the Board of Directors on internal agency management and organization and provides support services to the agency and to individual employees. The responsibilities of the Office of Resource Management include:

(a) Developing and managing agency policies and procedures governing employment and personnel action requirements, compensation and agency payroll requirements, travel, awards, insurance, retirement benefits, and other employee benefits;

(b) Providing support for all facility and supply requirements;

(c) Agency procurement and contracting programs;

(d) Agency financial management, budgeting and accounting; and

(e) Coordinating the design, programming, operation, and maintenance of the Finance Board's electronic data systems.

§§ 900.20, 900.21 [Removed]

3. Sections 900.20 and 900.21 are removed.

Dated: December 11, 1996.

By the Board of Directors of the Federal Housing Finance Board.

Bruce A. Morrison,

Chairman.

BILLING CODE 6725–01–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–NM–58–AD; Amendment 39–9852; AD 96–25–09]

RIN 2120–AA64

Airworthiness Directives; Fokker Model F28 Mark 0100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Fokker Model F28 Mark 0100 series airplanes, that requires modification of the thrust reverser doors, and replacement of the Collins multifunction display units (MFDU) with new MFDU's. This amendment also requires installation of a placard if the replacement of the MFDU is accomplished prior to modification of the thrust reverser door. This amendment is prompted by a report that cracks were found in the flanges of the main hinge fittings of the horizontal stabilizer, which were caused by higher than anticipated loads induced during thrust reverser operation. The actions specified by this AD are intended to ensure the structural integrity of the horizontal stabilizer by reducing the thrust reverser loads on the horizontal stabilizer.

DATES: Effective January 31, 1997.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 31, 1997.

ADDRESSES: The service information referenced in this AD may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tim Dulin, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2141; fax (206) 227–1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Fokker Model F28 Mark 0100 series airplanes was published in the **Federal Register** on December 4, 1995 (60 FR 62051). That action proposed to require modification of the thrust reverser doors. That action also proposed to require replacement of certain Collins multifunction display units (MFDU) with certain new MFDU's, and installation of a placard if the replacement of the MFDU is accomplished prior to modification of the thrust reverser door.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Support for the Proposal

One commenter supports the proposed AD.

Request To Revise Compliance Time

One commenter requests that the compliance time for accomplishing the modification be revised from the proposed "prior to the accumulation of 15,000 total flight cycles or within 1 year after the effective date of the AD, whichever is later," to "prior to the accumulation of 16,000 total flight cycles or within 2 years after the effective date of the AD, whichever is later." This commenter states that the interval for its regular heavy maintenance ("Q" check) is expected to be escalated in the near future to 16,000 flight hours/cycles; if the compliance time of the AD is extended likewise, it will allow this commenter to modify its fleet of affected airplanes during this regularly scheduled heavy maintenance interval. The commenter notes that, since the modification takes approximately 300 work hours to complete, it would be more economical to accomplish the modification during regularly scheduled maintenance, rather than having to schedule special times for the modification to be done. The commenter also states that, if it were required to bring its airplanes in for modification at a time other than the "Q" check interval, the associated costs would be far more than what the FAA indicated in its "cost impact" information that appeared in the preamble to the notice. Further, this commenter states that 6 of its 40 affected airplanes already have gone through their "Q" checks without having the modification installed; and if those 6 airplanes were required to be modified within 1 year, this commenter would sustain significant economic and logistical burdens.

The FAA does not concur with the commenter's request. The compliance time specified in the notice was developed in consultation with both the Rijksluchtvaartdienst (RLD), which is the airworthiness authority for the Netherlands, and Fokker. Based on fatigue test results and analysis of the effects of the thrust reverser loads on adjacent structure, the FAA has determined that 15,000 flight cycles is the maximum number of cycles that these airplanes can be allowed to operate prior to modification without compromising safety. The commenter has submitted no technical data to justify its request for an extension of this limit by 1,000 additional flight cycles. Although the FAA does consider the maintenance schedules of affected operators when developing appropriate compliance times for AD actions, it does not revise AD's merely to accommodate individual operators' maintenance schedules.

Additionally, the FAA disagrees with the commenter's statement that the modification takes 300 work hours to complete. The cost impact information that appeared in the preamble to the notice (and in this final rule, below) indicated that only 127 work hours were necessary to complete the modification. That figure was based on information provided by the manufacturer, and was conservatively estimated based on performing options that take the longest time to accomplish. Further, the manufacturer estimates that the total elapsed time necessary to accomplish the modification is only 67 hours, since more than one person can perform the work.

Conclusion

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

Cost Impact

The FAA estimates that 102 Fokker Model F28 Mark 0100 series airplanes of U.S. registry will be affected by this AD, that it will take approximately 127 work hours per airplane to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will cost approximately $19,000 per airplane. Based on these figures, the cost impact of the AD on U.S. operators is estimated to be $2,715,240, or $26,620 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish

VOL 61 ISS 250 DE 27 1996 UMI

those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–25–09 Fokker: Amendment 39–9852. Docket 95–NM–58–AD.

Applicability: Model F28 Mark 0100 series airplanes; serial numbers 11244 through 11460 inclusive, 11463 through 11469 inclusive, 11471, 11474, 11476, 11478, and 11479; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

(a) Prior to the accumulation of 15,000 total flight cycles, or within 1 year after the effective date of this AD, whichever occurs later, accomplish the requirements of paragraphs (a)(1) and (a)(2) of this AD concurrently, except as provided by paragraph (b) of this AD.

(1) Modify the thrust reverser doors in accordance with Fokker Service Bulletin SBF100–78–010, Revision 1, dated April 26, 1994; and

(2) Replace the Collins multifunction display units (MFDU) having part number (P/N) 622–8047–412 or 622–8047–422 with new MFDU's having P/N 622–8047–414 or 622–8047–423, respectively; as applicable; in accordance with Fokker Service Bulletin SBF100–31–036, dated February 7, 1994.

(b) Paragraph (a)(2) of this AD may be accomplished prior to paragraph (a)(1) of this AD provided that a placard is installed on the main instrument panel in accordance with Fokker Service Bulletin SBF100–31–038, dated April 26, 1994, and removed, prior to further flight, after accomplishment of the requirements of paragraph (a)(1) of this AD.

(c) For airplanes that have been modified in accordance with paragraphs (a)(1) and (a)(2) of this AD: No person may install a Grumman Aerospace aft engine cowling having part number 1159P41440 on any airplane unless it has been previously modified in accordance with Fokker Component Service Bulletin P41440–78–02, dated December 17, 1993, as revised by Fokker Component Service Bulletin Change Notification P41440–78–02/001, dated February 25, 1995.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished. Issued in Renton, Washington, on November 28, 1995.

(f) The actions shall be done in accordance with Fokker Service Bulletin SBF100–31–036, dated February 7, 1994; Fokker Service Bulletin SBF100–31–038, dated April 26, 1994; and Fokker Service Bulletin SBF100–78–010, Revision 1, dated April 26, 1994, which contains the following list of effective pages:

Page number	Revision level shown on page	Date shown on page
1–6, 8, 10, 11	1	April 26, 1994.
7, 9, 12–14 ...	Original	February 7, 1994.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on January 31, 1997.

Issued in Renton, Washington, on December 5, 1996.

S. R. Miller,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 96–NM–135–AD; Amendment 39–9857; AD 96–25–14]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model DC–10–10, –30, and –40 Series Airplanes, and KC–10 (Military) Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC–10–10, -30, and -40 series airplanes, and KC–10 (military) series airplanes, that requires repetitive high frequency eddy current (HFEC) inspections to detect cracks in the number 4 banjo fitting on the rear spar of the vertical stabilizer, and repair and modification of the vertical stabilizer, if necessary. It also requires the installation of a modification as terminating action for the repetitive inspections. This amendment is prompted by reports of failed attach

bolts and cracking found in the area of the number 4 banjo fitting, which were caused by higher than normal operating stresses. The actions specified by this AD are intended to prevent reduction in the structural integrity of this fitting due to failed bolts and cracking.

DATES: Effective January 31, 1997. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 31, 1997.

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Department C1–L51 (2–60). This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ron Atmur, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (310) 627–5224; fax (310) 627–5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC–10–10, –30, and –40 series airplanes, and KC–10 (military) series airplanes was published in the **Federal Register** on August 29, 1996 (61 FR 47375). That action proposed to require repetitive high frequency eddy current (HFEC) inspections to detect cracks in the number 4 banjo fitting on the rear spar of the vertical stabilizer, and repair and modification of the vertical stabilizer, if necessary. It also proposed to require the installation of a modification as terminating action for the repetitive inspections.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Request To Allow Use of Additional Service Information

Several commenters request that the proposal be revised to allow the terminating modification to be accomplished in accordance with earlier versions of McDonnell Douglas Service Bulletin DC10–54–096. Although the proposal only referenced Revision 03 of this service bulletin as the appropriate source of service information, these commenters contend that the modification as described in the original issue of the service bulletin (dated March 23, 1989), as well as Revision 01 (dated September 17, 1990) and Revision 02 (dated May 5, 1995), is equivalent to that described in Revision 03. Since certain of these commenters have already installed the modification on their airplanes in accordance with the earlier revisions of the service bulletin, they want to ensure that they will receive credit for having complied with the proposed terminating action.

The FAA concurs, and has included all of the revisions in final rule as acceptable sources of service information for compliance with the terminating modification requirements of the AD.

Conclusion

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change previously described. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the AD.

Cost Impact

There are approximately 376 Model DC–10–10, –30, and –40 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 230 airplanes of U.S. registry will be affected by this AD.

It will take approximately 2 work hours per airplane to accomplish each required inspection; the average labor rate is $60 per work hour. Based on these figures, the cost impact of the inspection requirement on U.S. operators is estimated to be $27,600, or $120 per airplane, per inspection.

It will take approximately 34 hours to accomplish the terminating modification. Required parts will cost approximately $3,875 per airplane for "Group 1" airplanes, and approximately $3,427 per airplane for "Group 2" airplanes. Based on these figures, the cost impact of the modification requirement on U.S. operators is estimated to be $5,915 per Group 1 airplane and $5,467 per Group 2 airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted. However, the FAA has been advised that some operators have already accomplished the terminating modification on airplanes in their fleets; therefore, the future cost impact of this AD is expected to be reduced by the amount associated with each previously modified airplane.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–25–14 McDonnell Douglas: Amendment 39–9857. Docket 96–NM–135–AD.

Applicability: Model DC–10–10, –30, and –40 series airplanes, and KC–10 (military) series airplanes; as listed in McDonnell Douglas Service Bulletin DC10–54–096, Revision 03, dated February 6, 1996; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduction in the structural integrity of the number 4 banjo fitting on the rear spar of the vertical stabilizer, which could ultimately result in a reduction in the ability to control the airplane during flight and ground operations, accomplish the following:

(a) Prior to the accumulation of 5,000 total landings, or within 1,500 landings after the effective date of this AD, whichever occurs later, perform a high frequency eddy current (HFEC) inspection to detect cracks in the upper and lower surface of the aft flange of the number 4 banjo fitting on the rear spar of the vertical stabilizer, in accordance with McDonnell Douglas Service Bulletin DC10–54–096, Revision 03, dated February 6, 1996.

(1) If no crack is found, repeat the HFEC inspection thereafter at intervals not to exceed 1,500 landings.

(2) If any crack is found, prior to further flight, repair the crack and install the modification in accordance with the service bulletin.

(b) Within 5 years after the effective date of this AD, modify the vertical stabilizer in the area of the number 4 banjo fitting on the rear spar, in accordance with any of the revisions of McDonnell Douglas Service Bulletin DC10–54–096 specified in TABLE 1 of this AD. Accomplishment of this modification constitutes terminating action for the repetitive HFEC inspections required by paragraph (a)(1) of this AD.

TABLE 1.—MCDONNELL DOUGLAS SERVICE BULLETIN DC10–54–096

Revision level	Issue date
(Original Issue)	March 23, 1989.
Revision 1	September 17, 1990.
Revision 2	May 5, 1995.
Revision 03	February 6, 1996.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The inspections shall be done in accordance with McDonnell Douglas Service Bulletin DC10–54–096, Revision 03, dated February 6, 1996. The modification shall be done in accordance with any of the following versions of McDonnell Douglas Service Bulletin DC10–54–096:

Revision level	Issue date
(Original Issue)	March 23, 1989.
Revision 1	September 17, 1990.
Revision 2	May 5, 1995.
Revision 03	February 6, 1996.

This incorporation by reference was approved by the Director of the **Federal Register** in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Department C1–L51 (2–60). Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on January 31, 1997.

Issued in Renton, Washington, on December 6, 1996.

S. R. Miller,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

14 CFR Part 39

[Docket No. 95–NM–271–AD; Amendment 39–9856; AD 96–25–13]

RIN 2120–AA64

Airworthiness Directives; Jetstream Model 4101 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Jetstream Model 4101 series airplanes, that requires a high frequency eddy current inspection to detect cracks of the boundary angle and joint angle of the rear pressure bulkhead, and repair, if necessary. This amendment also requires modification of the rear pressure bulkhead of the fuselage. This amendment is prompted by a report of fatigue cracking in the rear pressure bulkhead of the fuselage. The actions specified by this AD are intended to prevent such fatigue cracking, which could result in reduced structural integrity of the fuselage and, consequently, lead to the rapid decompression of the pressurized area of the airplane.

DATES: Effective January 31, 1997.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 31, 1997.

ADDRESSES: The service information referenced in this AD may be obtained from Jetstream Aircraft, Inc., P.O. Box 16029, Dulles International Airport, Washington, DC 20041–6029. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: William Schroeder, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2148; fax (206) 227–1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Jetstream Model 4101 airplanes was published as a supplemental notice of proposed rulemaking in the **Federal Register** on October 31, 1996 (61 FR 56169). That action proposed to require a high frequency eddy current inspection to detect cracks of the boundary angle and joint angle of the rear pressure bulkhead, and repair, if necessary. That action also proposed to require modification of the rear pressure bulkhead of the fuselage.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

Conclusion

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

Cost Impact

The FAA estimates that 40 Model 4101 airplanes of U.S. registry will be affected by this AD, that it will take approximately 40 work hours per airplane to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will be supplied by the manufacturer at no cost to the operators. Based on these figures, the cost impact of the AD on U.S. operators is estimated to be $96,000, or $2,400 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–25–13 JETSTREAM AIRCRAFT LIMITED: Amendment 39–9856. Docket 95–NM–271–AD.

Applicability: Model 4101 airplanes, constructors numbers 41004 through 41047 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent fatigue-related cracking in the rear pressure bulkhead, which could result in reduced structural integrity of the fuselage and, consequently, lead to the rapid decompression of the pressurized area of the airplane, accomplish the following:

(a) Prior to the accumulation of 10,000 total landings, or within 6 months after the effective date of this AD, whichever occurs later, accomplish paragraphs (a)(1) and (a)(2) of this AD, in accordance with Jetstream Service Bulletin J41–53–020, Revision 1, dated June 4, 1996.

(1) Perform a high frequency eddy current inspection to detect cracks of the boundary angle and joint angle of the rear pressure bulkhead, in accordance with the service bulletin. If any crack is detected, prior to further flight, repair it in accordance with a method approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate.

(2) Modify the rear pressure bulkhead of the fuselage (Jetstream Modification JM41382A), in accordance with the service bulletin.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspection and modification shall be done in accordance with Jetstream Service Bulletin J41–53–020, Revision 1, dated June 4, 1996. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Jetstream Aircraft, Inc., P.O. Box 16029, Dulles International Airport, Washington, DC 20041–6029. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington, or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on January 31, 1997.

Issued in Renton, Washington, on December 6, 1996.

S.R. Miller,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to all Boeing Model 767 series airplanes, that requires inspections of the components of the leading edge outboard slat; replacement of the control rod end, if necessary; and various follow-on actions. This amendment is prompted by reports of skewed panels of the outboard leading edge slat due to failure of a corroded rotary actuator or the control rod. The actions specified by this AD are intended to prevent such conditions, which could result in reduced controllability of the airplane and damage to or cracking of the leading edge slats or the fixed leading edge of the wing.

DATES: Effective January 31, 1997.

VOL 61 ISS 250 DEC 27 1996 UMI

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 31, 1997.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Kristin Larson, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington; telephone (206) 227–1760; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to all Boeing Model 767 series airplanes was published in the **Federal Register** on December 13, 1995 (60 FR 63992). That action proposed to require inspections of the components of the leading edge outboard slat; replacement of the control rod end, if necessary; and various follow-on actions.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Support for the Proposal

Two commenters support the proposed rule.

Request To Revise the Description of the Addressed Unsafe Condition

One commenter notes that the description of the cause of the addressed unsafe condition that appeared in the Summary and Discussion sections of the preamble to the notice states that "* * * the cause of the skewed panels is attributed to either corrosion of the rotary actuator, cracking of the control rod, or incorrect clearance of the overtravel stop * * *." The commenter suggests that a more accurate description of the cause would be "* * * failure of a corroded rotary actuator, due to excessive loads caused by the incorrect clearance of the overtravel stop, or failure of the control rod."

The FAA concurs and has revised the appropriate sections of this preamble to specify this language.

Requests To Extend the Compliance Time for Inspections Performed Previously

Several commenters request that the compliance time for paragraphs (a), (b), and (c) of the proposal be revised to allow credit for visual inspections performed previously within 6,000 hours time-in-service, or 18 months, whichever occurs later. One commenter submitted an identical request, but for inspections performed previously within 5,500 hours time-in-service. Two other commenters narrowed this request to apply to only paragraph (b) of the proposal. These commenters state that, as the NPRM is currently worded, it penalizes operators who promptly started accomplishing Boeing Service Bulletin 767–27A0137 after its issuance on May 18, 1995. These commenters assert that their suggested compliance times will coincide with the repetitive inspection requirements of the proposal.

The FAA concurs with the commenters' request to allow credit for all inspections accomplished prior to the effective date of this AD. The FAA has re-reviewed the recommended compliance time in the subject service bulletin and the proposed AD. The FAA does not intend that operators be penalized for accomplishing the actions specified in Boeing Service Bulletin 767–27A0137 in an expeditious manner. Although the service bulletin recommends that credit be allowed only for inspections accomplished previously within 3,000 hours time-in-service, the FAA finds that no data exist to warrant limiting credit for such inspections to 3,000 hours. Therefore, the FAA has removed the phrase "unless previously accomplished within the last 3,000 hours time-in-service prior to the effective date of this AD" from paragraphs (a), (b), and (c) of the final rule. In the case of this AD, if the initial inspection has been accomplished prior to the effective date of the AD, this AD does not require that it be repeated. However, the AD does require that repetitive inspections be conducted thereafter at intervals not to exceed 6,000 hours time-in-service, and that other follow-on actions be accomplished when indicated.

Request to Extend the Compliance Time for Slat Adjustment

One commenter requests that the compliance time for adjustment of the stop clearance, as specified in paragraph (a)(2) of the proposal, be extended from the proposed 500 hours time-in-service to 3,000 hours time-in-service. This commenter asserts that the time for accomplishing this adjustment of the slats with incorrect clearance at the overtravel stop should not be more stringent than the time for accomplishing the replacement of the rotary actuator if no clearance is found to exist (specified in proposed paragraph (a)(3) as 3,000 hours time-in-service).

The FAA does not concur with the commenter's request to extend the compliance time for the slat adjustment; nor does the FAA agree that the compliance time for adjustment of the slats is more stringent than that for replacement of the actuator and gearbox. Paragraph (a)(2) of the AD requires the proper adjustment of the stop clearance within 500 flight hours after the initial inspection if that inspection reveals that some clearance exists, but not the correct clearance; the inspection is then to be repeated thereafter at intervals of 6,000 hours time-in-service. However, the FAA points out that paragraph (a)(3) of the AD requires adjustment of the stop clearance immediately (prior to further flight) if the inspection reveals that no clearance exists; after this adjustment is accomplished, the replacement of the actuator and gearbox is required within 3,000 hours time-in-service. For cases where some clearance exists, the FAA finds a compliance time of 500 flight hours to be appropriate and warranted, since some clearance may continue to deteriorate until no clearance exists.

Requests to Defer Initial Inspections

Two commenters request that the compliance time for the initial inspections be deferred until Model 767 series airplanes have accumulated 10,000 total hours time-in-service, as recommended in Boeing Service Bulletin 767–27A0137, Revision 1, dated November 30, 1995. One of these commenters states that the history of the Model 767 fleet has shown that, for airplanes that have accumulated 10,000 total hours time-in-service or less, the amount and location of corrosion in the rotary actuators does not adversely affect their strength or function.

The FAA concurs with the commenters' request to defer the initial inspections. The FAA has reviewed and approved Revision 1 of Boeing Service Bulletin 767–27A0137, dated November 30, 1995, as discussed below. The FAA has revised the compliance time of the initial inspection requirements of paragraphs (a), (b), and (c) of the final rule to state "prior the accumulation of 10,500 total hours time-in-service since date of manufacture, or within 500

hours time-in-service after the effective date of this AD, whichever occurs later . . ." to coincide with the recommendations of the service bulletin.

Requests to Reference Boeing Service Bulletin 767–27A0137

Several commenters request that the FAA reference Boeing Service Bulletin 767–27A0137, Revision 1, dated November 30, 1995, as the appropriate source of service information for accomplishing the actions required by the proposal.

These commenters point out that, even though the proposal references the Boeing 767 Airplane Maintenance Manual (AMM), Chapter 27–81–20, as the appropriate source of service information, the proposed actions and compliance times of the proposal appear to be consistent with the recommendations of Boeing Service Bulletin 767–27A0137. Two of these commenters point out that the procedures described in the Boeing 767 AMM for accomplishing the inspection requirements of the proposal are not as detailed as those described in Boeing Service Bulletin 767–27A0137. The commenters contend that referencing the subject service bulletin will eliminate the operators' confusion as to which slats are to be inspected.

One of these commenters states that many operators have already accomplished the recommendations of Boeing Service Bulletin 767–27A0137, since it has been available for some time now. However, without specific reference to this service bulletin in the proposal, operators will be hesitant to indicate compliance with the AD without first submitting a request for an alternative method of compliance.

The FAA concurs with the commenters' request to reference Boeing Service Bulletin 767–27A0137 as the appropriate source of service information. The FAA has reviewed and approved Boeing Service Bulletin 767–27A0137, Revision 1, dated November 30, 1995. The service bulletin describes procedures for:

1. A visual inspection to verify proper clearance of the overtravel stop;
2. Adjustment of the stop clearance, and replacement of the rotary actuator and adjacent offset gearbox, if necessary;
3. Repetitive visual inspections to detect external signs of internal corrosion of the rotary actuator of the outboard leading edge slat;
4. Replacement of a certain earlier model rotary actuator with a certain later model rotary actuator, for certain airplanes;
5. Visual inspection(s) to verify proper installation of the control rods of the outboard leading edge slats; and
6. Tightening of the bolts or installing a new lockwire, if any bolt is loose or any lockwire is missing.

The final rule has been revised to include this service bulletin as an additional source of appropriate service information. The final rule also has been revised to indicate the specific numbers of the outboard leading edge slats that are to be inspected.

Operators should note that although the Boeing service bulletin indicates that certain procedures may be accomplished in accordance with an "operator's equivalent procedure," this AD does not permit such procedures to be used unless they have been approved as an alternative method of compliance under the provisions of paragraph (d) of the final rule. Since procedures may vary from operator to operator, the FAA would have no way of knowing whether an "equivalent" procedure would provide an acceptable level of safety unless it has been reviewed and verified in accordance with the alternative method of compliance approval process. New NOTES 3, 4, and 5 have been added to this final rule to clarify this information.

Request to Reference Original Version of Service Bulletin

Two commenters request that the proposed rule be revised to cite the original version of Boeing Alert Service Bulletin 767–27A0137, dated May 18, 1995, as an additional source of service information for accomplishing the actions specified in the AD. The FAA concurs and has revised the final rule to include a new "NOTE 2" to clarify this point.

Request to Revise the Reference to "New" Actuator

Several commenters note that paragraphs (b)(1)(i), (b)(2)(i), and (b)(2)(ii) of the proposal specify replacement of the actuator with a "new" actuator having part number (P/N) 256T2120–5 or later. One of these commenters suggests that, in lieu of the word "new," the language in the AD should use the term "serviceable," which would be a more accurate description. This same commenter states that a serviceable actuator, having P/N 256T2120–5 or later, is sufficient when it has been inspected according to the Component Maintenance Manual.

The FAA concurs with this suggestion and has revised the relevant wording of the final rule.

Request to Revise the Cost Impact Statement

One commenter questions the FAA's cost estimate presented in the preamble to the notice. The commenter points out that the cost estimate did not include the cost of replacement of the rotary actuators, having part number (P/N) 256T2120–3 or earlier, with a new rotary actuator, having P/N 256T2120–5 or later.

The FAA finds that clarification of the costs associated with the requirements of this AD is necessary. The FAA points out that the economic analysis of the AD is usually limited only to the cost of actions actually required by the rule. It does not consider the costs of "on condition" actions (e.g., "replace if any sign of internal corrosion is detected"), since those actions would be required to be accomplished, regardless of AD direction, in order to correct an unsafe condition identified in an airplane, and to ensure operation of that airplane in an airworthy condition, as required by the Federal Aviation Regulations.

Conclusion

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

Cost Impact

There are approximately 612 Model 767 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 213 airplanes of U.S. registry will be affected by this AD, that it will take approximately 14 work hours per airplane to accomplish the required inspections, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the AD on U.S. operators is estimated to be $178,920, or $840 per airplane, per inspection cycle.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various

VOL 61 ISS 250 DEC 27 1996 UMI

levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–25–18 Boeing: Amendment 39–9861. Docket 95–NM–244–AD.

Applicability: All Model 767 series airplanes, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced controllability of the airplane and damage to or cracking of the leading edge slats or the fixed leading edge of the wing, accomplish the following:

Note 2: Actions specified in this AD that were accomplished prior to the effective date of this AD in accordance with Boeing Alert Service Bulletin 767–27A0137, dated May 18, 1995, are considered acceptable for compliance.

(a) Prior to the accumulation of 10,500 total hours time-in-service, or within 500 hours time-in-service after the effective date of this AD, whichever occurs later: Perform a visual inspection to verify proper clearance of the overtravel stop of the outboard leading edge slats 2, 3, 4, 5, 8, 9, 10, and 11, in accordance with Part I of Boeing Service Bulletin 767–27A0137, Revision 1, dated November 30, 1995, or Chapter 27–81–20 of the Boeing 767 Airplane Maintenance Manual (AMM).

Note 3: Although the Boeing service bulletin indicates that the actions required by this paragraph may be accomplished in accordance with the "operator's equivalent procedure," this AD does not permit use of an "operator's equivalent procedure" unless it has been approved as an alternative method of compliance in accordance with paragraph (d) of this AD.

(1) If proper clearance exists, repeat the inspection for proper clearance thereafter at intervals not to exceed 6,000 hours time-in-service or 18 months, whichever occurs later.

(2) If clearance exists, but is incorrect, at the next convenient maintenance interval, but no later than 500 flight hours after accomplishment of the inspection, adjust the stop clearance for the slats in accordance with the service bulletin or AMM. Repeat the inspection for proper clearance thereafter at intervals not to exceed 6,000 hours time-in-service or 18 months, whichever occurs later.

(3) If no clearance exists (i.e., stop contact), prior to further flight, adjust the stop clearance for the slats in accordance with the service bulletin or AMM. After the adjustment, within 3,000 hours time-in-service or 1,500 flight cycles after accomplishing the inspection required by paragraph (a) of this AD, whichever occurs later, replace the rotary actuator and adjacent offset gearbox in accordance with the service bulletin or AMM. After replacement, repeat the inspection for proper clearance at intervals not to exceed 6,000 hours time-in-service or 18 months, whichever occurs later.

(b) Prior to the accumulation of 10,500 total hours time-in-service, or within 500 hours time-in-service after the effective date of this AD: Perform a visual inspection to detect external signs of internal corrosion of the rotary actuator of the outboard leading edge slats 2, 3, 4, 5, 8, 9, 10, and 11, in accordance with Part II of the Boeing Service Bulletin 767–27A0137, Revision 1, dated November 30, 1995, or Chapter 27–81–20 of the Boeing 767 AMM.

Note 4: Although the Boeing service bulletin indicates that the actions required by this paragraph may be accomplished in accordance with the "operator's equivalent procedure," this AD does not permit use of an "operator's equivalent procedure" unless it has been approved as an alternative method of compliance in accordance with paragraph (d) of this AD.

(1) If no sign of internal corrosion is detected, accomplish paragraph (b)(1)(i) or (b)(1)(ii) of this AD, as applicable.

(i) For airplanes on which a rotary actuator having part number (P/N) 256T2120–3 or earlier is installed: Within 4,000 flight hours after the effective date of this AD, replace that rotary actuator with a serviceable rotary actuator having P/N 256T2120–5 or later, in accordance with the service bulletin or AMM. After replacement, repeat the inspection of the rotary actuator at intervals not to exceed 6,000 flight hours or 18 months, whichever occurs later.

(ii) For airplanes on which a rotary actuator having P/N 256T2120–5 or later is installed: Repeat the inspection of the rotary actuator thereafter at intervals not to exceed 6,000 flight hours or 18 months, whichever occurs later.

(2) If any sign of internal corrosion is detected, accomplish paragraph (b)(2)(i) or (b)(2)(ii) of this AD, as applicable.

(i) For airplanes on which a rotary actuator having part number (P/N) 256T2120–3 or earlier is installed: Within 4,000 flight hours after the effective date of this AD, replace that rotary actuator with a serviceable rotary actuator having P/N 256T2120–5 or later, in accordance with the service bulletin or AMM. After replacement, repeat the inspection of the rotary actuator at intervals not to exceed 6,000 flight hours or 18 months, whichever occurs later.

(ii) For airplanes on which a rotary actuator having P/N 256T2120–5 or later is installed: Within 6,000 flight hours or 18 months after accomplishing the initial inspection required by paragraph (b) of this AD, replace that rotary actuator with a serviceable rotary actuator having P/N 256T2120–5 or later, in accordance with the service bulletin or AMM. After replacement, repeat the inspection required of the rotary actuator at intervals not to exceed 6,000 flight hours or 18 months, whichever occurs later.

(c) Prior to the accumulation of 10,500 total hours time-in-service, or within 500 hours time-in-service after the effective date of this AD: Perform a visual inspection to verify proper installation (including loose bolts and missing lockwires) of the control rods of the outboard leading edge slats 2, 3, 4, 5, 8, 9, 10, and 11, in accordance with Part III of the Boeing Service Bulletin 767–27A0137, Revision 1, dated November 30, 1995; or Chapter 27–81–20 of the Boeing 767 AMM.

Note 5: Although the Boeing service bulletin indicates that the actions required by this paragraph may be accomplished in accordance with the "operator's equivalent procedure," this AD does not permit use of an "operator's equivalent procedure" unless it has been approved as an alternative method of compliance in accordance with paragraph (d) of this AD.

(1) If all control rods are installed properly, repeat the inspection to verify proper installation thereafter at intervals not to exceed 6,000 flight hours or 18 months, whichever occurs later.

(2) If any bolt is loose or any lockwire missing, prior to further flight, tighten the bolt or install a new lockwire, in accordance

with the service bulletin or the AMM. Repeat the inspection to verify proper installation thereafter at intervals not to exceed 6,000 flight hours or 18 months, whichever occurs later.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 6: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspections and replacements shall be done in accordance with Boeing Service Bulletin 767–27A0137, Revision 1, dated November 30, 1995. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on January 31, 1997.

Issued in Renton, Washington, on December 11, 1996.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

---

14 CFR Part 39

[Docket No. 96–CE–12–AD; Amendment 39–9865; AD 96–26–02]

RIN 2120–AA64

Airworthiness Directives; FLS Aerospace (Lovaux) Ltd. OA7 Optica Series 300 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that applies to certain FLS Aerospace (Lovaux) Ltd. OA7 Optica series 300 airplanes equipped with a Hoffman fan, part number HO–E315/122EZ, and fan shaft extension. This AD requires replacing the fan shaft extension with one that incorporates Modification No. B2/MOD/047. The AD results from a quality control review that shows that the four counterbores on the fan shaft extension to engine attachment flange have excessive depths. The actions specified in this AD are intended to prevent cracks from forming in the fan shaft extension flange and subsequent structural failure of this area because of counterbores with excessive depth.

DATES: Effective January 13, 1997.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 13, 1997.

Comments for inclusion in the Rules Docket must be received on or before March 20, 1997.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket 96–CE–12–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Service information that applies to this AD may be obtained from FLS Aerospace (Lovaux) Ltd., Bournemouth International Airport, Christchurch, Dorset BH23 6NW, England; telephone 0202 500200; facsimile 0202 580567. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 96–CE–12–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Maurice Kuttler, Program Officer, Brussels Aircraft Certification Division, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B–1000 Brussels, Belgium; telephone (32 2) 508.2715; facsimile (32 2) 230.6899: or Mr. Robert W. Alpiser, Project Officer, Small Airplane Directorate, Airplane Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106; telephone (816) 426–6934; facsimile (816) 426–2169.

SUPPLEMENTARY INFORMATION:

Events Leading to Issuance of the Proposed AD

The Civil Airworthiness Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain FLS Aerospace (Lovaux) Ltd. OA7 Optica series 300 airplanes equipped with a Hoffman fan, part number (P/N) HO–E315/122EZ, and fan shaft extension. The CAA for the United Kingdom reports that a manufacturing process error could cause structural failure of the fan shaft extension.

This extension is attached to the engine propeller flange by six bolts. Of the six bushes on the propeller flange, four require a counterbore in the extension propeller flange. A quality control review of the manufacturing process has revealed that the depth of these counterbores on certain OA7 Optica 300 series airplanes equipped with a Hoffman fan, part number P/N HO–E315/122EZ, and fan shaft extension exceed 4.5 millimeters (mm). This could result in cracks forming in the propeller flange with subsequent structural failure of the fan shaft extension.

Applicable Service Information

FLS Aerospace Lovaux Mandatory Service Bulletin (MSB) No. B2/MSB/006, Issue: 1, dated August 22, 1994, specifies the following:

—measuring the depth of the four counterbores on the fan shaft extension to the engine attachment flange;

—inspecting the counterbores and propeller flange for cracks;

—incorporating Repair Drawing R 1299; and

—incorporating Modification B2/MOD/047 on the fan shaft extension.

The CAA of the United Kingdom classified this service bulletin as mandatory and issued CAA AD 010–08–94, in order to assure the continued airworthiness of these airplanes in the United Kingdom.

The FAA's Determination

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.19) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA of the United Kingdom has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA of the United Kingdom; reviewed all available information, including the service information and modification referenced above; and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

VOL 61 ISS 250 DE 27 1996 UMI

Explanation of the Provisions of This AD

Since an unsafe condition has been identified that is likely to exist or develop on other FLS Aerospace (Lovaux) Ltd. OA7 Optica series 300 airplanes of the same type design registered in the United States equipped with a Hoffman fan, P/N HO–E315/122EZ, and fan shaft extension, the FAA is issuing an AD. This AD requires replacing the fan shaft extension with one that incorporates Modification No. B2/MOD/047. Accomplishment of the modification would be in accordance with FL Aerospace Lovaux Modification Leaflet No. B2/MOD/047, dated August 31, 1994.

Differences Between This AD, Service Information, and the CAA AD

Both FLS Aerospace Lovaux Mandatory Service Bulletin (MSB) No. B2/MSB/006, Issue: 1, dated August 22, 1994, and CAA AD 010–08–94 specify the following:

—AT 50 HOURS TIME-IN-SERVICE (TIS): inspecting the fan shaft extension to engine attachment flange for cracks and replacing the fan shaft extension if any cracks are found; and measuring the depth of the four counterbores on the fan shaft extension to engine attachment flange incorporating Repair Drawing R 1299 if counterbores exceed a certain depth;

—AT 200 HOURS TIS: incorporating Modification B2/MOD/047 on the fan shaft extension.

Accomplishing the inspection, measurement, and possible repair allow the airplane to be operated until a Modification B2/MOD/047 fan shaft extension is installed. This AD only requires replacing the fan shaft extension. Since no airplanes are currently on the U.S. Register, the FAA has determined to require immediate fan shaft extension replacement on any aircraft obtaining a U.S. airworthiness certificate rather than require the inspection, measurement, and possible repair, and then require the replacement.

Cost Impact

None of the FLS Aerospace (Lovaux) Ltd. OA7 Optica series 300 airplanes affected by this action are on the U.S. Register. All airplanes included in the applicability of this rule currently are operated by non-U.S. operators under foreign registry; therefore, they are not directly affected by this AD action. However, the FAA considers this rule necessary to ensure that the unsafe condition is addressed in the event that any of these subject airplanes are imported and placed on the U.S. Register.

Should an affected airplane be imported and placed on the U.S. Register, accomplishment of the required replacement would take approximately 4 workhours at an average labor charge of $60 per workhour. Parts cost approximately $300 per airplane. Based on these figures, the total cost impact of this AD would be $540 per airplane that would become registered in the United States.

The Effective Date of This AD

Since this AD action does not affect any airplane that is currently on the U.S. register, it has no adverse economic impact and imposes no additional burden on any person. Therefore, notice and public procedures hereon are unnecessary and the amendment may be made effective in less than 30 days after publication in the **Federal Register**.

Comments Invited

Although this action is in the form of a final rule and was not preceded by notice and opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption "**ADDRESSES.**" All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 96–CE–12–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by Reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

96–26–02 FLS Aerospace (LOVAUX) LTD.: Amendment 39–9865; Docket 96–CE–12–AD.

Applicability: OA7 Optica Series 300 Airplanes (serial numbers 020, 021, and 022), certificated in any category, that are equipped with a Hoffman fan, part number HO–E315/122EZ, and fan shaft extension.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area

subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required prior to further flight after the effective date of this AD, unless already accomplished.

To prevent cracks from forming in the fan shaft extension flange and subsequent structural failure of this area because of counterbores with excessive depth, accomplish the following:

(a) Replace the fan shaft extension with one that incorporates Modification No. B2/MOD/047 in accordance with FL Aerospace Lovaux Modification Leaflet No. B2/MOD/047, dated August 31, 1994. This modification is referenced in FLS Aerospace Lovaux Mandatory Service Bulletin No. B2/MSB/006, Issue: 1, dated August 22, 1994.

(b) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Division, Europe, Africa, Middle East office, FAA, c/o American Embassy, 1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Division.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Brussels Aircraft Certification Division.

(d) The replacement required by this AD shall be done in accordance with FL Aerospace Lovaux Modification Leaflet No. B2/MOD/047, dated August 31, 1994. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from FLS Aerospace (Lovaux) Ltd., Bournemouth International Airport, Christchurch, Dorset BH23 6NW, England. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment (39–9865) becomes effective on January 13, 1997.

Issued in Kansas City, Missouri, on December 16, 1996.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 96–ANE–27; Amendment 39–9855; AD 96–25–12]

RIN 2120–AA64

Airworthiness Directives; Sundstrand T–62T–40C Series Auxiliary Power Units

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to Sundstrand T–62T–40C series auxiliary power units (APUs). This action requires removal from service of certain compressor wheels in accordance with a drawdown schedule, and replacement with serviceable parts, and establishes a new cyclic life limit for the existing compressor wheels. This amendment is prompted by reports of compressor wheel ruptures. The actions specified in this AD are intended to prevent compressor wheel rupture, which could result in an uncontained APU failure and damage to the aircraft.

DATES: Effective January 13, 1997.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 13, 1997.

Comments for inclusion in the Rules Docket must be received on or before February 25, 1997.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 96–ANE–27, 12 New England Executive Park, Burlington, MA 01803–5299.

The service information referenced in this AD may be obtained from Sundstrand Aerospace, 4400 Ruffin Rd., P.O. Box 85757, San Diego, CA 92186–5757; telephone (619) 627–6303, fax (619) 627–6473. This information may be examined at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Robert Baitoo, Aerospace Engineer, Los Angeles Aircraft Certification Office, FAA, Transport Airplane Directorate, 3960 Paramount Blvd., Lakewood, CA 90712–4137; telephone (310) 627–5245; fax (310) 627–5210.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) has received three reports of compressor wheels, installed on Sundstrand T–62T–40C series auxiliary power units (APUs), that ruptured prior to the published cyclic life limit. Of the three ruptures, two were uncontained. The investigation revealed that the compressor wheels ruptured due to low cycle fatigue. This condition, if not corrected, could result in compressor wheel rupture, which could result in an uncontained APU failure and damage to the aircraft.

The FAA has reviewed and approved the technical contents of Sundstrand Aerospace Service Bulletin (SB) No. SB–T–62T–49–120, Revision 2, dated November 5, 1996, Revision 1, dated September 9, 1996, and Original, dated July 22, 1996, that describe procedures for removal from service of certain compressor wheels in accordance with a drawdown schedule, and replacement with new design serviceable parts, and establishes a new cyclic life limit for existing compressor wheels.

Since an unsafe condition has been identified that is likely to exist or develop on other APUs of the same type design, this AD is being issued to prevent compressor wheel rupture. This AD requires removal from service of certain compressor wheels in accordance with a drawdown schedule, and replacement with serviceable parts, and establishes a new cyclic life limit for existing compressor wheels. The actions are required to be accomplished in accordance with the SB described previously.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All

VOL 61 ISS 250 DE 27 1996 UMI

communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 96–ANE–27." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–23–12 Sundstrand Aerospace: Amendment 39–9855. Docket 96–ANE–27.

Applicability: Sundstrand Aerospace Models T–62T–40C series auxiliary power units (APUs), with compressor wheel, Part Numbers (P/Ns) 162690–1, 165111–1, and 167200–1. These APUs are installed on but not limited to Aerospatiale Super Puma, Boeing 707 series, British Aerospace HS 748 series, Cessna 650 series, Convair 650 and 880 series, Dassault Aviation Falcon 20, 50 and 200 series, de Havilland DHC–7 and DHC–8 series, Embraer 120 series, Fokker F .27 series, Gulfstream Aerospace Corporation 159, 1159, and G–III series, Hawker 700 series, Lockheed Jetstar 731 series, Raytheon Corporate Jets, Inc. BAe 125 series, Sabreliner Corporation NA–265 series aircraft.

Note 1: This airworthiness directive (AD) applies to each APU identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For APUs that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent compressor wheel rupture, which could result in an uncontained APU failure and damage to the aircraft, accomplish the following:

(a) Remove from service compressor wheels in accordance with the procedures described in the Accomplishment Instructions of Sundstrand Aerospace Service Bulletin (SB) No. SB–T–62T–49–120, Revision 2, dated November 5, 1996, Revision 1, dated September 9, 1996, or Original, dated July 22, 1996, and the drawdown schedule described in Table 2 of Revision 2 only, dated November 5, 1996, and replace with serviceable parts.

(b) This AD establishes a new life limit of 6,000 cycles for existing uninstalled compressor wheels, identified as Sundstrand P/Ns 162690–1, 165111–1, and 167200–1.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles Aircraft Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Los Angeles Aircraft Certification Office.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the requirements of this AD can be accomplished.

(e) Thereafter, except as provided in paragraphs (c) and (d) of this AD, no alternative replacement time may be approved for compressor wheels, identified as Sundstrand P/Ns 162690–1, 165111–1, and 167200–1.

(f) The actions required by this AD shall be done in accordance with the following Sundstrand Aerospace SBs:

Document No.	Revision	Pages	Date
SB–T–62–T–49–120	2	1–9	Nov. 5, 1996
Total pages: 9.

Total pages: 9.			
SB–T–62–T–49–120	Original	1–9	July 22, 1996
Total pages: 9.			

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Sundstrand Aerospace, 4400 Ruffin Rd., P.O. Box 85757, San Diego, CA 92186–5757; telephone (619) 627–6303, fax (619) 627–6473. Copies may be inspected at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on January 13, 1997.

Issued in Burlington, Massachusetts, on December 4, 1996.

James C. Jones,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

FEDERAL TRADE COMMISSION

16 CFR Part 419

Trade Regulation Rule Concerning Games of Chance in the Food Retailing and Gasoline Industries

AGENCY: Federal Trade Commission.

ACTION: Repeal of rule.

SUMMARY: The Federal Trade Commission announces the repeal of the Trade Regulation Rule concerning Games of Chance in the Food Retailing and Gasoline Industries. The Commission has reviewed the rulemaking record and determined that due to changes in industry practices, the Rule no longer serves the public interest and should be repealed. This notice contains a Statement of Basis and Purpose for repeal of the Rule.

EFFECTIVE DATE: December 26, 1996.

ADDRESSES: Requests for copies of the Statement of Basis and Purpose should be sent to Public Reference Branch, Room 130, Federal Trade Commission, 6th Street and Pennsylvania Avenue N.W., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: John M. Mendenhall, Federal Trade Commission, Cleveland Regional Office, Suite 520A, 668 Euclid Avenue, Cleveland, Ohio 44114, (216) 522–4210.

SUPPLEMENTARY INFORMATION:

Statement of Basis and Purpose

I. Background

The Commission promulgated the Trade Regulation Rule concerning Games of Chance in the Food Retailing and Gasoline Industries (Games of Chance Rule), 16 CFR Part 419, on August 16, 1969 (34 FR 13302). The purpose of the Rule was to address abuses that were uncovered during Commission and Congressional investigation into the use of games of chance for promotional purposes in the food retailing and gasoline industries. In both industries, it appeared that the winning game pieces were being distributed in a manner not determined by chance but calculated to have maximum promotional impact. In order to prevent future abuses, the Rule required various pending-game and post-game disclosures, as well as certain procedures for operating a game of chance.

Pending-game disclosures included: (1) The number of prizes in each "category or denomination;" (2) the odds-of-winning each prize; (3) the number of retail outlets participating in the game; (4) the geographic area covered by the game; and (5) the end date. If the game extended beyond 30 days, the Rule required weekly updating of disclosures of the odds-of-winning and the number of prizes. Post-game disclosures included: (1) The list of winners and the amount or value of each prize; (2) the total number of game pieces distributed; (3) the number of prizes in each "category or denomination" that were made available; and (4) the number of prizes actually awarded. Procedural requirements included a hiatus between games; a prohibition against terminating a game prior to distribution of all game pieces; a prohibition against replenishing of game pieces or prizes during a game; and a three-year record-keeping requirement.

The Commission amended the Rule once in 1981. The amendments alleviated some reporting requirements, dropped certain requirements of the "winners list" provision, and shortened the required hiatus between games.[1]

After the 1981 amendments, advertising and broadcasting trade associations filed a petition seeking exemption from the disclosure requirements for broadcast advertising of games. The petition asserted that games of chance could not be advertised in the broadcast media if full disclosures regarding prizes and odds of winning were required. In response to the petition, the Commission granted a temporary exemption from disclosure requirements for broadcast advertising.[2]

In a related action, the Commission issued an Advance Notice of Proposed Rulemaking (ANPR) to request comments about whether the Commission should make the exemption permanent and whether to revise other aspects of the Rule.[3] The commenters who responded to the ANPR consisted of members of the supermarket, gasoline, advertising, game promotion, and broadcasting industries, and lawyers with experience in representing such industries.

Based upon comments received in response to the ANPR and the staff's analysis, the Commission published its Notice of Proposed Rulemaking (NPR).[4] The major proposals of the NPR were to amend the Rule to: (1) drop certain disclosures in advertising and promotional materials; (2) raise the threshold for winners lists disclosures to prizes of $50.00 and over; (3) permit replenishment of prize game pieces; and (4) drop the waiting period required between games. In 1995, the Presiding Officer re-opened the record for additional comments, particularly regarding whether there was a continuing need for this Rule.[5]

The Commission received seven comments in response to the NPR and seven in response to the 1995 request for additional comments. These commenters included members of the advertising, broadcasting, game promotion, and game user industries.[6] A number of these commenters urged rescission of the Rule, stating that it discriminated unfairly against certain types of retailers and that there was no record of abuse to justify retaining the Rule.[7] Others urged retention of a modified Rule in order to protect consumers from possible deception.[8] Finally, some commenters stated that if the Commission were to retain the Rule, it should be expanded to include other

[1] 16 CFR 419.1(e), -(f) (1995); 46 FR 36840 (July 16, 1981).

[2] 48 FR 1046 (Jan. 10, 1983).

[3] 48 FR 265 (Jan. 4, 1983).

[4] 53 FR 39103 (Oct. 5, 1988).

[5] 60 FR 38474 (July 26, 1995).

[6] Those filing comments on the NPR included: The Promotion Marketing Association of America, Inc.; CBS; Leo Burnett Company, Inc.; Association of Retail Marketing Services; Incentive Federation, Inc.; Producers Alliance on Rulemaking; and the Food Marketing Institute. No prospective witness filed a request to testify at a hearing, and the Presiding Officer therefore issued a Notification of Cancellation of Public Hearings and Rebuttal Period. 53 FR 39103 (1988). Parties responding to the 1995 notice re-opening the record included: the Food Marketing Institute; the Minnesota Service Station and Convenience Store Association; the National Association of Broadcasters; the National Association of Convenience Stores; The Promotion Marketing Association of America, Inc.; Society of Independent Gasoline Marketers of America; and Triplex Marketing, Inc.

[7] Those urging rescission included: the Food Marketing Institute; the National Association of Convenience Stores; Society of Independent Gasoline Marketers of America; and The Promotion Marketing Association of America, Inc.

[8] Producer's Alliance on Rulemaking; Triplex Marketing, Inc.; and the Minnesota Service Station and Convenience Store Association.

VOL 61 ISS 250 DE 27 1996 UMI

industries in order to remove the discriminatory effect against grocery stores and gasoline stations.[9] As with the response to the ANPR, the Commission received no comments from any public interest groups, government agencies or consumers.

The Final Staff Report [10] and the Presiding Officer's Report [11] on the proposed rulemaking both recommended rescission of the Rule. The reports were placed on the public record and public comments were invited.[12] No public comments were received on the reports and their joint recommendation to the Commission to rescind the Games of Chance Rule. The reasons for repeal of the Rule, as set forth in these two reports, are summarized below.

II. Basis for Repeal of Rule

The Commission has determined to repeal the Games of Chance Rule based on an analysis of the rulemaking record. The Commission bases its rescission on the following reasons:

1. In the 27 years since the Rule was promulgated, there have been no enforcement actions for violations of the Rule. It appears that the abuses that prompted adoption of this Rule have largely disappeared.

2. The Rule has become outdated. It covers only a limited sector of retail businesses that use games of chance in their promotions. During the 1960s, grocery stores and gasoline stations were the primary users of games. Today, however, businesses not covered by the Rule, such as fast food restaurants and soft drink bottlers, use games of chance as much as, or even more often than, those that are covered by the Rule. Generally, even businesses that are not covered voluntarily make some of the more important required disclosures, such as the prizes offered and the odds of winning them.

3. The Rule may have an adverse effect on businesses that must comply with all of the Rule's requirements, but are competing with other firms that are not regulated by the Rule. In recent years, the distinctions between types of retailers have become blurred. Many stores other than traditional grocery stores now sell food items, and grocery stores often sell prepared food like restaurants. Thus, although various retailers sell food, only grocery stores must incur costs to comply with the Rule. This disparity in treatment could be addressed by expanding the Rule to cover all retailers using games of chance. There is, however, no evidentiary basis in the record for expansion.

4. The states are in a good position to control the activities of retailers operating games of chance because such retailers have a physical presence in the states where they do business. Many states traditionally have been involved in the oversight of games of chance and sweepstakes, particularly where such games may violate a state's public policy against commercial lotteries.

5. This rulemaking has generated very little interest, indicating a lack of importance of this Rule in today's marketplace.[13] Significantly, no comments were filed in response to the recommendation of the Presiding Officer's Report and the Final Staff Report that the Commission repeal the Games of Chance Rule.

All of these reasons indicate that the Rule is outdated and no longer necessary to protect consumers. It appears that the costs of the Rule now outweigh its benefits. Should abuses recur in the future, both the Commission and the states can use case-by-case law enforcement to prosecute those engaging in unfair or deceptive practices in the use of games of chance.

III. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), 5 U.S.C. 601–12, requires that the agency conduct an analysis of the anticipated impact of the repeal of the Rule on small businesses.[14] The purpose of a regulatory flexibility analysis is to ensure that the agency considers the impact of a regulatory action on small entities and examines regulatory alternatives that could achieve the regulatory purpose while minimizing burdens on small entities. However, Section 605 of the RFA, 5 U.S.C. 605, provides that such an analysis is not required if the agency head certifies that the regulatory action will not have a significant economic impact on a substantial number of small entities.

Because the Games of Chance Rule covers retail food stores and gasoline stations, it may affect a substantial number of small entities. However, repeal of the Rule will not have a significant economic impact upon such entities. Disclosures and record-keeping requirements that are eliminated may involve a small cost savings to such retailers, but the effect will not be significant. Grocery stores and gasoline stations using games of chance, however, will be able to continue making those disclosures deemed most important to their customers or that are required by state law. Moreover, the Commission is not aware of any existing federal laws or regulations that would conflict with repeal of the Rule. Therefore, based on available information, the Commission certifies that repeal of the Games of Chance Rule will not have a significant economic impact on a substantial number of small entities.

IV. Paperwork Reduction Act

The Games of Chance Rule imposes third-party disclosure and record-keeping requirements that constitute information collection requirements for which the Commission has obtained clearance under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, Office of Management and Budget (OMB) Control Number 2084–0067. Accordingly, repeal of the Rule would eliminate any burdens on the public imposed by these disclosure and recordkeeping requirements.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Chapter I

[Docket No. 96N–0094]

Uniform Compliance Date for Food Labeling Regulations

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is establishing January 1, 2000, as the uniform compliance date for food labeling regulations that are issued between January 1, 1997, and December 31, 1998. FDA has periodically announced uniform compliance dates for new food labeling requirements to minimize the economic impact of label changes. In 1992, FDA suspended this practice pending the issuance of regulations implementing the Nutrition Labeling and Education Act of 1990 (the 1990 amendments). FDA recently reinstated this practice of with the establishment of a uniform compliance date of January 1, 1998.

DATES: Effective December 27, 1996; written comments by March 13, 1997.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Center for Food Safety and Applied Nutrition (HFS–150), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–205–4561.

SUPPLEMENTARY INFORMATION: FDA periodically issues regulations requiring changes in the labeling of food. If the effective dates of these labeling changes were not coordinated, the cumulative economic impact on the food industry of having to respond separately to each change would be substantial. Therefore, the agency periodically has announced uniform compliance dates for new food labeling requirements (see e.g., the **Federal Registers** of October 19, 1984 (49 FR 41019) and December 24, 1996 (61 FR 67710). Use of a uniform compliance date provides for an orderly and economical industry adjustment to new labeling requirements by allowing sufficient lead time to plan for the use of existing label inventories and the development of new labeling materials. This policy serves consumers' interests as well because the cost of multiple short-term label revisions that would otherwise occur would likely be passed on to consumers in the form of higher prices.

During the 1980's and into the early 1990's, FDA periodically issued final rules announcing new uniform compliance dates for food labeling regulations. The agency suspended the issuance of uniform compliance date final rules in 1992 because of the pending issuance of a number of new final regulations implementing the 1990 amendments. Most of these regulations are now in place and effective.

In the **Federal Register** of April 15, 1996 (61 FR 16422), FDA issued a proposal entitled "Uniform Compliance Date for Food Labeling Regulations." In that document, FDA, among other things, proposed to reinstate its practice of periodically issuing uniform compliance dates as final rules. The comments to the proposal fully supported the agency's doing so. With the publication of this final rule, FDA is reinstating this practice.

The agency has determined under 21 CFR 25.24(a)(11) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

FDA has examined the economic implications of this final rule under Executive Order 12866 and the Regulatory Flexibility Act (5 U.S.C. 601–612). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select the regulatory approach that maximizes net benefits (including potential economic, environmental, public health and safety effects; distributive impacts; and equity). Executive Order 12866 classifies a rule as significant if it meets any one of a number of specified conditions, including having an annual effect on the economy of $100 million or adversely affecting in a material way a sector of the economy, competition, or jobs, or if it raises novel legal or policy issues. If a rule has a significant impact on a substantial number of small entities, the Regulatory Flexibility Act requires agencies to analyze options that would minimize the economic impact of that rule on small entities.

The establishment of a uniform compliance date does not impose either costs or benefits. For future labeling requirements, FDA will assess the costs and benefits of the uniform compliance date as well as the options of setting alternative dates, especially with regard to the impact on small entities. Therefore, the agency finds that the final rule is not a significant rule as defined by Executive Order 12866. Similarly, the agency certifies that the final rule will not have a significant economic impact on a substantial number of small entities. It has also determined that the rule is not a major rule for the purpose of congressional review (Pub. L. 104–121).

This action is not intended to change existing requirements for compliance dates contained in final rules published before publication of this final rule. Therefore, all final FDA regulations published in the **Federal Register** before December 27, 1996 will still go into effect on the date stated in the respective final rule.

The agency generally encourages industry to comply with new labeling regulations as quickly as feasible, however. Thus, when industry members voluntarily change their labels, it is appropriate that they incorporate any new requirements that have been published as final regulations up to that time.

Because FDA has already provided notice and an opportunity for comment on the practice of establishing uniform compliance dates by issuance of a final rule announcing the date, it finds any further rulemaking unnecessary. Nonetheless, under 21 CFR 10.40(e)(1), FDA is providing an opportunity for comment on whether this uniform compliance date should be modified or revoked.

Interested persons may, on or before March 13, 1997 submit to the Dockets Management Branch (address above) written comments regarding this final rule. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday though Friday. After its review of any comments received to this final rule, FDA will either publish a notice providing its conclusions concerning the comments or will initiate notice and comment rulemaking to modify or revoke the uniform compliance date established by this final rule.

The new uniform compliance date will apply only to final FDA food labeling regulations that require changes in the labeling of food products and that publish after January 1, 1997, and before January 1, 1999. Those regulations will specifically identify January 1, 2000, as their compliance date. All food products subject to the January 1, 2000, compliance date must comply with the

VOL 61 ISS 250 DE 27 1996 UMI

appropriate regulations when initially introduced into interstate commerce on or after January 1, 2000. If any food labeling regulation involves special circumstances that justify a compliance date other than January 1, 2000, the agency will determine for that regulation an appropriate compliance date, which will be specified when the final regulation is published.

Dated: December 20, 1996.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

[FR Doc. 96–32884 Filed 12–26–96; 8:45 am]

BILLING CODE 4160–01–F

21 CFR Parts 510 and 522

Animal Drugs, Feeds, and Related Products; Fomepizole

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Orphan Medical, Inc. The NADA provides for intravenous use of fomepizole solution as an antidote for ethylene glycol poisoning in dogs.

EFFECTIVE DATE: December 27, 1996.

FOR FURTHER INFORMATION CONTACT: Marcia K. Larkins, Center for Veterinary Medicine (HFV–112), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–0614.

SUPPLEMENTARY INFORMATION: Orphan Medical, Inc., 13911 Ridgedale Dr., suite 475, Minnetonka, MN 55305, is sponsor of NADA 141–075, which provides for the use of Antizol-Vet™ (sterile injectable fomepizole solution) for use as an antidote for ethylene glycol (antifreeze) poisoning in dogs who have ingested or are suspected of having ingested ethylene glycol. The drug is for veterinary prescription use only. The NADA is approved as of November 25, 1996, and the regulations are amended in part 522 (21 CFR part 522) by adding a new § 522.1004 to reflect the approval. The basis of approval is discussed in the freedom of information summary.

Orphan Medical, Inc., has not previously been added to the list of sponsors of approved applications in § 510.600(c) (21 CFR 510.600(c)). At this time, § 510.600(c)(1) and (c)(2) are amended to include entries for the firm.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Under section 512(c)(2)(F)(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(c)(2)(F)(i)), this approval qualifies for 5 years of marketing exclusivity beginning November 25, 1996, because no active ingredient (including any ester or salt of the active ingredient) has been previously approved in any other application filed under section 512(b)(1) of the act.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 522

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 510 and 522 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 510 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 512, 701, 721 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 379e).

2. Section 510.600 is amended in the table in paragraph (c)(1) by alphabetically adding a new entry for "Orphan Medical, Inc.," and in the table in paragraph (c)(2) by numerically adding a new entry for "062161" to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
* * *	* * * *
Orphan Medical, Inc., 13911 Ridgedale Dr., suite 475, Minnetonka, MN 55305	062161
* * *	* * * *

(2) * * *

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS

3. The authority citation for 21 CFR part 522 continues to read as follows:

Authority: Sec. 512 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b).

4. New § 522.1004 is added to read as follows:

§ 522.1004 Fomepizole.

(a) *Specifications.* Two vials, one containing 1.5 grams fomepizole (1.5 milliliter of 1.0 gram fomepizole per milliliter sterile aqueous solution), and one vial containing 30 milliliters of 0.9 percent sodium chloride injection USP (as a diluent).

(b) *Sponsor.* See 062161 in § 510.600(c) of this chapter.

(c) *Conditions of use in dogs*—(1) *Amount.* 20 milligrams per kilogram initially, 15 milligrams per kilogram at 12 and 24 hours, and 5 milligrams per kilogram at 36 hours.

(2) *Indications for use.* As an antidote for ethylene glycol (antifreeze) poisoning in dogs who have ingested or are suspected of having ingested ethylene glycol.

(3) *Limitations.* Administer intravenously. For use by or on the order of a licensed veterinarian.

Dated: December 16, 1996.

Stephen F. Sundlof,

Director, Center for Veterinary Medicine.

[FR Doc. 96–32883 Filed 12–26–96; 8:45 am]

BILLING CODE 4160–01–F

21 CFR Parts 556 and 558

Animal Drugs, Feeds, and Related Products; Tilmicosin Phosphate Type A Medicated Article

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Elanco Animal Health. The NADA provides for the use of a Type A medicated article containing tilmicosin phosphate in manufacturing a Type B or Type C medicated feed indicated for the control of swine respiratory disease associated with certain bacterial organisms.

EFFECTIVE DATE: December 27, 1996.

FOR FURTHER INFORMATION CONTACT: George K. Haibel, Center for Veterinary Medicine (HFV–133), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–1644.

SUPPLEMENTARY INFORMATION: Elanco Animal Health, A Division of Eli Lilly and Co., Lilly Corporate Center, Indianapolis, IN 46285, filed NADA 141–064, which provides for the use of a Type A medicated article containing 90.7 grams (g) of tilmicosin (as tilmicosin phosphate) per pound in manufacturing a Type C medicated feed (181.8 g to 363.6 g of tilmicosin per ton) indicated for the control of swine respiratory disease associated with *Actinobacillus pleuropneumoniae* and *Pasteurella multocida.* The NADA is approved as of December 27, 1996, and the regulations are amended by adding new § 558.618 to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In addition, the agency is amending 21 CFR 556.735 to establish a tolerance for residues of tilmicosin in edible swine tissues. As discussed in the freedom of information summary, parent tilmicosin was selected as the marker residue, and liver as the target tissue, for determination of tilmicosin residues in edible swine tissues.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Under section 512(c)(2)(F)(ii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(c)(2)(F)(ii)), this approval qualifies for 3 years of marketing exclusivity for the use of tilmicosin in swine beginning December 27, 1996, because the application contains substantial evidence of the effectiveness of the drug involved, any studies of animal safety, or, in the case of food producing animals, human food safety studies (other than bioequivalence or residue studies) required for the approval of the application and conducted or sponsored by the applicant.

A high performance liquid chromatographic method is available to determine the presence and amount of the marker residue in swine liver. In addition, a high performance liquid chromatographic/mass spectrometric method is available to confirm the presence of the marker residue in liver. Both methods have been validated by FDA and the U.S. Department of Agriculture and are for regulatory purposes. The methods are available for public inspection at the Dockets Management Branch (address above) and are attached to the freedom of information summary for this NADA. Requests for copies of these methods should be made under the Freedom of Information Act.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Tilmicosin phosphate is a new animal drug used in a Type A medicated article to make Type B or Type C medicated feeds. Tilmicosin phosphate is a Category II drug as defined in 21 CFR 558.3(b)(1)(ii). Therefore, as provided in 21 CFR 558.4(b), an approved Form FDA 1900 is required for making a Type B or Type C medicated feed containing tilmicosin phosphate as in the approved subject NADA and in newly added § 558.618. Under section 512(m) of the act, as amended by the Animal Drug Availability Act of 1996 (ADAA), Pub. L. 104–250, medicated feed applications have been replaced by feed mill licensing.

Tilmicosin phosphate is limited to use under the professional supervision of a licensed veterinarian. It is the first veterinary feed directive (VFD) drug to be approved since the enactment of the ADAA. Pending issuance of regulations to implement veterinary feed directives, Congress directed FDA to set forth in the new animal drug approval notice required by section 512(i) of the act any necessary conditions relating to the

VOL 61 ISS 250 DE 27 1996 UMI

labeling, advertising, distribution, holding, and use of a VFD drug. Accordingly, this regulation sets forth necessary conditions for tilmicosin phosphate (NADA 141–064) including the information that shall be included in a VFD:

•The name, address, and phone number of the veterinarian and the client;

•Identification of the animals to be treated, including, identification of the species, number of animals, and the location of the animals;

•Date of treatment and, if different, date of prescribing the VFD drug;

•The condition or disease being diagnosed or treated;

•Name of the animal drug;

•Level of animal drug in the feed and the amount of feed;

•Feeding instructions with withdrawal time;

•Any special instructions and cautionary statements necessary for use of the drug in conformance with the approval;

•Expiration date of the VFD;

•Number of refills, if permitted by the approval;

•Signature of the veterinarian; and

•The veterinarian's license number and name of the State issuing the license.

At such time as FDA finalizes general regulations governing VFD drugs, the general regulations may supersede certain specific VFD requirements of this approval regulation.

List of Subjects

21 CFR Part 556

Animal drugs, Foods.

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 556 and 558 are amended as follows:

PART 556—TOLERANCES FOR RESIDUES OF NEW ANIMAL DRUGS IN FOOD

1. The authority citation for 21 CFR part 556 continues to read as follows:

Authority: Secs. 402, 512, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 342, 360b, 371).

2. Section 556.735 is revised to read as follows:

§ 556.735 Tilmicosin.

A tolerance is established for residues of parent tilmicosin (marker residue) in liver (target tissue) of cattle at 1.2 parts per million (ppm) and of swine at 7.2 ppm.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

3. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: Secs. 512, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b, 371).

4. Section 558.4 is amended in paragraph (d) in the "Category II" table by alphabetically adding a new entry for "Tilmicosin" to read as follows:

§ 558.4 Medicated feed applications.

* * * * *

(d) * * *

CATEGORY II

Drug	Assay limits percent[1] Type A	Type B maximum (100x)	Assay limits percent[1] Type B/C[2]
*	*	*	*
Tilmicosin	90—110	18.2 g/lb (4.0 %).	85—115

[1] Percent of labeled amount.

[2] Values given represent ranges for either Type B or Type C medicated feeds. For those drugs that have two range limits, the first set is for a Type B medicated feed and the second set is for a Type C medicated feed. These values (ranges) have been assigned in order to provide for the possibility of dilution of a Type B medicated feed with lower assay limits to make Type C medicated feed.

* * * * *

5. New § 558.618 is added to read as follows:

§ 558.618 Tilmicosin.

(a) *Approvals.* Type A medicated articles: 90.7 grams of tilmicosin (as tilmicosin phosphate) per pound (200 grams per kilogram) to 000986 in § 510.600(c) of this chapter.

(b) *Special considerations.* Do not use in any feed containing bentonite.

(c) *Related tolerances.* See § 556.735 of this chapter.

(d) *Conditions of use.* It is used in swine feed as follows:

(1) *Amount per ton.* 181.8 grams to 363.6 grams tilmicosin.

(2) *Indications for use.* For the control of swine respiratory disease associated with *Actinobacillus pleuropneumoniae* and *Pasteurella multocida.*

(3) *Limitations.* For use in swine feed only. The safety of tilmicosin has not been established in pregnant swine or swine intended for breeding purposes. Feed continuously as the sole ration for 21-day period, beginning approximately 7 days before an expected disease outbreak. Withdraw 7 days before slaughter. Federal law restricts this drug to use under the professional supervision of a licensed veterinarian. Any animal feed bearing or containing this drug shall be fed to animals only by or upon a lawful veterinary feed directive (VFD) issued by a licensed veterinarian in the course of the veterinarian's professional practice. VFD's for tilmicosin phosphate shall not be refilled.

(4) *VFD Requirements.* This drug and any article or feed manufactured from it shall bear the following cautionary statements: "Caution: Federal law limits this drug to use under the professional supervision of a licensed veterinarian. Animal feed bearing or containing this veterinary feed directive drug shall be fed to animals only by or upon a lawful veterinary feed directive issued by a licensed veterinarian in the course of the veterinarian's professional practice." A VFD shall contain the following information: The name, address, and phone number of the veterinarian and the client; identification of the animals to be treated, including, identification of the species, number of animals, and the location of the animals; date of treatment and, if different, date of prescribing the VFD drug; the condition or disease being diagnosed or treated; name of the animal drug; level of animal drug in feed and amount of feed; feeding instructions with withdrawal time; any special instructions and cautionary statements necessary for use of the drug in conformance with the approval; expiration date of VFD; number of refills, if permitted by approval; signature of the veterinarian; veterinarian's license number and name of the State issuing the license.

[TD 8701]

RIN 1545–AC06

Treatment of Shareholders of Certain Passive Foreign Investment Companies

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final and temporary regulations.

SUMMARY: This document contains final regulations that provide rules for making the deemed sale and deemed dividend elections under section 1291(d)(2). These regulations reflect changes to the law made by the Tax Reform Act of 1986 and the Technical and Miscellaneous Revenue Act of 1988, and apply to a shareholder of a passive foreign investment company (PFIC) that elects under section 1295 to treat the PFIC as a qualified electing fund (QEF) for a taxable year after the first taxable year during the shareholder's holding period that the foreign corporation was a PFIC.

DATES: These regulations are effective December 27, 1996.

Applicability: For the specific dates of applicability, see §§ 1.1291–9(k) and 1.1291–10(i).

FOR FURTHER INFORMATION CONTACT: Gayle Novig, (202) 622–3880 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in these final regulations have been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 U.S.C. 3507) under control numbers 1545–1028 and 1545–1304. All of these paperwork requirements will be consolidated under control number 1545–1507. Responses to these collections of information are mandatory.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

The estimated annual burden per respondent varies from .75 hour to 1 hour, depending on individual circumstances, with an estimated average of .76 hour.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Books or records relating to this collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains final regulations to be added to the Income Tax Regulations (26 CFR part 1) under section 1291(d)(2) of the Internal Revenue Code. The final regulations provide rules for making a deemed sale or deemed dividend election to purge a shareholder's holding period of stock of a PFIC of those taxable years during which the PFIC was not a QEF. The Tax Reform Act of 1986 added section 1291(d)(2)(A), relating to the deemed sale election, effective for taxable years of foreign corporations beginning after December 31, 1986. The Technical and Miscellaneous Revenue Act of 1988 amended section 1291(d)(2) to add new section 1291(d)(2)(B), relating to the deemed dividend election, effective for taxable years of foreign corporations beginning after December 31, 1986.

On March 2, 1988, temporary regulations (TD 8178) relating to the deemed sale election under section 1291(d)(2)(A), in addition to elections under sections 1294, 1295, and 1297, were published in the **Federal Register** (53 FR 6770). A notice of proposed rulemaking (INTL–941–86) cross-referencing the temporary regulations was also published in the **Federal Register** for the same day (53 FR 6781).

On April 1, 1992, temporary regulations (TD 8404) relating to both the deemed sale and deemed dividend elections under section 1291(d)(2) (A) and (B), were published in the **Federal Register** (57 FR 10992). A notice of proposed rulemaking (INTL–941–86; INTL–656–87; INTL–704–87) cross-referencing the temporary regulations was published in the **Federal Register** for the same day (57 FR 11024).

Written comments responding to these notices were received. No public hearing was held for the notice of proposed rulemaking published on March 2, 1988. A public hearing was held November 23, 1992, for the notice of proposed rulemaking published April 1, 1992. After consideration of all the comments, the proposed regulations under section 1291(d)(2) are adopted as revised by this Treasury decision, and the corresponding temporary regulations are removed. Substantive revisions are discussed below. All other revisions are stylistic, and are primarily intended to conform the regulations under § 1.1291–10 to those under § 1.1291–9.

Explanation of Provisions and Revisions and Summary of Comments

1. Introduction

A shareholder of a foreign corporation that qualifies as a PFIC under the

income or asset test of section 1296 is subject to the special interest charge regime of section 1291 with respect to certain distributions by the PFIC and dispositions of the stock of the PFIC. Provided the PFIC complies with certain election requirements, a shareholder may elect under section 1295 to treat the PFIC as a QEF. If the election is made, the shareholder is subject to the current inclusion regime of section 1293. If the shareholder makes the section 1295 election for the first year of its holding period for the foreign corporation during which year the foreign corporation is a PFIC, the shareholder is only subject to PFIC taxation under the current inclusion regime. Such a PFIC is a pedigreed QEF with respect to the shareholder. However, if the shareholder makes the section 1295 election for a later year, the shareholder is subject to both the interest charge regime of section 1291 and the current inclusion regime of section 1293. Such a PFIC is an unpedigreed QEF with respect to the shareholder. To limit its PFIC taxation to the current inclusion regime of section 1293, a shareholder that makes the section 1295 election may also make a section 1291(d)(2) election to purge its holding period of the years, or parts of years, before the effective date of the QEF election during which the foreign corporation was a PFIC (nonQEF years). Thereafter, the PFIC will be treated as a pedigreed QEF with respect to the shareholder.

Section 1291(d)(2) provides two methods to purge the nonQEF years from a shareholder's holding period of PFIC stock. A shareholder may elect under section 1291(d)(2)(A) to be treated as having sold the stock of the PFIC. The gain on the deemed sale is subject to the interest charge regime and therefore taxed as an excess distribution under section 1291. Alternatively, if the PFIC is a controlled foreign corporation (CFC), any U.S. person that is a shareholder of the PFIC may elect under section 1291(d)(2)(B) to be treated as receiving a dividend in the amount of its pro rata share of the post-1986 undistributed earnings and profits of the PFIC. The deemed dividend is taxed to the shareholder as an excess distribution under the interest charge regime. If either election is made, the shareholder's holding period is treated, for purposes of the PFIC rules, as beginning on the date of the deemed sale or dividend (qualification date).

2. Revisions to the Regulations

Section 1.1291–9 provides the rules for making the deemed dividend election under section 1291(d)(2)(B) with respect to a PFIC that is a CFC. Section 1.1291–10 provides the rules for making the deemed sale election under section 1291(d)(2)(A). The final regulations generally follow the proposed regulations with the exceptions described below.

a. Qualification Date

The 1988 temporary regulations under § 1.1291–10T provided that, in general, the date of the deemed sale, referred to as the qualification date, is the first day of the first taxable year of the corporation that it is treated as a QEF under section 1295 (first QEF year). However, the temporary and proposed amendments to § 1.1291–10T published in 1992 changed the qualification date for elections made after May 1, 1992, to the first day of the taxable year for which the shareholder made the QEF election (shareholder's election year). Similarly, under the temporary and proposed § 1.1291–9 regulations, the qualification date is the first day of the shareholder's election year.

Commenters described a potential problem with the designation of the first day of the shareholder's election year as the qualification date where the corporation and the shareholder have different taxable years. In this circumstance, the purging election would not avoid application of the interest charge regime to distributions and dispositions during the period between the first day of the corporation's first QEF year and the first day of the shareholder's election year.

In response to comments, the final regulations adopt the definition of qualification date used in the 1988 temporary regulations for purposes of both the deemed sale and deemed dividend elections made on or after January 27, 1997. For the period after March 31, 1995, to January 26, 1997, the final regulations adopt the definition of qualification date of the 1992 temporary regulations. In addition, the final regulations permit a shareholder that made the deemed sale or deemed dividend election after May 1, 1992 and on or before January 27, 1997 to amend its election and treat the deemed sale or deemed dividend as occurring on the first day of the PFIC's first QEF year, provided the periods of limitations on assessment for the taxable year that includes that date and for the shareholder's election year have not expired.

In response to comments, the final regulations also clarify that if the shareholder's holding period under section 1223 includes the first day of the first QEF year, the shareholder will be treated as holding the stock on that date. Therefore, the shareholder may make a section 1291(d)(2) election for the first QEF year.

b. Elections Made With Respect to Former PFICs

Section 1.1291–9(h) of the proposed regulations provides that a shareholder cannot apply the deemed dividend rules of section 1291(d)(2)(B) to purge PFIC taint, pursuant to section 1297(b)(1), from the stock of a foreign corporation that no longer is a PFIC under either the asset or income test of section 1296(a), but whose stock nevertheless is treated as stock of a PFIC with respect to a shareholder pursuant to section 1297(b)(1) (former PFIC). In addition, the proposed regulations provide that the section 1291(d)(2)(B) election cannot be made with respect to a corporation that will not qualify as a PFIC under section 1296(a)(1) or (2) in the first QEF year.

Several commenters disagreed with the position taken in § 1.1291–9(h) of the proposed regulations. Section 1.1291–9(i)(1) of the final regulations does not accept these comments and adopts the rule of the proposed regulation denying application of the rules of section 1291(d)(2)(B) for purposes of a section 1297(b)(1) election. In addition, § 1.1291–9(i)(2) modifies the rule of proposed regulation § 1.1291–9(h)(2) to clarify that the section 1295 and 1291(d)(2)(B) elections cannot be made with respect to a former PFIC. Section 1.1291–10(h) of the final regulations adopts a similar rule, clarifying that a shareholder of a former PFIC cannot make the section 1295 and 1291(d)(2)(A) elections. Thus, section 1295 and section 1291(d)(2) elections may only be made with respect to a foreign corporation that is a PFIC by definition under section 1296. Accordingly, the deemed sale election of section 1297(b)(1) remains the only means by which a shareholder may purge a former PFIC of its PFIC taint.

c. Qualification as a CFC

The final regulations, in response to comments, clarify that a shareholder may make the deemed dividend election provided the PFIC qualifies as a CFC for its first QEF year.

d. Time for Making the Elections

In response to comments, the final regulations clarify the time for making the deemed sale and dividend elections. The regulations provide that if the shareholder and the PFIC have the same taxable year, and therefore the first day of the shareholder's election year and the qualification date are the same, the shareholder may make the election in the same return in which it makes the

section 1295 election or in an amended return. The regulations also provide that if the shareholder and the PFIC have different taxable years and therefore the qualification date precedes the first day of the shareholder's election year, the shareholder must make the deemed sale or deemed dividend election in an amended return. If the shareholder is making the section 1291(d)(2) election in an amended return, the amended return must be filed within three years of the due date, as extended under section 6081, for the return for the taxable year that includes the qualification date.

e. Post-1986 Accumulated Earnings and Profits

The proposed regulations provide that the shareholder's old holding period for purposes of the PFIC rules ends on the qualification date, but also provide that its new holding period begins on the qualification date. These rules may have caused confusion concerning the last day of the holding period for purposes of determining post-1986 accumulated earnings and profits. The final regulations revise the holding period rules to provide that the shareholder's holding period ends on the day before the qualification date for purposes of calculating the amount of the deemed dividend.

Special Analyses

It has been determined that this Treasury Decision is not a significant regulatory action as defined in E.O. 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the notice of proposed rulemaking preceding the regulations was issued prior to March 29, 1996, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. These regulations, which have a retroactive effective date, satisfy the Administrative Procedure Act's requirement in section 553(d) for good cause because they provide necessary guidance for the period after March 31, 1995, and because they are not detrimental to taxpayers. These regulations are necessary because they provide taxpayers with the rules needed to make the elections under section 1291(d)(2). Pursuant to section 7805(f) of the Internal Revenue Code, the notices of proposed rulemaking preceding these regulations were submitted to the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is Gayle Novig, Office of the Associate Chief Counsel (International). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by removing the entry for section 1.1291–9T and the entry for sections 1.1291–10T, 1.1294–1T, 1.1295–1T, and 1.1297–3T, and by adding entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *.

Section 1.1291–9 also issued under 26 U.S.C. 1291(d)(2).

Section 1.1291–10 also issued under 26 U.S.C. 1291(d)(2).

Section 1.1294–1T also issued under 26 U.S.C. 1294.

Section 1.1297–3T also issued under 26 U.S.C. 1297(b)(1). * * *

Par. 2. Section 1.1291–0 is added to read as follows:

§ 1.1291–0 Treatment of shareholders of certain passive foreign investment companies; table of contents.

This section contains a listing of the headings for §§ 1.1291–9 and 1.1291–10.

§ 1.1291–9 Deemed dividend election.

(a) Deemed dividend election.
(1) In general.
(2) Post-1986 earnings and profits defined.
(i) In general.
(ii) Pro rata share of post-1986 earnings and profits attributable to shareholder's stock.
(A) In general.
(B) Reduction for previously taxed amounts.
(b) Who may make the election.
(c) Time for making the election.
(d) Manner of making the election.
(1) In general.
(2) Attachment to Form 8621.
(e) Qualification date.
(1) In general.
(2) Elections made after March 31, 1995, and before January 27, 1997.
(i) In general.
(ii) Exception.
(3) Examples.
(f) Adjustment to basis.
(g) Treatment of holding period.
(h) Coordination with section 959(e).
(i) Election inapplicable to shareholder of former PFIC.
(1) Coordination with section 1297(b)(1).
(2) Former PFIC.
(j) Definitions.
(1) Passive foreign investment company (PFIC).
(2) Types of PFICs.
(i) Qualified electing fund (QEF).
(ii) Pedigreed QEF.
(iii) Unpedigreed QEF.
(iv) Former PFIC.
(3) Shareholder.
(k) Effective date.

§ 1.1291–10 Deemed sale election.

(a) Deemed sale election.
(b) Who may make the election.
(c) Time for making the election.
(d) Manner of making the election.
(e) Qualification date.
(1) In general.
(2) Elections made after March 31, 1995, and before January 27, 1997.
(i) In general.
(ii) Exception.
(f) Adjustments to basis.
(1) In general.
(2) Adjustment to basis for section 1293 inclusion with respect to deemed sale election made after March 31, 1995, and before January 27, 1997.
(g) Treatment of holding period.
(h) Election inapplicable to shareholder of former PFIC.
(i) Effective date.

§ 1.1291–0T [Amended]

Par. 3. Section 1.1291–0T is amended as follows:

1. Remove from the introductory text the language "1.1291–9T, 1.1291–10T,".

2. Remove the entries for § 1.1291–9T and § 1.1291–10T from the table.

Par. 4. Section 1.1291–9 is added to read as follows:

§ 1.1291–9 Deemed dividend election.

(a) *Deemed dividend election*—(1) *In general.* This section provides rules for making the election under section 1291(d)(2)(B) (deemed dividend election). Under that section, a shareholder (as defined in paragraph (j)(3) of this section) of a PFIC that is an unpedigreed QEF may elect to include in income as a dividend the shareholder's pro rata share of the post-1986 earnings and profits of the PFIC attributable to the stock held on the qualification date (as defined in paragraph (e) of this section), provided the PFIC is a controlled foreign corporation (CFC) within the meaning of section 957(a) for the taxable year for which the shareholder elects under section 1295 to treat the PFIC as a QEF (section 1295 election). If the shareholder makes the deemed dividend election, the PFIC will become a

pedigreed QEF with respect to the shareholder. The deemed dividend is taxed under section 1291 as an excess distribution received on the qualification date. The excess distribution determined under this paragraph (a) is allocated under section 1291(a)(1)(A) only to those days in the shareholder's holding period during which the foreign corporation qualified as a PFIC. For purposes of the preceding sentence, the holding period of the PFIC stock with respect to which the election is made ends on the day before the qualification date. For the definitions of PFIC, QEF, unpedigreed QEF, and pedigreed QEF, see paragraph (j)(1) and (2) of this section.

(2) *Post-1986 earnings and profits defined*—(i) *In general.* For purposes of this section, the term post-1986 earnings and profits means the undistributed earnings and profits, within the meaning of section 902(c)(1), as of the day before the qualification date, that were accumulated and not distributed in taxable years of the PFIC beginning after 1986 and during which it was a PFIC, but without regard to whether the earnings relate to a period during which the PFIC was a CFC.

(ii) *Pro rata share of post-1986 earnings and profits attributable to shareholder's stock*—(A) *In general.* A shareholder's pro rata share of the post-1986 earnings and profits of the PFIC attributable to the stock held by the shareholder on the qualification date is the amount of post-1986 earnings and profits of the PFIC accumulated during any portion of the shareholder's holding period ending at the close of the day before the qualification date and attributable, under the principles of section 1248 and the regulations under that section, to the PFIC stock held on the qualification date.

(B) *Reduction for previously taxed amounts.* A shareholder's pro rata share of the post-1986 earnings and profits of the PFIC does not include any amount that the shareholder demonstrates to the satisfaction of the Commissioner (in the manner provided in paragraph (d)(2) of this section) was, pursuant to another provision of the law, previously included in the income of the shareholder, or of another U.S. person if the shareholder's holding period of the PFIC stock includes the period during which the stock was held by that other U.S. person.

(b) *Who may make the election.* A shareholder of an unpedigreed QEF that is a CFC for the taxable year of the PFIC for which the shareholder makes the section 1295 election may make the deemed dividend election provided the shareholder held stock of that PFIC on the qualification date. A shareholder is treated as holding stock of the PFIC on the qualification date if its holding period with respect to that stock under section 1223 includes the qualification date. A shareholder may make the deemed dividend election without regard to whether the shareholder is a United States shareholder within the meaning of section 951(b). A deemed dividend election may be made by a shareholder whose pro rata share of the post-1986 earnings and profits of the PFIC attributable to the PFIC stock held on the qualification date is zero.

(c) *Time for making the election.* The shareholder makes the deemed dividend election in the shareholder's return for the taxable year that includes the qualification date. If the shareholder and the PFIC have the same taxable year, the shareholder makes the deemed dividend election in either the original return for the taxable year for which the shareholder makes the section 1295 election, or in an amended return for that year. If the shareholder and the PFIC have different taxable years, the deemed dividend election must be made in an amended return for the taxable year that includes the qualification date. If the deemed dividend election is made in an amended return, the amended return must be filed by a date that is within three years of the due date, as extended under section 6081, of the original return for the taxable year that includes the qualification date.

(d) *Manner of making the election*—(1) *In general.* A shareholder makes the deemed dividend election by filing Form 8621 and the attachment to Form 8621 described in paragraph (d)(2) of this section with the return for the taxable year of the shareholder that includes the qualification date, reporting the deemed dividend as an excess distribution pursuant to section 1291(a)(1), and paying the tax and interest due on the excess distribution. A shareholder that makes the deemed dividend election after the due date of the return (determined without regard to extensions) for the taxable year that includes the qualification date must pay additional interest, pursuant to section 6601, on the amount of the underpayment of tax for that year.

(2) *Attachment to Form 8621.* The shareholder must attach a schedule to Form 8621 that demonstrates the calculation of the shareholder's pro rata share of the post-1986 earnings and profits of the PFIC that is treated as distributed to the shareholder on the qualification date pursuant to this section. If the shareholder is claiming an exclusion from its pro rata share of the post-1986 earnings and profits for an amount previously included in its income or the income of another U.S. person, the shareholder must include the following information:

(i) The name, address, and taxpayer identification number of each U.S. person that previously included an amount in income, the amount previously included in income by each such U.S. person, the provision of the law pursuant to which the amount was previously included in income, and the taxable year of inclusion of each amount; and

(ii) A description of the transaction pursuant to which the shareholder acquired, directly or indirectly, the stock of the PFIC from another U.S. person, and the provisions of law pursuant to which the shareholder's holding period includes the period the other U.S. person held the CFC stock.

(e) *Qualification date*—(1) *In general.* Except as otherwise provided in this paragraph (e), the qualification date is the first day of the PFIC's first taxable year as a QEF (first QEF year).

(2) *Elections made after March 31, 1995, and before January 27, 1997*—(i) *In general.* The qualification date for deemed dividend elections made after March 31, 1995, and before January 27, 1997 is the first day of the shareholder's election year. The shareholder's election year is the taxable year of the shareholder for which it made the section 1295 election.

(ii) *Exception.* A shareholder who made the deemed dividend election after May 1, 1992, and before January 27, 1997 may elect to change its qualification date to the first day of the first QEF year, provided the periods of limitations on assessment for the taxable year that includes that date and for the shareholder's election year have not expired. A shareholder changes the qualification date by filing amended returns, with revised Forms 8621 and the attachments described in paragraph (d)(2) of this section, for the shareholder's election year and the shareholder's taxable year that includes the first day of the first QEF year, and making all appropriate adjustments and payments.

(3) *Examples.* The rules of this paragraph (e) are illustrated by the following examples:

Example 1—(i) *Eligibility to make deemed dividend election.* A is a U.S. person who files its income tax return on a calendar year basis. On January 2, 1994, A purchased one percent of the stock of M, a PFIC with a taxable year ending November 30. M was both a CFC and a PFIC, but not a QEF, for all of its taxable years. On December 3, 1996, M made a distribution to its shareholders. A received $100, all of which A reported in its

1996 return as an excess distribution as provided in section 1291(a)(1). A decides to make the section 1295 election in A's 1997 taxable year to treat M as a QEF effective for M's taxable year beginning December 1, 1996. Because A did not make the section 1295 election in 1994, the first year in its holding period of M stock that M qualified as a PFIC, M would be an unpedigreed QEF and A would be subject to both sections 1291 and 1293. A, however, may elect under section 1291(d)(2) to purge the years M was not a QEF from A's holding period. If A makes the section 1291(d)(2) election, the December 3 distribution will not be taxable under section 1291(a). Because M is a CFC, even though A is not a U.S. shareholder within the meaning of section 951(b), A may make the deemed dividend election under section 1291(d)(2)(B).

(ii) *Making the election.* Under paragraph (e)(1) of this section, the qualification date, and therefore the date of the deemed dividend, is December 1, 1996. Accordingly, to make the deemed dividend election, A must file an amended return for 1996, and include the deemed dividend in income in that year. As a result, M will be a pedigreed QEF as of December 1, 1996, and the December 3, 1996, distribution will not be taxable as an excess distribution. Therefore, in its amended return, A may report the December 3, 1996, distribution consistent with section 1293 and the general rules applicable to corporate distributions.

Example 2. X, a U.S. person, owned a five percent interest in the stock of FC, a PFIC with a taxable year ending June 30. X never made the section 1295 election with respect to FC. X transferred her interest in FC to her granddaughter, Y, a U.S. person, on February 14, 1996. The transfer qualified as a gift for federal income tax purposes, and no gain was recognized on the transfer (see Regulation Project INTL–656–87, published in 1992–1 C.B. 1124; see § 601.601(d)(2)(ii)(*b*) of this chapter). As provided in section 1223(2), Y's holding period includes the period that X held the FC stock. Y decides to make the section 1295 election in her 1996 return to treat FC as a QEF for its taxable year beginning July 1, 1995. However, because Y's holding period includes the period that X held the FC stock, and FC was a PFIC but not a QEF during that period, FC will be an unpedigreed QEF with respect to Y unless Y makes a section 1291(d)(2) election. Although Y did not actually own the stock of FC on the qualification date (July 1, 1995), Y's holding period includes that date. Therefore, provided FC is a CFC for its taxable year beginning July 1, 1995, Y may make a section 1291(d)(2)(B) election to treat FC as a pedigreed QEF.

(f) *Adjustment to basis.* A shareholder that makes the deemed dividend election increases its adjusted basis of the stock of the PFIC owned directly by the shareholder by the amount of the deemed dividend. If the shareholder makes the deemed dividend election with respect to a PFIC of which it is an indirect shareholder, the shareholder's adjusted basis of the stock or other property owned directly by the shareholder, through which ownership of the PFIC is attributed to the shareholder, is increased by the amount of the deemed dividend. In addition, solely for purposes of determining the subsequent treatment under the Code and regulations of a shareholder of the stock of the PFIC, the adjusted basis of the direct owner of the stock of the PFIC is increased by the amount of the deemed dividend.

(g) *Treatment of holding period.* For purposes of applying sections 1291 through 1297 to the shareholder after the deemed dividend, the shareholder's holding period of the stock of the PFIC begins on the qualification date. For other purposes of the Code and regulations, this holding period rule does not apply.

(h) *Coordination with section 959(e).* For purposes of section 959(e), the entire deemed dividend is treated as included in gross income under section 1248(a).

(i) *Election inapplicable to shareholder of former PFIC*—(1) *Coordination with section 1297(b)(1).* The rules of this section do not apply to an election made under section 1297(b)(1).

(2) *Former PFIC.* A shareholder may not make the section 1295 and deemed dividend elections if the foreign corporation is a former PFIC (as defined in paragraph (j)(2)(iv) of this section) with respect to the shareholder. For the rules regarding the election by a shareholder of a former PFIC, see § 1.1297–3T.

(j) *Definitions*—(1) *Passive foreign investment company (PFIC).* A passive foreign investment company (PFIC) is a foreign corporation that satisfies either the income test of section 1296(a)(1) or the asset test of section 1296(a)(2). A corporation will not be treated as a PFIC with respect to a shareholder for those days included in the shareholder's holding period when the shareholder, or a person whose holding period of the stock is included in the shareholder's holding period, was not a United States person within the meaning of section 7701(a)(30).

(2) *Types of PFICs*—(i) *Qualified electing fund (QEF).* A PFIC is a qualified electing fund (QEF) with respect to a shareholder that has elected, under section 1295, to be taxed currently on its share of the PFIC's earnings and profits pursuant to section 1293.

(ii) *Pedigreed QEF.* A PFIC is a pedigreed QEF with respect to a shareholder if the PFIC has been a QEF with respect to the shareholder for all taxable years during which the corporation was a PFIC that are included wholly or partly in the shareholder's holding period of the PFIC stock.

(iii) *Unpedigreed QEF.* A PFIC is an unpedigreed QEF for a taxable year if—

(A) An election under section 1295 is in effect for that year;

(B) The PFIC has been a QEF with respect to the shareholder for at least one, but not all, of the taxable years during which the corporation was a PFIC that are included wholly or partly in the shareholder's holding period of the PFIC stock; and

(C) The shareholder has not made an election under section 1291(d)(2) and this section or § 1.1291–10 with respect to the PFIC to purge the nonQEF years from the shareholder's holding period.

(iv) *Former PFIC.* A foreign corporation is a former PFIC with respect to a shareholder if the corporation satisfies neither the income test of section 1296(a)(1) nor the asset test of section 1296(a)(2), but whose stock, held by that shareholder, is treated as stock of a PFIC, pursuant to section 1297(b)(1), because at any time during the shareholder's holding period of the stock the corporation was a PFIC that was not a QEF.

(3) *Shareholder.* A shareholder is a U.S. person that is a direct or indirect shareholder as defined in Regulation Project INTL–656–87 published in 1992–1 C.B. 1124; see § 601.601(d)(2)(ii)(*b*) of this chapter.

(k) *Effective date.* The rules of this section are applicable as of April 1, 1995.

§ 1.1291–9T [Removed]

Par. 5. Section 1.1291–9T is removed.

Par. 6. Section 1.1291–10 is added to read as follows:

§ 1.1291–10 Deemed sale election.

(a) *Deemed sale election.* This section provides rules for making the election under section 1291(d)(2)(A) (deemed sale election). Under that section, a shareholder (as defined in § 1.1291–9(j)(3)) of a PFIC that is an unpedigreed QEF may elect to recognize gain with respect to the stock of the unpedigreed QEF held on the qualification date (as defined in paragraph (e) of this section). If the shareholder makes the deemed sale election, the PFIC will become a pedigreed QEF with respect to the shareholder. A shareholder that makes the deemed sale election is treated as having sold, for its fair market value, the stock of the PFIC that the shareholder held on the qualification date. The gain recognized on the deemed sale is taxed under section 1291 as an excess

VOL 61 ISS 250 DE 27 1996 UMI

distribution received on the qualification date. In the case of an election made by an indirect shareholder, the amount of gain to be recognized and taxed as an excess distribution is the amount of gain that the direct owner of the stock of the PFIC would have realized on an actual sale or other disposition of the stock of the PFIC indirectly owned by the shareholder. Any loss realized on the deemed sale is not recognized. For the definitions of PFIC, QEF, unpedigreed QEF, and pedigreed QEF, see § 1.1291–9(j) (1) and (2).

(b) *Who may make the election.* A shareholder of an unpedigreed QEF may make the deemed sale election provided the shareholder held stock of that PFIC on the qualification date. A shareholder is treated as holding stock of the PFIC on the qualification date if its holding period with respect to that stock under section 1223 includes the qualification date. A deemed sale election may be made by a shareholder that would realize a loss on the deemed sale.

(c) *Time for making the election.* The shareholder makes the deemed sale election in the shareholder's return for the taxable year that includes the qualification date. If the shareholder and the PFIC have the same taxable year, the shareholder makes the deemed sale election in either the original return for the taxable year for which the shareholder makes the section 1295 election, or in an amended return for that year. If the shareholder and the PFIC have different taxable years, the deemed sale election must be made in an amended return for the taxable year that includes the qualification date. If the deemed sale election is made in an amended return, the amended return must be filed by a date that is within three years of the due date, as extended under section 6081, of the original return for the taxable year that includes the qualification date.

(d) *Manner of making the election.* A shareholder makes the deemed sale election by filing Form 8621 with the return for the taxable year of the shareholder that includes the qualification date, reporting the gain as an excess distribution pursuant to section 1291(a), and paying the tax and interest due on the excess distribution. A shareholder that makes the deemed sale election after the due date of the return (determined without regard to extensions) for the taxable year that includes the qualification date must pay additional interest, pursuant to section 6601, on the amount of the underpayment of tax for that year. A shareholder that realizes a loss on the deemed sale reports the loss on Form 8621, but does not recognize the loss.

(e) *Qualification date*—(1) *In general.* Except as otherwise provided in this paragraph (e), the qualification date is the first day of the PFIC's first taxable year as a QEF (first QEF year).

(2) *Elections made after March 31, 1995, and before January 27, 1997*—(i) *In general.* The qualification date for deemed sale elections made after March 31, 1995, and before January 27, 1997, is the first day of the shareholder's election year. The shareholder's election year is the taxable year of the shareholder for which it made the section 1295 election.

(ii) *Exception.* A shareholder who made the deemed sale election after May 1, 1992, and before January 27, 1997 may elect to change its qualification date to the first day of the first QEF year, provided the periods of limitations on assessment for the taxable year that includes that date and for the shareholder's election year have not expired. A shareholder changes the qualification date by filing amended returns, with revised Forms 8621, for the shareholder's election year and the shareholder's taxable year that includes the first day of the first QEF year, and making all appropriate adjustments and payments.

(f) *Adjustments to basis*—(1) *In general.* A shareholder that makes the deemed sale election increases its adjusted basis of the PFIC stock owned directly by the amount of gain recognized on the deemed sale. If the shareholder makes the deemed sale election with respect to a PFIC of which it is an indirect shareholder, the shareholder's adjusted basis of the stock or other property owned directly by the shareholder, through which ownership of the PFIC is attributed to the shareholder, is increased by the amount of gain recognized by the shareholder. In addition, solely for purposes of determining the subsequent treatment under the Code and regulations of a shareholder of the stock of the PFIC, the adjusted basis of the direct owner of the stock of the PFIC is increased by the amount of gain recognized on the deemed sale. A shareholder shall not adjust the basis of any stock with respect to which the shareholder realized a loss on the deemed sale.

(2) *Adjustment of basis for section 1293 inclusion with respect to deemed sale election made after March 31, 1995, and before January 27, 1997.* For purposes of determining the amount of gain recognized with respect to a deemed sale election made after March 31, 1995, and before January 27, 1997, by a shareholder that treats the first day of the shareholder's election year as the qualification date, the adjusted basis of the stock deemed sold includes the shareholder's section 1293(a) inclusion attributable to the period beginning with the first day of the PFIC's first QEF year and ending on the day before the qualification date.

(g) *Treatment of holding period.* For purposes of applying sections 1291 through 1297 to the shareholder after the deemed sale, the shareholder's holding period of the stock of the PFIC begins on the qualification date, without regard to whether the shareholder recognized gain on the deemed sale. For other purposes of the Code and regulations, this holding period rule does not apply.

(h) *Election inapplicable to shareholder of former PFIC.* A shareholder may not make the section 1295 and deemed sale elections if the foreign corporation is a former PFIC (as defined in § 1.1291–9(j)(2)(iv)) with respect to the shareholder. For the rules regarding the election by a shareholder of a former PFIC, see 1.1297–3T.

(i) *Effective date.* The rules of this section are applicable as of April 1, 1995.

§ 1.1291–10T [Removed]

Par. 7. Section 1.1291–10T is removed.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 8. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par. 9. In § 602.101, paragraph (c) is amended by removing the entries for 1.1291–9T and 1.1291–10T from the table and adding entries in numerical order to the table to read as follows:

§ 602.101 OMB Control numbers.

Fiscal Service

31 CFR Part 209

RIN 1510–AA30

Payment to Financial Institutions for Credit to Accounts of Employees and Beneficiaries

AGENCY: Financial Management Service, Fiscal Service, Treasury.
ACTION: Final rule.

SUMMARY: The Financial Management Service is removing this Part from Title 31 of the Code of Federal Regulations. This Part governs the remittance to financial institutions of checks representing wage, salary, annuity and allotment payments to be credited to the accounts of Federal employees and beneficiaries. Such disbursements are no longer made by check. These payments now are made by electronic funds transfer through the Automated Clearing House and, are governed by 31 CFR Part 210. Therefore, Part 209 is no longer necessary.

EFFECTIVE DATE: January 27, 1997.

FOR FURTHER INFORMATION CONTACT: Christine Ricci, Financial Program Specialist, at (202) 874–7458 or Cynthia L. Johnson, Director, Cash Management Policy and Planning Division, (202) 874–6657. A copy of the Final Rule is being made available for downloading from the Financial Management Service home page at the following address: http://www.ustreas.gov./treasury/bureaus/finman/.

SUPPLEMENTARY INFORMATION:

Background

On January 4, 1995, the Financial Management Service (Service) published a Notice of Proposed Rulemaking (NPRM) proposing to remove Part 209 from Title 31 of the Code of Federal Regulations. See 60 FR 416. Part 209 governs the remittance to financial institutions of checks representing wage, salary, annuity and allotment payments for credit to the accounts of Federal employees and beneficiaries. The Service issued such checks when sending payments to financial institutions that did not have the capability to receive payments by electronic funds transfer. In the NPRM, the Service noted that other regulations which took effect on July 1, 1994, required financial institutions to receive such payments by electronic funds transfer. See 58 FR 21634. The Service no longer issues checks pursuant to Part 209 and, thus, the regulation is obsolete.

The January 4 publication contained a 30 day comment period. No comments were received in response to the NPRM.

On September 30, 1994, the Service published an NPRM in which the Service proposed to move the portions of Part 209 dealing with savings and salary allotments to 31 CFR Part 210. See 59 FR 50112. The Service expects to issue a new NPRM with respect to Part 210 in the near future. At that time, the Service will review the desirability of including provisions relating to savings and salary allotments in Part 210.

Rulemaking Analysis

The Service has determined that this regulation is not a significant regulation as defined in E.O. 12866 and a regulatory assessment is not required. It is hereby certified that removal of this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. The removal of 31 CFR Part 209 will have little or no effect on the economy or consumers, because the part is obsolete and no longer in use.

List of Subjects in 31 CFR Part 209

Automated Clearing House, Allotments, Banks, Banking, Discretionary allotments, Electronic funds transfer, Financial institution, Government employees, Net pay, Salary, Wages.

Accordingly, and under the authority of 31 U.S.C. 321, 3321, and 3335, Part 209 of Title 31 is removed as follows:

PART 209—[REMOVED]

Part 209 is removed.

Dated: December 19, 1996.
Russell D. Morris,
Commissioner.

BILLING CODE 4810–35–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Charleston 96–034]

RIN 2115–AA97

Safety/Security Zone Regulations; Charleston Harbor and Cooper River, SC

AGENCY: Coast Guard, DOT.
ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a moving safety/security zone around vessels transporting nuclear materials in Charleston Harbor and the Cooper River. Each zone will extend 200 yards ahead and astern, and 100 yards to each side of vessels carrying the nuclear materials, during transit from the Charleston Harbor entrance to the Charleston Naval Weapons Station on the Cooper River. The zone will remain in effect during cargo operations while the vessel is moored at the Naval Weapons Station. This safety/security zone is needed to protect the transport vessels from potential protests and demonstrations by organizations that may attempt to disrupt shipments, while transiting Charleston Harbor and the Cooper River.

EFFECTIVE DATE: January 27, 1997.

FOR FURTHER INFORMATION: Lieutenant Jeffrey T. Carter, Project Manager, Coast Guard Marine Safety Office Charleston at (803) 724–7680.

SUPPLEMENTARY INFORMATION:

Regulatory History

On September 11, 1996, the Coast Guard published a notice of proposed rulemaking entitled SAFETY/SECURITY ZONE REGULATIONS; Charleston Harbor and Cooper River, SC in the **Federal Register** (61 FR 47839). The Coast Guard received no letters commenting on the proposal. A public hearing was not requested and one was not held.

Background and Purpose

The Coast Guard is establishing a moving safety/security zone around vessels transporting certain nuclear materials in Charleston Harbor and the Cooper River. As part of a major national security objective to prevent the spread of nuclear weapons worldwide, the U.S. Department of Energy will be receiving shipments of foreign research reactor spent nuclear fuel rods through the Charleston Naval Weapons Station. These shipments will take place over a 13 year period.

VOL 61 ISS 250 DE 27 1996 UMI

Protests and demonstrations during shipments through U.S. ports of nuclear materials, such as spent fuel rods, would place the safe navigation of the transport vessels at risk. This moving safety/security zone is needed to protect the transport vessels from the risk associated with protests and demonstrations while transiting Charleston Harbor and the Cooper River.

The safety/security zone will extend 200 yards ahead and astern and 100 yards to each side of the vessel carrying the nuclear materials during its transit from Charleston Harbor Entrance Buoy "C" (LLNR 1885) to the Charleston Naval Weapons Station on the Cooper River. The zone will remain in effect during cargo operations while the vessel is moored at the Naval Weapons Station. Entry into this zone is prohibited during vessel transit (which includes any emergency anchorage or mooring) and cargo transfer operations, unless authorized by Captain of the Port Charleston.

The actual dates this safety/security zone will be in effect are not known at this time. The Captain of the Port will announce the activation of this zone through a Broadcast Notice to Mariners whenever Captain of the Port Charleston receives a firm arrival time. Maritime traffic will not be significantly impacted because of the expected small number of vessels needing this safety/security zone, and the limited duration of the zone during transit and cargo operations.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979), because of the small number of vessels needing the safety/security zone and the minimal impact on navigation and commerce. No changes have been made to the proposed regulatory text.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this rule will have a significant economic impact on a substantial number of small entities. This rule is not significant and the number of small entities is not substantial because of the small number of vessels needing the safety/security zone and the minimal impact on navigation and commerce. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This rule contains no collection-of-information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this rule under the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of this action and has determined pursuant to Section 2.B.2 of Commandant Instruction M16475.1B, (as revised by 59 FR 38654, July 29, 1994), that this rule is categorically excluded from further environmental documentation. In accordance with this instruction section 2.B.2.e.34.(g), a Categorical Exclusion Determination and Environmental Analysis Checklist was prepared. Both documents are available in the docket for inspection and copying.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

Final Regulations

For reasons set forth in the preamble, the Coast Guard amends subpart D of part 165 of title 33, Code of Federal Regulations, as follows:

PART 165—[AMENDED]

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; 49 CFR 1.46.

2. A new § 165.708 is added to read as follows:

§ 165.708 Safety/Security Zone; Charleston Harbor and Cooper River, Charleston, SC.

(a) *Regulated area.* The following boundaries are established as a safety and security zone during specified conditions:

(1) All waters 200 yards ahead and astern and 100 yards to each side of a vessel transporting nuclear materials while the vessel transits from Charleston Harbor Entrance Buoy "C" (LLNR 1885, position 32–39.6N, 079–40.9W) to the Charleston Naval Weapons Station (position 32–55.4N, 079–56.0W) on the Cooper River. All coordinates referenced use datum: NAD 1983.

(2) All waters within 100 yards of the vessel described in paragraph (a)(1) of this section while the vessel is conducting cargo operations at the Charleston Naval Weapons Station.

(b) Captain of the Port Charleston will announce the activation of the safety/security zones described in paragraph (a) of this section by Broadcast Notice to Mariners. The general regulations governing safety and security zones contained in §§ 165.23 and 165.33 apply.

Dated: November 27, 1996.

M. J. Pontiff,

Commander, U.S. Coast Guard, Captain of the Port, Charleston, South Carolina.

[FR Doc. 96–32837 Filed 12–26–96; 8:45 am]

BILLING CODE 4910–14–M

---

33 CFR Part 165

[COTP Savannah 96–073]

RIN 2115–AA97

Safety Zone Regulations; Savannah, GA

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone in a 1,000 yards radius of the Savannah Light Tower. The safety zone is needed to protect vessel traffic from the hazards created by the allision of a vessel with the Savannah Light Tower and the Tower's subsequent destruction. These regulations are necessary for the safety of life on navigable waters. Entry into this zone is prohibited, unless specifically authorized by the Captain of the Port.

DATES: This rule is effective at 8 a.m. EST (Eastern Standard Time) on December 5, 1996. When this temporary regulation is terminated, the agency will publish a document in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: LCDR Linda Fagan, Project Officer, Coast Guard Marine Safety Office Savannah, at (912) 652–4371.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in

less than 30 days after **Federal Register** date would be contrary to the public interest since immediate action is needed to prevent further harm to the public due to the navigational hazards associated with destruction of the Savannah Light Tower.

Background and Purpose

The Coast Guard is establishing a temporary safety zone in a 1,000 yards radius of the Savannah Light Tower. This safety zone is needed to protect vessel traffic from the hazards created by the allision of the M/V Neptune Jade with the Savannah Light Tower and the Tower's subsequent destruction. The M/V Neptune Jade at the time of the allision lost at 20 ft. container overboard. The contents of the container were 70 55-gallon drums of paint. Salvage operations are being performed in the area of the Savannah Light Tower. In addition to protecting vessel traffic from debris associated with the Savannah Light Tower's destruction, these regulations are necessary to protect salvage personnel engaged in recovery operations.

This safety zone is established on the navigable waters within a 1,000 yard radius of the Savannah Light Tower, at position 31–57.ON and 080–41.OW. All coordinates referenced use Datum: NAD 1983. Nonobligatory guidelines are included in the regulatory language for that portion of the regulated area which falls outside of the navigable waters of the United States. Entry into this safety zone is prohibited, unless specifically authorized by the Captain of the Port.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary, because the safety zone will be in effect for a limited time and regulates a limited area.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). The Coast Guard Certifies this rule will not have a significant effect on small entities because this safety zone will be established in a limited area and will only be in effect for a limited time.

Collection of Information

This rule contains no collection-of-information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rulemaking does not have sufficient Federalism implication to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of this action and has been determined pursuant to section 2.B.2. of Commandant Instruction M16475.1B, (as revised by 59 FR 38654, July 29, 1994). Specifically, section 2.B.2.e.(34)(g) does not require a Categorical Exclusion Determination and the preparation of an Environmental Analysis Checklist.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Safety measures, Waterways.

Temporary Regulations

In consideration of the foregoing, the Coast Guard amends subpart C of part 165 of title 33, Code of Federal Regulations, as follows:

PART 165—[AMENDED]

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; 49 CFR 1.46.

2. A new § 165.T96–073 is added to read as follows:

§ 165.T96–073 Safety Zone: Savannah, GA.

(a) *Regulated Area.* A safety zone is established on the navigable waters within a 1,000 yard radius of the Savannah Light Tower, at position 31–57.ON, 080–41.OW. All coordinates referenced use Datum: NAD 1983.

(b) *Regulations.* These regulations are effective for those navigable waters which fall within the navigable waters of the United States.

(1) Anchoring, mooring, or transiting within this zone is prohibited, unless authorized by the Captain of the Port, Savannah, Georgia.

(2) Entry into this zone is prohibited. unless specifically authorized by the Captain of the Port, Savannah, Georgia.

(3) The Captain of the Port will notify the public of changes in the status of this safety zone by Marine Safety Radio Broadcast on VHF Marine Band Radio, Channel 22 (157.1 MHz).

(c) *Effective date.* This regulation is effective at 8 a.m. EST on December 5, 1996. When this temporary rule is terminated the agency will publish a document in the **Federal Register.**

Dated: December 5, 1996.

C. E. Bone,

Commander, U. S. Coast Guard, Captain of the Port Savannah, Georgia.

[FR Doc. 96–32844 Filed 12–26–96; 8:45 am]

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL–5669–7]

National Oil and Hazardous Substances Contingency Plan; National Priorities List Update

AGENCY: Environmental Protection Agency.

ACTION: Notice of deletion of a site from the National Priorities List.

SUMMARY: The Environmental Protection Agency (EPA) announces the deletion of the Ambler Asbestos Superfund site in Ambler, Pennsylvania from the National Priorities List (NPL). The NPL is Appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended. EPA and the State of Pennsylvania have determined that all appropriate Fund-financed responses under CERCLA have been implemented and that no further cleanup by responsible parties is appropriate. Moreover, EPA and the State of Pennsylvania have determined that remedial actions conducted at the site to date remain protective of public health, welfare, and the environment.

EFFECTIVE DATE: December 27, 1996.

VOL 61 ISS 250 DEC 27 1996 UMI

ADDRESSES: Comprehensive information on this site is available for viewing at the Site information repositories at the following locations:

U.S. EPA, Region 3, Hazardous Waste Technical Information Center, 841 Chestnut Building, Philadelphia, PA 19107, (215) 566-5363.

Wissahickon Valley Public Library, Ambler Branch, 209 Race Street, Ambler, PA 19002, (610) 646-1072.

FOR FURTHER INFORMATION CONTACT: James J. Feeney, Site Project Manager (3HW21), U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA, 19107, (215) 566-3190.

SUPPLEMENTARY INFORMATION: The site to be deleted from the NPL is: Ambler Asbestos Site, Ambler, Pennsylvania.

A Notice of Intent to Delete for this site was published September 5, 1996 (61 FR 46755). The closing date for comments on the Notice of Intent to Delete was October 7, 1996. EPA received no comments.

The EPA identifies sites which appear to present a significant risk to public health, welfare, or the environment and it maintains the NPL as the list of those sites. Sites on the NPL may be the subject of Hazardous Substance Response Trust Fund (Fund-) financed remedial actions. Any site deleted from the NPL remains eligible for Fund-financed remedial actions in the unlikely event that conditions at the site warrant such action. Section 300.66(c)(8) of the NCP states that Fund-financed actions may be taken at sites deleted from the NPL.

Deletion of a site from the NPL does not affect responsible party liability or impede agency efforts to recover costs associated with response efforts.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous substances, Hazardous waste, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: December 13, 1996.

W. Michael McCabe,

Regional Administrator, U.S. EPA Region 3.

For the reasons set out in the preamble, 40 CFR part 300 is amended as follows:

PART 300—[AMENDED]

1. The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601-9657; E.O. 12777, 56 FR 54757, 3 CFR, 191 Comp., p. 351; E.O. 12580, 52 FR 2923, 3 CFR, 1987 Comp., p. 193.

Appendix B [Amended]

2. Table 1 of Appendix B to part 300 is amended by removing the site "Ambler Asbestos Piles" in Ambler, Pennsylvania.

[FTR Amendment 54]

RIN 3090-AF98

Federal Travel Regulation; Computation of Per Diem Allowance for a Partial Day of Travel; Use of Locality-Based Per Diem Rate for Househunting Trips

AGENCY: Office of Governmentwide Policy, GSA.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal Travel Regulation (FTR) to modify per-diem allowance computation for a partial day of travel, to eliminate the requirement for a traveler to record departure and arrival times on the travel voucher, and to allow per diem reimbursement for a househunting trip to be based on the locality per diem rate. This amendment will simplify travel reimbursement, thereby reducing agency travel costs.

DATES: *Effective dates:* The provisions of this final rule which amend part 301-4 of chapter 301 are effective June 7, 1996. The provisions of this final rule which amend parts 301-7, 301-8, and 301-11 of chapter 301, and part 302-2 of chapter 302 are effective December 27, 1996.

Applicability dates: The provisions of this final rule which amend part 301-4 of chapter 301 apply for travel performed on or after June 7, 1996. The provisions of this final rule which amend parts 301-7, 301-8, and 301-11 of chapter 301, and part 302-2 of chapter 302 apply for travel (including travel incident to a change of official station) performed on or after December 27, 1996.

FOR FURTHER INFORMATION CONTACT: Robert A. Clauson, Travel and Transportation Management Policy Division (MTT), Washington, DC 20405, telephone 202-501-1538.

SUPPLEMENTARY INFORMATION: This amendment was developed by the Joint Financial Management Improvement Program (JFMIP) Travel Reinvention Task Force to streamline the processing of travel and relocation reimbursement claims. The General Services Administration (GSA), after review of the JFMIP recommendations, has determined that the recommendations are appropriate and is implementing the changes with certain modifications through this amendment. The amendment modifies per diem allowance computation for a partial day of travel, and eliminates the requirement for a traveler to record departure and arrival times on the travel voucher. This amendment also authorizes the payment of a locality-based per diem rate when an employee is performing travel to seek residence quarters. Finally, this amendment makes a technical correction to the provisions governing reimbursement when an employee uses a privately owned vehicle to perform official travel.

Current Per Diem Allowance Computation

The FTR provides for the payment of a per diem allowance based on the lodgings-plus method, which includes payment for the actual expenses of lodging up to a maximum amount and payment of a flat amount for meals and incidental expenses (M&IE). The FTR currently requires that the M&IE amount be reduced for meals provided by the Government at no cost or at nominal cost to the employee.

In addition, the FTR requires that the M&IE allowance for a partial day of travel (e.g., the first or last day of travel) be computed based on one-fourth of the applicable M&IE rate for each quarter-day the employee is in a travel status on that day. The quarters are fixed (i.e., 12:01 a.m.-6:00 a.m., 6:01 a.m.-12:00 noon, 12:01 p.m.-6:00 p.m., and 6:01 p.m.-12:00 midnight) based on local time.

Under current rules, an employee may not be paid a per diem allowance for travel of 10 hours or less (a special variation of this rule applies for an employee working a compressed work schedule). Finally, an employee must record the time of departure from, and arrival at, the official station or any other place at which official travel begins or ends to accurately compute the per diem allowance payable.

Modification of Per Diem Allowance Computation.

This amendment abolishes the quarter-day method of computing the M&IE allowance for a partial day of travel and replaces it with payment of a flat three-fourths of the applicable M&IE rate on a partial travel day. The JFMIP Travel Reinvention Task Force

found that most travelers begin their first day of official travel in the second quarter of the day and end the travel in the third quarter of the day. Under the new rule, agencies must continue to reduce, or deduct from, the applicable maximum per diem rate or the three-fourths of the M&IE rate, as appropriate, for Government provided meals.

This amendment also prohibits the payment of a per diem allowance for travel of 12 hours or less, and establishes three-fourths of the applicable M&IE rate as the appropriate per diem allowance payment for travel of more than 12 hours but not exceeding 24 hours when no lodging is required. For travel of more than 12 hours but not exceeding 24 hours when lodging is required, per diem shall be computed in the same manner as for travel of more than 24 hours.

Elimination of the Requirement That Employees Record Time of Departure and Arrival

This amendment eliminates the need for an employee to record departure and arrival times on the travel voucher. The FTR will continue to require that an employee record departure and arrival dates for such travel, however.

Locality-Based Per Diem Rate for Househunting Trips

The FTR allows an agency to authorize payment for travel to seek permanent residence quarters, i.e., a househunting trip. The agency may pay transportation expenses and subsistence expenses for the employee and spouse to perform a househunting trip for a period not to exceed 10 days. The FTR provides that the applicable per diem rate for a househunting trip inside the continental United States (CONUS) shall be the standard CONUS rate regardless of locality.

The JFMIP recommended giving agencies discretionary authority to reimburse per diem for a househunting trip within CONUS based on the locality per diem rate. This change is necessary since an employee who transfers to a high cost locality needs to obtain lodging in that locality when performing a househunting trip.

Further, the employee may not be able to reduce subsistence costs by lodging at a lower cost extended stay facility. The employee incurs expenses in the same manner as if he/she were on temporary duty travel, and it therefore is equitable to provide subsistence reimbursement based on the locality rate. This amendment maintains agencies' ability to reimburse househunting trip subsistence expenses based on the standard CONUS rate when the agency determines that it is advantageous to the Government.

Technical Correction to the Mileage Reimbursement Rate Provisions

FTR Amendment 48, (61 FR 25802, May 23, 1996) increased mileage reimbursement rates for the use of a privately owned vehicle. FTR Amendment 48 revised FTR § 301–4.2(a) to increase the mileage reimbursement rate for use of a privately owned automobile to 31 cents per mile, but did not make a corresponding change to FTR § 301–4.2(c) (1) or (2). This amendment makes the corresponding changes.

GSA has determined that this rule is not a significant regulatory action for the purposes of Executive Order 12866 of September 30, 1993. This final rule is not required to be published in the **Federal Register** for notice and comment. Therefore, the Regulatory Flexibility Act does not apply.

List of Subjects in 41 CFR Parts 301–4, 301–7, 301–8, and 301–11

Government employees, Travel, Travel allowances, Travel and transportation expenses.

List of Subjects in 41 CFR Part 302–2

Government employees, Relocation allowances and entitlements, Transfers.

For the reasons set out in the preamble, 41 CFR parts 301–4, 301–7, 301–8, 301–11, and 302–2 are amended to read as follows:

PART 301–4—REIMBURSEMENT FOR USE OF PRIVATELY OWNED CONVEYANCES

1. The authority citation for part 301–4 is revised to read as follows:

Authority: 5 U.S.C. 5701–5709.

§ 301–4.2 [Amended]

2. Section 301–4.2 is amended by removing the phrase "30 cents per mile" where it appears in paragraphs (c) (1) and (2), and adding in its place the phrase "31 cents per mile".

PART 301–7—PER DIEM ALLOWANCES

3. The authority citation for part 301–7 is revised to read as follows:

Authority: 5 U.S.C. 5701–5709.

4. Section 301–7.2 is amended by revising paragraphs (a) (2) and (3) to read as follows:

§ 301–7.2 Employee and agency responsibilities.

(a) * * *

(2) *Duty to record pertinent times and/or dates.* The date of departure from and arrival at the official station or any other place at which travel begins or ends must be shown on the travel voucher. This same information also must be shown for points at which temporary duty is performed or for a stopover or official rest stop location when such arrival or departure affects the per diem allowance or other travel expenses. Other points visited also should be shown.

(3) *Use of standard time.* When recording time, an employee shall use standard time in effect at the place involved. (See 15 U.S.C. 262.)

* * * * *

§ 301–7.4 [Amended]

5. Section 301–7.4 is amended by removing the phrase "Federal Supply Service, Attn: Transportation Management Division (FBX), Washington, DC 20406" in paragraph (a), and by adding in its place the phrase, "Office of Governmentwide Policy, Attn: Travel and Transportation Management Policy Division (MTT), Washington, DC 20405".

6. Section 301–7.5 is amended by revising paragraph (b), by removing paragraph (c), and redesignating paragraphs (d) and (e) as paragraphs (c) and (d) and revising them to read as follows:

§ 301–7.5 General rules affecting entitlement to per diem.

* * * * *

(b) *No allowance for travel of 12 hours or less.* A per diem allowance shall not be allowed for official travel of 12 hours or less. (This requirement also applies for travel incident to a change of official station.)

(c) *Beginning and ending of entitlement.* For computing per diem allowances, official travel begins when an employee leaves his/her home, office, or other authorized point of departure and ends when the traveler returns to his/her home, office, or other authorized point at the conclusion of the trip.

(d) *International date line.* In cases where the traveler crosses the international date line (180th meridian), the actual elapsed time in days shall be used to compute the per diem rather than calendar days.

7. Section 301–7.6 is amended by revising paragraph (b)(2) to read as follows:

§ 301–7.6 Lodgings-plus per diem system.

* * * * *

(b) * * *

* * * * *

(2) *Meals and incidental expenses (M&IE) allowance.* The maximum per

diem rates include a fixed allowance for meals and for incidental expenses (M&IE rate). The M&IE rate, or fraction thereof, is payable to the traveler without itemization of expenses or receipts. For a partial day of travel, the M&IE rate shall be prorated as provided in § 301–7.8 (a) or (c)(3), as appropriate.

8. Section 301–7.7 is revised to read as follows:

§ 301–7.7 Computation rules for travel of more than 12 hours, but not exceeding 24 hours.

When the travel for which per diem has been authorized is more than 12 hours, but does not exceed 24 hours, the per diem allowance for the trip shall be calculated as follows:

(a) *Lodging not required.* If lodging is not required, the per diem allowance shall be three-fourths of the applicable M&IE allowance for the temporary duty assignment location. If more than one temporary duty point is involved, the per diem allowance shall be calculated using the highest of the M&IE rates prescribed for the location where official business is performed.

(b) *Lodging required.* If lodging is required, the per diem allowable shall be the actual cost of lodging incurred by the traveler, limited to the applicable maximum lodging allowance prescribed for the location of the lodging, plus three-fourths of the applicable M&IE rate prescribed for the lodging location.

9. Section 301–7.8 is revised to read as follows:

§ 301–7.8 Computation rules for travel of more than 24 hours.

The applicable maximum per diem rate for each calendar day of travel shall be determined by the travel status and location of the employee at 12:00 midnight and whether lodging is required at such location. When lodging is required, the applicable maximum per diem rate shall be the maximum rate prescribed for the temporary duty location, or a stopover point where lodging is obtained while en route to, from, or between temporary duty locations (see §§ 301–7.9 and 301–7.6(a)(3) for regulations on lodging location and maximum per diem rates applicable to change of official station travel, respectively). Only one maximum rate will be applicable to a calendar day or fraction thereof. Per diem for travel of more than 24 hours shall be calculated as provided in paragraphs (a) through (e) of this section.

(a) *Day travel begins*—(1) *Lodging required.* When lodging is required on the day travel begins (day of departure from the home, office, or other authorized point), the per diem allowable shall be the actual cost of lodging incurred by the traveler, limited to the applicable maximum lodging allowance prescribed for the location of the lodging, plus three-fourths of the applicable M&IE rate prescribed for the lodging location.

(2) *Lodging not required.* When lodging is not required on the day travel begins, (day of departure from the home, office, or other authorized point), the per diem allowable shall be three-fourths of the destination M&IE rate.

(b) *Full calendar days of travel*—(1) *Lodging required.* For each full calendar day that the employee is in a travel status and lodging is required (whether en route or at a temporary duty location), the per diem allowable shall be the actual cost of lodging incurred by the traveler, limited to the applicable maximum lodging allowance prescribed for the location of the lodging, plus the applicable M&IE rate.

(2) *Lodging not required.* For each full calendar day that the traveler is in a travel status and lodging is not required (such as when the traveler is en route overnight to the next temporary duty location), the per diem allowance shall be the destination M&IE rate.

(c) *Returning from travel*—(1) *Lodging required.* For each full calendar day of travel when lodging is required at an en route location while the employee is returning to the official station, home, or other authorized point, the per diem allowable shall be the actual cost of lodging incurred by the traveler, limited to the applicable maximum lodging allowance prescribed for the en route temporary duty site, plus three-fourths of the M&IE rate applicable to the en route temporary duty site.

(d) *Lodging obtained after midnight.* Although per diem generally is based on the employee's location at midnight, there will be instances in which he/she is en route and does not arrive at the lodging location (either temporary duty location or en route stopover point) until after midnight. In such cases, the lodging shall be claimed for the preceding calendar day and the applicable maximum per diem for the preceding day will be determined as if the employee had been at the lodging location at 12:00 midnight of that day.

(e) *Commercial vessel.* For vessel travel, except for the day of arrival on board (day of embarkation) and the day of departure from the vessel (day of debarkation), the allowable per diem rate will be $6 per day. When the $6 rate is not sufficient to meet the traveler's per diem expenses, a per diem rate equal to the anticipated expenses, not to exceed $9 per day, may be authorized or approved; except that the rate for travel by the Alaska Ferry System shall not exceed the standard M&IE rate for CONUS. Per diem will be computed under the lodgings-plus system on the days of embarkation and debarkation.

10. Section 301–7.12 is amended by revising the fifth sentence of the introductory text to read as follows:

§ 301–7.12 Reductions in maximum per diem rates when appropriate.

* * * When reduced rate situations involve partial days, per diem for such days may be three-fourths of the reduced rate, a special reduced rate prescribed for partial days, or an amount determined under the lodgings-plus system, as considered appropriate by the agency. * * *

* * * * *

PART 301–8—REIMBURSEMENT OF ACTUAL SUBSISTENCE EXPENSES

11. The authority citation for part 301–8 is revised to read as follows:

Authority: 5 U.S.C. 5701–5709.

12. Section 301–8.3 is amended by revising paragraph (b)(2) to read as follows:

§ 301–8.3 Maximum daily rates and reimbursement limitations.

* * * * *

(b) * * *

(2) *Specific meals and incidental expenses limitation.* The agency may authorize or approve the payment of meals and incidental expenses on a flat rate basis without the need for receipts

and/or itemization when such expenses are within the applicable M&IE rate. On full days of travel, the payment shall not exceed the applicable M&IE rate. On partial days of travel, the payment shall not exceed three-fourths of the applicable M&IE rate. The amount of the maximum daily rate in excess of the actual M&IE payment may be used for lodging.

PART 301–11—CLAIMS FOR REIMBURSEMENT

13. The authority citation for part 301–11 is revised to read as follows:

Authority: 5 U.S.C. 5701–5709.

14. Section 301–11.5 is amended by revising paragraph (a) (2) and (3) to read as follows:

§ 301–11.5 Preparation of voucher.

(a) * * *

(2) *Leave of absence.* When leave of absence of any kind is taken while an employee is in a travel status, the type of leave and number of hours of leave for each day shall be recorded on the travel voucher.

(3) *Indirect-route travel.* The travel voucher should set forth the details of the expenses actually incurred, the date of departure from the post of duty, and the date of arrival at the place of duty. Where leave has been taken while in travel status, the date and time that leave began and terminated should be shown.

* * * * *

§ 301–11.6 [Amended]

15. Section 301–11.6 is amended by removing the reference "§ 301–7.8(g)" in paragraph (b)(16), and adding in its place the reference "§ 301–7.8(e)".

PART 302–2—ALLOWANCES FOR SUBSISTENCE AND TRANSPORTATION

16. The authority citation for part 302–2 continues to read as follows:

Authority: 5 U.S.C. 5721–5734; 20 U.S.C. 905(a); E.O. 11609, 36 FR 13747, 3 CFR, 1971–1975 Comp., p. 586.

17. Section 302–2.1 is revised to read as follows:

§ 302–2.1 For the employee.

(a) *Applicability.* This part applies to travel of

(1) Transferred employees,

(2) New appointees, and

(3) Employees assigned to posts of duty outside the continental United States in connection with either overseas tour renewal agreement travel or return travel to places of residence for the purpose of separation.

(b) *Payment for employee's travel expenses.* Except as specifically provided in this chapter, an agency shall pay per diem, transportation costs, and other travel expenses of the employee in accordance with the provisions of 5 U.S.C. 5701–5709 and chapter 301 of this title. The prohibition in § 301–7.5(b) of this title on paying per diem for travel of 12 hours or less applies to change of official station travel.

(c) *Maximum per diem rates for relocation travel*—(1) *Travel when en route between employee's old and new official stations.* The maximum per diem rate for en route travel within CONUS between the employee's old and new official stations shall be the standard CONUS rate prescribed under § 301–7.3 of this title.

(2) *Travel to seek residence quarters.* The maximum per diem rate for travel to seek residence quarters shall be the lesser of the maximum per diem rate prescribed under § 301–7.3 of this title for the locality where the employee seeks residence quarters or for the locality where the employee obtains lodging accommodations. An agency may prescribe the standard CONUS rate as the maximum per diem rate if it determines that establishment of such lower rate is advantageous to the Government.

18. Section 302–2.2 is amended by revising the introductory text of paragraph (b) to read as follows:

§ 302–2.2 For members of an employee's immediate family.

* * * * *

(b) *Per diem allowance when en route between employee's old and new official stations.* When an employee is transferred, an allowance shall be paid for per diem expenses incurred by the employee's immediate family while traveling between the old and new official stations regardless of where the old and new stations are located. If the actual travel involves departure and/or destination points other than the old or new official station, the per diem allowance shall not exceed the amount to which members of the immediate family would have been entitled if they had traveled by a usually traveled route between the old and new official stations. The prohibition in § 301–7.5(b) of this title on paying per diem for travel of 12 hours or less applies to change of official station travel. The maximum allowable per diem rates are as follows:

* * * * *

Dated: September 26, 1996.

David J. Barram,

Acting Administrator of General Services.

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 28

[CGD 96–046]

RIN 2115–AF35

Commercial Fishing Industry Vessel Regulations

AGENCY: Coast Guard, DOT.

ACTION: Correction to interim rule; extension of comment period; delay of effective date.

SUMMARY: This document contains a correction to the interim rule [CGD 96–046], which was published Tuesday, November 5, 1996, (61 FR 57268). Also, the Coast Guard is extending the comment period and delaying the interim rule effective date on the requirements for safety equipment and vessel operating procedures on commercial fishing industry vessels. The comment period is extended to 105 days to allow 60 additional days for public comment.

DATES: The effective date of the interim rule published on November 5, 1996 (61 FR 57268) is delayed until March 20, 1997. The effective date of this document is December 27, 1996. Comments must be received on or before February 20, 1997.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G–LRA/3406) (CGD 94–046), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, or may be delivered to room 3406 at the same address between 9:30 a.m. and 2 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267–1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters, between 9:30 a.m. and 2 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Commander Mark D. Bobal, Project Manager, G–MSO–2, U.S. Coast Guard, 2100 Second Street SW., Washington, DC 20593, telephone (202) 267–0836.

SUPPLEMENTARY INFORMATION:

Background and Purpose

On November 5, 1996, the Coast Guard published an interim rule in the **Federal Register** (61 FR 57268). This rulemaking was initiated to implement certain provisions of the Commercial Fishing Industry Vessel Safety Act of 1988, Pub. L. 100–424. This rule established requirements for U.S. documented or state numbered uninspected fishing, fish processing, and fish tender vessels. The comment period was limited to 45 days by the interim rule. The Coast Guard has received many requests to extend the comment period to allow for additional time to review the provisions of this rule. The purpose of this document is to extend the comment period an additional 60 days and delay the effective date of the interim rule and to make the following correction:

Need for Correction

As published, the interim rule contains an omission which may prove to be misleading and needs correction.

Correction of Publication

Accordingly, the publication on November 5, 1996, of the interim rule [CGD 96–046] which was the subject of FR Doc. 96–28406, is corrected as follows:

1. On page 57274, in table 28.120(a) entitled "Survival Craft For Documented Vessels," in the eighth entry for area, "Inside Boundary Line, cold waters; or Lakes, bays, sounds, cold waters; or rivers, cold waters", for vessels 10.97 meters (36 feet) or more in length, in the third column, the words "See note 2" should be added after the words "Inflatable buoyant apparatus."

Dated: December 20, 1996.

J.C. Card,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Marine Safety and Environmental Protection.

[FR Doc. 96–32843 Filed 12–26–96; 8:45 am]

BILLING CODE 4910–14–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

Radio Broadcasting Services; Various Locations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, on its own motion, editorially amends the Table of FM Allotments to specify the actual classes of channels allotted to various communities. The changes in channel classifications have been authorized in response to applications filed by licensees and permittees operating on these channels. This action is taken pursuant to *Revision of Section 73.3573(a)(1) of the Commission's Rules Concerning the Lower Classification of an FM Allotment,* 4 FCC Rcd 2413 (1989), and the *Amendment of the Commission's Rules to permit FM Channel and Class Modifications [Upgrades] by Applications,* 8 FCC Rcd 4735 (1993).

EFFECTIVE DATE: December 27, 1996.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, adopted December 13, 1996, and released December 20, 1996. The full text of this Commission decision is available for inspection and copying during normal business hours in the Commission's Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Services, Inc., 2100 M Street, NW., Suite 140, Washington, DC 20037, (202) 857–3800.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Part 73 of title 47 of the Code of Federal Regulations is amended as follows:

PART 73—[AMENDED]

1. The authority citation for Part 73 continues to read as follows:

Authority: Secs. 303, 48 Stat., as amended, 1082; 47 U.S.C. 154, as amended.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments under Alabama, is amended by removing Channel 244A and adding Channel 244C3 at Pine Hill.

3. Section 73.202(b), the Table of FM Allotments under California, is amended by removing Channel 297A and adding Channel 296B1 at Madera, and by removing Channel 252A and adding Channel 252B1 at Oxnard.

4. Section 73.202(b), the Table of FM Allotments under Georgia, is amended by removing Channel 264C3 and adding Channel 264A at Milledgeville.

5. Section 73.202(b), the Table of FM Allotments under Idaho, is amended by removing Channel 237C3 and adding Channel 237C1 at Sun Valley.

6. Section 73.202(b), the Table of FM Allotments under Garapan is amended by removing Channel 266C and adding Channel 266A at Saipan.

7. Section 73.202(b), the Table of FM Allotments under Minnesota, is amended by removing Channel 235C2 and adding Channel 235A at Albert Lea.

8. Section 73.202(b), the Table of FM Allotments under Montana, is amended by removing Channel 244A and adding Channel 243C2 at Deer Lodge.

9. Section 73.202(b), the Table of FM Allotments under New York, is amended by removing Channel 269A and adding Channel 270A at Jamestown.

10. Section 73.202(b), the Table of FM Allotments under Texas, is amended by removing Channel 225A and adding Channel 226A at Bells and by removing Channel 290A and adding Channel 290C2 at Stanton.

Federal Communications Commission.

John A. Karousos,

Chief, Allocations Branch, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712–01–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[OST Docket No. 1; Amdt. 282]

Organization and Delegation of Powers and Duties; Delegations to Federal Highway Administrator, Research and Special Programs Administrator, and Director of the Bureau of Transportation Statistics

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: This document delegates to the Administrator of the Federal Highway Administration (FHWA), the Administrator of the Research and Special Programs Administration (RSPA), and the Director of the Bureau of Transportation Statistics (BTS) certain authority vested in the Secretary of Transportation by the ICC Termination Act of 1995 (ICCTA), Pub. L. 104–88, 109 Stat. 803. The purpose of this rulemaking is to amend Part 1 of title 49, Code of Federal Regulations, to reflect these delegations.

EFFECTIVE DATE: December 27, 1996.

FOR FURTHER INFORMATION CONTACT: (1) Thomas P. Holian, Office of Chief Counsel, Legislation and Regulations Division, FHWA, Room 4223, (202) 366–0761; (2) John Grimm, Office of Motor Carrier Information Analysis,

FHWA, Room 3104, (202) 366–4039; or Michael Falk, Office of Chief Counsel, Motor Carrier Law Division, FHWA, Room 4217, (202) 366–0834; (3) Edward H. Bonekemper, III, Assistant Chief Counsel, Hazardous Materials Safety, Research and Technology Law Division, RSPA, Room 8405, (202) 366–4401; (4) David Mednick, BTS, Room 3430, (202) 366–8871. The building address for all of the above is 400 Seventh Street, SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION: The Secretary has determined that certain authority vested in the Secretary by the ICCTA should be formally delegated to the Federal Highway Administrator, the Research and Special Programs Administrator, and the Director of the Bureau of Transportation Statistics. This rulemaking amends section 1.48 of 49 CFR Part 1, Delegations to the Federal Highway Administrator, section 1.53 of 49 CFR Part 1, Delegations to the Administrator of the Research and Special Programs Administration, and section 1.71 of 49 CFR Part 1, Delegations to the Director of the Bureau of Transportation Statistics, to reflect these delegations.

Because these amendments relate to departmental management, organization, procedure, and practice, prior notice and opportunity for comment are unnecessary. For the same reason, good cause exists for making this final rule effective immediately upon publication in the **Federal Register**.

Section 1.48 Delegations to the Federal Highway Administrator

This final rule amends 49 CFR 1.48 to delegate to the Federal Highway Administrator the authority to administer portions of section 103 of the ICCTA. Section 103 amended or enacted provisions of title 49, United States Code, which direct the Secretary to carry out certain motor carrier, broker, and freight forwarder functions.

This final rule also amends 49 CFR 1.48 to delegate to the Federal Highway Administrator the authority to administer sections 104, 403(a), and 408 of the ICCTA. Section 104 requires regulations be established relating to State grants, vehicle length limitations, insurance, and self-insurance. Section 403(a) relates to the promulgation of regulations relating to railroad-highway grade crossings. Section 408 requires the Secretary to issue a rulemaking in relation to a variety of fatigue-related issues pertaining to commercial motor vehicle safety.

A correction in paragraph designation is provided to reflect an amendment to a final rule published on January 6, 1993 (58 FR 502–503), that added paragraph (jj) to § 1.48. The final rule published today amends the January 6, 1993, rule because an earlier rule added (jj) at 57 FR 62483–62484 on December 31, 1992.

Section 1.53 Delegations to the Research and Special Programs Administrator

This final rule amends 49 CFR 1.53 to delegate to the Research and Special Programs Administrator the authority to administer section 406 of the ICCTA, which requires the Secretary to (1) issue a final rule extending the transition period for the continued use of fiber drum packagings that do not meet performance standards adopted in 1990; (2) contract with the National Academy of Sciences for a study of packaging standards applicable to the use of fiber drums for the transportation of liquid hazardous materials; and (3) develop final standards for fiber drum packagings for liquid hazardous materials.

Section 1.71 Delegations to the Director of the Bureau of Transportation Statistics

This final rule amends 49 CFR 1.71 to delegate to the Director of the Bureau of Transportation Statistics the authority to administer section 14122(a) and (c) and section 14123 of title 49, U.S.C., relating to the collection and dissemination of information on motor carriers, which was revised under section 103 of the ICCTA.

List of Subjects in 49 CFR Part 1

Authority delegations (Government agencies), Organization and functions (Government agencies).

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulations, is amended as follows:

PART 1—[AMENDED]

1. The authority citation for Part 1 continues to read as follows:

Authority: 49 U.S.C. 322; Pub. L. 101–552; 28 U.S.C. 2672; 31 U.S.C. 3711(a)(2).

2. Section 1.48 is amended by redesignating the second (jj) paragraph as paragraph (d) and adding new paragraphs (h) and (i) to read as follow:

§ 1.48 Delegations to the Federal Highway Administrator.

* * * * *

(h) Carry out the functions and exercise the authority vested in the Secretary by 49 U.S.C., Subtitle IV, Part B,:

(1) Chapter 131;

(2) Chapter 133;

(3) Chapter 135;

(4) Chapter 137, sections 13702(a), 13702(c)(1), 13702(c)(2), 13702(c)(3), 13704, 13707, and 13708;

(5) Chapter 139;

(6) Chapter 141, Subchapter I and sections 14121 and 14122 of Subchapter II;

(7) Chapter 145, sections 14501, 14502, and 14504;

(8) Chapter 147, sections 14701 through 14708; and

(9) Chapter 149, sections 14901 through 14913.

(i) Carry out the functions and exercise the authority vested in the Secretary by sections 104, 403(a), and 408 of the ICC Termination Act of 1995, Pub. L. 104–88, relating to miscellaneous motor carrier provisions, railroad-highway grade crossing regulation and fatigue-related issues pertaining to commercial motor vehicle safety.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 951116270–5308–02; I.D. 102896B]

Fisheries of the Northeastern United States; Summer Flounder Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Commercial quota harvest; Closure of the exclusive economic zone (EEZ).

SUMMARY: NMFS issues this notification to announce that the summer flounder commercial quota available to the State of Maryland has been harvested and to announce the closure of the summer flounder fishery in the EEZ. Accordingly, vessels issued a commercial Federal fisheries permit for the summer flounder fishery may not land summer flounder in Maryland and no commercial vessel may fish for or possess summer flounder in the EEZ for the remainder of calendar year 1996. Regulations governing the summer flounder fishery require publication of this notification to advise Maryland that the State's quota has been harvested and to advise vessel and dealer permit holders that no commercial quota is available for landing summer flounder in that state. Also, regulations governing this fishery require that once the commercial fisheries for summer flounder are closed in all states, such as is now the case, the Regional Administrator close the EEZ to fishing for summer flounder for the remainder of the calendar year.

EFFECTIVE DATE: December 27, 1996, through December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Regina Spallone, Fishery Policy Analyst, 508–281–9221.

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found at 50 CFR part 648, Subparts A and G. The regulations require annual specification of a commercial quota that is apportioned among the states from North Carolina through Maine. The process to set the annual commercial quota and the percent allocated to each state are described in

§ 648.100. Amendment 7 to the Fishery Management Plan for the Summer Flounder Fishery (November 24, 1995, 60 FR 57955) revised the fishing mortality rate reduction schedule for summer flounder, and the revised schedule was the basis for establishing the 1996 quota. The total commercial quota for summer flounder for the 1996 calendar year was adopted to achieve the appropriate fishing mortality rate of 0.41 for 1996, and is set equal to 11,111,298 lb (5,040,000 kg) (January 4, 1996, 61 FR 291). The percent allocated to vessels landing summer flounder in Maryland is 2.03910 percent or 226,570 lb (102,770 kg).

Section 648.101(b) requires the Regional Administrator, Northeast Region, NMFS, (Regional Administrator) to monitor state commercial quotas and to determine when a state commercial quota is harvested. The Regional Administrator is further required to publish a notice in the **Federal Register** advising a state and notifying Federal vessel and dealer permit holders that, effective upon a specific date, the state's commercial quota has been harvested and no commercial quota is available for landing summer flounder in that state. The Regional Administrator has determined that the 1996 summer flounder quota allocation for vessels landing in Maryland has been harvested.

The regulations at § 648.4(b) provide that Federal permit holders agree as a condition of the permit not to land summer flounder in any state that the Regional Administrator has determined no longer has commercial quota available. Therefore, effective 0001 hours December 27, 1997, through December 31, 1997, further landings of summer flounder in Maryland by vessels holding commercial Federal fisheries permits are prohibited for the remainder of the 1996 calendar year, unless additional quota becomes available through a transfer and is announced in the **Federal Register**. Federally permitted dealers are also advised that they may not purchase summer flounder from Federally permitted vessels that land in Maryland for the remainder of the calendar year, or until additional quota becomes available, effective on December 27, 1996, through December 31. 1996.

Furthermore, the closure of the State of Maryland to landings means that the quota allocated to all of the states for 1996 has been attained and all of those states have been closed by virtue of either state of Federal action. As required by § 648.101(a), this notification closes the summer flounder fishery in the EEZ to harvesting or otherwise possessing summer flounder by commercial vessels for the remainder of the 1996 calendar year. During the closure, harvesting or otherwise possessing summer flounder in the EEZ is prohibited as authorized under § 600.725(a) and (k).

Classification

This action is required by 50 CFR part 648 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 20, 1996.

Gary C. Matlock,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

RIN 0648–AH70

Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Small Mesh Area 2

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to modify the regulations implementing the Northeast Multispecies Fishery Management Plan (FMP). This rule modifies the size of Small Mesh Area 2, which is an exempted small mesh fishing area located in the Gulf of Maine/Georges Bank (GOM/GB) Regulated Mesh Area, by removing the northernmost portion from the list of exempted fisheries. The intent of this action is to reduce the bycatch of regulated multispecies in Small Mesh Area 2 so that it is consistent with the conservation objectives of the fishery.

EFFECTIVE DATE: January 1, 1997.

ADDRESSES: Copies of Amendment 7 to the FMP, its regulatory impact review (RIR), the regulatory flexibility analysis contained within the RIR, and its final supplemental environmental impact statement, are available upon request from Christopher Kellogg, Acting Executive Director, New England Fishery Management Council (Council), 5 Broadway, Saugus, MA 01906–1097. Copies of the environmental assessment (EA) supporting this action may be obtained from Dr. Andrew A. Rosenberg, Regional Administrator, NMFS, 1 Blackburn Drive, Gloucester, MA 01930.

FOR FURTHER INFORMATION CONTACT: Peter W. Christopher, Fishery Management Specialist, 508–281–9288.

SUPPLEMENTARY INFORMATION:
Regulations implementing Amendment 7 to the FMP became effective on July 1, 1996 (61 FR 27710, May 31, 1996). These regulations implemented a comprehensive set of measures to control fishing mortality and rebuild the primary stocks of regulated multispecies. Among the specific measures is a bycatch control measure that prohibits prosecution of any fishery for which NMFS has not determined the bycatch level of regulated multispecies.

The bycatch control restriction is applied on a fishery-specific basis in each of two regulated mesh areas: The GOM/GB Regulated Mesh Area and the Southern New England (SNE) Regulated Mesh Area. A vessel may not fish in these areas unless it is fishing under a multispecies or scallop days-at-sea allocation, fishing with exempted gear, fishing under the handgear or party/charter permit restrictions, or fishing in an exempted fishery.

The procedure for adding or removing exempted fisheries is described in § 648.80 of the regulations governing the FMP. These regulations state that additional fisheries may be exempted if, after consultation with the New England Fishery Management Council, the Regional Administrator, Northeast Region, NMFS, (Regional Administrator) finds that there are sufficient data or information to determine that the percentage of the bycatch of regulated multispecies is, or can be reduced to, less than 5 percent, by weight, of the total catch, and that such exemption will not jeopardize fishing mortality objectives. This section also authorizes the Regional Administrator to remove or modify existing exempted fisheries by imposing specific gear, area, seasonal, or other limitations appropriate to reduce bycatch of regulated multispecies.

On May 15, 1995, the Regional Administrator established a seasonal small mesh fishing area within part of the GOM/GB Regulated Mesh Area (60 FR 26841, May 19, 1995). This small mesh fishing area consists of two subareas, Small Mesh Areas 1 and 2, and was established on the basis that fishing in these areas was not likely to exceed the 5 percent bycatch allowance of regulated multispecies.

Subsequently, the Maine Fisheries Cooperative Association requested that the Regional Administrator reexamine the establishment of Small Mesh Area 2, since it felt that small mesh vessels were causing unacceptable damage to the resource. The Regional Administrator presented the industry request to the Council and, despite earlier data showing that fishers using small mesh in Small Mesh Area 2 during January through June exhibited less than a 5 percent bycatch of regulated multispecies, several members of the Council insisted that the fishery exceeded the maximum 5 percent bycatch of regulated multispecies. The Council concurred with the industry request that the Regional Administrator reexamine the area and stated it would support further restrictions if the Regional Administrator found that the bycatch was equal to or greater than 5 percent, by weight, of total catch, or that continuing the exemption might jeopardize meeting fishing mortality objectives.

After analyzing the available data and considering the gear used, the area where the fishery occurred, and other relevant factors, the Regional Administrator determined that the top third (northernmost portion) of Small Mesh Area 2 does not meet the exemption qualification requirements specified in § 648.80(a)(7). This area is geophysically distinct from the lower two-thirds of Small Mesh Area 2 in that it is in shallower water. The elimination of the northern portion of the area is consistent with the available data, which show that fishing activity in the northern portion of Square Mesh Area 2 has exceeded the allowable bycatch of regulated multispecies. Eligible vessels may continue to participate in the fishery in the lower portion of Small Mesh Area 2 from January through June.

Classification

The Regional Administrator determined that this final rule is necessary for the conservation and management of the fishery and that it is consistent with the Magnuson-Stevens Fishery Conservation and Management Act and other applicable law.

The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive prior notice and opportunity for comment under 5 U.S.C. 553(b)(B). Provisions under the FMP give the Regional Administrator authority to add, delete, or modify exempted fisheries based on the percentage of regulated species caught. Public meetings held by the Council to discuss this modification to Small Mesh Area 2, provided prior notice and opportunity for public comment to be made and considered, making additional notice and opportunity for public comment unnecessary. Further, the AA finds good cause to waive the 30-day delay in effectiveness of this regulation under 5 U.S.C. 553(d)(3), because fishing in the area when it opens January 1 with small mesh would jeopardize the conservation objectives of the fishery. Specifically, the FMP's goals to reduce regulated multispecies bycatch would be jeopardized. NMFS will employ notification methods to fishery participants and the affected public beyond notification by this **Federal Register** notice (e.g., by letter, fax) so that they will not unknowingly fish in violation of the area modification.

This final rule has been determined to be not significant for purposes of E.O. 12866.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: December 23, 1996.

Charles Karnella,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 648 is amended as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 648.80, paragraph (a)(8)(i) is revised to read as follows:

§ 648.80 Regulated mesh areas and restrictions on gear and methods of fishing.

* * * * * *

(a) * * *

(8) *Small Mesh Area 1/Small Mesh Area 2.* (i) Vessels subject to the minimum mesh size restrictions specified in paragraph (a)(2) of this section may fish with or possess nets with a mesh size smaller than the minimum size from July 15 through November 15 when fishing in Small Mesh Area 1 and from January 1 through June 30 when fishing in Small Mesh Area 2, except as specified in paragraph (a)(8)(ii) of this section. A vessel may not fish for, possess on board, or land any species of fish other than: Butterfish, dogfish, herring, mackerel, ocean pout, scup, squid, silver hake, and red hake, except for the following allowable bycatch species, with the restrictions noted: Longhorn sculpin; monkfish and monkfish parts—up to 10 percent, by weight, of all other species on board; and American lobster—up to 10 percent, by weight, of all other species on board or 200 lobsters, whichever is less. These areas are defined by straight lines connecting the following points in the order stated (copies of a chart depicting these areas are available from the Regional Director upon request):

SMALL MESH AREA 1

Proposed Rules

Federal Register
Vol. 61, No. 250
Friday, December 27, 1996

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 20

Export Reporting for Meat and Meat Products

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Extension of comment period for advance notice of proposed rulemaking.

SUMMARY: On November 14, 1996, the U.S. Department of Agriculture (USDA) published an advance notice of proposed rulemaking (**Federal Register**: November 14, 1996, Volume 61, Number 221, page 58343–58345) soliciting comments and views on a proposal to require reporting of export sales of meat (including poultry meat) and meat products. The proposal responded to a recommendation by the USDA Advisory Committee on Agricultural Concentration. This notice required that comments be received on or before January 13, 1997, to be assured of consideration. Under the proposal, firms involved in exporting meat products could be required to report detailed information on these sales to the Department on a weekly basis.

DATES: *Revised comment period.* The comment period is extended for 30 days and comments should be received on or before February 12, 1997, to be assured of consideration.

ADDRESSES: Comments should be sent to: Export Sales Reporting Branch, Trade and Economic Analysis Division, Room 5959—Stop 1025, Foreign Agricultural Service, U.S. Department of Agriculture, 1400 Independence Ave. SW, Washington, DC 20250–1025. All written comments received will be available for public inspection at the above address during business hours from 8:00 a.m. to 5:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Thomas B. McDonald, Jr., Chief, Export Sales Reporting Branch, Trade and Economic Analysis Division, Foreign Agricultural Service, U.S. Department of Agriculture, (202) 720–3273, FAX (202) 690–3275.

Signed at Washington, D.C. December 18, 1996.

August Schumacher, Jr.,

Administrator, Foreign Agricultural Service.

[FR Doc. 96–32909 Filed 12–26–96; 8:45 am]

BILLING CODE 3410–10–M

Food Safety and Inspection Service

9 CFR Part 381

[Docket No. 96–007P]

RIN 0583–AC17

Use of Two Kinds of Poultry Without Label Change

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: In response to a petition, the Food Safety and Inspection Service (FSIS) is proposing to amend the poultry products inspection regulations by adding a provision that would permit manufacturers of poultry products to interchange the amounts and kinds of poultry present in a product without requiring new labels for each formulation. This provision would apply in situations where two kinds of poultry make up at least 70 percent of the poultry and poultry ingredients used in the product formulation, and neither of the two kinds of poultry used constitutes less than 30 percent of the poultry and poultry ingredients used. In these situations, one label with the word "and" instead of a comma between the declaration of the kinds of poultry in the ingredients statement would indicate to consumers that the order of predominance of the two kinds of poultry may be interchanged. This action would provide consistent provisions for both meat and poultry products.

DATES: Comments must be received on or before: February 25, 1997.

ADDRESSES: Send an original and two copies of comments to: FSIS Docket Clerk, Docket #96–007P, Room 3806–S, 1400 Independence Avenue, SW, Washington, DC 20250–3700. Reference materials cited in this document and any comments received will be available for public inspection in the FSIS Docket Room from 8:30 a.m. to 1:00 p.m. and 2:00 p.m. to 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Charles Edwards, Director, Facilities, Equipment, Labeling and Compound Review Division, Office of Policy, Program Development, and Evaluation; (202) 418–8900.

SUPPLEMENTARY INFORMATION:

Background

FSIS has been petitioned to amend the poultry products inspection regulations to add a provision that would permit poultry processors to interchange the kinds of poultry used to prepare a poultry product without requiring that the product label be changed to reflect the order of predominance of the kinds of poultry.

The Federal meat inspection regulations currently provide that when two meat ingredients comprise at least 70 percent of the meat and meat byproduct ingredients of a product formulation and when neither of the two meat ingredients constitutes less than 30 percent of the total weight of the meat and meat byproducts used, the meat ingredients may be interchanged in the product formula without a change being made in the ingredients statement, if the word "and" is used in lieu of a comma between the two meat ingredients in the ingredients statement (9 CFR 317.2(f)(1)(v)). (Meat byproduct ingredients are any parts of a meat carcass that are capable of use as human food other than meat.) For example, if a sausage is made with both beef and pork the proportions of beef can vary from 30 to 70 percent and the proportions of pork can vary from 30 to 70 percent, without necessitating a change in the product's ingredients statement. This provision was originally promulgated in response to an industry request to allow meat processors to utilize different amounts of meat ingredients without having to develop and maintain an inventory of labels with different ingredients statements. This provision permits processors to utilize whichever species of meat is the least expensive at the time the product is being produced. This provision, when promulgated for meat products, was not extended to poultry products because, at that time, the poultry industry was producing further processed poultry

VOL 61 ISS 250 DE 27 1996 UMI

products (such as poultry rolls and sausages) only on a very limited scale. Conditions in the poultry industry have changed since that time. Therefore, the petitioner requests that the labeling flexibility afforded to meat processors be available to poultry processors.

FSIS has determined that there is merit to the petitioner's request, and is proposing to amend the poultry products inspection regulations to add a provision to permit manufacturers of poultry products to interchange the amounts and kinds of poultry present in a product formulation without requiring new labels for each formulation. This provision would apply to those products in which at least 70 percent of the poultry and poultry ingredients portion comprises two kinds of poultry, and neither of the two kinds of poultry used in the product constitutes less than 30 percent of the poultry and poultry ingredients. (Poultry ingredients include such products as giblets, skin and/or fat in excess of natural proportions, and mechanically separated (kind)).

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) all State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Executive Order 12866 and the Regulatory Flexibility Act

This proposal has been determined to be not significant under Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

The Administrator has made an initial determination that this proposal will not have a significant impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act (5 U.S.C. 601). The proposal would provide flexibility in the amount and kinds of poultry that may be used in a product formulation without having to change product labels.

Paperwork Requirements

Abstract: FSIS has reviewed the paperwork and recordkeeping requirements in this proposed rule. This proposed rule would permit establishments to interchange the amounts and kinds of poultry present in a product without having to change the product label. However, establishments wishing to take advantage of this provision would need to develop and print labels which conform to the proposed rule.

Estimate of Burden: Meat and poultry establishments must develop product labels in accordance with the regulations. To receive approval of the labels, establishments must complete FSIS Form 7234–1. FSIS program employees review FSIS Form 7234–1 to ensure that information on the label complies with the regulations. FSIS estimates that it will take 60 minutes to design and develop a modified product label in accordance with the proposed regulations, and 15 minutes to prepare FSIS Form 7234–1 and submit it, along with the label, to FSIS or a label expediter who will deliver the form and label to FSIS.

Respondents: Poultry establishments.

Estimated Number of Respondents: 50.

Estimated Number of Responses per Respondent: 2.

Estimated Total Annual Burden on Respondents: 125 hours.

Copies of this information collection assessment can be obtained from Lee Puricelli, Paperwork Specialist, Food Safety and Inspection Service, USDA, South Agriculture Building, Room 3812, Washington, DC 20250–3700.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (b) the accuracy of the Agency's estimate of the burden of the collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Send comments to both Lee Puricelli, Paperwork Specialist, at the address provided above, and the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20253.

Comments are requested by February 25, 1997. To be most effective, comments should be sent to OMB within 30 days of the publication date of this proposed rule.

List of Subjects

9 CFR Part 381

Poultry products inspection, Labeling.

For the reasons discussed in the preamble, FSIS is proposing to amend part 381 of the poultry products inspection regulations (9 CFR part 381) as follows:

PART 381—POULTRY PRODUCTS INSPECTION REGULATIONS

1. The authority citation for part 381 would continue to read as follows:

Authority: 7 U.S.C. 138f; 7 U.S.C. 450; 21 U.S.C. 451–470; 7 CFR 2.18, 2.53.

2. Section 381.118 would be amended by adding a new paragraph (f) to read as follows:

§ 381.118 Ingredients statement.

* * * * *

(f) Establishments may interchange the identity of two kinds of poultry (e.g., chicken and turkey) used in a product formulation without changing the product's ingredients statement under the following conditions: the two kinds of poultry used must comprise at least 70 percent by weight of the poultry and poultry ingredients (e.g., giblets, skin and/or fat in excess of natural proportions, or mechanically separated (kind)) used, and neither of the two kinds of poultry used can be less than 30 percent by weight of the total poultry and poultry ingredients used. The word "and" in lieu of a comma must be shown between the declaration of the two kinds of poultry in the ingredients statement.

Done at Washington, DC, on: December 17, 1996.

Thomas J. Billy,

Administrator.

BILLING CODE 3410–DM–P

FEDERAL RESERVE SYSTEM

12 CFR Part 203

[Regulation C; Docket No. R–0951]

Home Mortgage Disclosure

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed rule.

SUMMARY: The Board is publishing for comment proposed revisions to Regulation C (Home Mortgage Disclosure). The revisions would implement the amendments to the Home Mortgage Disclosure Act included in the Economic Growth and Regulatory Paperwork Reduction Act of 1996. Those amendments increase the exemption threshold for depository institutions and modify certain

disclosure requirements. The Board also proposes to extend the information collection authority under the Paperwork Reduction Act for another three years, and to make technical amendments to the transmittal sheet accompanying the loan/application register.

DATES: Comments must be received on or before February 25, 1997.

ADDRESSES: Comments should refer to Docket No. R–0951, and may be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551. Comments also may be delivered to Room B–2222 of the Eccles Building between 8:45 a.m. and 5:15 p.m. weekdays, or to the guard station in the Eccles Building courtyard on 20th Street, N.W. (between Constitution Avenue and C Street) at any time. Comments received will be available for inspection in Room MP–500 of the Martin Building between 9:00 a.m. and 5:00 p.m. weekdays, except as provided in 12 CFR 261.8 of the Board's rules regarding availability of information.

FOR FURTHER INFORMATION CONTACT: Jane Jensen Gell or Manley Williams, Staff Attorneys, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, at (202) 452–3667 or (202) 452–2412; for the hearing impaired *only*, Dorothea Thompson, Telecommunications Device for the Deaf, at (202) 452–3544.

SUPPLEMENTARY INFORMATION:

I. Background

On September 30, the President signed into law the Economic Growth and Regulatory Paperwork Reduction Act of 1996 (the 1996 Act) (Pub. L. 104–208, 110 Stat. 3009) . The 1996 Act, in part, amends the Home Mortgage Disclosure Act of 1975 (HMDA) (12 U.S.C. 2801 *et seq.*). HMDA requires most mortgage lenders located in metropolitan areas to collect data about their housing-related lending activity. Annually, lenders must file reports with their federal supervisory agencies and make disclosures available to the public. The Board's Regulation C (12 CFR Part 203) implements HMDA.

II. Proposed Revisions

A. Increasing the Exemption Based on Asset Size

Currently, depository institutions with assets of $10 million or less are exempt from HMDA. The 1996 Act increases this exemption for depository institutions by adjusting the $10 million figure by the change since 1975 in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPIW)—rounded to the nearest million. The Board proposes to revise § 203.3(a)(1)(ii) of Regulation C to implement this amendment to section 309 of HMDA (12 U.S.C. 2808).

The Bureau of Labor Statistics calculates the CPIW monthly and publishes the data with a lag of a few weeks. The seasonally adjusted figures are available with a longer lag. Accordingly, the Board proposes to use the "not seasonally-adjusted" figure. The 1996 Act calls for an initial adjustment based on the percentage by which the CPIW for 1996 exceeds the CPIW for 1975. To ensure that the public is informed of the new threshold promptly, the Board intends to publish a notice with the adjusted threshold as soon as the December 1996 data become available in early January. Based on the increase in the CPIW from December 1975 to October 1996, the adjusted figure would be $27.9 million, rounded to an exemption threshold of $28 million. Thus, institutions with assets of $28 million or less would be exempt from data collection in 1997.

Institutions covered during 1996 but exempt subsequently because of the new threshold (for example, institutions with assets of $17 million) are required to collect data for all of 1996, and to submit those data by March 1, 1997. Such institutions will not be subject to the data collection requirements for 1997.

The 1996 Act provides that the exemption is to be adjusted annually to reflect future changes in the CPIW. The Board could make the adjustment using December data or, if it wanted to announce the new threshold by year-end, using November data. To make the year-to-year adjustments consistent with the initial adjustment, the Board proposes to base the adjustments on December data and publish the results in the **Federal Register** as soon as those data become available in January. If the adjustment uses December data the threshold might be higher, but some institutions that are actually exempt might have to collect the data in the early weeks of the year because of the uncertainty as to the threshold. For example, one year the threshold could be $29 million based on November data and $30 million based on December data. An institution with assets of $28.5 million as of that December 31 might want the Board to use the November data and publish the threshold in December so it could cease data collection beginning January 1. An institution with assets of $29.5 million might want the Board to use the December data so that it would qualify for exemption, even though the institution would have collected data for the first few weeks of January before the new threshold was published. The Board requests comment on whether earlier notice based on November data is preferable to a potentially higher exemption threshold using December data.

Conforming amendments relative to the asset exemption would be made in several sections of Appendix A—Form and Instructions for Completion of HMDA Loan/Application Register, and in § 203.3 of Supplement I—Staff Commentary.

Section 309 of HMDA (12 U.S.C. 2808), as amended in 1991, requires the Board, in consultation with the Secretary of the Department of Housing and Urban Development, to establish an exemption for nondepository institutions comparable to the exemption for depository institutions. The 1996 Act amends section 309 by adding a parenthetical stating that the comparable exemption shall be "determined without regard to the adjustment made by subsection (b) [the CPIW adjustments]." Currently, a nondepository institution with offices in an MSA is exempt from HMDA if it had assets of $10 million or less as of the preceding December 31 and originated fewer than 100 home-purchase loans in the preceding calendar year. In 1996, depository institutions with assets of $28 million or less, on average, reported about 50 HMDA loan/application register entries apiece. Accordingly, the Board, in consultation with the Secretary, has determined that no change to the existing coverage of nondepository institutions is appropriate at this time.

B. Elimination of the Branch Disclosure Requirement

Currently, HMDA provides that within ten business days of receiving the disclosure statement from the Federal Financial Institutions Examination Council (FFIEC), an institution must make a copy of the statement available to the public for inspection and copying in at least one branch office in each additional MSA where the institution has offices. The institution must also make the disclosure statement available at its home office. Regulation C added the requirement that an institution must post a general notice concerning the availability of HMDA data at the institution's home office and at each physical branch in an MSA.

The 1996 Act amends section 304 of HMDA (12 U.S.C. 2803) to specify that

VOL 61 ISS 250 DE 27 1996 UMI

an institution need not make the information available at branch offices if the institution posts a notice and makes the information available upon a written request sent to the home office. The proposal amends § 203.5(b) concerning the public disclosure of an institution's mortgage loan disclosure statement accordingly.

For an institution choosing to make the HMDA data available upon written request, the 1996 Act requires a notice stating that the information is available from the home office upon written request. Currently, § 203.5(e) requires an institution to post—at the home office and at each branch office—a general notice about the availability of its HMDA data. Upon request, the institution must promptly provide the location where the data is available, and at its option may include the location in the notice. The Board believes the current provisions provide adequate notice and that requiring more detailed notices would not produce sufficient additional benefit to the public to justify the burden of preparing the new notices.

A literal reading of the 1996 Act could suggest that a request for HMDA data must be sent to the home office. The Board believes that specifying the home office as the location where requests are sent would not improve the public availability of this information. Accordingly, the revised § 203.5(e) would allow an institution to specify whatever address it wishes. The institution could either provide the address promptly upon request, or include the address in its notice.

Technical amendments to paragraphs (b) and (c) of § 203.5 clarify that an institution may continue to provide the data on an MSA-by-MSA basis. For example, if a person requests the disclosure statement for a particular branch location, the institution may provide just the statement for the MSA in which that branch is located.

Conforming amendments would be made in several sections in Appendix A—Form and Instructions for Completion of HMDA Loan/Application Register.

C. Disclosure Formats

Currently, Appendix A to Regulation C provides that an institution may make the public disclosures available in paper or automated form (a computer diskette, for example). The 1996 Act amends section 304 of HMDA (12 U.S.C. 2803) to provide that an institution may not make the information available in automated form (in place of paper) unless the person requesting the information agrees to receiving the data in that format. Appendix A, Section III.F. would be revised accordingly.

D. Revisions to the HMDA Loan/Application Register

The Board proposes to make three minor revisions to the HMDA loan/application register. To comply with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. ch. 3506; 5 CFR 1320 Appendix A.1), the following text would be added: "An agency may not conduct or sponsor, and an organization is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for the HMDA–LAR is 7100–0247." In addition, to facilitate prompt communication with a respondent, a blank for the respondent's facsimile number would be added to the transmittal sheet. To reduce burden, the Board proposes to modify the transmittal sheet so that a respondent will no longer have to enter the name and address of its supervisory agency.

III. Form of Comment Letters

Comment letters should refer to Docket No. R–0951. The Board requests that, when possible, comments be prepared using a standard courier typeface with a type size of 10 or 12 characters per inch. This will enable the Board to convert the text into machine-readable form through electronic scanning, and will facilitate automated retrieval of comments for review. Comments may also be submitted on computer diskettes, using either the 3.5" or 5.25" size, in any IBM-compatible DOS-based format. Comments on computer diskettes must be accompanied by a paper version.

IV. Regulatory Flexibility Analysis

In accordance with section 3(a) of the Regulatory Flexibility Act (5 U.S.C. 603), the Board's Office of the Secretary has reviewed the proposed amendments to Regulation C. Overall, the amendments are expected to reduce the burden on small entities. The proposed regulatory revisions implement the 1996 Act which, in part, increases the exemption threshold for depository institutions. The 1996 Act also creates an alternative means for making branch disclosures available. A final regulatory flexibility analysis will be prepared after consideration of comments received during the comment period.

V. Paperwork Reduction Act

A. Paperwork Burden

The proposed revisions to the information collection requirements are found in 12 CFR 203.3, 203.5 and Appendix A to Part 203 and implement the data collection and reporting requirements established by the Home Mortgage Disclosure Act. The respondents are mortgage lenders in metropolitan statistical areas. Under the act, each respondent must make its loan/application register available to the public for three years; and must provide for five years the disclosure statement that the FFIEC prepares from the data submitted by the respondent. Local public officials use the data to help identify target areas for residential redevelopment and rehabilitations. Members of the public use the data to help evaluate the extent to which mortgage lenders are serving local community and housing needs.

The amendments that the Board has proposed for public comment would decrease the number of respondents and ease compliance with the public disclosure requirements of the regulation. Small businesses are directly affected by the proposed amendments: many would no longer be required to collect, report, or disclose the information.

Regulation C applies to all types of financial institutions and other mortgage-lending institutions that meet the coverage tests. Under the Paperwork Reduction Act, however, the Board accounts for the paperwork burden associated with Regulation C only for state member banks, their subsidiaries, subsidiaries of bank holding companies, and other entities regulated by the Federal Reserve. Any estimates of paperwork burden for other respondents are provided by the federal agency or agencies that supervise them.

The Board estimates that the amendments' impact on the burden per response is negligible. The estimated burden per response varies from 10 to 10,000 hours, depending on individual circumstances, with estimated averages of 202 hours for state member banks and 160 hours for mortgage banking subsidiaries.

It is estimated that of the 565 state member banks that are currently covered because they exceed the $10 million asset threshold, 39 will be exempt as a result of the higher threshold. The 93 mortgage banking subsidiaries reporting HMDA data to the Federal Reserve are and would remain covered. The total amount of annual burden is estimated to decrease from 129,168 hours to 121,368 (a change of approximately 6 percent) as a consequence of the higher exemption threshold. The Board estimates that there would be no capital or start up cost associated with these amendments,

and that there is no annual cost burden beyond the estimated burden hours.

B. OMB Control Number

Under the Paperwork Reduction Act, an agency may not conduct or sponsor, and an organization is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number applicable to the HMDA–LAR data collection is 7100–0247.

C. Confidentiality

The Board has previously determined that the HMDA loan/application register is required by law (12 U.S.C. 2801–2810; 12 CFR Part 203) and completion of the register, submission to the appropriate federal supervisory agency, and disclosure to the public on request are mandatory. The data, as modified according to Appendix A of the regulation (paragraph III.E.), are made publicly available and are not considered confidential. Information that might identify individual borrowers or applicants is given confidential treatment under exemption 6 of the Freedom of Information Act (5 U.S.C. 552(b)(6)).

D. Extension of Authority

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506; 5 CFR 1320 Appendix A.1), the Board has reviewed Regulation C under the authority delegated to the Board by the Office of Management and Budget. The Board proposes to extend the authority to collect the HMDA loan/application register for three years through March 31, 2000.

E. Comments

In keeping with OMB regulations, comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the Federal Reserve's functions; including whether the information has practical utility; (b) the accuracy of the Federal Reserve's estimate of the burden of the proposed information collection, including the cost of compliance; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology. Comments on the collection of information may be sent to the Office of Management and Budget, Paperwork Reduction Project (7100–0247), Washington, D.C. 20503, with copies to Mary M. McLaughlin, Chief, Financial Reports Section, Division of Research and Statistics, Mail Stop 97, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

List of Subjects in 12 CFR Part 203

Banks, banking, Consumer protection, Federal Reserve System, Mortgages, Reporting and recordkeeping requirements.

Text of Proposed Revisions

Certain conventions have been used to highlight the proposed revisions to the regulation. New language is shown inside bold-faced arrows, while language that would be deleted is set off with bold-faced brackets.

For the reasons set forth in the preamble, the Board proposes to amend 12 CFR part 203 as follows:

PART 203—HOME MORTGAGE DISCLOSURE (REGULATION C)

1. The authority citation for part 203 continues to read as follows:

Authority: 12 U.S.C. 2801–2810.

2. Section 203.3 would be amended by revising paragraph (a)(1)(ii) to read as follows:

§ 203.3 Exempt institutions.

(a) *Exemption based on location, asset size, or number of home purchase loans.* (1) * * *

(ii) The institution's total assets were [$10 million or less] ►at or below the asset threshold established by the Board. For 1997 data collection, the asset threshold is $28 million as of December 31, 1996. For subsequent years, the Board will adjust the threshold based on the year-to-year change in the Consumer Price Index for Urban Wage Earners and Clerical Workers, not seasonally adjusted, as of the month of December, with rounding to the nearest million. The Board will publish the adjusted asset figure in January◄.

* * * * *

3. Section 203.5 would be amended as follows:

a. Under paragraph (b), the first sentence would be designated as paragraph (b)(1), sentences two and three of the newly designated paragraph (b)(1) would be removed, and a new paragraph (b)(2) would be added;

b. Under paragraph (c), the last sentence would be revised; and

c. Under paragraph (e), the last two sentences would be revised.

The revisions and additions would read as follows:

§ 203.5 Disclosure and reporting.

* * * * *

(b) *Public disclosure of statement.* ►(1)◄ A financial institution shall make its mortgage loan disclosure statement (to be prepared by the Federal Financial Institutions Examination Council) available to the public at its home office no later than three business days after receiving it from the Examination Council. [A financial institution shall also make its disclosure statement available to the public within ten business days in at least one branch office in each additional MSA where the institution has offices. The disclosure statement at a branch office need only contain data relating to properties in the MSA where the branch office is located.]

►(2) In addition, a financial institution shall either:

(i) Make its disclosure statement available to the public within ten business days of receiving it from the Examination Council in at least one branch office in each additional MSA where it has offices (the disclosure statement need only contain data relating to properties in the MSA where the branch office is located); or

(ii) Mail or deliver a copy of its disclosure statement to any person requesting it, within 15 calendar days of receiving a written request (the disclosure statement need only contain data relating to properties in the MSA for which the request is made).◄

(c) *Public disclosure of loan application register.* * * * [The modified register made available at a branch office need only contain data relating to properties in the MSA where the branch office is located.] ►The modified register need only contain data relating to the MSA for which the request is made.◄

* * * * *

(e) *Notice of availability.* * * * Upon request, it shall promptly provide the location of the institution's offices where the statement is available ►for inspection and the address where a written request may be sent for a copy of the data◄. At its option, an institution may include [the locations] ►this information◄ in its notice.

4. Appendix A to Part 203 would be amended as follows:

a. Paragraph I.A. would be amended by redesignating the introductory text, paragraph 1., and 2. as paragraph 1., paragraph 1.a., and paragraph 1.b., respectively;

b. Newly designated paragraph 1.a. would be revised;

c. A new paragraph 2. would be added; and

d. The undesignated paragraph EXAMPLE, would be designated as

VOL 61 ISS 250 DEC 27 1996 UMI

paragraph 3. and would be revised. The addition and revisions would read as follows:

Appendix A to Part 203—Form and Instructions For Completion of HMDA Loan/Application Register

* * * * *

I. Who Must File a Report

A. Depository Institutions.

►1.◄ * * *

[1.]►a.◄ Had assets of more than [$10 million] ►the asset threshold for coverage as published by the Board each year in January◄, and

[2.]►b.◄ * * *

►2. For 1997 data collection, the asset threshold is $28 million in total assets as of December 31, 1996.◄

►3. *Example.*◄ If on December 31 you had a home or branch office in an MSA and your assets exceeded [$10 million] ►the asset threshold◄, you must complete a register that lists the home-purchase and home-improvement loans that you originate or purchase (and also lists applications that did not result in an origination) beginning January 1.

* * * * *

5. Paragraph III. of Appendix A to Part 203 would be amended as follows:

a. Under paragraph D. the fourth sentence would be removed and a new sentence and new paragraphs 1. and 2. would be added at the end;

b. Under paragraph F. the first paragraph following the heading would be designated as paragraph 1. and revised, and the second paragraph would be designated as paragraph 2.; and

c. Under paragraph G. the first paragraph following the heading would be designated as paragraph 1. and a new heading would be added to the newly designated paragraph 1., and paragraph 2. would be added after the Home Mortgage Disclosure Act Notice.

The revisions and additions would read as follows:

* * * * *

III. Submission of HMDA–LAR and Public Release of Data

* * * * *

D. *Availability of disclosure statement.*

* * * [You also must make the disclosure statement available, within ten business days after receiving it from the FFIEC, in at least one branch office in each additional MSA where you have physical offices.] For these purposes a business day is any calendar day other than a Saturday, Sunday, or legal public holiday. ►You also must either:

1. Make your disclosure statement available to the public, within ten business days of receiving it from the FFIEC, in at least one branch office in each additional MSA where you have offices (the disclosure statement need only contain data relating to properties in the MSA where the branch office is located); or

2. Mail or deliver a copy of your disclosure statement to any person requesting it, within 15 calendar days of receiving a written request (the disclosure statement need only contain data relating to the MSA for which the request is made).◄

* * * * *

F. *Location and format of disclosed data.*

►1.◄ A financial institution must make a complete copy of its disclosure statement and modified register available to the public at its home office. Institutions may make these data available in [hard copy or] ►paper form or, if the person requesting the data agrees,◄ in automated form (such as by floppy disk or computer tape). [If you have physical branch offices in other MSAs, you must make available, in at least one branch office in each of those MSAs, either a complete copy of the disclosure statement or the portion of it that relates to properties in that MSA. Similarly, a modified register at a branch office need only reflect data concerning properties within the MSA where the branch is located.] ►A modified register need only reflect data relating to the MSA for which the request is made.◄

►2.◄ * * *

G. *Posters.*

►1. *Suggested language.*◄ * * *

►2. *Optional information.* At your option, you may include the location where the disclosed data are available for inspection and the address to be used for making a written request.◄

* * * * *

6. Supplement I to Part 203, under Section 203.3—Exempt Institutions, under 3(a) *Exemption based on location, asset size, or number of home-purchase loans,* the second sentence of Paragraph 1. *General* would be revised to read as follows:

Supplement I to Part 203—Staff Commentary

* * * * *

Section 203.3—Exempt Institutions

3(a) *Exemption based on location, asset size, or number of home-purchase loans.*

1. *General.* * * * For example, a bank whose assets [drop to $10 million or less] ►are at or below the threshold◄ on December 31 of a given year reports data for that full calendar year, in which it was covered, but does not report data for the succeeding calendar year. * * *

* * * * *

By order of the Board of Governors of the Federal Reserve System, December 16, 1996.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 96–AEA–14]

Proposed Establishment of Class E Airspace; Canandaigua, NY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would establish Class E Airspace at Canandaigua, NY. The development of a new Standard Instrument Approach Procedure (SIAP) at Canandaigua Airport based on the Global Positioning System (GPS) has made this proposal necessary. Additional controlled airspace extending upward from 700 feet above the surface (AGL) is needed to accommodate this SIAP and for Instrument Flight Rules (IFR) operations to the airport. The area would be depicted on aeronautical charts for pilot reference.

DATES: Comments must be received on or before January 3, 1997.

ADDRESSES: Send comments on the proposed rule in triplicate to: Manager, Operations Branch, AEA–530, Docket No. 96–AEA–14, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy Int'l Airport, Jamaica, NY 11430. The official docket may be examined in the Office of the Assistant Chief Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430.

An informal docket may also be examined during normal business hours in the Operations Branch, AEA–530, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430.

FOR FURTHER INFORMATION CONTACT: Mr. Francis T. Jordan, Jr., Airspace Specialist, Operations Branch, AEA–530, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments

are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy related aspects of the proposal.
Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made:
"Comments to Airspace Docket No. 96–AEA–14". The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with the FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Assistant Chief Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish Class E airspace extending upward from 700 feet above the surface (AGL) at Canandaigua, NY. A GPS RWY 13 SIAP has been developed for Canandaigua Airport. Additional controlled airspace extending upward from 700 feet above the surface (AGL) is needed to accommodate this SIAP and for IFR operations at the airport. The area would be depicted on appropriate aeronautical charts. Class E airspace designations for airspace extending upward from 700 feet above the surface are published in Paragraph 6005 of FAA Order 7400.9D, dated September 4, 1996, and effective September 16, 1996, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9D, dated September 4, 1996, and effective September 16, 1996, is proposed to be amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AEA NY E5 Canandaigua, NY [New]

Canandaigua Airport, NY
(Lat. 42° 54′ 26″ N, long. 77° 19′ 18″ W)

That airspace extending upward from 700 feet above the surface within a 10-mile radius of Canandaigua Airport, excluding that portion that coincides with the Rochester, NY Class E airspace area and the Palmyra, NY Class E airspace area.

* * * * *

Issued in Jamaica, New York, on December 11, 1996.

John S. Walker,

Manager, Air Traffic Division, Eastern Region.

[FR Doc. 96–33002 Filed 12–26–96; 8:45 am]

BILLING CODE 4910–13–M

FEDERAL TRADE COMMISSION

16 CFR Ch. I

Notice of Intent to Request Public Comments on Rules

AGENCY: Federal Trade Commission.

ACTION: Notice of intent to request public comments.

SUMMARY: As part of its systematic review of all current Commission regulations and guides, the Federal Trade Commission ("Commission") gives notice that it intends to request public comments on the rules listed below during 1997. The Commission will request comments on, among other things, the economic impact of, and the continuing need for, the rules; possible conflict between the rules and state, local, or other federal laws or regulations; and the effect on the rules of any technological, economic, or other industry changes. In certain instances the reviews also will address other specific matters or issues, such as reviews of the impact on small businesses mandated by the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* No Commission determination on the need for or the substance of a rule should be inferred from the intent to publish requests for comments.

FOR FURTHER INFORMATION CONTACT: Further details may be obtained from the Commission's contact person(s) listed for each particular item.

SUPPLEMENTARY INFORMATION: The Commission intends to initiate a review of and solicit public comments on the following rules during 1997:

(1) *Hobby Protection Act Rules*, 16 CFR Part 304. The review of the Hobby Protection Act Rules will include a review of the impact of the rules on small businesses under the Regulatory Flexibility Act.

Agency Contact: Robert E. Easton, Sr., Federal Trade Commission, Bureau of Consumer Protection, Division of Enforcement, Room S–4302, Sixth Street and Pennsylvania Ave., NW, Washington, DC 20580, (202) 326–3029.

(2) *900 Number Rule*, 16 CFR Part 308.

Agency Contact: Marianne Schwanke, Federal Trade Commission, Bureau of Consumer Protection, Division of Marketing Practices, Room H–238, Sixth

Street and Pennsylvania Ave., NW, Washington, DC 20580, (202) 326–3165.

(3) *Dry Cell Batteries Rule*, 16 CFR Part 403.

Agency Contact: Neil J. Blickman, Federal Trade Commission, Bureau of Consumer Protection, Division of Enforcement, Room S–4302, Sixth Street and Pennsylvania Ave., NW, Washington, DC 20580, (202) 326–3038.

(4) *Negative Option Plans Rule*, 16 CFR Part 425.

Agency Contact: Edwin Rodriguez, Federal Trade Commission, Bureau of Consumer Protection, Division of Enforcement, Room S–4302, Sixth Street and Pennsylvania Ave., NW, Washington, DC 20580, (202) 326–3147.

(5) *Power Output Claims for Amplifiers Rule*, 16 CFR Part 432.

Agency Contact: Robert E. Easton, Sr., Federal Trade Commission, Bureau of Consumer Protection, Division of Enforcement, Room S–4302, Sixth Street and Pennsylvania Ave., NW, Washington, DC 20580, (202) 326–3029.

(6) *Ophthalmic Practice Rules*, 16 CFR Part 456.

Agency Contact: James Reilly Dolan, Federal Trade Commission, Bureau of Consumer Protection, Division of Service Industry Practices, Room H–200, Sixth Street and Pennsylvania Ave., NW, Washington, DC 20580, (202) 326–3292.

(7) *Informal Dispute Settlement Procedures under Magnuson-Moss Warranty Act*, 16 CFR Part 703.

Agency Contact: Carole I. Danielson, Federal Trade Commission, Bureau of Consumer Protection, Division of Marketing Practices, Room H–238, Sixth Street and Pennsylvania Ave., NW, Washington, DC 20580, (202) 326–3115.

As part of its systematic program to review all current Commission regulations and guides, the Commission also has tentatively scheduled reviews of additional rules and guides for 1998 through 2006. A copy of this tentative schedule is appended. The Commission may modify or reorder the schedule in the future where appropriate to incorporate new legislative rules, or to respond to external factors (such as changes in the law) or other considerations.

Authority: 15 U.S.C. 41–58.

By direction of the Commission.

Donald S. Clark,

Secretary.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 1 and 5

Revised Procedures for Commission Review and Approval of Applications for Contract Market Designation and of Exchange Rules Relating to Contracts Terms and Conditions

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rulemaking.

SUMMARY: On November 22, 1996, the Commodity Futures Trading Commission (Commission) published in the **Federal Register** a proposal to amend its procedures relating to its review and approval of applications for contract market designation and proposed exchange rules relating to contract terms and conditions (61 FR 59386). The comment period ends on December 23, 1996. These fast-track review procedures are intended further to streamline Commission review of applications for contract market designation and proposed exchange rule amendments relating to contract terms and conditions. The Commission has determined, in this instance, to extend the comment period.

DATES: Comments must be received on or before January 16, 1997.

ADDRESSES: Comments should be mailed to the Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, N.W., Washington, DC 20581, attention: Office of the Secretariat; transmitted by facsimile at (202) 418–5521; or transmitted electronically at [secretary@cftc.gov]. Reference should be made to "Fast-track Designation and Rule Approval Procedures."

FOR FURTHER INFORMATION CONTACT: Paul M. Architzel, Chief Counsel, Division of Economic Analysis, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, N.W., Washington, DC 20581, (202) 418–5260, or electronically, [PArchitzel@cftc.gov].

SUPPLEMENTARY INFORMATION: The New York Mercantile Exchange (NYMEX) has filed a petition requesting an extension of time to submit comments on the Commission's proposed rulemaking concerning approval of applications for contract market designation and of exchange rules relating to contract terms and conditions. The Exchange requests an extension until January 16, 1997—the date that comments are to be received on the proposed rulemaking concerning the related topic of contract market review procedures for other rules (61 FR 66241, December 17, 1996). The NYMEX stated that it has spoken to representatives from the Chicago Mercantile Exchange and the Chicago Board of Trade concerning this request for an extension and that those exchanges agreed to join this request.

The Exchange stated that, since the proposed rulemakings concern similar and related issues, the issues should be considered and evaluated together and can best be addressed in one comment letter. Accordingly, the NYMEX concluded that a short delay will result in a more efficient rulemaking process.

For the reasons noted above, the Commission has determined to extend the public comment period for the subject rulemaking. The Commission believes that an extension of the comment period until January 16, 1997, would permit the NYMEX and any other interested parties fully to evaluate the proposed rulemaking and to submit their comments thereon to the Commission. The Commission cautions that the deadline for comments on the subject proposed rulemaking is independent of the deadline for comments on the proposed rulemaking concerning contract market review procedures for other rules. Any request for and Commission action on an extension of the comment period for the latter proposed rulemaking will not affect the deadline for comments on the subject proposed rulemaking.

Issued in Washington, DC on December 20, 1996.

Jean A. Webb,

Secretary of the Commission.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–209817–96]

RIN 1545–AU19

Treatment of Obligation-Shifting Transactions

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations relating to the treatment of certain multiple-party financing transactions in which one party realizes income from leases or similar agreements and another party claims deductions related to that income. In order to prevent tax avoidance, the proposed regulations recharacterize these transactions in a manner that clearly reflects income. The proposed regulations affect only persons that engage in these transactions. The regulations generally do not apply to routine transactions lacking characteristics of tax avoidance. This document also provides notice of a public hearing on the proposed regulations.

DATES: Written comments, requests to appear, and outlines of topics to be discussed at the public hearing scheduled for April 29, 1997, at 10 a.m. must be received by April 8, 1997.

ADDRESSES: Send submissions to: CC:DOM:CORP:R (REG–209817–96), Room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered between the hours of 8 a.m. and 5 p.m. to: CC:DOM:CORP:R (REG–209817–96), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW, Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option of the IRS Home Page, or by submitting comments directly to the IRS Internet site at http://www.irs.ustreas.gov/prod/tax_regs/comments.html. The public hearing will be held in the IRS Auditorium, Internal Revenue Building,

7th Floor, 1111 Constitution Avenue NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Jonathan Zelnik at (202) 622–3940; concerning submissions and the hearing, Christina Vasquez at (202) 622–7190 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224. Comments on the collection of information should be received by April 8, 1997. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the Internal Revenue Service, including whether the collection will have a practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of service to provide information.

The collection of information is in § 1.7701(l)–2(j). This information is required by the IRS to verify pass-through entity compliance with § 1.7701(l)–2. This information will be used to determine whether the amount of tax has been computed correctly. The collection of information is mandatory. The likely recordkeepers are businesses and other organizations. Estimated total annual recordkeeping burden: 500 hours. Estimated average annual burden per recordkeeper: 5 hours. Estimated number of recordkeepers: 100.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax information are confidential, as required by 26 U.S.C. 6103.

Background

The IRS and Treasury Department have become aware of multiple-party financing transactions ("stripping transactions") intended to allow one party to realize income from a lease or similar agreement and to allow another party to report deductions related to that income (for example, cost recovery or rental expenses). Notice 95–53, 1995–2 C.B. 334, describes several examples of these transactions, including transferred basis transactions, transfers of partnership interests, and variations involving licenses, service contracts, and prepayment, front-loading, and retention of rights to receive future payments.

Notice 95–53 states the position of the IRS that the claimed tax treatment of these transactions improperly separates income from related deductions and that the transactions do not produce the tax consequences desired by the parties. The notice also states that regulations will be issued under section 7701(l) of the Internal Revenue Code recharacterizing stripping transactions any significant element of which is entered into or undertaken on or after October 13, 1995. The notice requested comments regarding those regulations.

The IRS received only one set of comments in response to Notice 95–53. Those comments recommended that the regulations under section 7701(l) address a broader class of transactions than was described in the notice. Specifically, they recommended that the regulations defer the recognition of income in circumstances where there is an advance receipt or assignment of future income and there is the potential for the transactions to become stripping transactions. They also recommended that the regulations recharacterize these transactions without regard to whether there is a tax avoidance purpose. The comments reflected a desire for the regulations to produce an economic accrual of income and to enable taxpayers to determine the proper tax accounting for their transactions without regard to subsequent events.

The proposed regulations generally follow the notice and do not expand the class of transactions subject to recharacterization. The regulations do not require taxpayers to make any assumptions as to subsequent events. They are intended to produce tax results that conform to the economic substance of the transactions that they address. Furthermore, the regulations generally apply to transactions whether or not the parties have a tax avoidance purpose.

Explanation of Provisions

1. General Approach

Section 7701(l) authorizes the Secretary to "prescribe regulations recharacterizing any multiple-party financing transaction as a transaction directly among any 2 or more of such parties where the Secretary determines that such recharacterization is appropriate to prevent avoidance of any tax imposed by [the Internal Revenue Code]." The proposed regulations recharacterize transactions in which the transferee ("the assuming party") assumes obligations or acquires property subject to obligations under an existing lease or similar agreement and the transferor ("the property provider") or any other party has already received or retains the right to receive amounts that are allocable to periods after the transfer. The recharacterization reflects the general principle that a taxpayer who is treated for federal income tax purposes as the owner of rental property must recognize income that accrues during its period of ownership. , *e.g.*, *Steinway & Sons* v. *Commissioner*, 46 T.C. 375 (1966), *acq.*, 1967–2 C.B. 3; *Alstores Realty Corp.* v. *Commissioner*, 46 T.C. 363 (1966), *acq.*, 1967–2 C.B. 1.

For the period in which an assuming party in such a transaction is a party to the lease or similar agreement, the recharacterization requires the assuming party to report income on a level-rent basis calculated using the rules of the constant rental accrual method described in § 1.467–3(d) as proposed on June 3, 1996 (IA–292–84, 61 FR 27834, 27844). Thus, the assuming party is required to recognize rental income for the period in which it owns the property or leasehold interest. In addition, the transaction is recharacterized to include additional consideration in the form of a note provided by the assuming party to the property provider for the transfer of the property, resulting in interest income and expense for which the parties must account as appropriate. The property provider also must adjust its income for any differences between amounts it recognized and amounts it would have recognized if it had reported income on a level-rent basis for the periods that it owned the property or leasehold

interest. Finally, to account for any differences in timing or amount between payments the property provider actually receives after the transaction and payments treated as being made to the property provider under the note from the assuming party, the property provider is treated as an obligor or obligee under a second loan, for which the property provider must account accordingly.

2. Obligation-shifting Tsransactions

The proposed regulations are not intended to recharacterize transactions with little potential for tax avoidance. Taken together, the definition of "obligation-shifting transaction" and the enumerated exceptions limit the scope of the regulations to transactions that are not routine and that involve shifting of substantial amounts of income away from the taxpayer that recognizes deductions related to the income.

The proposed regulations apply to obligation-shifting transactions, which are defined as any transaction in which an assuming party assumes a property provider's obligations to a property user (or acquires property subject to a property provider's obligations to a property user) under a lease or similar agreement if the property provider or any other party has already received, or retains the right to receive, amounts that are allocable to periods after the transaction. The regulations define obligations under a lease or similar agreement as including a continuing obligation to make property available to the lessee or the ultimate user of the property. These obligations typically give rise to deductions, such as for cost recovery or, in the case of a master-lease/sublease arrangement, for payments under a master lease. The advance receipt of amounts that are allocable to periods after the obligation-shifting transaction often results in accelerated taxable income for the recipient. Thus, the definition describes transactions in which there is the potential for one party to recognize income but a different party to recognize deductions associated with that income.

In some transactions identified in Notice 95–53, one party sells, assigns, or otherwise transfers to a third party the right to receive future payments under a lease and includes as current income the amount received as consideration for the transfer. The underlying property (subject to the lease) is later transferred in a transaction intended to qualify as a transferred basis transaction. These transactions are within the scope of the regulations because the property transferee assumes obligations or acquires the property subject to the obligation to make the property available to the lessee and the property transferor already received amounts that are allocable to periods after the transaction by reason of the assignment of rights to receive future payments. In other transactions, the property transferor does not assign the right to future rental amounts but instead receives prepayment from the lessee or retains the right to receive future amounts over time. Both variations likewise are within the scope of the regulations.

The proposed regulations adopt an aggregate view of partnerships, treating each partner as having a proportionate share of the rights and obligations of the partnership. Thus, for example, if a partnership assigns its right to receive future amounts under a lease and allocates to its current partners the amount recognized, a later transfer of a partnership interest is an obligation-shifting transaction because the transferee partner assumes an allocable share of the partnership's obligation to make the property available to the lessee and because the transferor partner is treated as having already received amounts that are allocable to periods after the transaction. See *Example 3* of the proposed regulations. In appropriate cases, the IRS may assert other authorities to prevent the use of a partnership to effect an improper separation of income from related deductions. *See, e.g.*, § 1.701–2(d) (*Example 7*).

The proposed regulations also generally treat an obligation-shifting transaction as occurring if a subsidiary that is a member of a consolidated group becomes a nonmember at a time when the subsidiary has received payments under a lease or similar agreement that are allocable to periods after the transaction.

3. Lease or Similar Agreement

Under the proposed regulations, an obligation-shifting transaction involves a lease or similar agreement. The regulations define this term broadly to include any contract for the use or enjoyment of tangible or intangible property, including leaseholds, licenses, other non-fee interests in property, and other contracts (including service contracts) involving the use or enjoyment of property if the value of that use or enjoyment is more than *de minimis*. The proposed regulations, therefore, do not apply to service contracts that do not involve the use or enjoyment of property. The definition of obligation-shifting transaction, however, does not restrict the IRS's ability to challenge these transactions under other authorities. For instance, even if a transaction is not within the scope of the proposed regulation, the IRS may challenge it under one or more of the authorities identified in Notice 95–53.

The IRS requests comments on whether additional guidance is needed on the definition of lease or similar agreement.

4. Exceptions

The proposed regulations are not intended to recharacterize otherwise routine transactions, such as the incorporation of an entire line of business that does not involve significant shifting of income and deductions. See Rev. Rul. 80–198, 1980–2 C.B. 113, subject to the limitations described therein. Accordingly, the regulations provide a number of objective exceptions that generally will protect routine transactions from recharacterization. The regulations do not apply to transactions in which the amounts that are allocable to future periods but are not transferred are less than or equal to $100,000. The regulations do not apply to transactions in which total payments (including the aggregate expected future value of all contingent consideration) under the lease or similar agreement are not reasonably expected to exceed $250,000. The regulations do not apply to transactions in which the fair market value of the property that is subject to the lease or similar agreement and is transferred in the obligation-shifting transaction, plus the value of the amounts that are already received or retained by the property provider but are allocable to periods after the obligation-shifting transaction, is less than ten percent of the total assets (other than Class I and Class II assets as described in § 1.1060–1T(d) and debt issued by the property provider) transferred by the property provider in the transaction. The regulations do not apply to transactions in which the lease or similar agreement is a disqualified leaseback or long-term agreement within the meaning of § 1.467–3(b). The regulations do not apply to transactions described in section 381(a), unless the transaction is deemed to be an obligation-shifting transaction under proposed § 1.7701(l)–2(k). Finally, the regulations provide that a transaction is exempt from recharacterization if the parties to the transaction establish to the satisfaction of the Commissioner that the transaction does not present a significant potential for tax avoidance.

Because the purpose of recharacterization under section 7701(l) is to prevent tax avoidance, these objective exceptions are unavailable for

transactions entered into with a principal purpose of substantially reducing the present value of the aggregate tax liability of the property provider, the assuming party, and any other party whose taxable income is determined by reference to the taxable income of the property provider or the assuming party.

5. Recharacterization

The proposed regulations recharacterize an obligation- shifting transaction in order to ensure that the property provider and the assuming party both report the income from the underlying property allocable to their respective periods of ownership.

For purposes of determining the amounts that are allocable to periods under the lease or similar agreement, the proposed regulations apply a rent-leveling process based on the constant rental accrual method described in § 1.467–3(d) to all amounts that are treated as payable under the lease or similar agreement. At the time of the obligation-shifting transaction, the level rental amount is determined for the entire term of the lease or similar agreement using 110 percent of the applicable Federal rate based on that term. The amounts that are treated as payable under the lease or similar agreement at the time of the obligation-shifting transaction are the amounts that have already been paid to the property provider and the future amounts that, immediately before the obligation-shifting transaction, are payable to the property provider. Thus, if the property provider assigns the right to receive payments to a third party in exchange for consideration, the consideration is treated as an amount received under the lease or similar agreement. Because the property provider no longer has the right to receive the payments assigned to the third party, those payments (whether past or future) are not treated as amounts that are payable to the property provider for purposes of calculating the level rental amount.

The proposed regulations recharacterize an obligation- shifting transaction by treating the assuming party and the property provider as follows:

The assuming party is treated as acquiring the right to receive all amounts that are allocable to periods after the obligation-shifting transaction. The assuming party includes these amounts in income for the periods that it owns the property.

To reflect the amounts that the assuming party is treated as receiving under the recharacterization but that it does not actually receive, the assuming party also is treated as providing additional consideration to the property provider in the form of a note (a "section 7701(l) note"). The original principal balance of the section 7701(l) note equals the excess of the present value of the amounts that are allocable to periods after the obligation-shifting transaction over the present value of the amounts that are payable to the assuming party.

The property provider must adjust its income to the extent that it accounted for income under the lease or similar agreement before the obligation-shifting transaction in a manner inconsistent with the level-rent method described above. The adjustment, which can increase or decrease the property provider's income, equals the principal balance of the section 467 loan that would have existed if the property provider had been using the constant rental accrual method to account for amounts under the lease or similar agreement that are allocable to periods before the obligation-shifting transaction, reduced by any existing section 467 loan if the lease or similar agreement is a section 467 rental agreement. The constant rental amount is calculated using the amounts that are treated as payable under the lease or similar agreement.

Finally, to account for any differences in timing or amount between payments the property provider actually receives after the obligation-shifting transaction and payments treated as being made to the property provider under the section 7701(l) note, the property provider is treated as a party to a loan (a "section 7701(l) rent-leveling loan"). The section 7701(l) rent-leveling loan is created at the time of the obligation-shifting transaction. Its balance at that time equals the section 467 loan that would have existed if the property provider had been using the constant rental accrual method to account for amounts under the lease or similar agreement that are allocable to periods before the obligation-shifting transaction. Thus, in the periods after the obligation-shifting transaction, the property provider must account for any interest expense or income resulting from the section 7701(l) rent-leveling loan, in addition to any interest income or expense resulting from the section 7701(l) note.

Although section 467 may not apply to an obligation-shifting transaction, the effect of the proposed regulations is to recharacterize the transaction to produce the constant rental amount and associated loans that the parties would have been treated as having if the lease or similar agreement had been a section 467 rental agreement (modified to reflect the amounts already received or payable to the property provider immediately before the obligation-shifting transaction) and had been subject to the constant rental accrual method. Thus, the assuming party is treated as if it had purchased the property in part with a note, had obtained the right to receive rental amounts on the constant rental accrual method during its ownership of the property, and had used those amounts to service the note. For the property provider, the proposed regulations provide a recharacterization that is similar (but not identical) to the treatment required when a lessor disposes of property subject to a section 467 rental agreement that was accounted for under the constant rental accrual method.

The proposed regulations provide the exclusive recharacterization of an obligation-shifting transaction for a property provider and an assuming party. Thus, if an obligation-shifting transaction is recharacterized under this section and the lease or similar agreement is a section 467 rental agreement, the rules of this section supersede the rules of §§ 1.467–1 through 1.467–8 as proposed on June 3, 1996 (IA–292–84, 61 FR 27834) for the property provider (the transferor) and the assuming party (the transferee). The assuming party's income after the obligation-shifting transaction is determined under this section and not under § 1.467–7(e)(1). Similarly, the rules provided in § 1.467–7(e)(2) for determining the amount of the section 467 loan for the period after the transfer, the amount realized by the property provider, and the assuming party's basis in the property do not apply to obligation-shifting transactions recharacterized by this section.

The recharacterization does not affect the property user or rent factor (if any), because, even though they are parties to the multiple-party financing transaction, no adjustment to their treatment of the transaction is necessary to prevent the avoidance of tax. *Cf.* § 1.881–3(a)(3)(ii)(A) (limiting purposes for which conduit financing arrangements are recharacterized). Thus, if the lease or similar agreement is a section 467 rental agreement, the property user must continue to take section 467 rent and section 467 interest into account without regard to the obligation-shifting transaction and the recharacterization under this section. *See* § 1.467–7(e)(1).

6. Issues Not Addressed

The proposed regulations do not address transactions in which a taxpayer assigns rights to future income

but does not transfer the underlying property to another taxpayer, except as provided in the special rules regarding pass-through entities and consolidated groups.

7. Proposed Effective Date

Notice 95–53 states that the regulations under section 7701(l) will be effective "with respect to stripping transactions any significant element of which is entered into or undertaken on or after October 13, 1995." The regulations are proposed to adopt the effective date stated in the notice.

Special Analyses

It is hereby certified that these regulations do not have a significant economic impact on a substantial number of small entities. This certification is based on the understanding of the IRS that the total number of entities engaging in transactions affected by these regulations is not substantial and, of those entities, most are not small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. chapter 6). Therefore, a Regulatory Flexibility Analysis is not required. It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in E.O. 12866. Therefore, a regulatory assessment is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comments on its impact on small businesses.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) that are submitted timely to the IRS. All comments will be available for public inspection and copying.

A public hearing has been scheduled for April 29, 1997, at 10 a.m. in the IRS Auditorium, Internal Revenue Building, 7th Floor, 1111 Constitution Avenue NW, Washington, DC. Because of access restrictions, visitors will not be admitted beyond the building lobby more than 15 minutes before the hearing starts.

The rules of 26 CFR 601.601(a)(3) apply to the hearing.

Persons that wish to present oral comments at the hearing must submit written comments and submit an outline of the topics to be discussed and the time to be devoted to each topic (a signed original and eight (8) copies) by April 8, 1997.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is Jonathan R. Zelnik, Office of the Assistant Chief Counsel (Financial Institutions & Products). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding an entry in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.7701(l)–2 also issued under 26 U.S.C. 7701(l). * * *

Par. 2. Section 1.7701(l)–1 is amended as follows:

1. Paragraphs (b)(6) and (b)(7) are revised.

2. Paragraph (b)(8) is added.

The revisions and addition reads as follows:

§ 1.7701(l)–1 Conduit financing arrangements.

* * * * *

(b) * * *

* * * * *

(6) Section 1.6038A–3(b)(5);

(7) Section 1.6038A–3(c)(2)(vii); and

(8) Section 1.7701(l)–2.

Par. 3. Section 1.7701(l)–2 is added under the center heading "General Actuarial Valuations" to read as follows:

§ 1.7701(l)–2 Treatment of obligation-shifting transactions.

(a) *Purpose.* The purpose of this section is to prevent avoidance of tax by parties participating in multiple-party financing transactions that involve an assumption of obligations under a lease or similar agreement. This section should be interpreted in a manner consistent with this purpose.

(b) *In general.* Obligation-shifting transactions as defined in paragraph (h)(1) of this section are recharacterized in the manner described in paragraph (d) of this section unless an exception in paragraph (c) of this section applies.

(c) *Exceptions*—(1) *In general.* Paragraph (d) of this section does not apply if any of the following is satisfied:

(i) The aggregate amounts that have already been received by or are payable to the property provider but are allocable to periods (including partial periods) after the obligation-shifting transaction (as determined under paragraph (g) of this section) are less than or equal to $100,000.

(ii) The sum of the aggregate payments (including contingent payments) under the lease or similar agreement and the aggregate value of other consideration (including contingent consideration) to be received under the lease or similar agreement is not reasonably expected to exceed $250,000. The rules of § 1.467–1(c)(4)(ii)[1] apply in determining the amount described in this paragraph (c)(1)(ii).

(iii) The fair market value of the leased property is less than ten percent of the aggregate fair market value of all of the property (excluding Class I assets as described in § 1.1060–1T(d)(1), Class II assets as described in § 1.1060–1T(d)(2)(i); and debt issued by the property provider) that the property provider transfers to the assuming party as part of the same transaction or series of related transactions. For this purpose, the fair market value of the leased property is the sum of—

(A) The fair market value of the property subject to the lease or similar agreement and transferred in the obligation-shifting transaction, plus

(B) The value of the amounts that have already been received under the lease or similar agreement or are retained by the property provider or any other party but are allocable to periods (including partial periods) after the obligation-shifting transaction.

(iv) The agreement(s) between the property provider and the property user is a disqualified leaseback or long-term agreement within the meaning of § 1.467–3(b).[2]

(v) The transaction is described in section 381(a), unless the transaction is deemed to be an obligation-shifting transaction under paragraph (k) of this section.

(vi) The Commissioner determines that the transaction does not

[1] This section appears in proposed regulations published on June 3, 1996 (IA–292–84, 61 FR 27834, 27839).

[2] This section appears in proposed regulations published on June 3, 1996 (IA–292–84, 61 FR 27834, 17844).

VOL 61 ISS 250 DE 27 1996 UMI

substantially reduce the present value of the tax liability of the assuming party or otherwise result in the avoidance of tax.

(2) *Limitation on exceptions.* The exceptions listed in paragraph (c)(1) of this section do not apply to obligation-shifting transactions entered into with a principal purpose of substantially reducing the present value of the aggregate tax liability of the assuming party, the property provider, and any person whose taxable income is determined (in whole or in part) by reference to the taxable income of the property provider or the assuming party.

(d) *Recharacterization of obligation-shifting transaction*—(1) *In general.* In order to clearly reflect the income of the assuming party and the property provider, an obligation-shifting transaction is recharacterized as follows:

(i) *Assuming party treated as receiving all allocable rents.* The assuming party is treated as acquiring the right to receive (and as receiving when due) all amounts under the lease or similar agreement that are allocable (as determined under paragraph (g) of this section) to periods (including partial periods) after the obligation-shifting transaction. Thus, the assuming party must include these amounts in income in the periods to which they are allocable.

(ii) *Assuming party treated as issuing section 7701(l) note.* The assuming party is treated as issuing to the property provider, as additional consideration in the obligation-shifting transaction, a section 7701(l) note, with terms as described in paragraph (e) of this section. Accordingly, the assuming party and the property provider must account for interest expense and income from the section 7701(l) note in the periods (including partial periods) following the obligation-shifting transaction.

(2) *Section 7701(l) rent-leveling loan and adjustment to property provider's income*—(i) *Section 7701(l) rent-leveling loan.* To account for any differences in timing or amount between payments actually received by the property provider after the obligation-shifting transaction and payments (as described in paragraph (e)(3) of this section) treated as being made under the section 7701(l) note, the property provider is treated as a party to a section 7701(l) rent-leveling loan, with terms as described in paragraph (f) of this section. Accordingly, the property provider must account for interest expense or income (as appropriate) in the periods (including partial periods) following the obligation-shifting transaction.

(ii) *Adjustment to property provider's income.* To account for any differences between amounts previously included by the property provider and amounts that are allocable to periods before the obligation-shifting transaction, on the date on which the obligation-shifting transaction is consummated, the property provider must treat as an item of expense or income (as appropriate)—

(A) The principal balance of the section 7701(l) rent-leveling loan, minus

(B) The principal balance (plus interest not already included in the principal balance) of the property provider's section 467 loan (if any) as determined under the principles of § 1.467–4(a)(4) [3] and existing as of that date.

(3) *Exclusive recharacterization.* If the lease or similar agreement is a section 467 rental agreement, the property provider and the assuming party must account for the recharacterized transaction under the provisions of this section and not under the provisions of §§ 1.467–1 through 1.467–8.[4]

(e) *Section 7701(l) note*—(1) *Principal.* On the date on which the obligation-shifting transaction is consummated, the principal balance of the section 7701(l) note equals the excess of—

(i) The present value of the amounts that are allocable to periods (including partial periods) after the obligation-shifting transaction, over

(ii) The present value of the amounts that are payable to the assuming party.

(2) *Present value, yield, and compounding period.* For purposes of paragraph (e)(1) of this section, present value is determined under the rules of § 1.467–2(d)[5]. The yield of the section 7701(l) note equals 110 percent of the applicable Federal rate on the date on which the obligation-shifting transaction is consummated, based on the remaining term of the lease or similar agreement. The compounding period for determining both the original principal balance and the yield must equal the period used in determining the amounts that are allocable (as determined under paragraph (g) of this section) to periods under the lease or similar agreement.

(3) *Repayment schedule*—(i) *Amount.* The payment for each period under the section 7701(l) note is—

(A) The amount that is taken into account by the assuming party under paragraph (d)(1)(i) of this section, minus

(B) The amount received by the assuming party for that period.

(ii) *Timing.* The timing of section 7701(l) note payments, as determined under paragraph (e)(3)(i) of this section, is the same as the timing of the payments taken into account by the assuming party under paragraph (d)(1)(i) of this section.

(4) *Debt for all purposes.* A section 7701(l) note is debt for all purposes of the Internal Revenue Code. The principal balance of the section 7701(l) note after the obligation-shifting transaction may be positive or negative. If the principal balance is positive, the note represents an amount owed by the assuming party to the property provider, and if the principal balance is negative, the note represents an amount owed by the property provider to the assuming party.

(f) *Section 7701(l) rent-leveling loan*—(1) *Principal.* On the date on which the obligation-shifting transaction is consummated, the principal balance of the section 7701(l) rent-leveling loan equals the principal balance (plus any interest not already included in the principal balance) of the section 467 loan as determined under § 1.467–4(b) that would have existed as of that date if—

(i) The amounts payable under the lease or similar agreement were the amounts described in paragraphs (g)(1) and (g)(2) of this section, and

(ii) The property provider had reported all items of income and expense with respect to the lease or similar agreement by applying the constant rental accrual method described in § 1.467–3(d) and by determining the section 467 rent for each period in accordance with § 1.467–1(d)(2)(i).

(2) *Yield and compounding period.* The yield of the section 7701(l) rent-leveling loan equals 110 percent of the applicable Federal rate on the date on which the obligation-shifting transaction is consummated, based on the original term of the lease or similar agreement. The compounding period for determining the yield must equal the period used in determining the amounts that are allocable (as determined under paragraph (g) of this section) to periods under the lease or similar agreement.

(3) *Repayment schedule*—(i) *Amount.* The property provider's payment (or receipt) for each period under the section 7701(l) rent-leveling loan is—

(A) The amount (as described in paragraph (e)(3)(i) of this section)

---

[3] This section appears in proposed regulation published on June 3, 1996 (IA–292–84, 61 FR 27834, 27845).

[4] These sections appear in proposed regulations published on June 3, 1996 (IA–292–84, 61 FR 27834).

[5] This section appears in proposed regulations published on June 3, 1996 (IA–292–84, 61 FR 27834, 27842).

treated as paid in satisfaction of the section 7701(l) note, minus

(B) The amount received by the property provider under the lease or similar agreement for that period.

(ii) *Timing.* The timing of section 7701(l) rent-leveling loan payments, as determined under paragraph (f)(3)(i) of this section, is governed by paragraph (g) of this section (and thus, is the same as the timing of the payments taken into account by the assuming party under paragraph (d)(1)(i) of this section).

(4) *Debt for all purposes.* A section 7701(l) rent-leveling loan is debt for all purposes of the Internal Revenue Code. The principal balance of the section 7701(l) rent-leveling loan may be positive or negative. If the principal balance is positive, the amount represents a loan on which the property provider is the obligee, and if the principal balance is negative, the amount represents a loan on which the property provider is the obligor.

(g) *Determining amounts that are allocable to periods under the lease or similar agreement.* The amounts that are allocable to periods under a lease or similar agreement are determined (immediately before the obligation-shifting transaction is consummated) by applying the constant rental accrual method described in § 1.467–3(d) from the inception of the lease or similar agreement based on—

(1) The amounts that have already been received under the lease or similar agreement, and

(2) The amounts that are payable under the lease or similar agreement.

(h) *Definitions.* The following definitions apply solely for purposes of this section.

(1) An *obligation-shifting transaction* is any transaction in which an assuming party assumes a property provider's obligations to a property user (or acquires property subject to a property provider's obligations to a property user) under a lease or similar agreement if the property provider or any other party has already received, or retains the right to receive, amounts that are allocable to periods after the transaction.

(2) A *property user* is any person with the right to use property under a lease or similar agreement.

(3) A *property provider* is any person (other than an assuming party in its capacity as such) that is obligated to make property available to a property user on account of a lease or similar agreement.

(4) An *assuming party* is any person that assumes obligations or acquires property subject to obligations under an existing lease or similar agreement with a property user.

(5) A *lease or similar agreement* is any contract for the use or enjoyment of tangible or intangible property, including leaseholds, licenses, other non-fee interests in property, and other contracts (including service contracts) involving the use or enjoyment of property if the fair market value of that use or enjoyment is more than de minimis.

(6) *Obligations under a lease or similar agreement* include the continuing obligation to make property subject to a lease or similar agreement available to a property user. To the extent that an assuming party assumes obligations of a property provider or acquires property subject to obligations of a property provider, the obligations shall not thereafter be treated as obligations of the property provider.

(7) *Amounts that have already been received under the lease or similar agreement* include consideration received (as of the date on which the obligation-shifting transaction is consummated) for assigning the rights to receive payments under the lease or similar agreement.

(8) *Amounts that are payable under the lease or similar agreement* do not include payments the rights to which have been assigned in an arm's-length transaction to an unrelated third person in exchange for consideration.

(9) A *section 7701(l) note* is indebtedness arising from the recharacterization described in paragraph (d)(1)(ii) of this section. The terms of a section 7701(l) note are described in paragraph (e) of this section.

(10) A *section 7701(l) rent-leveling loan* is indebtedness arising from the recharacterization described in paragraph (d)(2)(i) of this section. The terms of a section 7701(l) rent-leveling loan are described in paragraph (f) of this section.

(i) *Reserved.*

(j) *Pass-through entity look-through rule.* For purposes of determining whether any person is a property user, a property provider, or an assuming party, the person is treated as having the rights and obligations of any pass-through entity in which the person is a partner, shareholder, beneficiary, or other participant, but only to the extent of the person's allocable share of pass-through entity items relating to the property. The pass-through entity must reflect the required recharacterization on its books.

(k) *Consolidated group rule.* For purposes of this section, if a subsidiary is a member of a consolidated group and the subsidiary or a successor becomes a nonmember (other than in a transaction described in § 1.1502–13(j)(5)), the nonmember (whether or not a separate legal entity) will be treated as a separate corporation that acquires the assets and assumes the obligations of the subsidiary. For example, assume that P sells all the stock of S, previously a wholly-owned subsidiary of P and a member of the P consolidated group, and that, at the time of the sale, S already has received amounts under a lease that are allocable to periods after the sale. Under this paragraph (k), an obligation-shifting transaction occurs when S becomes a nonmember. S, as a nonmember, is treated as having assumed the obligations under the lease. Therefore, S must adjust its income as provided in paragraph (d)(2)(ii) of this section immediately before it becomes a nonmember of the consolidated group. After the sale, S is treated as both a property provider and an assuming party in the obligation-shifting transaction.

(l) *Reserved.*

(m) *Examples.* The following examples illustrate the rules of this section. Each example assumes that all taxpayers use the calendar year as the taxable year, all payment periods are the calendar year, and none of the rental agreements are disqualified leasebacks or long-term agreements under § 1.467–3(b). Except as otherwise provided, none of the exceptions in paragraph (c)(1) of this section apply. The examples read as follows:

Example 1. *Retained rents; section 351 transfer*—(i) *Facts.* (A) On January 1, 2001, A leases property to B for a five-year period. The lease provides for rent of $10,000,000 per year, payable annually on December 31.

(B) On January 1, 2002, A transfers the leased property to D in exchange for D preferred stock. A retains the right to receive the remaining four years of rent from B. As part of the same transaction, C transfers $100,000,000 to D in exchange for D common stock. After the transaction, A and C own 100 percent of the stock of D. Assume the transaction meets all of the requirements of section 351. C and D are members of the same consolidated group as defined in § 1.1502–1(h). One hundred ten percent of the applicable Federal rate based on annual compounding is 7 percent.

(ii) *Obligation-shifting transaction.* B is a property user because B has the right to use the property under the lease with A. A is a property provider because A is obligated to make the property available to B on account of the lease. D is an assuming party because in the January 1, 2002, transaction D acquires the property subject to A's obligations under the lease to make the property available to B for the remaining four years of the lease. The transaction is an obligation-shifting transaction because D is an assuming party

and A retains the right to receive rent from B allocable to periods after the transaction.

(iii) *Recharacterization.* As of January 1, 2002, the transaction is recharacterized as follows:

(A) Under the constant rental accrual method described in § 1.467–3(d), the amount accruing for each calendar year period under the lease is $10,000,000. D is treated as acquiring the right to receive the amounts allocable to the four periods after the obligation-shifting transaction. Thus, in 2002, 2003, 2004, and 2005, D must recognize $10,000,000 rental income.

(B) The principal balance of the section 7701(l) note equals $33,872,112.56, with a yield equal to 7 percent based on annual compounding. As part of the obligation-shifting transaction, D is treated as having given A the section 7701(l) note as additional consideration. The amount of the section 7701(l) note is treated as "other property" transferred from D to A in the section 351 exchange. D is treated as making section 7701(l) note payments to A. A has interest income on the section 7701(l) note. D has interest expense on the section 7701(l) note. A and D account for the section 7701(l) note as follows:

SECTION 7701(l) NOTE

Taxable year ending	Beginning balance	Payment	Interest	Principal
12/31/02	$33,872,112.56	$10,000,000.00	$2,371,047.88	$7,628,952.12
12/31/03	26,243,160.44	10,000,000.00	1,837,021.23	8,162,978.77
12/31/04	18,080,181.67	10,000,000.00	1,265,612.72	8,734,387.28
12/31/05	9,345,794.39	10,000,000.00	654,205.61	9,345,794.39

(C) Because the amount A recognized in the year before the obligation-shifting transaction equals the amount A would have recognized under the constant rental accrual method, A's adjustment to income on the consummation of the obligation-shifting transaction is $0.

(D) At the time of the obligation-shifting transaction, the principal balance of the section 7701(l) rent-leveling loan equals $0. Furthermore, because the amounts A actually receives each year after the obligation-shifting transaction, $10,000,000, equal the amounts D is treated as paying A under the section 7701(l) note, $10,000,000, the balance of the section 7701(l) rent-leveling loan equals $0 for all periods after the obligation-shifting transaction. Thus, A has no interest income or expense arising from the section 7701(l) rent-leveling loan.

Example 2. *Rents already received; section 351 transfer*—(i) Facts. (A) On January 1, 2001, X leases property to Y for a seven-year period. The XY lease provides for rent of $900,000 per year, payable annually on December 31. Also on January 1, 2001, Y leases the property to Z for a five-year period. The YZ lease provides for rent payable on December 31 of each year as follows: $800,000 in 2001, $900,000 in 2002, $1,000,000 in 2003, $1,100,000 in 2004, and $1,200,000 in 2005.

(B) On December 31, 2001, Y sells to F the right to receive all rents from Z for 2002 through 2005. F pays Y $3,146,345.27. Y includes the $3,146,345.27 as ordinary income.

(C) On January 1, 2002, Y contributes to S cash of $2,500,000, Y's rights and obligations under the lease with X, and Y's rights and obligations under the lease with Z in exchange for S preferred stock. As part of the same transaction, P transfers cash of $7,500,000 to S in exchange for S common stock. After the transaction, Y and P own 100 percent of the stock of S. Assume the transaction meets all of the requirements of section 351. S and P are members of the same consolidated group as defined in § 1.1502–1(h). One hundred ten percent of the applicable Federal rate based on annual compounding is 10 percent.

(ii) *Obligation-shifting transaction.* Z is a property user because Z has the right to use the property under the YZ lease. Y is a property provider because Y is obligated to make the property available to Z. S is an assuming party because in the January 1, 2002, transaction, S assumes Y's obligations under the YZ lease to make the property available for the remaining four years of the lease. The transaction is an obligation-shifting transaction because S is an assuming party and Y has already received amounts allocable to periods after the transaction (Y sold to F the right to receive rent payments under the YZ lease for 2002 through 2005).

(iii) *Recharacterization.* As of January 1, 2002, the transaction is recharacterized as follows:

(A) Under the constant rental accrual method described in § 1.467–3(d), the amount accruing for each calendar year period under the YZ lease is $946,396.31, based on the $800,000 Y received from Z on December 31, 2001, and the $3,146,345.27 Y received from F on December 31, 2001. S is treated as acquiring the right to receive the amounts allocable to the four periods after the obligation-shifting transaction. Thus, S must recognize $946,396.31 of rental income for each of the four periods following the obligation-shifting transaction.

(B) The principal balance of the section 7701(l) note equals $2,999,948.96, with a yield equal to 10 percent based on annual compounding. As part of the obligation-shifting transaction, S is treated as having given Y the section 7701(l) note as additional consideration. The amount of the section 7701(l) note is treated as "other property" transferred from S to Y in the section 351 exchange. S is treated as making section 7701(l) note payments to Y. Y has interest income on the section 7701(l) note. S has interest expense on the section 7701(l) note. S and Y account for the section 7701(l) note as follows:

SECTION 7701(l) NOTE

Taxable year ending	Beginning balance	Payment	Interest	Principal
12/31/02	$2,999,948.96	$946,396.31	$299,994.90	$646,401.41
12/31/03	2,353,547.55	946,396.31	235,354.75	711,041.56
12/31/04	1,642,505.99	946,396.31	164,250.60	782,145.71
12/31/05	860,360.28	946,396.31	86,036.03	860,360.28

(C) At the time of the obligation-shifting transaction, the principal balance of the section 467 loan that would have existed if Y had reported all items of income and expense by applying the constant rental accrual method equals negative $2,999,948.96. Thus, in computing its income on the consummation of the obligation-shifting transaction, Y must take into account an expense equal to $2,999,948.96.

(D) At the time of the obligation-shifting transaction, the principal balance of the section 7701(l) rent-leveling loan equals negative $2,999,948.96. Y must account for the section 7701(l) rent-leveling loan as follows:

SECTION 7701(l) RENT-LEVELING LOAN

Taxable year ending	Beginning balance	Payment	Interest	Principal
12/31/02	($2,999,948.96)	($946,396.31)	($299,994.90)	($646,401.41)
12/31/03	(2,353,547.55)	(946,396.31)	(235,354.75)	(711,041.56)
12/31/04	(1,642,505.99)	(946,396.31)	(164,250.60)	(782,145.71)
12/31/05	(860,360.28)	(946,396.31)	(86,036.03)	(860,360.28)

Example 3. *Rents already received; sale of a partnership interest*—(i) *Facts.* (A) On January 1, 2001, A, B, and C form partnership PRS by contributing $3,600,000, $396,000, and $4,000, respectively, for proportionate interests (90.0 percent, 9.9 percent, and 0.1 percent, respectively) in the capital and profits of PRS. On the same day, PRS purchases property for $4,000,000 and leases the property to X for a five-year period. The lease provides for rent payable on December 31 of each year as follows: $800,000 in 2001, $900,000 in 2002, $1,000,000 in 2003, $1,100,000 in 2004, and $1,200,000 in 2005.

(B) On December 31, 2001, PRS sells to F the right to receive all rents from X for 2002 through 2005. F pays PRS $3,146,345.27. PRS treats the $3,146,345.27 as ordinary income allocated $2,831,710.74 to A, $311,488.18 to B, and $3,146.35 to C. One hundred ten percent of the applicable Federal rate based on annual compounding is 10 percent.

(C) Immediately following the sale of the rents, A sells its entire partnership interest to D based on the fair market value of 90 percent of PRS's assets. PRS does not have an election in effect under section 754.

(ii) *Obligation-shifting transaction.* X is a property user because X has the right to use the property under the lease with PRS. A is a property provider as to its share of the partnership's obligations under the lease to make the property available to X. D is an assuming party because D acquires A's partnership interest subject to A's share of the partnership's obligations under the lease with X to make the property available for the remaining four years of the agreement. The transaction is an obligation-shifting transaction because D is an assuming party and A has already received income allocable to periods after the transaction (A received allocations of income from the sale of the right to receive rents under the lease in 2002 through 2005). Thus, D is treated as assuming 90 percent of the partnership's obligations under the lease.

(iii) *Recharacterization.* As of January 1, 2002, the transaction is recharacterized as follows:

(A) Under the constant rental accrual method described in § 1.467–3(d), the amount accruing for each calendar year period under the lease is $946,396.31, based on the $800,000 PRS received from X and the $3,146,345.27 PRS received from F. A's share of the amount payable in each calendar year period under the lease is $851,756.68 (90 percent of $946,396.31). D is treated as acquiring the right to A's 90 percent share of the amounts allocable to the four periods after the obligation-shifting transaction. Thus, D must recognize $851,756.68 of rental income for each of the four periods following the obligation-shifting transaction.

(B) The principal balance of the section 7701(l) note equals $2,699,954.06, with a yield equal to 10 percent based on annual compounding. As part of the obligation-shifting transaction, D is treated as having given A the section 7701(l) note as additional consideration. D is treated as making section 7701(l) note payments to A. A has interest income on the section 7701(l) note. D has interest expense on the section 7701(l) note. A and D account for the section 7701(l) note as follows:

SECTION 7701(l) NOTE

Taxable year ending	Beginning balance	Payment	Interest	Principal
12/31/02	$2,699,954.06	$851,756.68	$269,995.41	$581,761.27
12/31/03	2,118,192.79	851,756.68	211,819.28	639,937.40
12/31/04	1,478,255.39	851,756.68	147,825.54	703,931.14
12/31/05	774,324.25	851,756.68	77,432.42	774,324.26

(C) At the time of the obligation-shifting transaction, the principal balance of the section 467 loan that would have existed if PRS had reported all items of income and expense by applying the constant rental accrual method equals negative $2,999,948.96. Thus, in computing its income on the consummation of the obligation-shifting transaction, A must take into account an expense equal to $2,699,954.06 (90 percent of $2,999,948.96).

(D) At the time of the obligation shifting transaction, the principal balance of the section 7701(l) rent-leveling loan equals negative $2,699,954.06. A must account for the section 7701(l) rent-leveling loan as follows:

SECTION 7701(l) RENT-LEVELING LOAN

Taxable year ending	Beginning balance	Payment	Interest	Principal
12/31/02	($2,699,954.06)	($851,756.68)	($269,995.41)	($581,761.27)
12/31/03	(2,118,192.79)	(851,756.68)	(211,819.28)	(639,937.40)
12/31/04	(1,478,255.39)	(851,756.68)	(147,825.54)	(703,931.14)
12/31/05	(774,324.25)	(851,756.68)	(77,432.42)	(774,324.26)

Example 4. *Exception where aggregate amounts retained or already received are less than or equal to $100,000; section 351 transfer*—(i) *Facts.* (A) On January 1, 2001, A leases property to B for a five-year period. The lease provides for rent of $1,000,000 for 2001, and $875,000 for the each of the remaining four years of the lease. Rent is payable annually on December 31.

(B) On January 1, 2002, A transfers the leased property along with the right to receive rent payments for 2002 through 2005 to D in exchange for D preferred stock. As part of the same transaction, C transfers $1,000,000 to D in exchange for D common stock. After the transaction, A and C own 100 percent of the stock of D. Assume that the transaction meets all of the requirements of

section 351. C and D are members of the same consolidated group as described in § 1.1502–1(h). Assume that A, C, and D did not enter into the transaction with a principal purpose of substantially reducing the present value of their aggregate tax liabilities. One hundred ten percent of the applicable Federal rate based on annual compounding is 7 percent.

(ii) *Obligation-shifting transaction.* A is a property provider because it is obligated to make property available to B on account of a lease or similar agreement. B is a property user because it has the right to use property under its lease with A. D is an assuming party because, in the January 1, 2002, transaction, it acquires the property subject to A's obligation to make the property available to B for the remaining term of the lease. The transaction between A and D is an obligation-shifting transaction because D is an assuming party and A retains the right to receive amounts from B allocable to periods after the transaction.

(iii) *Availability of exception.* Even though the transaction between A and D is an obligation-shifting transaction, it is not recharacterized under this section. As of the date of the transaction, A has already received $1,000,000. Under the constant rental accrual method described in § 1.467–3(d), the constant rental amount accruing for each calendar year during the lease is $903,491.90. The aggregate amount that has already been received by A but that is allocable to periods after the obligation-shifting transaction is $1,000,000 minus $903,491.90, or $96,508.10. Because this amount is less than $100,000, the transaction is excepted from recharacterization under paragraph (c)(1)(i) of this section.

Example 5. *Exception where fair market value of leased property is less than 10 percent of value of all property transferred; incorporation of existing business*—(i) *Facts.* (A) On January 1, 2001, A leases property to B for a five-year period. The lease provides for rent of $1,000,000 per year, payable annually on December 31.

(B) On January 1, 2003, the fair market value of the leased property is $4,000,000. On that date, A transfers the property, together with $3,000,000 of Class I and Class II assets and other property with a fair market value of $39,000,000, in exchange for all of the common stock of C. A retains the right to receive the remaining three rent payments from B. The fair market value of the rent payments retained by A is $2,486,851.99 (based on a discount rate of 10 percent). The fair market value of the property subject to the lease and transferred to B, reflecting A's retention of the right to the remaining three rent payments, is $1,513,148.01. Assume that the transaction meets all of the requirements of section 351. Assume that A and C did not enter into the transaction with a principal purpose of substantially reducing the present value of their aggregate tax liabilities.

(ii) *Obligation-shifting transaction.* A is a property provider because it is obligated to make property available to B on account of a lease or similar agreement. B is a property user because it has the right to use property under its lease with A. C is an assuming party because, in the January 1, 2003, transaction, it acquires the property subject to A's obligation to make the property available to B for the remaining three years of the lease. The transaction between A and C is an obligation-shifting transaction because C is an assuming party and A retains the right to receive amounts from B allocable to periods after the transaction.

(iii) *Availability of exception.* Even though the transaction between A and C is an obligation-shifting transaction, it is not recharacterized under this section. The fair market value of the leased property equals $4,000,000. The fair market value of the property subject to the lease and transferred to B is $1,513,148.01, and the fair market value of the rents retained is $2,486,851.99. The aggregate fair market value of all of the property transferred, excluding Class I assets, Class II assets, and debt issued by the property provider, as part of the same transaction is $43,000,000 ($4,000,000 leased property plus $39,000,000 other property, excluding Class I assets, Class II assets, and debt issued by the property provider). Because the value of the leased property, $4,000,000, is less than 10 percent of $43,000,000, the transaction is excepted from recharacterization under paragraph (c)(1)(iii) of this section.

(n) *Effective date.* This section applies to obligation-shifting transactions any significant element of which was entered into or undertaken on or after October 13, 1995.

Margaret Milner Richardson,

Commissioner of Internal Revenue.

BILLING CODE 4830–01–P

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 203

RIN 0790–AG14

Technical Assistance for Public Participation (TAPP) in Defense Environmental Restoration Activities

AGENCY: Office of the Deputy Under Secretary of Defense for Environmental Security (DUSD(ES)), DOD.

ACTION: Proposed rule.

SUMMARY: Pursuant to the National Defense Authorization Act of 1996, the Department of Defense proposes these regulations on providing technical assistance to local community members of Restoration Advisory Boards (RABs) and Technical Review Committee (TRCs). RABs and TRCs are established to review and comment on Department of Defense actions at military installations undertaking environmental restoration's activities.

DATES: Written comments must be received on or before February 25, 1997.

ADDRESSES: Send written comments and requests for documents to the Office of the Deputy Under Secretary for Environmental Security/Cleanup, 3400 Defense Pentagon, Washington, DC 20301–3400. Comments may also be submitted electronically by sending electronic mail (e-mail) to: ferrebpl@acq.osd.mil.

FOR FURTHER INFORMATION CONTACT: Patricia Ferrebee or Marcia Read, telephone (703) 697–5372 or (703) 697–7475.

SUPPLEMENTARY INFORMATION:

IV. Regulatory Analysis
  A. Regulatory Impact Analysis
  B. Regulatory Flexibility Analysis
  C. Paperwork Reduction Act

I. Introduction

A. Authority

This proposed rule is issued under the authority of § 2705 of Title 10, United States Code. Subsections (c) and (d) of Section 2705 encourage the Department of Defense to establish either a Technical Review Committee (TRC) or Restoration Advisory Board (RAB) to review and comment on DoD actions at military installations undertaking environmental restoration activities. In 1994, Congress authorized the Department of Defense to develop a program to facilitate public participation by providing technical assistance to local community members of TRCs and RABs (section 326 of the National Defense Authorization Act for Fiscal Year 1995, P.L. 103–337). In 1996, Congress revised this authority (section 324 of the National Defense authorization Act for Fiscal Year 1996,

P.L. 104–112). It is pursuant to this revised authority, which is codified as new subsection (e) of § 2705, that the Department of Defense issues this proposed rule.

In general, § 2705(e) permits the Department of Defense to obtain, from private sector sources, technical assistance to help TRCs and RABs better understand the scientific and engineering issues underlying an installation's environmental restoration activities. TRCs and RABs may request this assistance only if:

(1) The TRC or RAB demonstrates that the Federal, State, and local agencies responsible for overseeing environmental restoration at the installation do not have the technical expertise necessary for achieving the objective for which the technical assistance is to be obtained; or

(2) The technical assistance—

(a) Is likely to contribute to the efficiency, effectiveness, or timeliness of environmental restoration activities at the installation; and

(b) Is likely to contribute to community acceptance of environmental restoration activities at the installation.

Funding for this technical assistance program will come from the Defense Environmental Restoration Account for operating installations and formerly used defense sites, and from the Defense Base Closure Account for installations approved for closure.

B. Background of the Rulemaking

Over the past several years, the Department of Defense has participated as a member of the Federal Facilities Environmental Restoration Dialogue Committee (FFERDC). This committee, comprised of a wide range of stakeholders, was chartered to develop consensus policy recommendations for improving environmental restoration at Federal facilities. In February 1993, the FFERDC issued the "Interim Report of the FFERDC: Recommendations for Improving the Federal Facilities Environmental Restoration Decision-Making and Priority-Setting Processes." This report recommended that Federal agencies become more proactive in providing information about restoration activities to stakeholders and that citizen advisory boards be established to provide advice to government agencies that conduct restoration at Federal facilities. This report also suggested the initiation of administrative and technical assistance funding.

The Department of Defense has issued policy for establishing RABs at all installations. On September 9, 1993, the Department of Defense issued policy for establishing RABs at installations designated for closure or realignment under the BRAC Acts of 1988 and 1990 where property will be available for transfer to the community. On April 14, 1994, the Department of Defense issued RAB policy for non-closing installations as part of Management Guidance for Execution of the FY94/95 and Development of the FY96 Defense Environmental Restoration Program. The policy called for the establishment of RABs at DoD installations where there is sufficient, sustained community interest. Criteria for determining sufficient interest are: (1) A government request that a RAB be formed; (2) fifty local residents sign a petition requesting that a RAB be formed; (3) an installation determines that a RAB is needed; or (4) the closure of an installation involves the transfer of property to the community. On September 27, 1994, the Department of Defense and the Environmental Protection Agency (EPA) issued joint RAB guidelines on how to develop and implement a RAB. Finally, on August 6, 1996, the Department of Defense proposed regulations governing the characteristics, composition, and establishment of RABs pursuant to NDAA–95 (61 FR 40764–40772). These regulations propose the policy for creation and implementation of RABs at defense installations.

The purpose of a RAB is to bring together people who reflect the diverse interests within the local community, enabling an early and continual flow of information between the affected community, the Department of Defense, and environmental oversight agencies. Recognizing the importance of citizen participation in the environmental restoration process, Congress authorized the provision of technical assistance and assistance to aid public participation in § 326 of NDAA–95. In response to this authority, the Department of Defense published a Notice of Request for Comments (May 24, 1995, 60 FR 27460–27463) on alternative methods for funding technical assistance. In 1996, Congress revised this authority in § 324 of NDAA–96. This proposed rule proposes regulations for providing technical assistance to RABs and Technical Review Committees (TRCs), and details the specific requirements for obtaining this assistance consistent with this new authority. Regulations regarding the characteristics, composition, and establishment of RABs were previously announced on August 6, 1996 (61 FR 40764–40772).

Because this rule relates to public grants, benefits, or contracts, it is exempt from the requirements of § 553 of the Administrative Procedure Act (5 U.S.C. 553), including notice and opportunity for comment. Nonetheless, the Department of Defense is interested in receiving public comments. The Department of Defense previously sought public comment on the issues addressed in this proposed rule in its May 1995 Notice of Request for Comments, and is seeking comments on this proposed rule as well in order to develop the final rule.

II. Summary of RAB Regulation

RAB policy is contained in the April 14, 1994, Management Guidance for Execution of the FY94/95 and Development of the FY96 Defense Environmental Restoration Program and the September 9, 1993, memorandum on Fast Track Cleanup at Closing Installations. Joint Department of Defense and EPA RAB Implementation Guidelines were published in September 1994. Proposed regulations on RAB development and procedures were published on August 6, 1996, (61 FR 40764–40772).

A RAB will be established at installations where there is sufficient, sustained community interest. Criteria for determining sufficient interest are:

(1) A local government requests that a RAB be formed; or

(2) Fifty local residents sign a petition requesting that a RAB be formed; or

(3) An installation determines that a RAB is needed; or

(4) The closure of an installation involves the transfer of property to the community.

The purpose of a RAB is to act as a forum for discussion and exchange of information between agencies and the community and to provide an opportunity for stakeholders to review progress and participate in a dialogue with the decisionmakers.

The RAB will be comprised of representatives from the Department of Defense Components, the EPA and/or States, and members of the local community. The Department of Defense will ensure that the membership reflects the diverse interests within the community.

Statutory language defining the duties of the Secretary of Defense regarding consultations with RABs or TRCs can be found at 10 U.S.C. § 2705(f). Details regarding the establishment, operation, funding, and reporting requirements for RABs are contained in the proposed rule published in the **Federal Register** on August 6, 1996, (61 FR 40764–40772).

VOL 61 ISS 250 DEC 27 1996 UMI

III. Responses to Major Public Comments on RAB Funding Options Raised in the Notice of Request for Comments

A. Summary of Options

Consistent with § 326 of the National Defense Authorization Act for Fiscal Year 1995 (NDAA–95), the Department of Defense considered three options for technical assistance funding to citizens affected by the environmental restoration of DoD facilities. These options were published by the Department of Defense on May 24, 1995, (60 FR 27460–27463) in a Notice of Request for Comments. The three options under consideration are described briefly as follows:

Option A proposes using the existing EPA Technical Assistance Grant (TAG) and Technical Outreach Services to Communities (TOSC) programs as vehicles to provide technical assistance to community members of TRCs and RABs. Under this option, the Department of Defense would sign a Memorandum of Understanding (MOU) authorizing the EPA to provide assistance to community members of TRCs and RABs using EPA's existing regulations. The TAG process provides funding directly to community members at National Priority List (NPL) installations. The TOSC program would provide technical advisors and related services from designated Hazardous Substance Research Centers to community members at non-NPL installations.

Option B would involve the competitive procurement of one or more independent technical assistance providers to provide technical and public participation assistance to community members of TRCs and RABs at DoD installations.

Option C proposes the issuance of purchase orders to technical and public participation assistance providers up to the allowable limit per purchase order. Under this option, community members of the TRC or RAB would provide a description of the service they are requesting and the names of one or more proposed technical assistance providers to a DoD contracting office. A minimum set of organizational qualifications for receiving assistance would be specified by the Department of Defense under this option.

In the National Defense Authorization Act for Fiscal Year 1996 (NDAA–96), Congress established a limit on the total amount of DERA and BRAC funds that could be made available for use as support to RABs. These funding sources also fund technical assistance for public participation. Under all of the technical assistance options examined today, the local installations will continue to be responsible for providing that portion of the available funds required for administrative support. Furthermore, under all options assistance would be limited to community members of TRCs or RABs at DoD installations. This has the added benefit of providing a return to the government in the form of enhanced public participation in the restoration process. Furthermore, NDAA–96 directed the Department of Defense to consider funding for technical assistance only under the following specified conditions:

(1) The Technical Review Committee or Restoration Advisory Board must demonstrate that the Federal, State, and local agencies responsible for overseeing environmental restoration at the installation, and available DoD personnel, do not have the technical expertise necessary for achieving the objective for which the technical assistance is to be obtained; or

(2) The technical assistance—

(a) Is likely to contribute to the efficiency, effectiveness, or timeliness of environmental restoration activities at the installation; and

(b) Is likely to contribute to community acceptance of environmental restoration activities at the installation.

This proposed rule responds to the public's comments on the options published in the request for comments and the requirements of § 2705 of Title 10 of the U.S. Code, as amended.

A total of 43 written comments were received in response to the request for comment. Approximately two-thirds of the comments received were from members of RABs, the groups most directly affected by the proposed rules, although a number of comments were also received from various government sources and potential providers of the services described in the notice. The written comments are available to the public in the docket for the notice. The major issues addressed by the comments and the Department of Defense responses to them are provided in this preamble.

B. Comments in Support of Option C—Issue Purchase Orders to Assistance Providers

A clear majority of the commenters expressed a preference for Option C, citing the increased flexibility and responsiveness to community needs provided by this option and the increased ability of the RABs and TRCs to contribute to the selection of the technical assistance provider. Several commenters noted the importance of this latter provision in Option C, with some going on to state that the separation of the Department of Defense from the selection process was important in eliminating potential conflicts of interest and fostering increased trust in the contributions of the technical assistance providers. Furthermore, this option was viewed as an efficient use of funds, as unnecessary layers of management were eliminated.

In response to the clear support of commenters for Option C, the Department of Defense is today publishing the proposed rule describing the procedures for implementing this option for funding technical support for public participation. This option also provides benefits to the government, primarily in providing a direct return to the restoration process in the form of informed and involved public participation. The RABs and TRCs are in the best position to determine their particular requirements for assistance. Their description of the services required and the criteria for selecting a provider will allow the Department of Defense to obtain the necessary resources to enhance their participation. Option C, as proposed today, provides the most direct means for meeting those needs and for meeting the requirements of the Federal Acquisition Regulations. Furthermore, by means of the eligibility requirements outlined in § 203.11 and § 203.12 of this proposed rule, the Department of Defense has more assurance that its limited will be used to provide technical support to the RABs or TRCs.

The Department of Defense supports the legislative initiative to enhance public participation at DoD environmental restoration sites. Based upon the comments received, the Department of Defense believes that Option C will provide the greatest opportunity to provide TRCs and RABs with technical assistance in a manner that will promote the highest level of confidence among public participants in that assistance.

Ten commenters remarked on the increased workload the RABs might incur from the implementation of Option C, since this option would involve an application for assistance, a process with which the RABs might not be familiar. However, many felt the administrative burden under this option was significantly less than that entailed by Option A.

The Department of Defense is aware of the administrative burdens that might fall to RABs or TRCs and for this reason has sought to minimize them with the publication of this rule. Each option proposed would impose some

responsibility for administration and accounting. This proposed rule, however, seeks to limit the burden on RABs and TRCs by using the Department of Defense as the contracting office to administer funds to providers selected on the basis of specifications provided by RABs and TRCs, subject to the limitations of the Federal Acquisition Regulations as noted in the proposed rule. This process is expected to minimize administrative impacts on RABs and TRCs while still providing sufficient reporting and management requirements to effectively run the program.

Although Option C was favored by most respondents, some commenters preferred either Option A or Option B or some combination of options which included A or B. The Department of Defense carefully considered these options, but ultimately rejected them in favor of Option C for many of the same reasons as were provided by commenters.

C. Comments in Support of Option A—Using EPA's TAG and TOSC Program

Option A was favored by six commenters, who cited its status as an ongoing and functioning program that has already provided technical assistance to a number of groups at Federal facilities. Two of these commenters represented TOSC providers, or individual Hazardous Substance Research Centers; two others had positive experiences with this process at their installations. There were, however, other commenters who argued against the selection of this option. Principal among the reasons provided by these commenters was the lack of local control over the selection of a provider. Several commenters also noted the "cumbersome and time-consuming" administrative requirements associated with the application and reporting requirements of TAG grants and TOSC support. These were felt to be beyond the scope of administrative resources available to most typical RABs or TRCs. One commenter questioned whether the selection process used by TOSC providers would adequately serve the needs of RABs or TRCs, citing their experience with a potential TOSC provider. Other limitations noted were the unequal treatment afforded NPL sites versus non-NPL sites, the normal limitation of one TAG grant per site, which might lead to competition between RABs or TRCs and other community groups, and the uncertain ability of the EPA to provide sufficient resources to manage the additional grants for DoD facilities. Indeed, Region IX EPA opposes the use of Option A because of the significant increase in workload it will generate for EPA staff. This commenter also believes that RABs and TRCs may be ineligible for TAG grants, which are intended for non-profit community groups, and is concerned that DoD's definition of technical assistance is broader than that used by the EPA and may lead to ineligible charges or inadequate support for RABs and TRCs.

In selecting Option C instead of Option A as a means for providing assistance to RABs and TRCs, the Department of Defense has balanced the expressed desires of those bodies to identify proposed technical assistance providers and the Department of Defense's own financial management responsibilities. Furthermore, the option of using TAG grants or TOSC support will continue to be available to communities surrounding DoD installations, although the prior existence of TAG or TOSC support at an installation may affect DoD funding priorities. Those arguments supplied by commenters in favor of Option A, because of its ready adaptation to Department of Defense use, are met by this proposed rule by implementing a process that will be immediately available to RABs and TRCs to obtain technical support. The Department of Defense also maintains that many of the comments opposing the selection of Option A have merit, and concurs that the administrative burden on RABs or TRCs associated with the procurement of a TAG grant or TOSC support could be an impediment to obtaining meaningful assistance.

D. Comments in Support of Option B—Procurement of Independent Provider

Only one commenter expressed interest solely in the selection of Option B, noting the neutral and credible assistance such a provider could supply. This commenter also expressed interest in providing the services outlined under this option. The Department of Defense's rejection of this option was again primarily based upon the majority of the commenters' wishes to maintain control of the assistance provider at the local level. Other comments that the Department of Defense believes have merit include the comment that the use of regional or national providers may exclude from participation firms providing localized or specialized expertise, and the fact that the procurement of regional or national providers under this option would take considerable time to implement.

E. Comments in Support of Option C Combined with Option A or B

Ten commenters favored the selection of Option C in conjunction with either Option A or Option B. The principal reason cited for this preference was the possibility of deflecting administrative burdens from the RABs and TRCs onto other entities. The Department of Defense believes it has met this objective by the use of DoD contracting offices in the issuance and administration of purchase orders, as detailed in this rule. The RABs and TRCs will have the ability to define the TAPP project, specify assistance provider qualifications and criteria for consideration by the Department of Defense, and provide consultation to the Department of Defense in the selection process.

F. Qualifications for Independent Technical Assistance Providers

The Department of Defense also solicited comments on the qualifications necessary for the independent technical assistance providers described in Option B, and the desirability of regional versus national assistance providers. However, because the Department of Defense supports Option C, these issues are no longer pertinent to this proposed rule.

G. Methods and Criteria for Allotment

Regardless of the option chosen, funding must, out of necessity, be subject to an annual limit per RAB or TRC. The Department of Defense solicited comments and suggestions as to the size of such a cap or the criteria that should be used to establish a cap.

Eleven commenters suggested options for allocating the limited resources available for technical assistance. Proposed amounts ranged from $25,000 to $325,000, with one commenter noting that the larger number is still less than that incurred by lawsuits brought by affected community members, and another commenter stating that $25,000 was insufficient to hire qualified technical assistance for larger projects. Other commenters proposed allotments based on a percentage of the BRAC or DERA restoration budget. Suggested amounts were based on one to five percent of the restoration budget. One commenter suggested a determination based upon the total number of RABs expected to make requests versus the available resources.

The Department of Defense must carefully balance available funds with the needs of RABs and TRCs to procure needed technical assistance. In response to the limits suggested by commenters,

VOL 61 ISS 250 DE 27 1996 UMI

and in view of the resources available, the Department of Defense has determined that total technical assistance funding will be limited to $100,000 per RAB or TRC, with no more than the lesser of 1 percent of the installation's projected restoration cost-to-complete or $25,000 available during any fiscal year. This amount is consistent with the amounts available for similar purposes under the EPA's TAG/TOSC programs and should be sufficient to obtain meaningful technical assistance for a variety of needs. Limiting funding on the basis of an installation's annual restoration budget is one means available to the Department of Defense for allocating resources among competing facilities. The Deputy Under Secretary of Defense (Environmental Security) may waive the $100,000 total and $25,000 annual limitations, as appropriate, to reflect the complexity of response action, the nature and extent of contamination at the installation, the level of activity at the installation, projected total needs as identified by the TAPP recipient, the size and diversity of the affected population, and the ability of the TAPP recipient to identify and raise funds from other sources.

In addition to the issue of providing technical assistance to RABs or TRCs, the Department of Defense requested comment on methods of determining priorities among TAPP projects. Two commenters suggested the closure status of the base should affect priority, since these bases tend to be on a fast track cleanup schedule. Other factors that were offered as a basis for prioritization included the severity of the problem or risk associated with a base, the stage of the restoration program at the base, and the proposed use of the money. Commenters did question where the decisionmaking authority would lie for setting priorities among competing funding requests.

In response, the Department of Defense has determined that TAPP projects will be funded upon completion of an eligible TAPP request, in the order received, as available resources permit. In the event that TAPP requests exceed available resources, the Department of Defense Component will consider factors such as closure status, the installations restoration program status, and alternate sources of assistance in determining funding priorities.

H. Additional Services to be Provided Under Option C

The Department of Defense developed a list of public participation services it believes could be provided under Option C in addition to hiring technical advisors, facilitators, mediators and educators. These services include: translation and interpretation; training; transportation to meetings; and payment of approved travel. The notice solicited comments regarding additional services that should be considered to meet the goal of providing technical assistance to RABs and TRCs and to encourage meaningful public participation.

Although only a limited number of commenters chose to respond to the request for additional services that should be offered, a variety of options were suggested. These included technical support, such as the procurement of independent technical consultants, training, and legal advice, as well as administrative and financial support, such as translation services, reimbursement for postage, phone calls, and travel, community outreach programs, newsletters, stipends for RAB members, and child care.

Because of limitations within the legislation and because resources for RAB and TRC support are limited, the Department of Defense has chosen to focus resources on technical support. The Department of Defense has an interest in promoting partnering with the community members of TRCs and RABs and believes that providing technical assistance will enable them to provide more meaningful input to the restoration process. Technical support, including short-term training, attendance at workshops, and procurement of technical consultants, would be eligible for funding under the program outlined in this rule. Specific eligibility criteria can be found in § 203.11 of this proposed rule. Administrative costs incurred by the RABs and TRCs will continue to be borne by the installation, as is currently the case.

Certain types of legal assistance will not be eligible for funding because they could promote an adversarial relationship between community members and the installation. Specifically, litigation or underwriting legal actions, such as paying for attorney fees or paying for a technical assistance provider to assist an attorney in preparing legal action or preparing for and serving as an expert witness at any legal proceeding regarding or affecting the site, will be ineligible for funding. Other types of assistance, such as translation and interpretation, transportation to meetings, and community outreach programs, represent needs of the community at large, and are not limited by RAB membership. As such, they are beyond the scope of the TAPP funding mechanism.

I. Other Comments and Suggestions

Although not specifically requested by the notice for comments, a few commenters suggested additional options for increasing or improving public participation. These included extending assistance to community groups other than RABs or TRCs; providing additional assistance for minority voices on RABs; obtaining peer review from other Federal agencies with relevant technical expertise; providing documents in electronic format to RABs, TRCs, and public repositories; releasing draft documents for review; and using local universities for technical support.

In keeping with the legislation, the Department of Defense is limiting the program announced in this proposed rule to providing technical assistance to community members of TRCs and RABs. The EPA's TAG and TOSC programs are still available for other community groups. The use of assistance provided through the DoD program will be decided by individual RABs and TRCs, given the eligibility criteria specified in § 203.11 of this proposed rule.

Regarding the other suggestions, these are beyond the scope of the current rulemaking and therefore will not be addressed. The Department of Defense, however, notes its continuing efforts to enhance public participation at its facilities and encourages those commenters to pursue innovative ideas for public participation through the RAB process.

IV. Regulatory Analysis

A. Regulatory Impact Analysis

Under Executive Order 12866 (October 4, 1993, 58 FR 51735), the Department of Defense must determine whether this regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) an the requirements of the Executive Order. under Section 3(f), the order defines a "significant regulation action" as an action that is likely to result in a rule: (1) Having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering

the budgetary impacts of entitlement, grants, user fees, or loan programs or the rights and obligations or recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities or the principles set forth in this Executive Order.

Pursuant to the terms of this Executive Order, the OMB has determined this rule is a "significant regulatory action" because it may raise novel legal or policy issues. As such, this action was submitted to the OMB for review, and any comments or changes made in response to the OMB suggestions or recommendations have been documented in the public record.

B. Regulatory Flexibility Analysis

The Regulatory Flexibility Act of 1980 requires that agencies evaluate the effects of proposed rules for three types of small entities:

(1) Small businesses (as defined in the Small Business Administration regulations);

(2) Small organizations (independently owned, non-dominant in their field, non-profit); and

(3) Small government jurisdictions (serving communities of less than 50,000 people).

The Department of Defense has considered the interests of small businesses and small organizations by means of the use of purchase orders to obtain technical assistance. As stated in the Federal Acquisition Regulations, those purchase orders under $100,000 are reserved for small businesses, unless it can be demonstrated that small businesses are unable to provide the necessary service or product. Only a limited number of small non-profit organizations are expected to be affected by this program as it is likely that only those non-profit organizations located near Department of Defense installations with ongoing environmental restoration programs will, in most cases, provide the requested technical assistance. The Department of Defense was careful not to impose additional reporting requirements on the public and to stay within the reporting requirements quota for procurements.

Moreover, the Department of Defense has undertaken several activities to help small organizations. The Department of Defense has sought to increase the dollar amount of small purchase orders to simplify the procurement process. The Department of Defense has deliberately written the regulations to encourage small entities to apply.

Given the limited funding available to this program from Congress, and the rationing operation of § 203.4, this rule is not expected to have a significant economic impact on a substantial number of small entities. The Under Secretary for Acquisition and Technology (USD(A&T)), therefore, certifies that no Regulatory Flexibility Analysis is necessary.

C. Paperwork Reduction Act

Pursuant to the Paperwork Reduction Act of 1995, the reporting and recordkeeping provisions of this proposed rule have been submitted to the OMB for review under § 3507(d) of the Act.

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Assistant Deputy Under Secretary of Defense for Environmental Security (Environmental Cleanup) announces the proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed information collection; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

The collection of information is necessary to identify products of services requested by community members of restoration advisory boards or technical review committees to aid in their participation in the Department of Defense's environmental restoration program, and to meet Congressional reporting requirements.

Affected Public: Not-for-Profit Institutions.

Annual Burden Hours: 1,060.

Number of Respondents: 265.

Responses Per Respondent: 1.

Average Burden Per Response: 4 hours.

Frequency: On occasion.

Respondents are community members of restoration advisory boards or technical review committees requesting technical assistance to interpret scientific and engineering issues regarding the nature of environmental hazards at an installation. This assistance will assist communities in participating in the cleanup process. The information, directed by 10 U.S.C. 2705, will be used to determine the eligibility of the proposed project, begin the procurement process to obtain the requested products or services, and determine the satisfaction of community members of restoration advisory boards and technical review committees receiving the products and services.

Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs, OMB, 715 17th Street, N.W., Washington, DC 20503, marked "Attention Desk Officer for Department of Defense." Copies should be sent to the Office of the Deputy Under Secretary for Environmental Security/ Cleanup, 3400 Defense Pentagon, Washington, DC 20301–3400. Comments may also be submitted electronically by sending electronic mail (e-mail) to: ferrebpl@acq.osd.mil.

When the Department of Defense promulgates the Final Rule, the Department will respond to comments by OMB or the public regarding the information collection provisions and recordkeeping requirements of the rule.

List of Subjects in 32 CFR Part 203

Administrative practice and procedure, Technical assistance, Public participation, Environmental protection—restoration, Federal buildings and facilities, Organization and functions (Government agencies).

It is proposed to amend Title 32 of the Code of Federal Regulations, Chapter I, Subchapter M, by adding part 203 to read as follows:

PART 203–TECHNICAL ASSISTANCE FOR PUBLIC PARTICIPATION (TAPP) IN DEFENSE ENVIRONMENTAL RESTORATION ACTIVITIES

Sec.

203.1 Authority.
203.2 Purpose and availability of referenced material.
203.3 Definitions.
203.4 Selected option.
203.5 TAPP process.
203.6 Cost Principles.
203.7 Eligible applicants.
203.8 Ineligible applicants.
203.9 Evaluation criteria.
203.10 Submission of application.
203.11 Eligible activities.
203.12 Ineligible activities.
203.13 Technical assistance for public participation provider qualifications.
203.14 Procurement.
203.15 RAB/TRC reporting requirements.
203.16 Method of payment.
203.17 Record retention and audits.
203.18 Availability of information.
203.19 Conflict of interest and disclosure requirements.
Appendix A to Part 203—Technical Assistance for Public Participation Application Request Form.

Authority: 10 U.S.C. 2705.

VOL 61 ISS 250 DE 27 1996 UMI

§ 203.1 Authority.

Part 203 is issued under the authority of section 2705 of Title 10, United States Code. In 1994, Congress authorized the Department of Defense to develop a program to facilitate public participation by providing technical assistance to local community members of TRCs and RABs (section 326 of the National Defense Authorization Act for Fiscal Year 1995, P.L. 103–337). In 1996, Congress revised this authority (section 324 of the National Defense Authorization Act for Fiscal Year 1996, P.L. 104–112). It is pursuant to this revised authority, which is codified as new subsection (e) of section 2705, that the Department of Defense issues this part.

§ 203.2 Purpose and availability of referenced material.

(a) This part establishes the Technical Assistance for Public Participation (TAPP) program for the Department of Defense. It sets forth policies and procedures for providing technical assistance to community members of TRCs and RABs established at DoD facilities. This part sets forth the procedures for the Department of Defense to accept and evaluate TAPP applications, to procure the assistance desired by community members of RABs and TRCs, and to manage the TAPP program. These provisions are applicable to all applicants/recipients of technical assistance as specified under the selected option discussed in § 203.4.

(b) Any reference to documents made in this part necessary to apply for TAPP (e.g., the Office of Management and Budget (OMB) Circulars or DoD forms) are available through the DoD installation, the military department headquarters, of from the Department of Defense, Office of the Deputy Under Secretary of Defense for Environmental Security (DUSD(ES)), 3400 Defense Pentagon, Washington, DC 20301–3400.

§ 203.3 Definitions.

As used in this part, the following terms shall have the meaning set forth:

Affected. Means subject to an actual or potential health or environmental threat arising from a release or a threatened release at an installation where the Secretary of Defense is planning or implementing environmental restoration activities including a response action under the Comprehensive Environmental Response Compensation and Liability Act as amended (CERCLA), corrective action under the Resource Conservation and Recovery Act (RCRA), or other such actions under applicable Federal or State environmental restoration laws. This would include actions at active, closing, realigning, and formerly used defense installations. Examples of affected parties include individuals living in areas adjacent to installations whose health is or may be endangered by the release of hazardous substances at the facility.

Applicant. Means any group of individuals that files an application for TAPP, limited by this proposal rule to community members of the RAB or TRC.

Application. Means a completed formal written request for TAPP that is submitted to the installation commander or to the identified decision authority designated for the installation. A completed application will include a TAPP project description.

Assistance provider. Is an individual, group of individuals, or company contracted by the Department of Defense to provide technical assistance under the Technical Assistance for Public Participation program announced in this rule.

Assistance provider's project manager. Means the person legally authorized to obligate the organization receiving a TAPP purchase order to the terms and conditions of the Department of Defense's regulations and the contract, and designated by the recipient to serve as the principal contact with the Department of Defense.

Community member. Is a member of the RAB or TRC who is also a member of the affected community. For the purpose of this rule, community members to do not include local, State, or Federal government officials acting in any regulatory capacity, nor does it include DoD members.

Community point of contact. Is the community member of the RAB or TRC designated in the TAPP application as the focal point for communications with the Department of Defense regarding the TAPP procurement process. The community point of contact is responsible for completing the reporting requirements specified in § 203.15 of this part.

Contract. Means a written agreement between the installation or other instrumentality of the Department of Defense and another party for services or supplies necessary to complete the TAPP project. Contracts include written agreements and subagreements for professional services or supplies necessary to complete the TAPP projects, agreements with consultants, and purchase orders.

Contract officer. Means the Federal official designated to manage the contract used to fulfill the TAPP request by the RAB or TRC.

Contractor. Means any party (e.g., Technical advisor) to whom the installation or other instrumentality of the Department of Defense awards a contract. In the context of this rule, it is synonymous with assistance provider.

Cost estimate. Is an estimate of the total funding required for the assistance provider to complete the TAPP project.

DoD Component. Includes, but is limited to, the services (Army, Navy, Air Force, Marines, and Reserves) and those defense agencies with an environmental restoration program.

DoD Installation. Means a faculty that is owned or operated or otherwise possessed by a department, agency, or instrumentality of the United States Department of Defense. In the context of this rule, formerly used defense sites (FUDS) are included within the definition of a DoD Installation.

EPA. Means the United States Environmental Protection Agency.

Formerly Used Defense Site (FUDS). Is a site that has been owned by, leased to, possessed by, or otherwise under the jurisdiction of the Department of Defense. The FUDS program does not apply to those sites outside the U.S. jurisdiction.

Firm fixed price contract. Is a contract wherein funding is fixed, prior to the initiation of a contract, for an agreed upon service or product.

Purchase order. Is an offer by the Government to buy supplies or services from a commercial source, upon specified terms and conditions, the total cost of which cannot exceed the small purchase limit of $100,000. Purchase orders are governed by Federal Acquisition Regulations, 48 CFR part 13, and the Simplified Acquisition Threshold Procedures.

Restoration Advisory Board (RAB). Is a group of individuals comprised of representatives of the Department of Defense, community members, and EPA and/or State officials formed to act as a forum for discussion and exchange of information between agencies and the community, and to provide an opportunity for stakeholders to review progress and participate in dialogue with the decision makers. RAB policy was outlined in the joint guidelines published by EPA and the Department of Defense on September 27, 1994, and is described in 32 CFR part 202.[1] [2]

Statement of Work. Is that portion of a contract which describes the actual

---

[1] 32 CFR part 202 is the proposed rule on RAB development. It was published on August 6, 1996 (61 FR 40764–40772).

[2] Copies of the **Federal Register** publication for 32 CFR part 202 are available from the Department of Defense, Office of the Deputy Under Secretary of Defense (Environmental Security).

work to be done by means of specifications or minimum requirements, quantities, performance dates, time and place of performance, and quality requirements. It is key to any procurement because it is the basis for the contractor's response and development of proposed costs.

TAPP approval. Signifies that the Department of Defense has approved the eligibility of the proposed TAPP project and will undertake an acquisition to obtain the services specified in the TAPP application submitted by the RAB or TRC. The government will conduct the acquisition in accordance with all of the applicable rules and requirements of the Federal Acquisition Regulations and the Simplified Acquisition Procedures. Approval does not constitute an agreement to direct an award to a specific source if such an action would be contrary to Federal Acquisition Regulations.

TAPP project description. Is a discussion of the assistance requested that includes the elements listed in § 203.10 of this part. The project description should contain sufficient detail to enable the Department of Defense to determine the nature and eligibility of the project, identify potential providers and estimate costs, and prepare a statement of work to begin the procurement process.

Technical assistance. Encompasses those activities specified in § 203.11 that will contribute to the public's ability to participate in the decision-making process by improving the public's understanding of overall conditions and activities. Technical assistance may include interpreting information such as: the nature of the hazard, including potential health impacts posed by onsite conditions; remedial investigation and feasibility studies; records of decision; remedial designs; selection and construction of remedial actions; operation and maintenance; significant removal actions; and training on technical issues of particular concern to the community members of the RAB or TRC. Technical assistance does not include those activities prohibited under § 203.12, such as litigation or underwriting legal actions; political activity; generation of new primary data such as well drilling and testing, including split sampling; reopening final Department of Defense decisions or conducting disputes with the Department of Defense; or epidemiological or health studies, such as blood or urine testing.

Technical Review Committee (TRC). Is a group formed to meet the requirements of 10 U.S.C. 2705(c), Department of Defense Environmental Restoration Program. Primarily functioning to review installation restoration documents, these committees are being expanded and modified at installations where interest or need necessitates the creation of a RAB.

§ 203.4 Selected option.

(a) The Department of Defense will issue purchase orders to technical assistance, facilitation, training, and other public participation assistance providers subject to the purchase limit per order as resources continue to be available. If multiple purchase orders are needed to assist community members of a particular RAB or TRC, the combined sum of these purchase orders cannot exceed $100,000 or, during any one year, the lesser of $25,000 or 1 percent of the installation's projected restoration cost to complete. Note that these limitations refer to the maximum allowable technical assistance funding per RAB/TRC. Resources available within a given year may vary. These limitations apply unless a waiver is granted by the Deputy Under Secretary of Defense (Environmental Security) (DUSD(ES)). The Deputy Under Secretary of Defense (Environmental Security) may waive the $100,000 total and $25,000 annual limitations, as appropriate, to reflect the complexity of response action, the nature and extent of contamination at the installation, the level of activity at the installation, projected total needs as identified by the TAPP recipient, the size and diversity of the affected population, and the ability of the TAPP recipient to identify and raise funds from other sources.

(b) Community members of the RAB/TRC will provide a description of the services it is requesting (TAPP Project Description) and, if desired, the names of one or more proposed technical assistance providers to the DoD RAB Co-Chair, who will ensure the application will be submitted to the installation commander or other designated authority and to the appropriate DoD contracting office. Technical assistance providers proposed by the community members of a RAB or TRC at each DoD facility that meet the minimum set of organizational qualifications guidelines provided by the Department of Defense in § 203.13 of this part will be added to the governments list of bidders for the proposed procurement.

§ 203.5 TAPP process.

This section provides an overview of the TAPP process. Specific details referred to in this section can be found in subsequent sections of this rule.

(a) *TAPP funding.* The DoD budget for support to RABs and TRCs will be established annually. Each DoD Component will be authorized to allocate funds on the basis of the number of RABs or TRCs in operation or in planning stages at the beginning of the fiscal year. Each DoD Component will then make these funds available to their individual installations or facilities on an equitable basis, considering a number of factors related to the restoration program at the installation and its impact upon the community. These factors include, but are not limited to:

(1) Closure status.
(2) Budget.
(3) Installation restoration program status.
(4) Presence (or absence) of alternate funding.
(5) Relative risk.
(6) Type of task to be funded.
(7) Community concern.
(8) Available funding.

(b) *Identification of proposed TAPP project.* Eligible applicants of RABs and TRCs, established in § 203.7 and § 203.8 of this part, should determine whether a TAPP project is required to assist the community members of the RAB or TRC to interpret information regarding the nature and extent of contamination or the proposed remedial actions. Eligibility requirements for TAPP projects are described in § 203.11 and § 203.12 of this part. In keeping with the requirements of 10 U.S.C. 2705(e), the RAB or TRC must be able to demonstrate that the technical expertise necessary for the proposed TAPP project is not available through the Federal, State, or local agencies responsible for overseeing environmental restoration at the installation, or that the selection of an alternate provider will contribute to environmental restoration activities and the community acceptance of such activities. In addition, the Department of Defense encourages the RAB or TRC to seek other available avenues of assistance prior to submitting a request for TAPP in order to preserve limited TAPP resources. These sources include tasks appropriate for the installation contractor, the procurement of volunteer services from local universities or other experts, or assistance from state and local health and environmental organizations.

(c) *TAPP project request.* Upon the determination that other sources of assistance are unavailable or unlikely to contribute to the community acceptance of environmental restoration activities at the installation, the RAB or TRC should notify the installation of its intent to pursue TAPP, and should prepare a

formal request specifying the type of assistance required and, if desired, one or more sources for this assistance. Details concerning this request are stated in § 203.10 of this part. The RAB or TRC must certify to the Department of Defense that the TAPP request represents a request by a majority of the community members of the RAB or TRC. The RAB or TRC should ensure that the request meets the eligibility requirements specified in § 203.11 and § 203.12 of this part. Furthermore, the RAB or TRC should outline specific criteria for the Department of Defense to consider in the selection of a provider (such as knowledge of local environmental conditions or specific technical issues, a prior work history within the study area which has relevant specific circumstances or unique challenges, or other relevant expertise or capabilities), keeping in mind that providers must meet the minimum technical qualifications outlined in § 203.13 of this part. The formal request should be submitted to the installation commander or designated decision authority, either directly, or through the DoD member of the RAB. The installation commander, or other designated decision authority, will review the proposed project to determine whether the proposed project conforms to the eligibility requirements.

(d) *Purchase orders.* Upon receipt of a completed TAPP request, the installation will begin the procurement process necessary to obtain the desired services by means of a purchase order or will forward the request to the contracting authority designated by the DoD component to act for that installation. The government is required to follow the rules and regulations for purchase orders as outlined in the Federal Acquisition Regulations. As a result, the government cannot direct awards to a specified supplier unless the procurement is under $2,500, and then only if the cost is comparable to other suppliers. For procurements over $2,500 but under $100,000, the acquisition is reserved for small businesses, unless there is a reasonable expectation that small businesses could not provide the best scientific and technological sources consistent with the demands of the proposed acquisition for the best mix of cost, performance, and schedules. Furthermore, the award must be on a competitive basis. In addition to proposing potential providers, the application for technical assistance should indicate specific criteria or qualifications that are deemed necessary by the RAB/TRC for the completion of the project to their satisfaction. This information will be used to assist the Department of Defense in preparing a bidders list. The Department of Defense will solicit bids from those providers meeting the criteria and will select a provider offering the best value to the government. Should the procurement process identify more than one qualified respondent or fail to identify any qualified respondents, the RAB/TRC will be consulted prior to the award of a purchase order. If the Department of Defense determines that the TAPP request represents an eligible project for which no funds are available, it will ask the RAB or TRC to specify whether the project should be reconsidered upon the availability of additional funds.

(e) *Reporting requirements.* The applicant must make copies of delivered reports available to the Department of Defense and comply with the reporting requirements established in § 203.15 of this part.

§ 203.6 Cost principles.

(a) Non-profit contractors must comply with the cost principles in OMB Circular A–122.[3]

(b) Profit-making contractors and subcontractors must comply with the cost principles in the Federal Acquisition Regulation (48 CFR part 31).

§ 203.7 Eligible applicants.

Eligible applicants, except as provided in § 203.8 of this part, are community members of RABs or TRCs established in accordance with 32 CFR part 202 (61 FR 40764–40772). Furthermore, the RABs or TRCs must be comprised of at least three community members to ensure community interests are broadly represented. The applicant must certify that the request represents the wishes of a simple majority of the community members of the RAB or TRC. Certification includes, but is not limited to, the results of a roll call vote of community members of the RAB or TRC documented in the meeting minutes. Other requirements of the application are detailed in § 203.10 of this part.

§ 203.8 Ineligible applicants.

(a) The following groups and organizations are ineligible to receive technical assistance for public participation under this program:

(1) Corporations that are not incorporated for the specific purpose of representing affected individuals at a defense installation.

(2) Academic institutions.

(3) Political subdivisions (e.g., townships and municipalities).

(b) Paragraph (a) of this section does not preclude qualified technical assistance providers that fall under these categories from receiving a purchase order from the government to supply TAPP project services or products.

§ 203.9 Evaluation criteria.

The Department of Defense will begin the TAPP procurement process only after it has determined that all eligibility and responsibility requirements listed in § 203.6, § 203.7, and § 203.8 of this part are met, and after review of the specific provider qualifications as submitted in the narrative section of the application. In addition, the proposed TAPP project must meet the eligibility criteria as specified in § 203.11 and § 203.12 of this part. Projects that fail to meet those requirements relating to the relevance of the proposed project to the restoration activities at the installation will be denied.

§ 203.10 Submission of application.

The applicant must submit a TAPP application to begin the TAPP procurement process. The application form is included as Appendix A of this part and can be obtained from the DoD installation, the military department headquarters, or directly from the Department of Defense.[4] The applications will not be considered complete until the following data elements have been entered into the form:

(a) Installation.

(b) Source of TAPP request (name of RAB or TRC).

(c) Certification of majority request.

(d) RAB/TRC contact point for TAPP project.

(e) Project title.

(f) Project type (e.g., data interpretation, training, etc.).

(g) Project purpose and description (descriptions, time and locations of products or services desired).

(h) Statement of eligibility of project.

(i) Proposed provider, if known.

(j) Specific qualifications or criteria for provider.

§ 203.11 Eligible activities.

(a) TAPP procurements should be pursued by the RAB or TRC only to the extent that Federal, State, or local agencies responsible for overseeing environmental restoration at the facility do not have the necessary technical expertise for the proposed project, or the

[3] Copies may be obtained from EOP Publications, 725 17th NW, WEOB, DC 20503.

[4] Copies may be obtained from the Department of Defense, Office of the Deputy Under Secretary of Defense (Environmental Security).

proposed technical assistance will contribute to the efficiency, effectiveness, or timeliness of environmental restoration activities at the installation and is likely to contribute to community acceptance of those activities.

(b) TAPP procurements may be used to fund activities that will contribute to the community's ability to participate in the decision-making process by improving the community's understanding of overall conditions and activities. Specifically, TAPP procurements may be used to obtain technical assistance in interpreting information with regard to: the nature of the hazard, including potential health impacts posed by onsite conditions; remedial investigation and feasibility study; record of decision; remedial design; selection and construction of remedial action; operation and maintenance; or a significant removal action at an installation where the Secretary of Defense is planning or implementing environmental restoration activities. Also included within additional activities for purposes of enhancing public participation are those activities such as training on technical issues of particular concern to the community members of the RAB or TRC.

§ 203.12 Ineligible activities.

The following activities are ineligible for assistance under this program:

(a) Litigation or underwriting legal actions such as paying for attorney fees or paying for a technical assistance provider to assist an attorney in preparing legal action or preparing for and serving as an expert witness at any legal proceeding regarding or affecting the site.

(b) Political activity and lobbying in accordance with OMB Circular A–122.

(c) Other activities inconsistent with the cost principles stated in OMB Circular A–122, "Cost Principles for Non-Profit Organizations."

(d) Generation of new primary data such as well drilling and testing, including split sampling.

(e) Reopening final DoD decisions such as the Records of Decision (see limitations on judicial review of remedial actions under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) § 113(h)) or conducting disputes with the Department of Defense.

(f) Epidemiological or health studies, such as blood or urine testing.

§ 203.13 Technical assistance for public participation provider qualifications.

(a) A technical assistance provider must possess the following credentials:

(1) Demonstrated knowledge of hazardous or toxic waste issues and/or laws.

(2) Academic training in a relevant discipline (e.g., biochemistry, toxicology, environmental sciences, engineering, law).

(3) Ability to translate technical information into terms understandable to lay persons.

(b) A technical assistance provider should possess the following credentials:

(1) Experience working on hazardous or toxic waste problems.

(2) Experience in making technical presentations.

(3) Demonstrated writing skills.

(4) Previous experience working with affected individuals or community groups or other groups of individuals.

(c) The technical assistance provider's qualifications will vary according to the type of assistance to be provided. Community members of the RAB/TRC may suggest additional provider qualifications as part of the application for technical assistance. These additional qualifications may be used by the Department of Defense to target the most appropriate providers during the procurement process. Examples of such criteria could include prior work in the area, knowledge of local environmental conditions or laws, specific technical capabilities, or other relevant expertise.

§ 203.14 Procurement.

Procurements will be conducted as purchase orders in accordance with the Federal Acquisition Regulations 48 CFR part 13. Under these procedures, procurements not exceeding $100,000 are reserved exclusively for small businesses, and will be conducted as competitive procurements. Procurements below a value of $2,500 are considered "micro-purchases." These procurements do not require the solicitation of bids and may be conducted at the discretion of the contracting officer.

§ 203.15 RAB/TRC reporting requirements.

The RAB or TRC shall ensure that all final written documents developed by a technical advisor for the RAB or TRC using resources provided under this rule are disseminated by providing copies of such documents to the DoD installation for the local information repository(ies). Furthermore, the community point of contact of the RAB or TRC must submit a report, to be provided to the installation and to DUSD(ES), to enable the Department of Defense to meet DoD reporting requirements to Congress. This report should include a description of the TAPP project, a summary of services and products obtained, and a statement regarding the overall satisfaction of the community members of the RAB or TRC with the quality of service and/or products received.

§ 203.16 Method of payment.

The simplified acquisition procedures set forth in Federal Acquisition Regulations 48 CFR part 13, require purchase orders to be conducted on a firm-fixed-price basis, unless otherwise authorized by agency procedures. The Department of Defense anticipates all TAPP awards to be firm-fixed-price procurements.

§ 203.17 Record retention and audits.

The recipient contractor(s) shall keep and preserve detailed records in connection with the contract reflecting acquisitions, work progress, reports, expenditures and commitments, and indicate the relationship to established costs and schedules.

§ 203.18 Technical assistance provider reporting requirements.

Each technical assistance provider shall submit progress reports, financial status reports, and a final report to the Department of Defense for the TAPP project as specified by the specific purchase order agreement. The final report shall document TAPP project activities over the entire period of support and shall describe the achievements with respect to stated TAPP project purposes and objectives.

§ 203.19 Conflict of interest and disclosure requirements.

The Department of Defense shall require each prospective contractor on any contract to provide, with its bid or proposal:

(a) Information on its financial and business relationship with the installation or any/all potentially responsible parties (PRPs) at the site, and with their parent companies, subsidiaries, affiliates, subcontractors, contractors, and current clients or attorneys and agents. This disclosure requirement encompasses past and anticipated financial and business relationships, including services related to any proposed or pending litigation, with such parties.

(b) Certification that, to be best of its knowledge and belief, it has disclosed such information or no such information exists.

(c) A statement that it shall disclose immediately any such information discovered after submission of its bid or

after award. The contracting officer shall evaluate such information and shall exclude any prospective contractor if the contracting officer determines the prospective contractor's conflict of interest is significant and cannot be avoided or otherwise resolved. After award, the contract will be terminated, if the contracting officer determines the conflict of interest is significant and cannot be avoided or resolved.

(d) Contractors and subcontractors may not be Technical Advisors to recipient groups at the same installation for which they are doing work for the Federal or State government or any other entity.

APPENDIX A TO PART 203

TECHNICAL ASSISTANCE FOR PUBLIC PARTICIPATION (TAPP) APPLICATION

Form Approved
OMB No. 0704-0352
Expires Dec 31, 1999

The public reporting burden for this collection of information is estimated to average 4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Department of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (0704-0352), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS. RETURN COMPLETED FORM TO INSTALLATION LISTED IN SECTION I, BLOCK 1.

SECTION I - TAPP REQUEST SOURCE IDENTIFICATION DATA

1. INSTALLATION

2. SOURCE OF TAPP REQUEST *(Name of Restoration Advisory Board (RAB) or Technical Review Committee (TRC))*

3. CERTIFICATION OF MAJORITY REQUEST

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CGD01–96–119]

Special Anchorage Area: Special Anchorage Sheepshead Bay, Brooklyn, NY

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposed to amend the Sheepshead Bay special anchorage regulations by reducing the size of the northern area to accommodate the construction of a floating restaurant.

DATES: Comments must be received on or before February 25, 1997.

ADDRESSES: Comments should be mailed to Lieutenant John W. Green, Waterways Oversight Branch, Coast Guard Activities New York, Bldg. 108 Governors Island, New York 10004–5096.

FOR FURTHER INFORMATION CONTACT: Lieutenant John W. Green, Waterways Oversight Branch, Coast guard Activities New York (212) 668–7906.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD01–96–119) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments. The Coast Guard plans no public hearing; however, persons may request a public hearing by writing to the Waterways Oversight Branch at the address under **ADDRESSES**. If it is determined that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The Hastings Design Group is developing plans to construct a floating restaurant in Sheepshead Bay. As planned, the floating restaurant extends into the northern area of the Sheepshead Bay special anchorage defined in 33 CFR 110.60(x)(2). Special anchorages are areas of water in which vessels of not more than 65 feet in length may anchor without exhibiting anchor lights. The proposed rule would change the boundaries of the special anchorage by moving the eastern boundary line so that no portion of the restaurant is within the special anchorage. The new eastern boundary line would be relocated to a line parallel to and 80 feet west of the prolonged west line of Coyle Street. This configuration would allow for the floating restaurant to project a maximum of 80 feet west of the prolonged west line of Coyle Street, and will allow for an area 45 feet wide for vessel traffic to transit to and from the anchorage west of the floating restaurant. Moving the eastern boundary line would eliminate four moorings from the special anchorage under the existing mooring field plan. However, the owner of the floating restaurant has agreed to make four berths available at the restaurant pier to the New York City, Department of Parks and Recreation to offset the loss of moorings from the special anchorage. These four berths will be administered by the Department of Parks and Recreation as part of the entire special anchorage.

Regulatory Evaluation

This proposal is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation under paragraph 10(e) of the regulatory policies and procedures of DOT is unnecessary. Although the proposed boundary change would decrease the size of the northern area of the Sheepshead Bay special anchorage, the effect of this regulation would not be significant for the following reasons: the owner of the floating restaurant will provide four permanent moorings to be administered by the New York City, Department of Parks and Recreation as part of the special anchorage, and a 45 foot fairway will be established so vessel traffic can safely access the special anchorage west of the floating restaurant.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider the economic impact on small entities of a rule for which a general notice of proposed rulemaking is required. "Small entities" may include (1) small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields and (2) governmental jurisdictions with populations of less than 50,000.

For reasons set forth in the above Regulatory Evaluation, the Coast Guard expects the impact of this proposal to be minimal. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposal will not have a significant economic impact on a substantial number of small entities. If, however, you think that your business or organization, qualifies as a small entity and that this rule will have significant economic impact on your business or organization, please submit a comment explaining why you think it qualifies and in what way and to what degree this rule will economically affect it.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this action in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard has considered the environmental impact of this proposal and concluded that under section 2.B.2.e.(34)(f) of Commandant Instruction M16475.1B (as revised by 59 FR 38654, July 29, 1994) this rule reduces the size of a special anchorage and is categorically excluded from further environmental documentation.

Anchorage grounds.

VOL 61 ISS 250 DEC 27 1996 UMI

Proposed Regulation

For reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 110 as follows:

PART 110—[AMENDED]

1. The authority citation for Part 110 continues to read as follows:

Authority: 33 U.S.C. 471, 2071; 49 CFR 1.46 and 33 CFR 1.05–1(g). Section 110.1a and each section listed in it are also issued under 33 U.S.C. 1223 and 1231.

2. Section 110.60, is amended by revising paragraph (c)(2) to read as follows:

§ 110.60 Port of New York and vicinity.

* * * * *

(x) * * *

(2) *Northern Area.* South of the established U.S. pier head line on the north side of the bay; west of a line parallel to and 80 feet west of the prolonged west line of Coyle Street; north of a line ranging from a point 125 feet south of said pier head line in said line parallel to and 80 feet west of the prolonged west line of Coyle Street to the intersection of the south line of Shore Boulevard and the west line of Kensington Street; north of a line parallel to and 325 feet north of the bulkhead wall along the north side of Shore Boulevard; northeast of a line ranging from the point of intersection of the last-mentioned line with the prolonged east line of East 28th Street, toward a point on the prolonged east line of East 27th Street and 245 feet south of the established U.S. pier head line on the north side of the bay; and east of the prolonged east side of East 27th Street.

33 CFR Part 117

[CGD08–95–026]

RIN 2115–AE47

Drawbridge Operation Regulation; Bonfouca Bayou, LA

AGENCY: Coast Guard, DOT.

ACTION: Notice of supplemental proposed rulemaking; Notice of temporary deviation.

SUMMARY: The Coast Guard is revising its proposal concerning the operation of the swing span drawbridge across Bonfouca Bayou, mile 7.0, at Slidell, St. Tammany Parish, Louisiana. This supplemental proposal is the result of comments on the notice of proposed rulemaking. The revised proposal would provide that the draw need not open for passage of vessels during peak vehicular traffic periods. This change will allow for the timely passage of school busses and relieve vehicular traffic congestion that has increased dramatically during recent years and still provide for the reasonable needs of navigation.

In order to test the revised schedule and closing times in this supplemental proposal, the District Commander authorized a temporary deviation in drawbridge operation regulations for the Bonfouca Bayou drawbridge effective through December 21, 1996. The Coast Guard requests comments on the test schedule.

DATES: Comment must be received on or before January 10, 1997.

ADDRESSES: Comments should be mailed to Commander (ob), Eighth Coast Guard District, 501 Magazine Street, New Orleans, Louisiana 70130–3396, or may be delivered to Room 1313 at the same address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (504) 589–2965.

FOR FURTHER INFORMATION CONTACT: Mr. Phil Johnson, Bridge Administration Branch, at the address and telephone number given above.

SUPPLEMENTARY INFORMATION:

Request for Comments

Interested parties are invited to participate in the proposed rulemaking and to comment on the temporary deviation by submitting written views, comments, or arguments. Persons submitting comments should include their names and addresses, identify the bridge and give reasons for concurrence with or any recommended change in this supplemental proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Eighth Coast Guard District at the address under **ADDRESSES**. The request should include reasons why a hearing would be beneficial. If it is determined that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

The Commander, Eighth Coast Guard District, will evaluate all comments received and determine a course of final action on this proposal. The supplemental proposal may again be changed in the light of comments received.

The temporary deviation is effective for 90 days from September 23, 1996 through December 21, 1996.

Discussion of Proposed Rules

The Bonfouca Bayou, swingspan bridge at mile 7.0, at Slidell, St. Tammany Parish, Louisiana, has 3.5 feet vertical clearance above high tide in the closed to navigation position and 6.7 feet above low tide at the pivot pier, and 8.2 feet clearance above high tide and 11.4 feet above low tide at the rest pier. Navigation on the waterway consists of tugs with tows, fishing vessels, sailing vessels, and other recreational craft. Annualized data provided by the Louisiana Department of Transportation and Development (LDOTD) show that from September 1994 through September 1995, a total of 207 vessels passed the bridge between 6 a.m. and 9 a.m. throughout the year and a total of 406 vessels passed the bridge between 3 p.m. and 6 p.m. throughout the year. The data also shows that on average 1532 vehicles cross the bridge between 6 a.m. and 9 a.m. each day and 2261 vehicles cross the bridge between 3 p.m. and 6 p.m. each day.

Reduced to a monthly rate, the above data reflects the fact that on average, 17 vessels pass and 45,960 vehicles cross the bridge each month during the morning period and 34 vessels pass and 67,830 vehicles cross the bridge during the afternoon period.

The Louisiana Department of Transportation and Development with the support to Congressman Robert L. Livingston and many other parish and city officials, previously requested that the bridge remain closed from 6 a.m. to

9 a.m. and from 3 p.m. to 6 p.m. in order to expedite passage of vehicular traffic, that crosses the bridge during the peak traffic periods. A notice of proposed rulemaking was published in 61 Federal Register 19223 dated Wednesday, May 1, 1996 which announced the original proposed rulemaking and solicited comments of support or opposition. Mariners and business owners, located upstream of the bridge commented on the proposal, stating that their businesses would suffer if vessels were not permitted to transit above the bridge for periods of three continuous hours. Additionally, local commercial marine interests, requested that the draw open on demand from 9 p.m. to 5 a.m. if at least 4 hours advance notice is given, in lieu of 12 hours notice. A meeting was held in Slidell, Louisiana on June 19, 1996 attended by the Greater Slidell Chamber of Commerce, City of Slidell officials, maritime industry members, and concerned citizens to discuss this proposal. The proposed rule is being revised to reflect these comments, concerns and suggested changes.

Regulatory Evaluation

This proposal is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential cost and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979).

The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal, if adopted, will have a significant economic impact on a substantial number of small entities. "Small entities" may include (1) small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields and (2) governmental jurisdictions with populations of less than 50,000.

Since the proposed rule also considers the needs of local commercial fishing vessels, the economic impact of this proposal is expected to be minimal. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection-of-information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism Implications

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that under paragraph 2.B.2.g(5) of Commandant Instruction M16475.1B, this proposal is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons set out in the preamble, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.433 is revised to read as follows:

§ 117.433 Bonfouca Bayou.

The draw of the S433 bridge, mile 7.0, at Slidell, shall operate as follows:

(a) The draw need not open for passage of vessels from 7 a.m. to 8 a.m. and from 1:45 p.m. to 2:45 p.m., Monday through Friday except Federal holidays.

(b) The draw need open only on the hour and half-hour from 6 a.m. to 7 a.m. and from 3 p.m. to 6 p.m., Monday through Friday except Federal holidays.

(c) The draw shall open on signal from 9 p.m. to 5 a.m., if at least 4 hours notice is given to the LDOTD Security Service at (504) 375–0100.

(d) At all other times the draw shall open on signal.

Dated: November 26, 1996.

T.W. Josiah,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[MO–010–1010; FRL–5671–3]

Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA is proposing to approve revisions to Missouri's State Implementation Plan (SIP) concerning Missouri rules 10 CSR 10–2.260 and 10 CSR 10–5.220, "Control of Petroleum Liquid Storage, Loading, and Transfer." The purpose of these revisions is to modify the required testing periods for delivery vessels in the Kansas City metropolitan area and in the St. Louis nonattainment area. These revisions are designed to reduce volatile organic compound emissions from the loading and unloading of gasoline delivery vessels. The reduction in emissions is part of the state's plan under the Clean Air Act to reduce ozone levels in the St. Louis nonattainment area. This action will also ensure progress toward improved air quality in Kansas City.

DATES: Comments must be received on or before January 27, 1997.

ADDRESSES: Comments may be mailed to Stan Walker, Environmental Protection Agency, Air Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101.

FOR FURTHER INFORMATION CONTACT: Stan Walker at (913) 551–7494.

VOL 61 ISS 250 DEC 27 1996 UMI

SUPPLEMENTARY INFORMATION: On February 1, 1996, the state of Missouri submitted revisions to Missouri rules 10 CSR 10–2.260 and 10 CSR 10–5.220, "Control of Petroleum Liquid, Storage, Loading, and Transfer." These revisions were adopted after proper notice and public hearing. The hearing was held on July 27, 1995. Revisions to 10 CSR 10–2.260 are being submitted to help Kansas City maintain the ozone standard. Revisions to 10 CSR 10–2.250 are being submitted as part of the state's plan to attain the ozone standard in St. Louis.

The amendment to Missouri rule 10 CSR 10–2.260 (specific to the Kansas City metropolitan area) changes the periods for testing tank trucks that have rubber hoods from April 1 through July 1 to January 1 through May 30 of each year. The purpose of requiring tank trucks with rubber hoods to be tested during the aforementioned schedule is to give the state an opportunity to identify problems or possible leaks in the gasoline transfer process before the ozone season. The testing period for aluminum hoods will take place in the period of January 1 through December 31 of each year. Requiring tank trucks with aluminum hoods to be tested during the previously mentioned schedule provides the state the opportunity to test trucks before the ozone season, but also provides the flexibility to continue testing throughout the year. In addition, the revisions add two forms for reporting. One form is a leak test application which is to be completed by the owner or operator of the facility and provided to the director. The second form is a request for exemption form which is to be completed by facility personnel to request an exemption.

The amendment to Missouri rule 10 CSR 10–5.220 (specific to the St. Louis nonattainment area) requires bulk plants to use two new forms. One form requires bulk plants to report the throughput when they apply for an exemption. This form provides documentation for eligible facilities to seek an exemption. The second revision requires sources to submit an application form to obtain a sticker that certifies passage of required tests by gasoline tank trucks.

I. Proposed Action

The EPA is proposing to approve amendments to rules 10 CSR 10–2.260 and 10 CSR 10–5.220 as a revision to the Missouri SIP.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors, and in relation to relevant statutory and regulatory requirements.

II. Administrative Requirements

A. Executive Order 12866.

This action has been classified as a Table 3 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by a July 10, 1995, memorandum from Mary Nichols, Assistant Administrator for Air and Radiation. The Office of Management and Budget has exempted this regulatory action from E.O. 12866 review.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5. U.S.C. 600 et seq., the EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities (5 U.S.C. 603 and 604). Alternatively, the EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, Part D of the Clean Air Act (CAA) do not create any new requirement, but simply approve requirements that the state is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, the Administrator certifies that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The CAA forbids the EPA to base its actions concerning SIPs on such grounds (*Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2)).

C. Unfunded Mandates

Under section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, the EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated costs to state, local, or tribal governments in the aggregate; or to private sector, of $100 million or more. Under section 205, the EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires the EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

The EPA has determined that the approval action proposed does not include a Federal mandate that may result in estimated costs of $100 million or more to either state, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves preexisting requirements under state or local law, and imposes no new requirements. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector, result from this action.

BILLING CODE 6560–50–P

FEDERAL MARITIME COMMISSION

46 CFR Part 586

[Docket No. 96–20]

Port Restrictions and Requirements in the United States/Japan Trade

AGENCY: Federal Maritime Commission.

ACTION: Notice of proposed rule; extension of comment period.

SUMMARY: This extends the comment deadline in regard to the Commission's proposed imposition of fees on liner vessels operated by Japanese carriers calling at United States ports in an effort to adjust or meet apparent unfavorable conditions caused by Japanese port restrictions and requirements.

DATES: Comments due on or before January 20, 1997.

ADDRESSES: Send comments (original and fifteen copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573, (202) 523–5725.

FOR FURTHER INFORMATION CONTACT:

Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573, (202) 523–5740.

SUPPLEMENTARY INFORMATION: The Commission's Notice of proposed rulemaking in this proceeding, published November 13, 1996 (61 FR 58160), proposed countervailing burdens on Japanese ocean carriers designed to adjust or meet apparent unfavorable conditions caused by Japanese port restrictions and requirements. Sixty days were allowed for filing comments. The current deadline is January 13, 1997.

Counsel for the Japanese Lines now has filed a request for a 45-day enlargement of the comment period to February 27, 1997. Counsel cite as justification for their request intergovernmental meetings regarding this matter scheduled for January 6–7, 1997, a week before comments are due, and the intervening holiday schedule. Counsel for Sea-Land Service, Inc. and American President Lines, Ltd. have responded in general opposition to the request, but state that they have no objection to a one-week extension of the filing deadline.

The Commission has determined that an extension limited to one week should be granted. This would move the filing deadline to January 20, 1997, which would provide roughly two weeks after completion of the intergovernmental meetings for parties to finalize and submit comments. This should be sufficient in the circumstances.

By the Commission

Ronald D. Murphy,

Assistant Secretary.

BILLING CODE 6730–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 73 and 76

[Gen Docket No. 83–484; RM 3739; DA No. 96–2159]

Personal Attack and Political Editorial Rules

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; notice of invitation to file updated comments.

SUMMARY: This Public Notice invites interested parties to file updated comments in General Docket No. 83–484 concerning the Commission's proposal to repeal or modify the personal attack and political editorial rules. Comments were filed in that proceeding in 1983, but no Report and Order has been issued. The Commission has received petitions from the Radio-Television News Directors Association ("RTNDA") and other parties urging the Commission to repeal the personal attack and political editorial rules. In addition, on September 17, 1996, RTNDA filed in the United States Court of Appeals for the D.C. Circuit a Petition for a Writ of Mandamus, asking the Court to direct the Commission to act on a 1987 RTNDA petition seeking repeal of the rules. In view of the length of time that has passed since conclusion of the pleading cycle in General Docket No. 83–484, and in light of the Commission's subsequent decision to end enforcement of the fairness doctrine as described in the 1987 RTNDA petition, we believe it is appropriate to update the record in this proceeding by affording interested parties an opportunity to file additional comments in General Docket No. 83–484 concerning the Commission's proposal to repeal the rules.

DATES: Comments are due February 10, 1997, and reply comments are due March 12, 1997.

ADDRESSES: Federal Communications Commission, 2000 M Street, Room 543, Washington, DC, 20554.

FOR FURTHER INFORMATION CONTACT: Kim Matthews, Mass Media Bureau, (202) 418–2130.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Public Notice, released December 19, 1996, inviting updated comments regarding the personal attack and political editorial rules. The complete text of the Public Notice is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, N.W., Washington, D.C., and also may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, N.W., Suite 140, Washington, D.C. 20037.

Synopsis of Public Notice

The Commission has received petitions from the Radio-Television News Directors Association ("RTNDA") and other parties urging the Commission to repeal the personal attack and political editorial rules, 47 CFR §§ 73.1920, 73.1930. In addition, on September 17, 1996, RTNDA filed in the United States Court of Appeals for the D.C. Circuit a Petition for a Writ of Mandamus, asking the Court to direct the Commission to act on a 1987 RTNDA petition seeking repeal of the rules. By this Public Notice, interested parties are invited to file updated comments in the Commission's pending rulemaking proceeding concerning the above-referenced rules.

By way of background, in 1983 the Commission proposed to repeal or modify the personal attack and political editorial rules. *See Notice of Proposed Rulemaking*, Gen. Docket 83–484, RM–3739, 48 FR 28295 (June 21, 1983). The Commission also sought comment on possible repeal of the rules insofar as they apply to cable systems. Comments were filed in the proceeding in 1983, but no Report and Order has been issued. On August 25, 1987, RTNDA and others filed a "Joint Petition for Expedited Rulemaking Action and for Clarification of Memorandum Opinion and Order Ending Enforcement of the Fairness Doctrine" ("Joint Petition"), urging the Commission to: (1) Issue a Report and Order in General Docket 83–484 repealing the personal attack and political editorial rules; and/or (2) clarify that in light of the decision to end enforcement of the fairness doctrine, in *In re Complaint of Syracuse Peace Council Against Television Station WTVH, Syracuse, New York*, 2 FCC Rcd. 5043 (1987), *recon. denied*, 3 FCC 2d 2035 (1988), *aff'd sub nom. Syracuse Peace Council* v. *FCC*, 867 F.2d 654 (D.C. Cir. 1989), *cert. denied*, 493 U.S. 1019 (1990) ("*Syracuse Peace Council*"), the personal attack and political editorial rules will no longer be applied to broadcast licensees. On January 22, 1990, RTNDA and four other parties filed another petition, renewing the request that the Commission repeal the personal attack and political editorial rules.

In view of the length of time that has passed since conclusion of the pleading cycle in General Docket No. 83–484, and in light of the Commission's subsequent decision to end enforcement of the fairness doctrine as described in the 1987 RTNDA petition, we believe it is appropriate to update the record in this proceeding by affording interested parties an opportunity to file additional comments in General Docket No. 83–484 concerning the Commission's proposal to repeal the rules. Comments must be filed on or before February 10, 1997, and reply comments must be filed by March 12, 1997. To file formally in this proceeding, participants must file an original and four copies of all comments, reply comments, and supporting comments. All comments should reference General Docket No. 83–484 and should be addressed to: Office of the Secretary, Federal Communications Commission, Washington, D.C. 20554. The full text of

the submissions are available for viewing and copying in the Public Reference Room, Room 239, 1919 M Street, N.W., Washington, D.C. 20554. Copies may also be purchased from the Commission's copy contractor, International Transcription Service ((202) 857–3800).

RIN 0648–AH77

Atlantic Shark Fisheries; Limited Access Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to implement the limited access system contained in proposed Amendment 1 to the Fishery Management Plan for Atlantic sharks (FMP). If approved, Amendment 1 would establish a two-tiered permit system for the Atlantic shark commercial fishery, set forth eligibility criteria for these permits based on historical participation, and limit the transferability of such permits. NMFS has determined that the Atlantic shark fishery is overfished and overcapitalized, with an excessive number of permitted vessels relative to the harvest level prescribed by the recovery plan. NMFS is holding public hearings and requesting written comments from the public on this proposed rule. The objective of this amendment is to take a first and significant step to prevent further overcapitalization.

DATES: Written comments on this proposed rule must be received on or before February 18, 1997.

ADDRESSES: Comments on this proposed rule should be sent to William Hogarth, Acting Chief, Highly Migratory Species Management Division (F/SF1), National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910. Copies of Amendment 1, which includes an Environmental Assessment (EA) and Regulatory Impact Review (RIR), are available from Margo Schulze, Fishery Biologist, at the same address. See **SUPPLEMENTARY INFORMATION** for hearing locations. Comments regarding the collection-of-information requirement required in this rule should be sent to Margo Schulze and to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20503 (Attention: NOAA Desk Officer).

FOR FURTHER INFORMATION CONTACT: Margo Schulze or John Kelly, 301–713–2347; fax: 301–713–1917.

SUPPLEMENTARY INFORMATION:

Background

The fishery for Atlantic sharks is managed under the FMP prepared by NMFS under authority of section 304(g) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), as amended, and implemented on April 26, 1993, through regulations found at 50 CFR part 678. The FMP established three species management groups, commercial quotas and recreational bag limits, fishing seasons, mandatory vessel reporting, and required commercial vessel permits (with an earned income requirement). The Atlantic shark fishery has operated under open access.

On February 22, 1994, a notice of control date for entry into the Atlantic shark fishery was published in the **Federal Register** (59 FR 8457). This notice announced that anyone entering the fishery after that date (the "control date") may not be assured of future access to the fishery if some form of limited access were implemented later.

Currently, there are more vessels permitted in the fishery than are necessary or desirable to harvest the available total allowable catch (TAC). During 1993–96, the number of commercial vessels permitted in the fishery has fluctuated between approximately 1,500 and 2,748 vessels, while the TAC has been harvested by about 100 to 150 vessels (approximately 3 to 5 percent of the permitted fleet).

Need for Limited Access

The creation of a limited access system would be an initial step toward achieving a more reasonable balance between the harvesting capacity of the permitted fleet and the TAC. Implementation of proposed limited access would, at a minimum, prevent further increases in the number of permits in the fisheries that target sharks and would dramatically reduce the number of speculative permit holders (those without significant, documented landings of Atlantic sharks).

While a limited access system alone would not resolve all of the problems associated with open access fisheries (e.g., derby fishing conditions, "the race for fish," market gluts), it would help prevent them from becoming more severe. Additionally, considerable public comment subsequent to the scoping meetings convened by NMFS indicates increased support for limited access from the directed shark fishing industry.

A limited access system would stabilize fleet size and provide an opportunity for NMFS to collect data, conduct studies, and work cooperatively with fishery participants and other constituents to develop a more flexible, permanent, effort control program in the future.

Permit Categories

NMFS proposes to implement a two-tiered commercial fishing permit system in which permits would be classified as "directed" or "incidental." The reason for issuing two types of permits is to define and regulate the directed shark fishery separately from commercial fisheries that target other species but take sharks as bycatch. Only persons holding directed fishery permits would be eligible to participate in directed fisheries under the management measures already established, while those holding incidental permits would be restricted to the bycatch fishery with more restrictive management measures. NMFS proposes to restrict access to both the directed and incidental shark fisheries.

Eligibility Criteria

Only person or entities that held a shark permit at any time from July 1, 1994, through December 31, 1995, who have documented landings equal to or above the specified directed or incidental threshold levels of historical participation in the shark fishery, who meet the current earned income requirement, and who own a shark-permitted vessel at the time of

publication of the final rule would receive a directed or incidental commercial permit, respectively.

It is considered that catch histories belong to current permit holders rather than to vessels; i.e., if a shark permit holder sells one vessel and buys another, he/she retains the history of the vessel sold and does not acquire the history of the vessel purchased. Thus, it is considered that persons or entities purchasing existing shark vessels have not also purchased that vessel's catch history (since the fishery is currently open access, it would be imprudent for someone to pay money for a catch history from which he/she may never benefit). However, the establishment of a control date by NMFS has changed this assumption as several vessels were purchased after the control date with stipulations that the catch history of the purchased vessel was purchased as well. Accordingly, NMFS will accept legal documentation of transfers of catch histories in the determination of eligibility.

These eligibility criteria are proposed because the majority of existing shark permit holders have not participated in the fishery (have not had significant reported landings of sharks). If all current shark permit holders were to be allowed future participation in the commercial shark fishery, there would be potential to reach or even to exceed greatly the TAC in a short time. Given the overfished status of large coastals and the fully fished status of pelagics and small coastals, exceeding the TAC could have substantial long-term negative impacts on these resources.

For the directed fishery, NMFS proposes a minimum landings threshold of 250 sharks from January 1, 1991, through February 21, 1994, and 125 sharks from February 22, 1994 (the control date), through June 30, 1995 (which is equivalent to having landed sufficient shark each year on average to earn $5,000 per year in gross revenue). NMFS estimates that 134 vessels would be eligible for directed shark permits under this landings criteria.

For the incidental fishery, NMFS proposes a minimum landings threshold of three sharks from January 1, 1991, through February 21, 1994, and two sharks from February 22, 1994 (the control date), through June 30, 1995. NMFS estimates that 279 vessels would be eligible for incidental shark permits under this landings criteria.

If a vessel were sold after the control date and its landings history were included specifically in the written sales agreement, such landings would accrue to the purchaser (and no longer to the seller) for purposes of qualifying for a directed or incidental permit under the proposed limited access system.

Permit Process

NMFS would identify and notify all permit holders of their eligibility status for the directed or incidental shark fishery, after analysis based on the established eligibility criteria.

Upon receipt of this initial notification, eligible permit holders may submit an application for a directed or incidental fishery permit. If a permit holder is informed that he or she does not qualify for a permit, but he or she believes that there is credible evidence to the contrary, the permit holder may apply for a permit and provide the appropriate documentation. NMFS would then evaluate all applications and any accompanying documentation, and notify the applicant of its decision either to accept or deny the permit application.

If the permit application is denied, the applicant may appeal within 90 days of receipt of the notice of denial. Provisional directed or incidental fishery permits, as appropriate, would be issued, pending the outcome of an appeal, until the final decision has been rendered. All appeal decision letters would be mailed via certified mail. If the appeal is denied, provisional permits would become invalid 5 days after the receipt of the notice of denial. If the appeal is approved, provisional permits would become invalid upon receipt of the appropriate permit.

Only owners or operators of permitted vessels that were permitted at any time from July 1, 1994, through December 31, 1995, would be considered for appeal. All appeals would need to be made in writing. To appeal, the applicant would complete an appeal cover sheet with the name, affiliation (if any), address, and telephone number of the applicant. Additional pages and documentation could be attached, as necessary.

The sole ground for appeal would be that NMFS used incorrect or incomplete data in the eligibility analysis. No hardship cases would be heard. Valid documentation of landings covering the eligibility period would be required for consideration of an appeal. Documentation that would be considered in support of an appeal from fishers who believe they qualify for a directed or incidental fishery permit would be restricted to official NMFS logbook records that have been submitted to NMFS prior to August 30, 1995 (60 days after the cutoff date for eligible landings); official, verifiable sales slips or receipts from registered dealers; and state landings records. Dealer sales slips or receipts would have to show definitively the species and the vessel's name or other traceable indication of the harvesting vessel. Dealer records would have to contain a sworn affidavit by the dealer confirming the accuracy and authenticity of the records.

While photocopies would be acceptable for initial submission, NMFS might request originals at a later date, which would be returned to the applicant via certified mail. Any submitted materials of questionable authenticity would be referred for investigation to NMFS' Office of Enforcement.

NMFS would designate appeals officers, who would be NOAA employees. The appeals officers would individually review cases but would confer regularly to ensure consistency.

The appeals officers would review appeals for no more than 30 days before making a recommendation to the Director of the Office of Sustainable Fisheries (Director). The Director would render the final decision for the Department of Commerce. All denial letters would be sent by certified mail with return receipt so that NMFS would know when letters were received by permit holders.

Restrictions on Transfer of Permits

NMFS recognizes that vessels may sink or deteriorate beyond repair, and vessel owners may have valid reasons for wishing to exit the fishery. NMFS proposes to create a system in which directed commercial permits would be transferable with the sale of the permitted vessel, or to a vessel of similar harvesting capacity, or a replacement vessel owned or purchased by the original permittee but not under any other circumstances. Such transfers would be subject to upgrading restrictions (defined in next section). Incidental permits would not be transferable. NMFS recognizes that the same factors present in the directed fishery (e.g., vessel sinking or deterioration, disability, retirement) would also be present in the incidental fishery and that non-transferability of incidental permits would eventually result in the elimination of the incidental fishery through attrition. However, NMFS believes that allowing transferability of incidental permits could result in substantial increases in fishing effort levels. Prohibiting transferability of incidental permits would slow the growth of fishing effort in the limited access fishery.

In years after 1997, the eligibility criteria to which initial limited access permit holders are subject would not apply. In other words, transferees/

buyers of limited access vessel permits would not be required to meet the initial limited access eligibility criteria, (i.e., having held a shark permit at any time from July 1, 1994, through December 31, 1995; having met the landings thresholds and the earned income requirement; and owning a vessel at the time of publication of the final rule).

Restrictions on Vessel Upgrading

NMFS proposes to require that any vessel to which a permit is transferred be defined as the "new" vessel and be required to have the same or less gross registered tonnage and registered length as the originally permitted vessel. This restriction would apply to "replacement vessels," or those vessels acquired by the original permittee to replace originally permitted vessels, and to "new vessels," or those vessels not originally permitted but to which a permit has been transferred after the original permittee has sold the permit. This restriction would also apply to the refurbishment of existing permitted vessels.

Ownership Limits

NMFS proposes to restrict the number of permitted vessels that any one person or entity could own or control to no more than 5 percent of the permitted vessels in the directed fishery. This would prevent significant consolidation and maintain the historically predominant individual owner/operator character of the shark fishery.

Incidental Harvest Limits

Without limits on the harvest of bycatch, the potential would exist for the incidental fishery to target and harvest significant numbers of sharks. This would defeat the purpose of the two-tiered commercial permit system. For these reasons, NMFS proposes to establish a harvest limit for the incidental fishery at a maximum of four sharks (all species combined) per vessel per day. Vessel logbooks would be examined to determine the dates of trip origin and termination (number of days) to ascertain the authorized harvest limit for each trip, with the number of days of the trip multiplied by 4 as the maximum number of sharks of all species authorized per trip.

NMFS believes that establishing a limit of four shark per vessel per day for the commercial incidental fishery would ensure that fishing mortality on the overfished large coastal stock does not increase, while still providing the opportunity for incidental fishers to land some bycatch. The rationale for combining all species groups is that a single catch limit would minimize fishing mortality on the overfished large coastal sharks, prevent increases in fishing mortality on the fully fished pelagic and small coastal sharks, reduce the incentive to target sharks while fishing for other species, and greatly facilitate enforcement. A limit of four sharks per vessel per day limit for the incidental limit would be restrictive for the pelagic longline fisheries, which often catch substantial numbers of pelagic sharks as bycatch. However, at this time, most pelagic sharks are released except for makos and threshers, which are harvested for their valuable fins, and porbeagles, for which there is a small directed fishery. Current estimates of effective fishing mortality on pelagic sharks indicate that significant increases in fishing mortality would likely result in overfishing. The proposed incidental limit, in conjunction with the limited number of permits that would be issued for the incidental category under the proposed limited access system (approximately 279 permits), would allow some sharks caught as bycatch to be landed, while an increase in the current level of fishing mortality would be prevented.

Fees

The Regional Director may charge a fee to recover the administrative expenses of permit issuance and appeals. The amount of the fee would be determined, at least annually, in accordance with the procedures of the NOAA Finance Handbook, available from the Regional Director, for determining administrative costs of each special product or service. The fee would not exceed such costs and would be specified with each application form. The appropriate fee would be required to accompany each application. Failure to pay the fee would preclude issuance of the permit. Payment by a commercial instrument later determined to be insufficiently funded would invalidate any permit.

Classification

This proposed rule is published under the authority of the Magnuson-Stevens Act, 16 U.S.C. 1801 *et seq.* The Assistant Administrator has preliminarily determined that the proposed regulations are necessary for management of the Atlantic shark fishery. NMFS prepared a draft EA for this proposed rule with a preliminary finding of no significant impact on the human environment. NMFS reinitiated consultation on the Atlantic shark fishery under section 7 of the Endangered Species Act on September 25, 1996. This consultation will consider new information concerning the status of the northern right whale. NMFS has determined that proceeding with this rule, pending completion of that consultation, will not result in any irreversible and irretrievable commitment of resources that would have the effect of foreclosing the formulation or implementation of any reasonable and prudent alternative measures. This rule would reduce the number of permits in the Atlantic shark commercial fishery and freeze the harvesting capacity of the fleet at current levels, thereby preventing further overcapitalization and derby fishing conditions and would likely reduce interaction rates.

The Assistant General Counsel for Legislation and Regulations of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities as follows:

The proposed rule would establish a two-tiered limited access permit system for the Atlantic shark fishery, set forth eligibility criteria for these permits based on historical participation, and limit the transferability of such permits. The Atlantic shark fishery is overfished and overcapitalized, with an excessive number of permitted vessels relative to the harvest level prescribed by the recovery plan.

The purpose of this proposed rule is to rationalize current harvesting capacity with total allowable catch and substantially reduce latent effort without significantly altering the status quo in the Atlantic shark fishery. Practically all current participants of the shark fishery readily fall within the definition of small business. The proposed rule will affect all current permit holders in the Atlantic shark fishery. However, few if any shark fishers that are substantially dependent on the fishery would be excluded under the proposed limited access rule.

Speculative permit holders, by definition, have not participated in the commercial shark fishery at all or have not been substantially dependent on the fishery. The incidental bycatch limits continue to provide for speculative commercial fishers to land some sharks; accordingly, annual gross revenues should not decrease substantially.

Therefore, redefining commercial shark permits as directed and incidental will not significantly alter the status quo of the Atlantic shark fishery in terms of fishers' annual gross revenues. Since the proposed rule will not significantly impact presently active shark fishers, the "significant economic impact" criterion will not be met. Therefore, the substantive changes proposed are minimal, primarily affecting the applicability of permitting requirements.

Any of the proposed limited entry measures have implications on the gross revenues of small entities. In essence, those that will be excluded from any form of limited entry system will experience

reduction in their gross revenues at least in the short run. If qualification for any form of limited entry is similar to the one adopted for the species endorsement and bycatch while limited is allowed, those excluded would probably not experience more than a 5 percent reduction in their gross revenues.

The substantive changes proposed primarily affecting the applicability of permitting requirements. The need for these changes is explained in the preamble to the proposed rule.

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection-of-information subject to the requirements of the Paperwork Reduction Act (PRA) unless that collection of information displays a currently valid OMB Control Number.

This proposed rule does not change any currently approved vessel permitting or reporting requirements under OMB Control Numbers 0648–0205, which is estimated and approved at 20 minutes per permit application, and 0648–0016, which is estimated and approved at 15 minutes per logbook report. However, the appeals procedure does constitute a new collection-of-information requirement, which has been submitted to OMB for approval. An appeal of a permit denial is estimated to take 1.5 hours, including the time to gather records, make copies, and mail documents to NMFS. Comments regarding: (1) the accuracy of this burden estimate (including hours and cost); (2) whether the proposed collection of information is necessary for the proper performance of NMFS' functions, including whether the sought information has practical utility; (3) ways to enhance the quality, utility, and clarity of the information to be collected; (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information; and (5) any other aspects of information collection should be sent to OMB and NMFS (see **ADDRESSES**).

This action has been determined to be not significant for purposes of E.O. 12866.

List of Subjects in 50 CFR Part 678

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: December 20, 1996.

Nancy Foster,

Deputy Assistant Administrator, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 678 is proposed to be amended as follows:

PART 678—ATLANTIC SHARKS

1. The authority citation for part 678 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 678.2, a definition for "Director" is added, in alphabetical order, to read as follows:

§ 678.2 Definitions.

* * * * *

Director means the Director, Office of Sustainable Fisheries F/SF, NMFS, or a designee.

* * * * *

3. In § 678.4, paragraphs (a) through (c) and (e) through (k) are revised to read as follows:

§ 678.4 Permits and fees.

(a) *Vessel permits.* Any owner or operator of a vessel of the United States that fishes for, possesses, or lands Atlantic sharks from the management unit, except vessels that fish for Atlantic sharks exclusively in state waters, and recreational fishing vessels, must obtain and carry on board a valid Federal shark permit issued under this paragraph.

(1) *Limited access eligibility in 1997.* NMFS will issue two types of Atlantic shark vessel permits: Directed and incidental. To be eligible to obtain a shark permit for 1997, a vessel owner or operator must have held a valid Federal commercial shark permit at any time from July 1, 1994, through December 31, 1995, must meet the earned income qualification specified in paragraph (b)(1)(vi) of this section, and must own or operate a vessel with a valid shark permit on the date of publication of the final rule.

(i)(A) Directed permits will be issued only to eligible permit holders that have documented landings of at least 250 sharks from January 1, 1991, through February 21, 1994, and 125 sharks from February 22, 1994, through June 30, 1995.

(B) Incidental permits will be issued only to eligible permit holders that have documented landings of three sharks from January 1, 1991, through February 21, 1994, and two sharks from February 22, 1994, thorough June 30, 1995.

(ii) If the vessel owner does not meet the limited access criteria specified in paragraph (a)(1) of this section and the earned income qualification specified in paragraph (b)(1)(vi) of this section and the operator does meet those qualifications, the operator may apply for a shark permit.

(iii) A shark permit for 1997 will not be issued unless an application for such permit is received by NMFS on or before December 31, 1997.

(2) *Eligibility in 1998 and thereafter.* To be eligible for a shark permit in years after 1997, a vessel owner or operator must have been issued a shark permit for the preceding year or the vessel must be replacing a vessel that has been retired from the Atlantic commercial shark fishery and had been issued a shark permit for the preceding year, and the vessel and owner must meet the criteria set forth in paragraphs (a)(4) through (a)(6) of this section. If more than one vessel owner claims eligibility to apply for a shark permit based on one vessel's fishing and permit history after 1997, the Regional Administrator shall determine who qualifies for the limited access Atlantic shark vessel permit according to paragraph (a)(3) of this section.

(3) *Change in ownership.* The fishing and permit history of a vessel is presumed to be retained by the original permit holder whenever the vessel is bought, sold, or otherwise transferred, unless there is a written agreement, signed by the transferor/seller and transferee/buyer, or other credible written evidence, verifying that the transferor/seller is transferring/selling the vessel's fishing and permit history.

(4) *Permit transfer.* Directed permits are transferable to a new vessel and/or owner or to a replacement vessel owned or purchased by the original permittee but not under any other circumstances. Such transfers are subject to the requirements specified in paragraph (a)(5) of this section. Incidental permits are not transferable or assignable; incidental permits are valid only for the vessel and owner or operator of original issuance.

(5) *Vessel replacement/upgrading.* Transfer of directed shark permits is authorized only for new or replacement vessels of the same or lesser gross registered tonnage and registered length as the originally permitted vessel.

(6) *Ownership limits.* One person or entity may own or control no more than 5 percent of the vessels in the directed shark fishery.

(7) *Notification of eligibility for 1997.* (i) NMFS will attempt to notify all current commercial shark permit holders of their eligibility for a directed or incidental shark permit, based on the eligibility criteria set forth in paragraph (a)(1) of this section. Upon receipt of this determination, eligible permit holders may submit an application for the appropriate permit.

(ii) If a vessel owner or operator has been notified that the vessel is not eligible for a directed shark permit or is only eligible for an incidental shark permit, and the vessel owner or operator can provide credible evidence that the

VOL 61 ISS 250 DE 27 1996 UMI

vessel does qualify under the pertinent criteria, the vessel owner or operator may apply for the appropriate permit by submitting the documentation required under paragraph (9)(ii) of this section. If, based on the documentation supplied with the application, NMFS determines that the vessel meets the eligibility criteria, the appropriate permit will be issued.

(8) *Application denial.* If, based on the documentation supplied with the application, NMFS determines that the vessel does not meet the eligibility criteria specified in paragraphs (a)(1) and (a)(2) of this section or the conditions specified in paragraph (e) of this section, the permit will be denied. Letters of denial will be sent via certified mail.

(9) *Appeals.* (i) Any applicant denied a limited access permit for Atlantic shark vessels may appeal the denial to NMFS within 90 days of the notice of denial. The sole ground for appeal is that NMFS erred in its determination of eligibility on the basis of incorrect or incomplete data. Valid documentation of landings covering the eligibility period as specified in paragraph (a)(9)(ii) of this section must be provided by the applicant for NMFS to consider an appeal. Photocopies will be acceptable for initial submission. NMFS may request originals at a later date, which will be returned to the applicant via certified mail. Any such appeal must be in writing. Documentation that is of questionable authenticity will be referred for investigation to NMFS' Office of Enforcement.

(ii) *Valid documentation.* The only documentation that will be considered in support of an application or appeal are official NMFS logbook records that were submitted to NMFS prior to August 30, 1995, state landings records, and official, verifiable sales slips or receipts from registered dealers. Dealer sales slips and receipts must definitively show the species landed and vessel's name or other traceable information for the harvesting vessel and must contain a sworn affidavit by the dealer confirming the accuracy and authenticity of the records.

(iii) *Status during appeal.* The Regional Director shall issue a provisional permit for the category of appeal for, which shall be valid for the pendency of the appeal to a vessel and owner for which an appeal has been initiated. The provisional permit must be carried on board the vessel while participating in the Atlantic shark fishery and is not transferable.

(iv) *Appeals officers.* NMFS will appoint appeals officers, who will review the written materials and submit findings and a recommendation to the Regional Director within 30 days of receipt of a complete appeal.

(v) *Final decision on appeals.* Upon receiving the findings and a recommendation, the Regional Director will issue a final decision on the appeal. The Regional Director's decision is the final administrative action of the Department of Commerce.

(vi) *Notification of final decision on appeals.* The Regional Director shall notify the appellant of the final decision on the appeal by letter sent via certified mail. If the appeal is denied, the provisional permit will become invalid 5 days after receipt of the notice of denial. If the appeal is granted, the provisional permit will become invalid upon receipt of the appropriate permit.

(10) *Adjustments to eligibility.* In years after 1997, NMFS may adjust the eligibility criteria for issuance of a shark permit. In making the adjustment, NMFS shall take into consideration the fishing mortality goals and the objectives of the FMP. Any such adjustment may be made following a reappraisal and analysis under the framework provisions specified in § 678.27.

(11) *Condition.* A vessel owner who applies for a shark permit under this section must agree, as a condition of the permit, that the vessel's shark fishing, catch, and gear are subject to the requirements of this part during the period of validity of the permit, without regard to whether such fishing occurs in the EEZ, landward of the EEZ, or outside the EEZ, and without regard to where such shark or gear are possessed, taken, or landed. However, when a vessel fishes in the waters of a state that has more restrictive regulations on shark fishing, those more restrictive regulations may be applied by that state to fishing, catch, and gear in its waters.

(b) *Application for a shark permit.* (1) In the year 1997, an initial application for a shark permit must be submitted and signed by the owner (in the case of a corporation, the qualifying officer or shareholder; in the case of a partnership, the qualifying general partner) or operator of the vessel. The application must be submitted to the Regional Director at least 30 days prior to the date on which the applicant desires to have the permit made effective. An applicant must provide the following:

(i) A copy of the vessel's U.S. Coast Guard certificate of documentation or, if not documented, a copy of its state registration certificate.

(ii) The vessel's name, official number, registered gross tonnage, and registered length.

(iii) Name, mailing address including ZIP code, telephone number, and social security number, and date of birth of the owner (if the owner is a corporation/partnership, in lieu of the social security number, the employer identification number, if one has been assigned by the Internal Revenue Service (IRS), and, in lieu of the date of birth, provide the date the corporation/partnership was formed).

(iv) If the owner does not meet the earned income qualification specified in paragraph (b)(1)(vi) of this section and the operator does meet that qualification, the name, mailing address including ZIP code, telephone number, social security number, and date of birth of the operator.

(v) Information concerning vessel, gear used, fishing areas, and fisheries vessel is used in, as specified on the application form.

(vi) A sworn statement by the applicant (if the applicant is a corporation or partnership, by an officer, shareholder, general partner, or if the applicant is an operator, by the operator) certifying that, during 1 of the 3 calendar years preceding the application:

(A) More than 50 percent of his or her earned income was derived from commercial fishing, that is, sale of the catch, or from charter or headboat operations;

(B) His or her gross sales of fish were more than $20,000; or

(C) For a vessel owned by a corporation or partnership, the gross sales of fish of the corporation or partnership were more than $20,000.

(vii) Documentation supporting the statement of income, if required under paragraph (b)(1)(x) of this section.

(viii) A sworn statement that the applicant agrees to the conditions specified in paragraph (a)(11) of this section.

(ix) Any other information that may be necessary for the issuance or administration of the permit, as requested by the Regional Director and included on the application form.

(x) The Regional Director may require the applicant to provide documentation supporting the sworn statement under paragraph (b)(1)(vi) of this section before a permit is issued or to substantiate why such permit should not be revoked or otherwise sanctioned under paragraph (h) of this section. Such required documentation may include copies of appropriate forms and schedules from the applicant's income tax return. Copies of income tax forms and schedules are treated as confidential.

(2) In years after 1997, a shark permit holder may apply for a shark permit renewal, provided that the initial information under which the permit holder qualified for a shark permit has not changed as specified in paragraph (k) of this section. Shark permits must be renewed annually and renewal applications must be submitted to the Regional Director at least 30 days prior to the date on which the applicant desires to have the permit made effective. Only a holder of a valid shark permit is eligible for a renewal of that permit.

(3) In years after 1997, an application for permit transfer of a directed shark permit to a new vessel and/or owner will be authorized, subject to transfer and upgrading restrictions specified in paragraphs (a)(4) and (a)(5) of this section, respectively. Incidental shark permits are not transferable. All other requirements and restrictions specified in this part apply to transferred limited access permits and permit holders.

(c) *Dealer permits.* A dealer who receives sharks from the management unit must have a valid dealer permit issued under this part. An application for an annual dealer permit must be submitted and signed by the dealer or an officer of a corporation acting as a dealer. The application must be submitted to the Regional Director at least 30 days prior to the date on which the applicant desires to have the permit made effective.

(1) A permit applicant must provide the following:

(i) A copy of each state wholesaler's license held by the dealer.

(ii) Business name; mailing address, including zip code, of the principal office of the business; employer identification number, if one has been assigned by the Internal Revenue Service; and date the business was formed.

(iii) The address of each physical facility at a fixed location where the business receives fish.

(iv) Applicant's name; official capacity in the business; address, including zip code; telephone number; social security number; and date of birth.

(v) Any other information that may be necessary for the issuance or administration of the permit, as specified on the application form.

(2) *Transfer.* A dealer permit issued under paragraph (c)(1) of this section may be transferred upon sale of the dealer's business. However, such transferred permit shall expire 30 days after sale of the dealer's business. A person purchasing a permitted dealership who desires to conduct activities for which a new permit is required after that 30-day period must apply promptly for a permit in accordance with paragraph (c) of this section.

* * * * *

(e) *Issuance*—(1) Limited access shark permits. Except as provided in subpart D of 15 CFR part 904 and under paragraphs (a)(8) and (a)(9) of this section, the Regional Director shall issue a Federal shark permit within 30 days of receipt of the application unless:

(i) The applicant has failed to submit a complete application. An application is complete when all requested forms, information, documentation, and fees, if applicable, have been received and the applicant has submitted all applicable reports specified at § 678.5;

(ii) The application was not received by NMFS by the deadlines set forth in paragraph (a)(1)(v) of this section;

(iii) The applicant and applicant's vessel failed to meet all eligibility requirements described in paragraphs (a)(1) and (a)(2) of this section; or

(iv) The applicant has failed to meet any other application requirements stated in this part.

(2) *Dealer permits.* The Regional Director will issue a dealer permit at any time to an applicant if the application is complete. An application is complete when all requested forms, information, and documentation have been received and the applicant has submitted all applicable reports specified at § 678.5(a) or § 678.5(b).

(3) *Incomplete applications.* Upon receipt of an incomplete application, the Regional Director will notify the applicant of the deficiency. If the applicant fails to correct the deficiency within 90 days of the date of the Regional Director's letter of notification, the application will be considered abandoned.

(f) *Duration.* A permit remains valid for the period specified on it, and the conditions accepted upon its issuance remain in effect for that period, unless the vessel is retired from the shark fishery or the permit is revoked, suspended, or modified pursuant to subpart D of 15 CFR part 904.

(g) *Display.* A vessel permit issued pursuant to paragraphs (a)(9)(iii) or (b) of this section must be carried on board the vessel, and such vessel must be identified as required by § 678.6. A dealer permit issued pursuant to paragraph (c) of this section must be available on the dealer's premises. The operator of a vessel or a dealer must present the permit for inspection upon the request of an authorized officer.

(h) *Sanctions and denials.* A permit issued pursuant to this section may be revoked, suspended, or modified, and a permit application may be denied, in accordance with the procedures governing enforcement-related permit sanctions and denials found at subpart D of 15 CFR part 904.

(i) *Alteration.* A permit that is altered, erased, or mutilated is invalid.

(j) *Replacement.* A replacement permit may be issued. An application for a replacement permit will not be considered a new application. A fee, the amount of which is stated with the application form, must accompany each request for a replacement permit.

(k) *Change in application information.* The owner or operator of a vessel with a shark permit or a dealer with a permit must notify the Regional Director within 30 days after any change in the application information required by paragraphs (a), (b), or (c) of this section. The permit is void if any change in the information is not reported within 30 days.

* * * * *

4. In § 678.7, paragraphs (b), (k) through (m), (p), (q), (x), and (y) are revised to read as follows:

§ 678.7 Prohibitions.

* * * * *

(b) Fail to display a permit, as specified in § 678.4(g).

* * * * *

(k) Remove the fins from a shark and discard the remainder, as specified in § 678.22(b)(1).

(l) Possess shark fins, carcasses, or parts, aboard or offload shark fins from a fishing vessel, except as specified in § 678.22, or possess shark carcasses or parts aboard, or offload shark fins, carcasses, or parts, from a vessel, except as specified in § 678.22(d).

(m) Fail to release a shark in the manner specified in § 678.22(c).

* * * * *

(p) Land or possess on any trip, shark in excess of the vessel trip limit, as specified in § 678.22(d).

(q) Transfer a shark at sea, as specified in §§ 678.22(d)(3) and 678.23(e).

* * * * *

(x) Exceed the vessel trip limits, as specified in § 678.22(d).

(y) Purchase, trade, or barter, or attempt to purchase, trade, or barter, a shark from the management unit without an annual dealer permit, as specified in § 678.4(c).

* * * * *

5. Section 678.22 is revised to read as follows:

§ 678.22 Harvest Limitations.

(a) *Limited access permit restrictions.* (1) Only holders of valid directed shark

VOL 61 ISS 250 DE 27 1996 UMI

permits issued pursuant to § 678.4 may target and harvest sharks under the specifications outlined in §§ 678.20, 678.21, and 678.24 through 678.28.

(2) Only holders of valid incidental shark permits issued pursuant to § 678.4 may retain a maximum of four sharks (all species combined) per vessel per day.

(b) *Finning.* (1) The practice of "finning," that is, removing only the fins and returning the remainder of the shark to the sea, is prohibited in the EEZ or aboard a vessel that has been issued a permit pursuant to § 678.4.

(2) Shark fins that are possessed onboard or offloaded from a fishing vessel must be in proper proportion to the weight of carcasses. That is, the weight of fins may not exceed 5 percent of the weight of the carcasses. All fins must be weighed in conjunction with the weighing of the carcasses at the vessel's first point of landing and such weights of the fins landed must be recorded on the weighout slips submitted by the vessel owner or operator under § 678.5(a).

(3) Shark fins may not be possessed onboard a fishing vessel after the vessel's first point of landing.

(c) *Release.* A shark that is harvested in the EEZ or harvested by a vessel that has been issued a permit pursuant to § 678.4 that is not retained—

(1) Must be released in a manner that will ensure maximum probability of survival.

(2) If caught by hook and line, must be released by cutting the line near the hook without removing the fish from the water.

(d) *Vessel trip limits*—(1) *Directed permits.* The owner or operator of a vessel that has been issued a directed shark permit pursuant to § 678.4 may not possess on any trip, or land from any trip, large coastal species in excess of 4,000 lb (1,814 kg), dressed weight.

(2) *Incidental permits.* The owner or operator of a vessel that has been issued an incidental shark permit pursuant to § 678.4 may not possess on any trip, or land from any trip, in excess of four sharks per day of all shark species combined. Vessel logbooks will be the sole criterion used to determine dates of trip origin and termination for each trip.

(3) *Transfer at sea.* A shark from any of the three management units may not be transferred at sea from a vessel issued an Atlantic shark permit issued under § 678.4 to any other vessel.

6. In § 678.26, paragraph (c) is revised to read as follows:

§ 678.26 Restrictions on sale upon landing.

* * * * *

(c) Fins from a shark harvested in the EEZ, or by the owner or operator of a vessel that has been issued a permit under § 678.4, that are disproportionate to the weight of carcasses landed (see § 678.22(b)(2)) may not be sold, purchased, traded, or bartered or attempted to be sold, purchased, traded, or bartered.

Notices

Federal Register

Vol. 61, No. 250

Friday, December 27, 1996

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency For International Development; Board for International Food and Agricultural Development One Hundred and Twenty-Second Meeting; Notice of Meeting

Pursuant to the Federal Advisory Committee Act, notice is hereby given of the one hundred and twenty-second meeting of the Board for International Food and Agricultural Development (BIFAD). The meeting will be held from 9:00 a.m. to 5:00 p.m. on January 14, and from 9:00 a.m. to 3:00 p.m. on January 15, 1997, both days, at the Pan-American Health Organization, located at 525 23rd Street N.W., Washington DC, 20523, in Conference Room B.

The agenda will concentrate on issues related to the leadership role of the Agency for International Development in international agriculture.

The meeting is open to the public. Any interested person may attend the meeting, may file written statements with the Committee before or after the meeting, or present any oral statements in accordance with procedures established by the Committee, to the extent that time available for the meeting permits.

Those wishing to attend the meeting should contact Mr. George Like at the Agency for International Development, Office of Agriculture and Food Security, SA–2, Room 401–B, Washington, DC, 20523–0214, telephone (202) 663–2553, fax (202) 663–2552 or internet [glike@usaid.gov] with your full name.

Anyone wishing to obtain additional information about BIFAD should contact Mr. Tracy Atwood the Designated Federal Officer for BIFAD. Write him in care of the Agency for International Development, Office of Agriculture and Food Security, SA–2, Room 401K, Washington DC, 20523–0214, telephone him at (202) 663–2536 or fax (202) 663–2552.

Dated: December 17, 1996.

Tracy Atwood,

AID Designated Federal Officer, (Chief, Food Policy Division, Office of Agriculture and Food Security, Economic Growth Center, Bureau for Global Programs).

BILLING CODE 6116–01–M

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

Market Access Program, Fiscal Year 1997

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice.

SUMMARY: This notice announces an extension of the application period for participation in the Market Access program (MAP) for Fiscal Year 1997 until 5 pm eastern standard time, January 13, 1997.

FOR FURTHER INFORMATION CONTACT:

Marketing Operations Staff, Foreign Agricultural Service, U.S. Department of Agriculture, 1400 Independence Ave., SW Washington, DC 20250, (202) 720–4327.

SUPPLEMENTARY INFORMATION: The MAP is implemented by the Commodity Credit Corporation (CCC) in accordance with the regulations set forth in 7 CFR 1485, published February 1, 1995. On October 4, 1996, CCC published a notice in the **Federal Register** (61 FR 51880) informing prospective applicants for participation in the MAP that all applications had to be received by CCC by 5 p.m. Eastern Standard Time, December 16, 1996.

CCC has determined that the program's goals and purposes can be best served by enabling program managers to consider a broader range of commodities and applicants. Therefore, CCC is extending the period to apply for participation in the MAP until 5 p.m. Eastern Standard Time, January 13, 1997. Applicants must follow the instructions for addressing applications set forth in the October 4, 1996, Notice.

Signed at Washington, D.C. on December 18, 1996.

August Schumacher,

Administrator, Foreign Agricultural Service, and Vice President, Commodity Credit Corporation.

BILLING CODE 3410–10–M

Rural Housing Service

Notice of Availability of Housing Funds; Multi-Family Housing, Single Family Housing

AGENCY: Rural Housing Service, USDA.

ACTION: Notice.

SUMMARY: The Rural Housing Service (RHS) announces the availability of housing funds for fiscal year 1997 (FY 1997). This action is taken to comply with 42 U.S.C 1490p which requires that RHS publish in the **Federal Register** notice of the availability of any housing assistance.

EFFECTIVE DATE: December 27, 1996.

FOR FURTHER INFORMATION CONTACT: Cynthia Reese-Foxworth, Senior Loan Specialist, Rural Rental Housing Branch, Multi-Family Housing Processing Division, Room 5337 (STOP 0781), or Gloria Denson, Senior Loan Specialist, Single Family Housing Processing Division, Room 5334 (STOP 0783), U.S. Department of Agriculture, 1400 Independence Ave., SW., Washington, DC 20250, telephones (202) 720–1604 and (202) 720–1474, respectively. (These are not toll free numbers.)

SUPPLEMENTARY INFORMATION:

Programs Affected

These programs or activities are listed in the Catalog of Federal Domestic Assistance under Nos.

10.405 Farm Labor Housing (LH) Grants
10.410 Very Low to Moderate Income Housing Loans
10.415 Rural Rental Housing Loans
10.427 Rural Rental Housing Assistance Payments
10.433 Housing Preservation Grants

Executive Order 12372

The following programs are subject to the provisions of Executive Order 12372 that requires intergovernmental consultation with State and local officials:

10.405 Farm Labor Housing (LH) Grants
10.415 Rural Rental Housing Loans
10.427 Rural Rental Housing Assistance Payments
10.433 Housing Preservation Grants

Discussion of Notice

7 CFR, part 1940, subpart L contains the formulas and methodology applicable to loan and grant funds.

Rural Housing Service Rural Housing Assistance Program

I. General

A. The Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, 1997 Appropriations Act, Public Law 104–180 (August 6, 1996), established the Rural Housing Assistance Program (RHAP). RHAP combines eleven programs into one funding account. The Administrator has allocated RHAP budget authorities into program funds in proportion to what was proposed in the President's budget. Each dollar of budget authority may support a different program level dependent upon whether it is a loan or grant program and the nature of the program. In addition to RHAP, the Appropriations Act provided two additional sources of funding which may be available to supplement funding for some of our programs during this fiscal year. These sources include a portion of the Fund for Rural America and excess unobligated funds from the "Women, Infant, and Children" (WIC) program.

B. *RHAP Programs.* The programs included in the RHAP are:

1. Direct Community Facility loans,
2. Guaranteed Community Facility loans,
3. Community Facility grants,
4. Rural Housing Preservation Grants,
5. Section 504 Single Family Housing grants,
6. Compensation for Construction Defects,
7. Supervisory and Technical Assistance Grants,
8. Section 515 Direct Multi-Family Housing loans for new construction,
9. Section 538 Guaranteed Multi-Family Housing loans for new construction,
10. Section 521 Rental Assistance for new construction for the Section 515 program,
11. Section 516 Farm Labor Housing grants.

C. RHAP provides flexibility for transfers in budget authority between programs included within RHAP. For FY 1997, up to 20 percent of initial allocations of budget authority may be transferred between the Community Facilities CF) Direct loan, CF Guaranteed loan, and Housing Preservation Grant (HPG) programs.

D. *Empowerment Zone/Enterprise Community (EZ/EC) Earmark.* The appropriations act provided not to exceed $1.2 million in budget authority in RHAP for EZ/EC Communities.

E. *Pooling.* Pooling for programs funded under the RHAP is tentatively scheduled for August 15, 1997. Unexpended RHAP funding will be pooled and may be redistributed between the eleven program areas.

F. *RHAP programs funded for carryover.* The following programs will be funded exclusively from carryover funds from previous years. No funding was required from RHAP funds. These programs are included in the non-RHAP section of this Notice:

1. Section 509 Compensation for Construction Defects.
2. Supervisory and Technical Assistance Grants.

II. Exception Authority

The Administrator, or the Administrator's designee, may, in individual cases, make an exception to any of the requirements of this Notice which are not inconsistent with the authorizing statute if the Administrator finds that application of the requirement would adversely affect the interest of the Government. The Administrator, or designee, may change pooling dates, establish or change minimum or maximum fund usage from set asides and reserves, or restrict participation in set asides and reserves.

Rural Housing Service Rural Housing Assistance Program (RHAP) Multi-Family Housing (MFH)

I. General

A. This provides MFH allocations for the Rural Housing Assistance Program (RHAP) to individual States for FY 1997. Allocation computations have been performed in accordance with 7 CFR 1940.575 and 1940.578. For FY 1997, there is flexibility to transfer up to 20 percent of initial allocations of budget authority between the Community Facilities (CF) Direct loan, CF Guaranteed loan, and Housing Preservation Grant (HPG) programs under certain conditions.

B. Section 515 Rural Rental Housing for new construction, Section 516 Farm Labor Housing (LH) Grants, Section 525 or 509 Housing Application Packaging Grants, and the Housing Preservation Grant (HPC) Program are included under RHAP. For FY 1997, Rural Rental Housing is in two separate funds—one for new construction under the RHAP program and one for repair or rehabilitation and equity loans which is not limited to new construction not included under RHAP. Therefore, the repair or rehabilitation portion of the RRH not limited to new construction, as well as LH loans and LH rental assistance, are covered in the non-RHAP portion of this Notice.

C. MFH loan and grant levels for the available RHAP programs, for FY 1997, are as follows:

Section 515 Rural Rental Housing (RRH) for New Construction	$96,561,280
Section 521 Rental Assistance for RRH New Construction	30,190,000
Section 516 Farm Labor Housing (LH) Grants	6,421,000
Section 533 Housing Preservation Grants (HPG)	7,063,000

II. Section 515 RRH and Section 521 RA Funds (Allocated to the States)

Section 515 new construction loan funds and new construction rental assistance programs cannot be obligated until revised regulations have been promulgated for legislated reforms.

A. Section 515 RRH Loan Funds (for New Construction)

1. *Amount Available for Allocation.* Refer to the end of the RHAP, MFH portion of this Notice:

Total available	$96,561,280
Less set-aside for nonprofits	8,936,938
Less set-aside for underserved counties and colonias	4,826,064
Less general reserve	9,656,128
Less designed reserve	2,500,000
Base allocation	16,232,880
Basic formula amount	56,407,270

2. *Base Allocation.* This provides a distribution of funds to certain States to assure that all States receive at least $1,000,000 to ensure sufficient funding levels for new construction.

3. *Administrative Allocation.* Not used.

4. *Reserves and Set-Asides.*

a. *State Office Reserve.* State Directors are encouraged NOT to hold reserves or sub-allocate funds due to the decrease in funding levels.

b. *National Office Reserves.* These reserves are broken down as follows:

General reserve	$9,656,128
Designated reserve:	
State RA	2,500,000
Total National Office Reserve	12,156,128

(i) *General Reserve.* $9,656,128 in general reserve funds have been set aside. Since access to general reserve

funds cannot be assured or guaranteed, States should not consider potential access to these funds when authorizing Form AD–622, "Notice of Preapplication Review Action," up to the authorized percentage of their allocation. Some examples of allowable uses are as follows:

(A) *Hardships and Emergencies.* The request must include sufficient documentation to support the hardship or emergency including reasons why it is in the Government's best interest to favorably consider the request.

(B) *Patch outs.* A patch out, not to exceed 30 percent of the total loan obligation, when the State needs the additional funds to obligate 100 percent of its allocation.

(C) *RH Cooperatives.* States with approval proposals for cooperative housing may request funds and RA from this reserve.

(ii) *Designated Reserves for State RA.* $2.5 million of the RRH funds has been set aside for matching for projects in which an active State sponsored RA program is available. The State RA program must be comparable to the RHS RA program.

c. *National Office Set-asides.* The following designated and legislatively required set-asides are part of the National Office Set-aside:

Nonprofit set-aside	$6,936,938
Underserved counties and colonias	4,828,064

(i) *Nonprofit Set-Aside.* $6,936,938 has been set-aside for nonprofit applicants. In order to maximize the number of loans from this set-aside, each State may develop one proposal which may not exceed the State's average size (number of units) new construction loan. The amount requested under this reserve per State or jurisdiction cannot exceed $750,000. The applicant must be a nonprofit entity which meets the following conditions:

(1) Is a private nonprofit organization, consumer cooperative or Indian Tribe;

(2) Whose principal purposes include the planning, development and management of low-income housing;

(3) Is exempt from federal income taxes under section 501(c)(3) or 501(c)(4) of the Internal Revenue Code;

(4) Is not wholly or partially owned or controlled by a for-profit entity; and

(5) If a partnership has as its general partner a nonprofit entity or the nonprofit entity's for-profit subsidiary for Section 515 assistance to sponsor a project which is receiving Low-Income Housing Tax Credits (LIHTC) pursuant to section 42 of the Internal Revenue Code of 1986.

(ii) *Underserved Counties and Colonias Set-Aside.* $4,828,064 has been set-aside for loan requests which are located in one of the 100 underscored counties (list available in any Rural Development Office) and colonias, as determined by the provisions of the Cranston-Gonzalez Affordable Housing Act of 1990.

5. *National Office Pooling.* Pooling for programs funded under the RHAP is tentatively scheduled for August 15, 1997. RHAP funding will be pooled and may be redistributed between the eleven program areas.

6. *Participation Loans.* Participation loans are those where other funding sources are participating with RHS in the development of a rural rental housing complex. All provisions of 7 CFR part 1944, subpart E apply to participation loans. Participation loans do not receive any special priority. The ability to approve such loans is tied to the promulgation of revisions to 7 CFR part 1944, subpart E.

7. *Issuing Form AS–622.* The Agency will not issue Form AD–622 authorizing submission of applications for new construction, including the use of reserve funds until regulatory changes to the selection system and initiation of subsidy layering reforms are promulgated. Applications approved, but not funded, will most likely need to be re-submitted for consideration for funding under the new selection system when implemented.

B. Section 515 New Construction Rental Assistance (RA).

1. *Valuation of New Construction RA.* $30,190,000 will be available for RRH new construction RA. This amount equates to an estimated 2,415 units for the new construction RRH loan program.

2. *Estimated New Construction RA Units Available for Allocation.* New construction RA allocations are based proportionately upon each State's new construction loan fund allocation. The allocation formula contained in 7 CFR 1940.576 was not utilized. See the end of this Notice for the new construction RA State allocations.

Estimated total new construction units available	2,415
Less set-aside	559
Less base allocation	0
Less administrative allocation	0
Total state requested new construction RA units	1,856

3. *Base Allocation.* No base allocation is provided.

4. *Administrative Allocation.* No administrative allocation is provided.

5. *RA Set-asides.*

a. *National Office Set-aside.* 309 units will be held in the National Office to accompany RRH set-asides for nonprofits, underserved counties and colonias.

b. *Participation Loans and RA.* 250 units of new construction RA have been set-aside to provide tenant subsidy on units that are developed through participation loans.

6. *National Office Pooling.* Pooling for programs funded under the RHAP is tentatively scheduled for August 15, 1997. RHAP funding will be pooled and may be redistributed between the eleven program areas.

7. *Availability of the Allocation.* The Agency will not issue Form AD–622 authorizing submission of applications for new construction until the aforementioned regulatory reforms are promulgated.

8. *Approval and Obligation of RA.* Loans will only be obligated when sufficient RA to ensure market feasibility can be obligated at the same time. RA for loans obligated in a prior FY will not be authorized.

III. Farm Labor Housing Grant Funds (Not Allocated to States) (LH Loan Funds Are Not Part of RHAP.)

A. *Section 516 LH Grants.* The grants are funded in accordance with 7 CFR 1940.579(b). Unobligated prior year balances and cancellations will be added to the amount shown.

FY 1997 Appropriation	$6,421,000
Available for LH Grants	4,815,750
Available for Technical Assistance Contracts	642,100
National Office Reserve (15 percent)	963,150

B. *National Office Reserve.* A $963,150 LH grant National Office reserve will be available until pooling, tentatively scheduled for close-of-business August 15, 1997, or until expended. The reserve will be used for the following purposes:

1. *Repair and Rehabilitation of LH Projects in the Portfolio.* Loans and grants are available for the repair and rehabilitation of existing projects that have health and safety violations.

2. *Migrant and Migrant and Homeless Projects.* Funds are available for proposals that include at least 50 percent of the units to serve migrant farmworkers or the dual populations of migrant farmworkers and the homeless.

3. *Leveraged LH projects.* While some leverage funds should be used in all LH projects to the degree possible and feasible, reserve funds are available for projects that are highly-leveraged, i.e., projects that have commitments of non-

LH loan and grant funds in excess of 25 percent of total development cost.

C. *National Office Pooling.* Pooling for programs funded under RHAP is tentatively scheduled for August 15, 1997. RHAP funding will be pooled and may be redistributed between the eleven program areas.

D. *Section 516 Technical Assistance (TA) Contracts.* Funds set aside for TA contracts are legislatively limited to 10 percent of funds made available for LH grants. TA is provided for the development of labor housing exclusively for farmworkers and may also be used in those unique agricultural markets where there is also a need for emergency, short-term housing for the local homeless population. The current contracts with the TA providers provide funds through March 31, 1997.

The contracts may be extended for the TA providers to assist current sponsors through the preapplication and application process as well as those sponsors with repair or rehabilitation needs.

E. *RA for LH.* This RA is held in a National Office reserve for use with LH loan and grant applications. RA is only available with a LH loan of at least 5 percent of total development cost. Projects without LH loans cannot receive RA.

F. *National Office Pooling.* Pooling for programs funded under the RHAP is tentatively scheduled for August 15, 1997. RHAP funding will be pooled and may be redistributed between the eleven program areas.

IV. Section 533 Housing Preservation Grants (HPG)

A. *Amount Available for Allocation.*

Total available	$7,063,000
Less reserve	353,150
Less base allocation	1,810,012
Basic formula amount	4,899,838

B. *Base Allocation.* The base allocation is used to provide each State a minimum of $100,000.

C. *Administrative Allocations.* There is no administrative allocation due to the limited amount of funds available for FY 1997.

D. *Reserve.* The National Office reserve is 5 percent of the total funds available. The reserve is for emergencies.

E. *Availability of the Allocation.* A distribution of funds is made to all States. The Agency does not have the authority to waive the statutory rule requiring not more than 50 percent of the State's allocation go to one eligible applicant.

F. *HPG is a competitive grant program.* Opening and closing dates for submission of preapplications will be announced in the **Federal Register** at a later date. Obligations of HPG requests may not exceed the amounts reflected in this Notice. There will be no funds for patch outs or additional requests.

Rural Housing Service Rural Housing Assistance Program (RHAP) Single Family Housing (SFH)

I. General

A. *Amount available for allocation.* This provides SFH allocations for RHAP programs to individual States for FY 1997. Only the Section 504 Grant program is included in RHAP for SFH.

Amount available for allocations.

Section 504 Grants

Total Available	$15,989,000
Less 5% Set aside for 100 underserved counties or colonias	799,450
Less General Reserve	757,000
Less Targeted Reserve	756,000
Basic Formula-Administrative Allocation	13,676,550

B. *Basic formula criteria, data source, and weight.* See 7 CFR 1940.567(b). Data derived from the 1990 Census was provided to each State by the National Office on August 12, 1993, (available in any State Office). This data must be used if funds are suballocated to below the State level.

C. *Administrative allocation.* Due to the absence of Census Data, the Western Pacific Areas will receive an administrative allocation of $560,000. The minimum amount to a State is $50,000.

D. *Reserve.*

1. *State Office reserve.* State Directors must:

a. Maintain an adequate reserve to fund hardship applications.

b. Develop their own definition of a hardship case. Hardships will be determined by the Agency on a case-by-case basis.

2. *National office reserves.*

a. *General reserve.* The general reserve contains $757,000. Access to the general reserve is only for hardship cases.

(i) For Section 504 Grants, an extreme hardship case is one requiring a significant priority in funding, ahead of other requests, due to severe health or safety hazards, or physical needs of the applicant or community.

(ii) Section 504 grant requests must be reviewed and sufficient documentation must be provided to support the hardship.

b. *Targeted reserve.* Of the 1997 Section 504 grant funds, $756,000 has been set aside for the targeted counties selected by the State Director in accordance with strategic plan goals.

c. *Underserved counties or colonias.* The reserve for the 100 underserved counties and colonias contains $799,450.

E. *Pooling of funds.* Pooling for programs funded under the RHAP is tentatively scheduled for August 15, 1997. RHAP funding will be pooled and may be redistributed between the eleven programs areas.

Rural Housing Service Non-RHAP

I. General

A. *Public Notification.* State Directors are encouraged to notify nonprofit and public housing agencies of the availability of RHS loan and grant funds.

B. *Section 525 or 509 Housing Application Packaging Grants (HAPG).* Carry-over funds from previous years remain available for the HAPG program. HAPG funds will not be allocated by State, based on the historical use of the program.

II. Exception Authority

The Administrator, or the Administrator's designee, may, in individual cases, make an exception to any of the requirements of this Notice which are not inconsistent with the authorizing statute if the Administrator finds that application of such requirement would adversely affect the interest of the Government.

Rural Housing Service Non-Rural Housing Assistance Programs (Non-RHAP) Multi-Family Housing (MFH)

I. General

A. This provides MFH allocations for programs not in the Rural Housing Assistance Program (RHAP) to individual States for FY 1997. Allocation computations have been performed in accordance with 7 CFR 1940.575 and 1940.578.

B. Section 514 Labor Housing (LH) Loans, Section 515 Loans for repairs and rehibilitation and Equity Loans, Rental Assistance (RA) for labor housing, and MFH Loan Program Credit Sales are covered in this section. Rental Assistance units for servicing and renewal will be distributed separately. All other MFH programs are listed in the RHAP section of this Notice. MFH loan levels for the above mentioned programs, for FY 1997, are as follows:

Section 514 Farm Labor Housing (LH) Loans	$14,512,811
Section 515 Rural Rental Housing (RRH) Loans not limited to new construction	56,571,038
Section 515 Rural Rental Housing (RRH) Loans:	
(New construction is not authorized at this time.)	(See RHAP Section)
Section 516 LH Grants	(See RHAP Section)
Section 521 Rental Assistance (RA):	
RRH New Construction	(See RHAP Section)
LH	4,500,000
Section 525 or 509 Housing Application Packaging Grants*	Carryover
Section 533 Housing Preservation Grants (HPG)	(See RHAP Section)
MFH Loan Programs Credit Sales	3,687,179

* See the RHAP, MFH portion of this notice for further information.

II. State Allocations

State allocations have been developed with the methodology and formulas stated in 7 CFR part 1940, subpart L, except where noted elsewhere.

A. *Repair or Rehabilitation.* States with repair and rehabilitation loans have a separate Section 515 allocation for repair and rehabilitation loans. These funds may not be used for new construction. Tenant health and safety continues to be a priority. Allocated repair and rehabilitation funds must be FIRST targeted to RRH Loan facilities that have physical conditions that effect the health and safety of tenants and then made available to facilities that have deferred maintenance. See the end of this Notice for the State rehabilitation and repair allocations.

B. *Section 515 RRH Funds not Limited to New Construction.*

1. *Amount Available for Allocation.*

Section 515 RRH Loan Funds	$56,571,038
General reserve	5,657,104
Designated reserve for equity loans	2,500,000
Basic formula amount	48,413,934

2. *Base Allocation.* Not used.

3. *Administrative Allocation.* To ensure sufficient funding levels for repair or rehabilitation loans, funds are distributed to States based on need. States are receiving at least $1,000,000 or their stated need for funds if less than $1,000,000.

4. *Reserves.*

a. *State Office Reserve.* Since funds were allocated based on need, there is no basis for a State Office reserve.

b. *National Office Reserve.* This reserve is 10 percent of the total funds available.

(i) *General Reserve.* $5,657,104 in general reserve funds have been set aside. Since access to general reserve funds cannot be assured or guaranteed, States should not consider potential access to these funds when authorizing Form AD–622, "Notice of Preapplication Review Action." Some examples of allowable uses are as follows:

(A) *Hardships and Emergencies.* The request must include sufficient documentation to support the hardship or emergency including reasons why it is in the Government's best interest to favorably consider the request.

(B) *Patch outs.* A patch out, not to exceed 30 percent of the total loan obligation, when the State needs the additional funds to obligate 100 percent of its allocation.

(ii) *Designated reserve for equity loans.* $2.5 million has been designated for the equity loan prepayment alternative incentive feature described in 7 CFR Part 1965, subpart E.

5. *National Office Pooling.* Unused RRH funds will be placed in the National Office reserve and will be made available administratively. Year-end pooling of all Section 515 RRH funds is tentatively scheduled for close of business (COB), August 15, 1997.

III. Funds not Allocated to States

A. *Credit Sales Authority.* For FY 1997, $3,687,179, will be set aside for credit sales to program and nonprogram buyers. Credit sale funding will not be allocated by State. When this loan authority is expended, States will resume the use of the appropriate loan funds to finance sales to program eligible buyers.

B. *Section 514 Farm LH Loans.*

1. These loans are funded in accordance with 7 CFR 1940.579(a).

FY 1997 appropriation	$14,412,811
Available for off-farm loans	10,112,811
Available for on-farm loans	1,500,000
National Office reserve	2,800,000

2. On-farm loans are limited to $1.5 million for this FY.

C. *National Office LH Loan Reserve.* A $2.8 million LH loan National Office reserve will be available until approximately August 15, 1997, or until expended. The reserve will be used for the following purposes:

1. *Repair and Rehabilitation of LH Projects in the Portfolio.* Loans are available for the repair and rehabilitation of existing projects that have health and safety violations.

2. *Migrant and Migrant and Homeless Projects.* Funds are avilable for obligation of proposals that include at least fifty percent of the units to serve migrant farmworkers or the dual populations of migrant farmworkers and the homeless.

3. *Leveraged LH Projects.* While some leveraging funds should be used in all LH projects to the degree possible and feasible, reserve funds are available for projects that are highly-leveraged, i.e., projects that have commitments of non-LH loan and grant funds in excess of percent of total development cost. The operating budget should still reflect a feasible full five-year period of RA usage. Leveraged loan funds should result in economically feasible rents and assurance that the term of RA for the facility will average 5 years. In general, the cost of leveraged loans should not exceed the cost of 100 percent LH loan financing.

D. *Section 516 Technical Assistance (TA) Contracts.* For Information on TA contracts for FY 1997, see the RHAP, MFH portion of this notice.

E. *RA for LH.* The National Office reserve contains 360 units at an average of $12,500 for use with LH loan and grant applications. RA is only available with an LH loan of at least 5 percent of total development cost. Projects without a LH loan cannot receive RA.

Rural Housing Service Non-RHAP Single Family Housing (SFH)

I. General

A. This provides SFH allocations for programs not in the Rural Housing Assistance Program (RHAP) available to individual States for Fiscal Year (FY) 1997. Allocation computations have been made in accordance with 7 CFR 1940.563 through 1940.568.

B. The SFH loan amounts (*) and grant amounts shown below are based on the total loan levels deliverable. The SFH levels authorized for FY 1997 are as follows:

Section 502 Guaranteed Rural Housing (RH) Loans:	
Non-subsidized Guarantees	$2,700,000,000
[Refinancing Guarantees ***	150,000,000]
Section 502 Direct RH Loans:	
Very Low-Income Subsidized Loans *	234,132,581
Low-Income Subsidized Loans *	351,198,871
Non-subsidized Loans	0
Credit Sales (Program and Non Program) *	24,674,166
Section 504 Housing Repair Loans *	30,251,160
See 504 Grants	(See RHAP)
Section 509 Compensation for Construction Defects **	1,909,926
Section 523 Self-Help Site Loans *	592,234
Section 525 Self-Help Technical Assistance Grants **	26,010,520
Section 524 RH Site Loans	600,000
Section 306C WWD Grants	2,075,921
Sections 525 or 509 Housing Application:	
Packaging Grants (HAPG) **	1,731,394
Natural Disaster Funds.	
(Estimated carry-over amounts from previous year):	
Section 502 Natural Disaster Loans	34,969,354
Section 504 Natural Disaster Loans	3,913,949
Section 504 Natural Disaster Grants	765,690

* SFH loan levels deliverable with subsidy.
** Unobligated or canceled funds from prior FY have been added to the amount shown. See the non-RHAP portion of this notice.
*** $150 million for loans to refinance Section 502 Direct loans with guaranteed funds. These funds will be held until July 1, 1997, pending passage of a statutory provision to permit using guaranteed funds for refinancing 502 direct loans. If the statutory provision is not passed by July 1, 1997, these funds will be used for non-subsidized guarantees.

C. SFH loan and grant types not allocated to States or available as follows:

1. *Section 502 direct non-subsidized funds (loan making and servicing).* There were no FY 1997 funds designated for loans for non-subsidized servicing or loan-making applicants. Subsidized funds will continue to be used for qualified very low- and low-income applicants when the payment subsidy formula shows there is no need for the subsidy. This assistance will be taken from the State's subsidized regular funding.

2. *Credit sale authority.* For FY 1997, $24,674,166 will be set aside for Real Estate Owned (REO) credit sales to SFH program and nonprogram buyers. Credit sale funding will not be allocated by State. When this loan authority is exhausted, States will resume the use of the loan funds to finance REO sales to program eligible buyers.

3. *Section 509 Compensation for Construction Defects.* The approval official must determine that the construction is defective, in accordance with 7 CFR 1924.265.

4. *Section 523 Mutual and Self-Help Site Loans.* The State Director must request funding authority prior to obligating loan funds for the project.

5. *Section 523 Mutual and Self-Help Technical Assistance Grants.* The State Director must request funding approval authority for all grantees. A technical review and analysis of all grantee applications must be completed by the Technical and Management Assistance (T&MA) contractor. This analysis is a prerequisite for approval for all grantees.

6. *Section 524 RH Site Loans.* The State Director must request funding authority prior to obligating loan funds for the project.

7. *Deferred Mortgage Payment Demonstration.* There is no funding provided for deferred mortgage authority or loans for deferred mortgage assumptions.

II. State Allocations

A. *Section 502 non-subsidized guaranteed RH loans.*

1. *Amount available for allocation:*

Total Available	$2,700,000,000
Less National Office Reserve	405,000,000
Less funds for refinancing Section 502 loans (Pending Legislative Authority)	150,000,000
Less Base Allocation	0
Basic Formula—Administrative: Allocation	2,145,000,000

2. *Basic formula criteria, data source, and weight.* See 7 CFR 1940.563(b). Data derived from the 1990 Census was provided to each State by the National Office on August 12, 1993.

3. *Administrative allocation.* Due to the absence of Census Data, the Western Pacific Areas will receive an administrative allocation of $1 million.

4. *Pooling of funds.* There will be no mid-year pooling. Year-end pooling is tentatively scheduled for close of business on August 15, 1997. Pooled funds will be placed in the National Office reserve and will be made available administratively.

5. *Availability of the allocation.* Funds will be distributed by quarters as follows: 50 percent through the first quarter, 80 percent through the second quarter, 90 percent through the third quarter, and 100 percent in the fourth quarter until the National Office year-end pooling date.

6. *Suballocation by the State Director.* The State Director may suballocate to the District level. All guaranteed funds will be administered through the reservation of funds system.

7. *Targeted.* Each State Director must target at least 30 percent of their Section 502 guaranteed rural housing funds toward counties with median incomes at or below the State's non-metropolitan median income.

B. *Section 502 Direct RH loans.*

1. *Amount available for allocation.*

Total Available	$585,331,452
Less required set aside for underserved counties or colonies	29,266,573
Less General Reserve	18,000,000
Less Designated Reserves	85,000,000
Self-Help	80,000,000
Targeted	5,000,000
Basic Formula Administrative Allocation	453,064,879

2. *Basic formula criteria, data source, and weight.* See 7 CFR 1940.565(b). Data derived from the 1990 U.S. Census was provided to each State by the National Office on August 12, 1993.

3. *Administrative allocation.* Due to the absence of Census Data, the Western Pacific Areas will receive an administrative allocation of $1,100,000.

4. *Reserves.*

a. *State office reserve.* State Directors must maintain an adequate reserve to fund the following applications:

(i) Hardship and homelessness applications. Hardships and homelessness will be determined by the State Directors on a case-by-case basis.

(ii) The State's portion of funds for Mutual Self-Help loans. This amount will represent the State's 25 percent contribution.

(iii) Subsequent loans for essential improvements or repairs and in connection with transfers with assumptions of the Rural Development indebtedness.

(iv) Financing for the purchase of REO property when credit sale authority has been exhausted.

(v) State Directors must set aside not less than 20 percent of their initial low-income allocation for participation in leveraging Section 502 direct loan funds. A reserve for very low-income participation loans is not required, but may be established if significant activity is anticipated by the State Director.

b. *National office reserves.*

Note: Currently, RHS has small reserves set aside for the general reserve which includes hardships, homelessness, and National Homeownership Partnership pilot cases; and the designated reserves which include self-help loans, and the targeted counties. RHS will consider increasing the general and designated reserves and continuing with the Innovative Demonstration Initiatives if there is any increase in the program levels in the Section 502 Direct Program.

(i) *General reserve.* The National Office reserve has a general reserve of $18 million. Of the $18 million, hardship and homelessness reserves each have $1 million set aside. For a National Homeownership Partnership pilot, $8 million is set aside.

(ii) *Hardhip and homeless reserve.* When State funding is not sufficient to serve all program eligible applicants, State Directors may submit hardship and homeless cases for reserve funds. Priority will be given to applicants facing deficient housing hardships including applicants who have been living in deficient housing for more than 6 months, current homeowners in danger of losing a property through foreclosure, and other circumstances determined by RHS on a case-by-case basis to constitute a hardship.

(iii) *National Homeownership Partnership pilot.* Of the section 502 direct funds, $8 million has been set aside for this pilot. This is a pilot in designated States forming a partnership between Rural Housing Service, Federal Home Loan Bank, local lenders, and community based non-profit organizations although RHS funds will all be used for Section 502 authorized purposes.

c. *Designated reserves.*

Note: The designated reserves have a set aside of $85 million for the following:

(i) *Targeted reserve.* Of the FY 1997 section 502 Direct loan funds, $5 million has been set aside for targeted counties. The targeted reserve will be held in the Administrator's reserve for areas and projects identified in the FY 1997 annual performance goals. Special consideration will be given to non-metro counties with persistent poverty, tribal government, Empowerment Zones, Enterprise Communities, Champion Communities, Pacific Northwest areas, Appalachia and the Mississippi Delta Region.

(ii) *Matching funds for states with approved mutual self-help housing grants.* The amount of $80 million of FY 1997 Section 502 Direct Loan funds has been set aside for matching funds on the basis of the National Office contributing 75 percent from the National Office reserve and States contributing 25 percent of their allocated Section 502 RH funds to assist participating Self-Help families.

d. *Underserved counties and colonias.* $29,266,573 was set aside for the 100 underserved counties and colonias per the Cranston-Gonzalez National Affordable Housing Act, as amended. These funds are to be used in the 100 most underserved counties and colonias (available in any Agency office).

e. *State office pooling.* If pooling is conducted within a State, it must not take place within the first 30 calendar days of the first, second, or third quarter. (There are no restrictions on pooling in the fourth quarter.) The pooled funds may be redistributed by the State Director provided the State Director has determined that the pooled funds could not be used in the field offices receiving the funds allocated in accordance with 7 CFR part 1940, subpart L.

f. *National Office Pooling.* There will be no mid-year pooling. Year-end pooling is tentatively scheduled for close of business August 15, 1997. Year-end pooled funds will be placed in the National Office reserve and will be made available administratively.

g. *Availability of the Allocation.* The Housing Act of 1949, as amended, provides that not less than 40 percent of the funds be made available for very low-income Section 502 loan applicants. Funds will be distributed by quarters as follows: 50 percent through the first quarter, 80 percent through the second quarter, 90 percent through the third quarter, and 100 percent in the fourth quarter until the National Office year-end pooling date.

h. *Suballocation by the State Director.* The State Director may suballocate using the methodology and formulas required by 7 CFR part 1940, subpart L.

C. *Section 504 housing repair loans.* Section 504 grant funding may be found in the RHAP section of this notice.

1. *Amount available for allocation.*

Total Available	$30,251,160
Less 5% for Underserved Counties or Colonias	1,512,558
Less General Reserve	1,436,930
Less Designated Targeted Reserve	1,436,930
Basic Formula—Administrative Allocation	25,864,742

2. *Basic formula criteria, data source, and weight.* See 7 CFR 1940.566(b). Data derived from the 1990 Census was provided to each State by the National Office on August 12, 1993, (available in any State Office). This data must be used if funds are suballocated.

3. *Administrative allocation.* Due to the absence of Census Data, the Western Pacific Areas will receive an administrative allocation of $2,400,000. The minimum State allocation is $50,000.

4. *Reserves and Set-asides.*

a. *State office reserve.* State Directors must:

(i) Maintain an adequate reserve for Section 504 hardship loan applications.

(ii) Develop an objective definition of a hardship case for a Section 504 loan. Hardships will than be determined by the State Director on a case-by-case basis.

b. *National office reserve.* Of the 1997 Section 504 loan funds, $1,436,930 has been set aside for the General Reserve and $1,436,930 has been set aside as a reserve for targeted counties.

c. *Underserved counties and colonias.* $1,512,558 was set aside for the 100 underserved counties and colonias.

5. *Pooling of funds.* There will be no mid-year pooling. Year-end pooling is tentatively scheduled for close of business on August 15, 1997. Pooled funds will be placed in the National Office reserve and will be made available administratively.

6. *Availability of the allocation for section 504 loans.* Funds will be distributed cumulatively by quarters as follows: 50 percent through the first quarter, 80 percent through the second quarter, 90 percent through the third quarter and 100 through the fourth quarter.

7. *Section 306C water and waste grants to individuals in colonias.* The

objective of the section 306C WWD individual grant program is to facilitate the use of community water or waste disposal systems for the residents of the colonias along the U.S.-Mexico border.

8. *Natural disaster assistance.* For the purpose of administering these funds, natural disasters will only include those identified by a Presidential declaration. State Offices will be informed at the issuance of the Presidential declaration on how to handle and process natural disasters loans or grants through the Finance Office.

Dated: December 18, 1996.

Jan E. Shadburn,

Acting Administrator, Rural Housing Service.

RURAL HOUSING SERVICE—SECTION 515—RURAL RENTAL HOUSING PROGRAM

[FY 1997 New Construction State Allocations Under RHAP]

State	Formula factor	State formula allocation	Base allocation	Total new construc. allocation	New construc. RA units
AL	0.02956	$1,667,963	$0	$1,667,963	43

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Mississippi Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Mississippi Advisory Committee to the Commission will convene at 6:00 p.m. and adjourn at 8:00 p.m. on Thursday, January 30, 1997, at the Ramada Plaza Hotel, 1001 County Line Road, Jackson, Mississippi 39211. The purpose of the meeting is to plan future projects.

Persons desiring additional information, or planning a presentation to the Committee, should contact Melvin L. Jenkins, Director of the Central Regional Office, 913–551–1400 (TDD 913–551–1414). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, December 19, 1996.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit

Agenda and Notice of Public Meeting of the Virginia Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Virginia Advisory Committee to the Commission will convene at 9:30 a.m. and adjourn at 7:00 p.m. on each of the following days: Thursday, January 30, 1997, at the Hampton City Council Chambers, 22 Lincoln Street, Hampton, Virginia 23669, and Friday, January 31, 1997, at the Newport News City Council Chambers, 2400 Washington Avenue, Newport News, Virginia 23607. The purpose of each meeting is to gather information from panels of speakers and individuals on policies and practices of law enforcement agencies and sentencing disparities as they affect African Americans on the Hampton/Newport News peninsula.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Jessie M. Rattley, 804–727–5647, or Ki-Taek Chun, Director of the Eastern Regional Office, 202–376–7533 (TDD 202–376–8116). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, December 18, 1996.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

DEPARTMENT OF COMMERCE

Submission for OMB Review: Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act of 1995, Public Law 104–13.

Agency: Bureau of the Census.

Title: 1997 Census of Governments.

Agency Number: F–1, F–5, F–5A, F–11, F–12, F–13,F–21, F–22, F–25, F–28, F–29, F–32, F–42, D–1, E–2, E–3, E–6, E–7, E–9, EGO–3, EGO–4, EGO–6, EGO–7.

OMB Approval Number: None.

Type of Request: New Collection.

Burden: 170,017 hours.

Number of Respondents: 134,119.

Avg Hours Per Response: 1.27 hours.

Needs and Uses: This census provides government organization, employment and finance data for state and local governments. The data are used to calculate the Gross Domestic Product (GDP), to monitor the government sector of the economy, and to formulate, develop, and review public policy. The organization phase provides statistics on the number of local governments by type and by selected characteristics. The employment phase collects data on employment and payrolls of state and local governments. In the finance phase, the information relates to several aspects of state and local government public finance; revenues, including related property tax bases; expenditures by function and character; indebtedness and debt transactions; and case and security holdings. The 1997 Census of Governments excludes two portions of information collected in the 1992 quinquennial census; There will not be a taxable property value phase and the organization phase will exclude data relating to elected officials. In addition, there are two significant methodological changes; The reference date for the Employment phase will be March 12, 1997 instead of October 12, 1997 and all organization phase mail data will be obtained on joint employment/organization forms (EGO forms).

Affected Public: State, local or tribal government.

Frequency: Every five years.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 USC, Section 161.

OMB Desk Officer: Jerry Coffey, (202) 395–7314.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, Acting DOC Forms Clearance Officer, (202) 482–3272, Department of Commerce, Room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Jerry Coffey, OMB Desk Officer, Room 10201, New Executive Office Building, Washington, DC 20503.

Dated: December 19, 1996.

Linda Engelmeier,

Acting Departmental Forms Clearance Officer, Office of Management and Organization.

Bureau of the Census

1997 Economic Censuses Classification Report; Proposed Agency Information Collection Activity; Comment Request

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before February 25, 1997.

ADDRESSES: Direct all written comments to Linda Engelmeier, Acting Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information of copies of the information collection instrument(s) and instructions should be directed to William Bostic, Bureau of the Census, Room 2641, Building 3, Washington, D.C. 20233–6100 and 301–457–2672 or E-mail at William.G.Bostic.Jr@Info.Census.Gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau is the preeminent collector of timely, relevant and quality data about the people and the economy of the United States. Economic data are the Census Bureau's primary program commitment during non-decennial census years. The economic census, conducted under authority of Title 13 U.S.C., is the primary source of facts about the structure and functioning of the Nation's economy and features unique industry and geographic detail. Economic census statistics serve as part of the framework for the national accounts and provide essential information for government, business, and the general public.

The 1997 Economic Census will cover virtually every sector of the U.S. economy. The Census Bureau will implement the new North American Industry Classification System (NAICS) in the 1997 Economic Census. The implementation of the NAICS as a replacement for the 1987 Standard Industrial Classification (SIC) system will require contacting businesses to collect classification information to update the 1997 Economic Census mailing lists.

Accurate and reliable industry and geographic codes are critical to the Bureau of Census statistical programs. New businesses are assigned industry classification by the Social Security Administration (SSA). However, many of these businesses in manufacturing and mining cannot be assigned detailed industry codes because insufficient information is provided on Internal Revenue Service (IRS) Form SS–4. In addition, many of these businesses when matched against the Bureau of Labor Statistics (BLS) classification system cannot be assigned a detailed classification code.

In order to provide detailed manufacturing and mining industry data reflecting NAICS for the 1997 Economic Censuses and the Standard Statistical Establishment List (SSEL), these partially coded businesses must be assigned detailed classification codes.

This data collection, Form NC–9926, is designed to obtain detailed classification information for the partially coded single-unit manufacturing and mining industries including changes from the SIC to NAICS and provide current information on physical locations for establishments below the mail cutoff.

The failure to collect this classification information will have an adverse effect on the quality and usefulness of economic statistics and

VOL 61 ISS 250 DE 27 1996 UMI

severely hamper the Census Bureau's ability to implement NAICS in the 1997 Economic Censuses.

II. Method of Collection

The Census Bureau will select establishments to receive this survey from the Census Bureau's SSEL. The Census Bureau will mail the NC–9926 to single-unit manufacturing and mining establishments to obtain needed four-digit industry codes and subindustry detail for small establishments in selected four-digit industries in the apparel area, Major Groups 22 and 23. In addition, this form will be mailed to small manufacturing and mining establishments which could not be assigned a classification code when matched against the Bureau of Labor Statistics classification system. The NC–9926 will contain a list of 6-digit codes and descriptions. Respondents are to select the activity which best describes their business by checking the box next to the activity listed or describe their principal business activity if no box can be checked.

III. Data

OMB Number: Not Available.
Form Number: NC–9926.
Type of Review: Regular Review.
Affected Public: Small businesses or other small for profit organizations.
Estimated Number of Respondents: 105,000.
Estimated Total Per Response: 5 minutes.
Estimated Total Annual Burden Hours: 8,750.
Estimated Total Annual Cost: The cost to government for this survey is included in the total cost of the 1997 Economic Census, estimated to be $218 million.
Respondent's Obligation: Mandatory.
Legal Authority: Title 13 USC, Sections 131 and 224.

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they will also become a matter of public record.

Dated: December 19, 1996.

Linda Engelmeier,

Acting Departmental Forms Clearance Officer, Office of Management and Organization.

Bureau of Export Administration

Action Affecting Export Privileges; Doornbos, GMBH

In the matter of: Doornbos, GMBH, Emscherstrasse 4, 42697 Solingen, Germany, Respondent.

Order

The Office of Export Enforcement, Bureau of Export Administration, United States Department of Commerce (BXA), having notified Doornbos, GmbH (Doornbos) of its intention to initiate an administrative proceeding against it pursuant to Section 13(c) of the Export Administration Act of 1979, as amended (50 U.S.C.A. app. §§ 2401–2420 (1991 & Supp. 1996)) (the Act),[1] and the Export Administration Regulations (currently codified at 15 C.F.R. Parts 768–799 (1996), as amended (61 FR 12714 (March 25, 1996)) (the Regulations),[2] based on allegations that Doornbos violated the provisions of Sections 787.2, 787.3(b), 787.4(a) and 787.5(a) as follows:

1. between on or about May 1, 1991 and on or about June 15, 1995, Doornbos conspired with Helmut Korelski and others to evade U.S. export control laws that restricted exports to Libya by acquiring various equipment from several companies in the United States, representing that the equipment was for use in Germany, then selling the U.S.-origin equipment to the Dong Ah Consortium for use in the Great Man Made River Project in Libya, transporting it to Libya through the Netherlands and/or Germany, without applying for and obtaining the export authorizations that the conspirators knew or had reason to know were required by Section 772.1 of the Regulations, in violation of Section 787.3(b) of the Regulations;

2. in furtherance of the conspiracy described above, between on or about May 1, 1991 and on or about June 15, 1995, Doornbos caused, aided or abetted the export of U.S.-origin equipment from the United States, through the Netherlands and/or Germany, to Libya for use in the Great Man Made River Project, without applying for and obtaining the export authorizations that Doornbos knew or had reason to know were required by Section 772.1 of the Regulations, in violation of Sections 787.2 and 787.4(a) of the Regulations; and

3. in furtherance of the conspiracy described above, between on or about May 1, 1991 and on or about June 15, 1995, Doornbos caused to be filed with the U.S. Customs Service Shipper's Export Declarations containing false and misleading misrepresentations of material fact, in violation of Section 787.5(a) of the Regulations;

BXA and Doornbos having entered into a Settlement Agreement pursuant to Section 766.18(a) of the Regulations whereby they agreed to settle this matter in accordance with the terms and conditions set forth therein, and the terms of the Settlement Agreement having been approved by me;

It is therefore Ordered:

First, that, for a period of four years from the date of this Order, Doornbos and all of its successors or assigns, and all of its officers, representatives, agents, and employees when acting for or on behalf of Doornbos, may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license,[3] License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is

[1] The Act expired on August 20, 1994. Executive Order 12924 (3 C.F.R., 1994 Comp. 917 (1995)), extended by Presidential Notice on August 15, 1995 (3 C.F.R., 1995 Comp. 501 (1996)), and extended again on August 14, 1996 (61 *Fed. Reg.* 42527, August 15, 1996), continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C.A. §§ 1701–1706 (1991 & Supp. 1996)).

[2] The March 25, 1996 **Federal Register** publication redesignated, but did not republish, the existing Regulations as 15 C.F.R. Parts 768A–799A. In addition, the March 25 **Federal Register** publication restructured and reorganized the Regulations, designating them as an interim rule at 15 C.F.R. Parts 730–774, effective April 24, 1996.

[3] For purposes of this Order, "license" includes any general license established in 15 C.F.R. Parts 768A–799A.

subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefiting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

Second, that no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the denied person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the denied person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the denied person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the denied person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the denied person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and that is owned, possessed or controlled by the denied person, or service any item, of whatever origin, that is owned, possessed or controlled by the denied person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, that, after notice and opportunity for comment as provided in § 766.23 of the Regulations, any person, firm, corporation, or business organization related to the denied person by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be made subject to the provisions of this Order.

Fourth, that this Order does not prohibit any export, reexport, or other transaction subject to the Regulations where the only items involved that are subject to the Regulations are the foreign-produced direct product of U.S.-origin technology.

Fifth, that the proposed Charging Letter, the Settlement Agreement, and this Order shall be made available to the public. A copy of this Order shall be published in the **Federal Register**.

This Order, which constitutes the final agency action in this matter, is effective immediately.

Entered this 18th day of December, 1996.

Action Affecting Export Privileges; Helmut Korelski

In the Matter of: Helmut Korelski, Manager, Doornbos, GmbH, Emscherstrasse 4, 42697 Solingen, Germany, Respondent.

Order

The Office of Export Enforcement, Bureau of Export Administration, United States Department of Commerce (BXA), having notified Helmut Korelski (Korelski) of its intention to initiate an administrative proceeding against him pursuant to Section 13(c) of the Export Administration Act of 1979, as amended (50 U.S.C.A. app. §§ 2401–2420 (1991 & Supp. 1996)) (the Act),[1] and the Export Administration Regulations (currently codified at 15 C.F.R. Parts 768–799 (1996), as amended (61 FR 12714 (March 25, 1996)) (the Regulations),[2] based on allegations that Korelski violated the provisions of Sections 787.2, 787.3(b), 787.4(a) and 787.5(a) as follows:

1. Between on or about May 1, 1991 and on or about June 15, 1995, Korelski conspired with Doornbos, GmbH and others to evade U.S. export control laws that restricted exports to Libya by acquiring various equipment from several companies in the United States, representing that the equipment was for use in Germany, then selling the U.S.-origin equipment to the Dong Ah Consortium for use in the Great Man Made River project in Libya, transporting it to Libya through the Netherlands and/or Germany, without applying for and obtaining the export authorizations that the conspirators knew or had reason to know were required by Section 772.1 of the Regulations, in violation of Section 787.3(b) of the Regulations;

2. In furtherance of the conspiracy described above, between on or about May 1, 1991 and on or about June 15, 1995, Korelski caused, aided or abetted the export of U.S.-origin equipment from the United States, through the Netherlands and/or Germany, to Libya for use in the Great Man Made River Project, without applying for and obtaining the export authorizations that Korelski knew or had reason to know were required by Section 772.1 of the Regulations, in violation of Sections 787.2 and 787.4(a) of the Regulations; and

3. In furtherance of the conspiracy described above, between on or about May 1, 1991 and on or about June 15, 1995, Korelski caused to be filed with the U.S. Customs Service Shipper's Export Declarations containing false and misleading misrepresentations of material fact, in violation of Section 787.5(a) of the Regulations;

BXA and Korelski having entered into a Settlement Agreement pursuant to Section 766.18(a) of the Regulations whereby they agreed to settle this matter in accordance with the terms and conditions set forth therein, and the terms of the Settlement Agreement having been approved by me;

It is therefore ordered:

First, that, for a period of four years from the date of this Order, Korelski may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From Singapore: Amended Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of amended final results of antidumping duty administrative review.

SUMMARY: On December 5, 1996, the Department of Commerce (the Department) issued the final results of administrative review of the antidumping duty orders on Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof from France, Germany, Italy, Japan, Singapore, Sweden, and the United Kingdom, which published on December 17, 1996 in the **Federal Register**.

The classes or kinds of merchandise covered by these reviews are ball bearings and parts thereof, cylindrical roller bearings and parts thereof, and spherical plain bearings and parts thereof. The reviews cover 64 manufacturers/exporters. The review period is May 1, 1993, through April 30, 1994. We are correcting a margin-rate error with respect to ball bearings from Singapore manufactured/exported by NMB/Pelmec.

EFFECTIVE DATE: December 27, 1996.

FOR FURTHER INFORMATION CONTACT: Lyn Johnson or Richard Rimlinger, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC. 20230; telephone: (202) 482–4733.

SUPPLEMENTARY INFORMATION:

Background

On December 5, 1996, the Department of Commerce (the Department) issued the final results of the fifth administrative review of the antidumping duty orders on Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof from France, Germany, Italy, Japan, Singapore, Sweden, and the United Kingdom, which published on

December 17, 1996 in the **Federal Register**. The classes or kinds of merchandise covered by these reviews are ball bearings and parts thereof, cylindrical roller bearings and parts thereof, and spherical plain bearings and parts thereof. The reviews cover 64 manufacturers/exporters. The review period is May 1, 1993, through April 30, 1994.

After issuance of our final results, we realized that we did not publish the correct margin we calculated for the final results with respect to ball bearings exported by NMB/Pelmec.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute and to the Department's regulations are references to the provisions as they existed on December 31, 1994.

Amended Final Results of Review

We have determined the following weighted-average margin to exist for the period May 1, 1993, through April 30, 1994:

Country	Company	Class or kind	Rate (percent)
Singapore	NMB/Pelmec	Ball Bearings	12.47

This deposit requirement is effective upon publication of this notice of amended final results of administrative review for all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(1) of the Tariff Act of 1930 (as amended). This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as the only reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Failure to comply is a violation of the APO.

This administrative review and this notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: December 18, 1996.

Robert S. LaRussa,

Acting Assistant Secretary for Import Administration.

Fresh Garlic From the People's Republic of China; Preliminary Results of Antidumping Duty Administrative Review and Partial Termination of Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to a request by the petitioner, the Fresh Garlic Producers Association and its individual members, the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on fresh garlic from the People's Republic of China (PRC). The period of review (POR) is July 11, 1994, through October 31, 1995. The petitioner's request covered 159 producers/exporters of subject merchandise. Only one company, Top Pearl Ltd. (Top Pearl), a Hong Kong company, along with its U.S. importer of record, Merex Corporation, requested a review of its sales and has responded to our questionnaire. Because we have determined that (1) the review of Top Pearl should be terminated, and (2) the other PRC producers/exporters failed to submit responses to our questionnaires, we have preliminarily determined to use facts otherwise available for cash deposit and assessment purposes for all PRC producers/exporters of the subject merchandise.

Interested parties are invited to comment on these preliminary results. Parties who submit comments are requested to submit with each argument (1) a statement of the issue and (2) a brief summary of the argument.

EFFECTIVE DATE: December 27, 1996.

FOR FURTHER INFORMATION CONTACT: Andrea Chu or Kris Campbell, Office of AD/CVD Enforcement, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–4733.

SUPPLEMENTARY INFORMATION:

Applicable Statute

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to the current regulations, as amended by the interim regulations published in the **Federal Register** on May 11, 1995 (60 FR 25130).

Background

On September 26, 1994, the Department published in the **Federal Register** (59 FR 49058) the final affirmative antidumping duty determination on fresh garlic from the PRC and published an antidumping duty order on November 16, 1994 (59 FR 59209). On November 15, 1995, the Department published in the **Federal Register** (60 FR 55541) a notice of "Opportunity to Request an Administrative Review" of the antidumping duty order on fresh garlic from the PRC. On November 30, 1995, petitioner requested an administrative review of 159 producers/exporters of this merchandise to the United States. On the same date, Top Pearl, along with its U.S. importer of record, Merex Corporation, requested a review of its sales. We initiated the review on December 15, 1995 (60 FR 64413).

Scope of the Review

The products subject to this antidumping duty order are all grades of garlic, whole or separated into constituent cloves, whether or not peeled, fresh, chilled, frozen, provisionally preserved, or packed in

water or other neutral substance, but not prepared or preserved by the addition of other ingredients or heat processing. The differences between grades are based on color, size, sheathing and level of decay.

The scope of this order does not include: (a) garlic that has been mechanically harvested and that is primarily, but not exclusively, destined for non-fresh use; or (b) garlic that has been specially prepared and cultivated prior to planting and then harvested and otherwise prepared for use as seed.

The subject merchandise is used principally as a food product and for seasoning. The subject garlic is currently classifiable under subheadings 0703.20.0000, 0710.80.7060, 0710.80.9750, 0711.90.6000, and 2005.90.9500 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

In order to be excluded from the antidumping duty order, garlic entered under the HTSUS subheadings listed above that is (1) mechanically harvested and primarily, but not exclusively, destined for non-fresh use or (2) specially prepared and cultivated prior to planting and then harvested and otherwise prepared for use as seed must be accompanied by declarations to the Customs Service to that effect.

Use of Facts Otherwise Available

On January 25, 1996, we sent a questionnaire to the Embassy of the People's Republic of China, requesting that any designated party answer the questions to the extent possible for all companies that manufactured or exported the subject merchandise during the period of review (POR), whether or not they were owned by the PRC-government or subject to PRC government control of export pricing. We also stated that all companies named in the notice of initiation were presumed to be under PRC-government control and we requested that the government designate a person or organization as our contact for this review. The embassy named the Ministry of Foreign Trade and Economic Cooperation (MOFTEC) as our contact. We did not receive any response from MOFTEC regarding the questionnaire nor did we receive a response from any PRC companies. Therefore, we must rely on facts otherwise available in accordance with section 776(a) of the Act for these preliminary results of review.

Because necessary information is not available on the record with regard to sales by these firms, as a result of their withholding the requested information, we are preliminarily determining to apply antidumping duties based on facts otherwise available pursuant to section 776(a) of the Act. In addition, the Department finds that, in not responding to the questionnaire, the firms named in the notice of initiation failed to cooperate by not acting to the best of their ability to comply with requests for information from the Department.

Where the Department must base the entire dumping margin for a respondent in an administrative review on facts available because that respondent failed to cooperate, section 776(b) of the Act authorizes the Department to use an inference adverse to the interests of that respondent in choosing facts available. Section 776(b) of the Act also authorizes the Department to use, as adverse facts available, information derived from the petition, the final determination, a previous administrative review, or other information placed on the record. Because information from prior segments of the proceeding constitutes secondary information, section 776(c) of the Act provides that the Department shall, to the extent practicable, corroborate that secondary information from independent sources reasonably at its disposal. The Statement of Administrative Action (SAA) provides that "corroborate" means simply that the Department will satisfy itself that the secondary information to be used has probative value.

To corroborate secondary information, the Department will, to the extent practicable, examine the reliability and relevance of the information to be used. With respect to the relevance aspect of corroboration, the Department will consider information reasonably at its disposal as to whether there are circumstances that would render the secondary information not relevant. Where circumstances indicate that the selected data is not appropriate as adverse facts available, the Department will disregard that data and determine an appropriate alternative (*see, e.g., Bicycles from the PRC; Final Determination of Sales at Less than Fair Value*, 61 FR 19026, 19027 (April 30, 1996) (where the Department disregarded certain information from the petition as adverse facts available because the data was not reflective of the industry and, therefore, did not have probation value)). In this case, we relied upon information from the petition as secondary information. Based on our review of several major items (*i.e.*, general and administrative expense, packing cost and profit, as well as the factor value for seed cost and labor cost) contained in the petition which individually comprise a significant portion of the normal value (NV) calculations, there is no indication that the selected margin is not appropriate as facts available.

In this case, in accordance with the facts-available formula stated above, we have preliminarily assigned these companies the rate determined for companies involved in the less-than-fair-value investigation (376.67 percent). Moreover, we have determined that the non-responsive companies do not merit separate rates. *See, e.g, Natural Bristle Paint Brushes and Brush Heads From the People's Republic of China; Preliminary Results of Antidumping Duty Administrative Review*, 61 FR 57390 (November 6, 1996). Therefore, the facts available for these companies forms the basis for the PRC rate, which is 376.67 percent for this review.

Partial Termination of Review

We also preliminarily determine to terminate our review of Top Pearl, the sole responding party in this proceeding. This determination is based on the principle that it is not appropriate to review U.S. sales made by a third-country company (in this case, Top Pearl) whose supplier (here, the PRC exporter Wallong) had knowledge that the merchandise was destined for the United States. Instead, the appropriate respondent in this instance is Wallong. We are assigning the PRC rate to transactions made during the period between Wallong and Top Pearl, for the reasons stated in our November 22, 1996 memorandum: *Partial Termination of 1994–95 Administrative Review of Fresh Garlic from the PRC* (November 22, 1996). Specifically, we did not receive a request for review of Wallong; accordingly, Wallong is not entitled to a review of its POR sales as a separate entity (as opposed to its participation as part of the PRC entity). In order for Wallong to participate in this review as an independent company and not as part of the PRC entity, a request for review of this company must have been made during the anniversary month (*see* 19 CFR 353.22) and the company must have established that it is entitled to a separate rate.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that a margin of 376.67 percent exists for all producers/exporters of the subject merchandise for the period July 11, 1994 through October 31, 1995.

Parties to the proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the publication of this notice or the first workday thereafter. Interested parties may submit case briefs within 30 days of the date of publication of this notice. Rebuttal briefs, which must be limited to issues raised in the case briefs, may be filed not later than 37 days after the date of publication. The Department will issue a notice of final results of this administrative review, which will include the results of its analysis of issues raised in any such comments, within 120 days of publication of these preliminary results.

The Department will determine, and the Customs Service will assess, antidumping duties on all appropriate entries. Upon completion of this review, the Department will issue appraisement instructions directly to the Customs Service.

Furthermore, the following deposit rates will be effective upon publication of the final results of this administrative review for all shipments of fresh garlic from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(c) of the Act: For all PRC exporters and for all non-PRC exporters of subject merchandise from the PRC, the cash deposit rate will be the PRC-wide rate established in the final results of this review.

These deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: December 18, 1996.

Robert S. LaRussa,

Acting Assistant Secretary for Import Administration.

Fresh Kiwifruit From New Zealand; Results of Antidumping Administrative Review

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice of amendment to final results of antidumping duty administrative review.

SUMMARY: On September 3, 1996, the Department of Commerce (the Department) published the final results of its administrative review of the antidumping duty order on fresh kiwifruit from New Zealand. The review covers one exporter, the New Zealand Kiwifruit Marketing Board (NZKMB), and the period from June 1, 1994, through May 31, 1995. Based on the correction of ministerial errors, we are amending the final results.

EFFECTIVE DATE: December 27, 1996.

FOR FURTHER INFORMATION CONTACT: Paul M. Stolz or Thomas F. Futtner, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–4474 or 482–3814, respectively.

SUPPLEMENTARY INFORMATION

Background

On September 3, 1996, the Department published the final results (61 FR 46438) of its administrative review of the antidumping duty order on fresh kiwifruit from New Zealand (57 FR 23203 (June 2, 1992)). The review covered one exporter, the New Zealand Kiwifruit Marketing Board (NZKMB). The Department has now amended the final results of this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act). Unless otherwise indicated, all citations to the statute are references to the provisions on January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act), by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to the current regulations, as amended by the interim regulations published in the **Federal Register** on May 11, 1995 (60 FR 25130).

Scope of the Review

The product covered by the order under review is fresh kiwifruit. Processed kiwifruit, including fruit jams, jellies, pastes, purees, mineral waters, or juices made from or containing kiwifruit, are not covered under the scope of the order. The subject merchandise is currently classifiable under subheading 0810.90.20.60 of the Harmonized Tariff Schedule (HTS). Although the HTS number is provided for convenience and customs purposes, our written description of the scope of this review is dispositive.

Analysis of Comments Received

After publication of our final results, we received timely allegations of ministerial errors from the respondent, NZKMB, and the petitioner, the California Kiwifruit Commission.

Comments

The petitioner alleged that the Department's calculation of cost of production (used for comparison with net home market sales prices) did not include an amount for pallet expense.

The respondent alleged three ministerial errors pertaining to the Department's preliminary calculations: (1) packing costs were double-counted in calculating constructed value; (2) home market transportation insurance was incorrectly treated as an indirect selling expense rather than as a movement cost; and (3) U.S. indirect selling expenses incurred in New Zealand were erroneously deducted from constructed export price.

DOC Position

With respect to the ministerial error allegations noted above, the Department agrees that it made these errors and has corrected these errors for the final results. (See memorandum to the file dated October 30, 1996, for a detailed description of all adjustments made.)

Amended Final Results of Review

As a result of our correction of the ministerial errors, we have determined the following margin exists for the period June 1, 1994, through May 31, 1995:

Manufacturer exporter	Margin (percent)
New Zealand Kiwifruit Marketing Board	3.5
